With respect to those new natural gas supplies discovered in the onshore (and offshore) domains of the several states, we have no authority to compel the sale of those natural gas supplies in interstate commerce unless these newly discovered supplies are located upon acreage which has been previously dedicated to an interstate pipeline company. This makes it impossible for the Commission to determine which exploration and development activities will be associated with a sale of new natural gas supplies in interstate commerce prior to the filing of an application for a certificate of public convenience and necessity authorizing the sale of natural gas to an interstate pipeline. We are, therefore, unable to predict which drilling activities will ultimately result in the sale and transportation of natural gas in interstate commerce subject to this Commission's jurisdiction.

Increasing the rates allowed for the sale of natural gas in interstate commerce may have some effect upon the ultimate end use of that gas in the various energy marketplaces. The ultimate end use of new natural gas supplies sold in interstate commerce is not readily definable, since the Commission does not know which interstate pipelines will actually purchase these new supplies for resale. To be sure, all interstate pipelines will purchase new natural gas supplies as they are able to contract for such supplies; however, the prices paid by the various individual pipelines and the various classes of customers to which the different interstate pipelines resell natural gas and the various proportions of the volumes which are consumed in particular end uses vary from pipeline to pipeline. These variations, plus the ability of the individual pipelines to acquire new supplies, add to the difficulties of predicting the environmental impact in the various energy consuming marketplaces.

The Commission anticipates that additional exploration and development activities will be undertaken as a result of this order and that additional supplies of natural gas will be dedicated to the interstate market. There exists no reliable methodology by which the location and extent of this exploration and development activity may be predicted, and we have no method for precisely predicting the volumes of new natural gas supplies that will be forthcoming at the rate established herein. *Placid Oil Company, et al.* v. *FPC*, 483 F. 2d 880, 900–902 (5th Cir. 1973), affirmed sub nom. *Mobil Oil Corp.* v. *FPC*, 42 U.S.L.W. 4842 (U.S. June 10, 1974).

We can conclude that there may be some adverse environmental impact as the result of increased exploration and development activity which is undertaken because of the decision in this proceeding. There may also be some adverse environmental impact as the result of pipeline projects undertaken as a result of the decision rendered in this proceeding. None of the potential adverse environmental impacts which may result from the increase in rates allowed by this decision is reasonably susceptible to any sort of quantification.

The present action will tend to increase gas supplies and to diminish the inefficient use of available gas. It will

These requirements apply to both onshore and offshore projects.

V 41 154 AUG 9 76 UMI

substitute a small amount of clean-burning gas for a larger amount of dirtier fuels. We cannot predict the relationship between the location of fuel use and the air quality in those locations. Neither can we be sure that air-quality benefits outweigh the environmental costs of added gas production. But we can be confident that the aggregate end-use environmental impacts will be beneficial.

VIII. CONCLUSIONS

A. GENERAL CONCLUSIONS

The just and reasonable national rate for post-January 1, 1975 gas supplies dedicated to the interstate market and the revised rate for qualifying 1973–1974 biennium gas supplies prescribed in this decision are founded on costs. In addition, the Commission has examined other relevant facts such as intrastate market prices, the "commodity value" of natural gas, supply and demand effects, and the cost of alternate fuels in evaluating the sufficiency of the cost-based rate for new supplies.

Each of the elements of the rate structures is interdependent upon all of the other elements and stands not by itself but as part of the whole.

In our opinion, the rates prescribed herein are at a level which will serve the public interest by increasing the supply of natural gas available to the interstate market and which will effect a more efficient utilization and allocation of the nation's natural gas resources in an intercompetitive fuel economy.

In summary, the total rate design herein found to be just and reasonable consists of the following integral elements:

1. A base rate of $1.42 per Mcf for post-January 1, 1975 gas (with quarterly escalations of 1.0 cent per Mcf) subject to Btu adjustment plus reimbursement for production, severance, or similar taxes, and gathering allowances (including the onshore delivery of offshore gas at the cost of the producer) for qualifying sales;

2. A base rate of $1.01 per Mcf for qualifying 1973–1974 biennium gas subject to Btu adjustment plus reimbursement for production, severance, or similar taxes, and gathering allowances (including the onshore delivery of offshore gas at the cost of the producer) for qualifying sales;

3. Allowance of the rate established in Opinion No. 699–H for sales formerly made pursuant to contracts which have expired by their own terms where a qualifying renewal contract is submitted to the Commission for certification; and

4. Provisions for certain adjustments to the national rate.

We have "adopted a total rate structure to motivate private producers to fully develop [the nation's natural gas] resources" [242] while assuring the consumer an adequate supply of gas at a reasonable rate. This total rate structure represents a solution "capable of equitably reconciling the diverse and conflicting interests" [243] which are presented on the record of this proceeding. It is true that certain portions of this rate structure favor some producers or some consumers more than other members of those classes of persons. There is always "some discrimination aris[ing] from the mere fact of [national], rather than individual producer, regulation," [244] but such discrimination is permissible if the overall balance of the order is not unjust and unreasonable. We are of the opinion that the "overall balance" of the rate structure established herein is just and reasonable.

B. ADDITIONAL COMMENTS

In reaching this decision the Commission has reviewed the judgments and conclusions as set forth in the dissenting opinion. The legal, factual and policy considerations which support the Commission's findings and conclusions are interspersed throughout the majority opinion and need not be restated. Having considered the dissenting opinion herein we are not able to agree that the record supports the judgments or conclusions therein reached nor do we conclude that legal or policy considerations warrant or permit such judgments and conclusions.

Additionally, we believe the dissenting opinion misconceives the nature of the holding of the majority opinion in several important respects. The Commission has here established a rate of $1.42/Mcf escalating at 1¢ per quarter for post-December 31, 1974 gas. The Commission has also established a rate of $1.01/Mcf for gas dedicated and wells drilled on or after January 1, 1973 and prior to January 1, 1975. The reference in the majority opinion to $1.63/Mcf is an arithmetic calculation.

In reference to productivity determination the Commission did not compute the calculation that the dissenting opinion sets out.

The dissent states that it is necessary to lag the reserves-added data one year behind the drilling footage data to compensate for AGA errors. There is simply no evidence in the record to support this new and heretofore undisclosed methodology. There is certainly no evidence that a one-year period reflects the "average effect" of the errors. In fact, the Staff Report on the 31-Lease Investigation indicated that the AGA figures reported fields as being discovered both earlier and later than the same fields as reported by producers.

Revisions are an important piece of information. They improve overall reserve estimates, and their exclusion should be carefully considered before being adopted. If adjustments are made to the annual reserve additions to exclude revisions from prior years, the assumption would have to be made that such reserve revisions apply only to years prior to the series used in deriving a productivity factor. In other words, such revisions would have to be applicable to pre-1967 reserve additions only, if a nine-year productivity average is employed. This is certainly a questionable assumption since a portion of these revisions would likely apply to reserve additions reported from 1967 to 1975.

We find no record support for the calculation and therefore we cannot share the view expressed in the dissenting opinion.

In regard to the discussion of non-cost factors, the dissent only chooses to recognize those which lead to a lower price. We have examined a set of intrastate prices and commodity values and do not embrace any particular component. We only use these factors to assure a just and reasonable rate.

The purpose of the advance payments program was to provide producers with additional capital in order to promote additional drilling activity. These advanced payments are not lost to the consumers but will be recouped by the pipelines with the receipt of new supplies of gas. In any event, the program is now terminated and does not belong in a prospective price determination that has the underlying purpose of eliciting new supplies of natural gas.

Finally, the economic impact, as discussed in the dissent, was not placed in the proper perspective. The additional annual costs to consumers for gas supplies under expiring contracts would remain the same under this opinion as under Opinion No. 699–H. The repricing of 1973–1974 biennium gas is also essential, if only to track the additional tax liability resulting from the repeal of percentage depletion.

We anticipate that, in any application for rehearing of the Commission's opinion and order, additional commentary may be appropriate in light of the arguments and positions which the majority and minority opinions may prompt. The Commission welcomes any such further opportunity.

The Commission finds. (1) The notice and opportunity to participate in this rulemaking proceeding with respect to the matters currently before this Commission through the submission in writing of data, views, comments, and suggestions in the manner described above are consistent and in accordance with the procedural requirements prescribed by 5 U.S.C. 553.

(2) Good cause exists that the revisions adopted herein become effective upon issuance of this order.

(3) The revisions adopted herein are in the public interest and are necessary and appropriate for the administration of the Natural Gas Act.

The Commission, acting pursuant to the provisions of the Natural Gas Act, as amended, particularly Sections 4, 5, 7, 8, 14, 15, and 16 thereof (52 Stat. 822, 823, 824, 825, 828, 829, 830 (1938); 56 Stat. 83, 84 (1942); 61 Stat. 459 (1947); 76 Stat. 72 (1962); 15 U.S.C. §§ 717c, 717d, 717f, 717g, 717m, 717n, 717o (1970) 0. orders:

(A) The Statements of General Policy and Interpretations of the Commission, Part 2 of Subchapter A of Chapter I of Title 18 of the Code of Federal Regulations, are hereby amended by substituting revised § 2.56a as follows:

§ 2.56a National Rates for Sales of Natural Gas from Wells Commenced on or after January 1, 1973, and New Dedications of Natural Gas to Interstate Commerce on or after January 1, 1973, and Certain Other Sales.

(a) *Base national rates.* Notwithstanding any other provisions of the General Rules of the Federal Power Commission, or the Regulations under the Natural Gas Act, sales of natural gas in interstate commerce with qualify under the provisions of this subsection (a) may be made at rates herein provided.

(1) Sales of natural gas in interstate commerce for resale may be made at a rate of $1.42 per Mcf (at 14.73 psia), exclusive of all State or Federal production, severance or similar taxes, and subject to the adjustments provided in this section, and the escalation provided in paragraph (a)(2) of this section, provided the sale is within one or more of the following classifications:

(i) The sale is made from a well or wells commenced on or after January 1, 1975;

(ii) The sale is made pursuant to a contract for the sale of natural gas in interstate commerce for gas not previously sold in interstate commerce prior to January 1, 1975, except pursuant to the provisions of 18 CFR 2.68, 2.70, 157.22, or 157.29 (including sales made pursuant to those sections as modified by Federal Power Commission Order No. 491, et al.), or 18 CFR 2.75(n), where the sale is initiated on or after January 1, 1975, provided that no certificate for the subject sale has been issued under the optional procedure (18 CFR 2.75);

(2) The price prescribed by paragraph (a)(1) of this section may be increased by an amount not to exceed 1 cent per Mcf per quarter commencing on October 1, 1976, and the first days of January, April, and July of every year, thereafter, for the term of the contract dedicating the subject gas for sale in interstate commerce pursuant to the terms of the sales contract until such time as the price prescribed in paragraph (1) of this section (a)(1) shall be redetermined according to the provisions of paragraph (n) of this section.

(3) Sales of natural gas in interstate commerce for resale may be made at a rate of $1.01 per Mcf (at 14.73 psia), exclusive of all State or Federal production, severance or similar taxes, and subject to the adjustments provided in this Section 2.56a, provided the sale is within one or more of the following classifications:

(i) The sale is made from a well or wells commenced on or after January 1, 1973 and on or before January 1, 1975;

(ii) The sale is made pursuant to a contract for the sale of natural gas in interstate commerce for gas not previously sold in interstate commerce prior to January 1, 1973, except pursuant to the provisions of 18 CFR 2.68, 2.70, 157.22, or 157.29 (including sales made pursuant to those sections as modified by Federal Power Commission Order No. 491, et al.), or 18 CFR 2.75(n), where the sale is initiated on or after January 1, 1973 and before January 1, 1975, provided that no certificate for the subject sale has been issued under the optional procedure (18 CFR 2.75).

(4) Sales of natural gas in interstate commerce for resale may be made at a rate of 52 cents per Mcf (at 14.73 psi), exclusive of all State or Federal production, severance or similar taxes, and subject to the adjustments provided in this section and the escalation provided in paragraph (a)(5) of this section, provided the sale is made pursuant to a contract executed prior to or subsequent to the expiration of the term of the prior contract where the sales were formerly made pursuant to permanent certificates of unlimited duration under such prior contracts which expired of their own terms on or after January 1, 1973, or pursuant to contracts executed on or after January 1, 1973, where the prior contract expired by its own terms prior to January 1, 1973.

(5) The price prescribed by paragraph (a)(4) of this section may be increased by an amount not to exceed 1.0 cents per Mcf per annum commencing on January 1, 1977, and the first day of every year thereafter for the term of the contract dedicating the subject gas for sale in interstate commerce pursuant to the terms of the sales contract until such time as the price prescribed in paragraph (4) of this subsection (a) shall be redetermined according to the provisions of paragraph (n) of this section.

(b) *Tax adjustments.* The applicable rate prescribed in subsection (a) shall be adjusted upward for all State or Federal production, severance, or similar taxes, effective the date deliveries are commenced, and shall be adjusted upward by 100 percent of any increase in such taxes subsequent to the date deliveries were commenced, and shall be adjusted downward by 100 percent of any decrease in such taxes subsequent to the date deliveries were commenced.

(c) *Quality adjustments.* For natural gas sold in interstate commerce for resale subject to the rate prescribed in subsection (a) of this section, quality standards and the resulting adjustments to the base national rate shall be made as follows:

(1) *Btu adjustment.*—For natural gas containing more than 1,000 Btu's per cubic foot, at 60°F and 14.73 psia, upward adjustments shall be made on a proportional basis from a base of 1,000 Btu's per cubic foot; and for natural gas containing less than 1,000 Btu's per cubic foot, at 60° F and 14.73 psia, downward adjustments shall be made on a proportional basis from a least of 1,000 Btu's per cubic foot.

This adjustment shall be made after the rate prescribed in paragraph (a)(1) of this section is adjusted for taxes pursuant to paragraph (b) of this section.

The Btu content of the natural gas used in computing this rate adjustment shall be the number of British thermal units (Btu) produced by the combustion, at constant pressure, of the amount of the gas which would occupy a volume of 1.0 cubic feet at a temperature of 60° F saturated with water vapor and under a pressure equivalent to that of 30.00 inches of mercury at 32° F and under standard gravitational force (980.665 centimeters per second squared) with air of the same temperature and pressure as the gas, when the products of combustion are cooled to the initial temperature of the gas and air and when the water formed by combustion is condensed to the liquid state.

(2) *Other quality adjustments.*—All quality standards and the resulting adjustments to the rate prescribed in paragraph (a)(1) of this section shall be made in accordance with the provisions of the particular gas sales contract except that all Btu adjustments shall be governed by paragraph (1) of this section.

(d) *Gathering allowances.* The base national rate prescribed in subsection (a) of this section, as adjusted for Btu content and applicable taxes, shall be adjusted for gathering activities as follows:

(1) *Appalachian-Illinois Basin areas.*—The gathering allowance shall be 1.0 cents per Mcf for all sales of natural gas made from wells located in the Appalachian-Illinois Basin Areas.

(2) *Hugoton-Anadarko area.* — The gathering allowance shall be the amounts prescribed below where delivery of the gas is made after substantial off-lease gathering by the producer, whether at a plant tailgate or at a central point in the field.

(i) For gas produced in the Panhandle and Hugoton Fields, the allowance shall be 2.5 cents per Mcf.

(ii) For gas produced from fields or reservoirs other than the Panhandle or Hugoton Fields (the "Other Fields"), the allowance shall be 1.0 cents per Mcf.

(3) *Other Southwest area.*—The gathering allowance shall be the amounts prescribed below where the gas is delivered to the buyer at a central point in the field, the tailgate of a processing plant, a point on the buyer's pipeline or an offshore platform on the buyer's pipeline.

(i) For gas produced in the Other Oklahoma Area, Texas Railroad District No. 9, and Northern Arkansas, the allowance shall be 1.5 cents per Mcf.

(ii) For gas produced in Texas Railroad District Nos. 5 and 6, Northern Louisiana, and Southern Arkansas, the allowance shall be 1.0 cents per Mcf.

(iii) For gas produced in Mississippi and Alabama, the allowance shall be 1.25 cents per Mcf.

(4) *Permian Basin area.*—For gas produced in the Permian Basin Area, the applicable gathering allowance shall be 1.5 cents per Mcf where delivery is made

V 41 154 AUG 9 76 UMI

after substantial off-lease gathering by the producer, whether at a plant tailgate or a central point in the field.

(5) *Rocky Mountain area.*—For gas produced in the Rocky Mountain Area, the applicable gathering allowance shall be 1.0 cents per Mcf where delivery is made to the buyer at a central point in the field, the tailgate of a processing plant, or a point on the buyer's pipeline.

(6) *Southern Louisiana area.*—For gas produced in the Southern Louisiana Area, the applicable gathering allowance shall be 0.5 cents per Mcf where the gas is delivered to the buyer at a central point in the field, the tailgate of a processing plant, a point on the buyer's pipeline, or an offshore platform on the buyer's pipeline.

(7) *Texas Gulf Coast area.*—For gas produced in the Texas Gulf Coast area, the applicable gathering allowance shall be 0.4 cents per Mcf where the gas is delivered to the buyer at a central point in the field, the tailgate of a processing plant, a point on the buyer's pipeline, or an offshore platform on the buyer's pipeline.

(e) *Delivery of offshore gas by the producer to an onshore area.* If natural gas produced offshore is delivered onshore, at the sole cost of producer, the uniform national rate shall be adjusted upward 1.0 cent per Mcf for such offshore gas.

(f) *Adjusted national rate.* The uniform national rate prescribed in paragraph (a) of this section, as adjusted pursuant to paragraphs (b), (c), (d), and (e), is the adjusted national rate, and such rate is applicable only to those jurisdictional sales described in paragraph (a)(2) of this section made within the United States including the adjacent offshore Federal domain but excluding Alaska and Hawaii. No seller may demand or receive any rate or charge in excess of the rate prescribed by paragraph (a), except for such adjustments described in paragraphs (b), (c), (d), and (e) of this section as may be applicable to the particular sale, unless the Commission after giving proper notice and providing an opportunity for the submission of comments shall modify the rate set forth in paragraph (a) of this section or grant a petition for special relief pursuant to paragraph (g) of this section.

(g) *Special relief.* Prior to the establishment of rates for the 1977–78 biennium pursuant to subsection (n), any seller seeking to charge a rate in excess of the adjusted national rate described in paragraph (f) of this section or requesting a change in either the base national rate prescribed in paragraph (a)(1) of this section or the adjusted national rate described in subsection (f) must file a petition seeking special relief for waiver or amendment of said subsections pursuant to § 1.7(b) of the Commission's Rules of Practice and Procedure (18 CFR 1.8(b)) fully justifying the relief sought in light of this order. Such seller may not file for any rate increase which results in a rate in excess of the adjusted national rate described in paragraph (f) of this section unless and until the Commission grants such petition for special relief.

(h) *Modification of area rate regulations.* To the extent that the Commission's Regulations Under the Natural Gas Act establishing area rates and conditions for sale of natural gas from the Southern Louisiana Area (18 CFR 154.105), Hugoton-Anadarko Area (18 CFR 154.106), Appalachian Basin Area (18 CFR 154.107), Illinois Basin Area (18 CFR 154.109), Other Southwest Area (18 CFR 154.109a), or Rocky Mountain Area (18 CFR 2.56(a), 154.109(b)), and the Permian Basin Area are inconsistent with the provisions set forth above the same are hereby modified to reflect the provisions set forth above. The provisions of the rate structures for these are modified only with respect to those sales which are certificated pursuant to the provisions of this section and in all other respects remain in full force and effect. Provisions pertaining to refund credits and contingent escalations are contained in paragraph (i) of this section.

(i) *Waiver of refund credits and contingent escalations.* Any natural gas certificated under the provisions of this section which a natural gas producer elects to have credited against his existing refund obligations in the Southern Louisiana, Texas Gulf Coast, Other Southwest Area, or the Permian Basin, or applied to the triggering volumes for the contingent escalations for those areas shall be priced at the rate prescribed in the applicable area rate opinion and not at the uniform national rate prescribed in this opinion. For purposes of this section, the applicable area rate opinions and Commission regulations are:

(a) *Area Rate Proceeding (Texas Gulf Coast Area)*, et al., Opinion No. 595, 45 F.P.C. 675 (1971); 18 CFR 154.109.

(b) *Area Rate Proceeding (Southern Louisiana Area)*, et al., Opinion No. 598, 46 F.P.C. 86 (1971); 18 CFR 154.195.

(c) *Area Rate Proceeding (Other Southwest Area)*, et al., Opinion No. 607–A, 47 F.P.C. 99 (1972); 18 CFR 154.109a.

(d) *Area Rate Proceeding (Permian Basin Area II)*, Docket No. AR70–1 (Phase I), Opinion No. 662, 50 F.P.C. 390 (1973).

With respect to gas of a class described in paragraph (a)(2) of this section which is currently being sold in interstate commerce in discharge of a refund obligation or was dedicated to interstate commerce in partial satisfaction of the triggering volumes for the contingent escalations in the described areas, such gas may be sold at the rate prescribed in paragraph (a) of this section only if the seller files a written waiver of the right with respect to such gas to discharge such refund obligations or to trigger the contingent escalations concurrently with the contractually authorized rate increase filing. The seller shall further state the date on which the subject wells were commenced, the present provisions under which the gas is being sold in interstate commerce, the dollar amount of existing refund obligations previously discharged by the sale of such gas, and the volumes (at 14.73 psia) applied to trigger the contingent escalations.

(j) *Effective date of rate filings and waivers of refund credits or contingent escalations.* Any contractually authorized increase rate filing made pursuant to the provisions of this order shall be effective as of July 27, 1976, if the filing is made on or before August 26, 1976, and as of the date of filing if the filing is made subsequent thereto.

A single filing may be made which covers the rates to become effective July 27, 1976, and the 1.0¢ periodic escalations to be effective October 1, 1976, January 1, 1977, and April 1, 1977, provided such filing clearly and distinctly shows the rates to be effective on these respective dates.

For those persons desiring to make separate filings to track the 1.0¢ periodic escalations to be effective October 1, 1976, January 1, 1977, and April 1, 1977, such filing shall be made on or before October 1, 1976, January 1, 1977, and March 31, 1977, respectively. Any filings made after October 1, 1976, will be subject to the thirty (30) day notice requirements.

(k) *Newly discovered reservoirs on previously committed acreage.* (1) In all areas, the rate for natural gas produced from a reservoir discovered on or after January 1, 1973, which is located upon acreage previously dedicated to interstate commerce under a contract dated prior to January 1, 1973, shall be determined by the date of discovery of such reservoir, in lieu of the contract date.

(2) Where a producer is entitled to an increase in the price of its gas based on the date of discovery of the reservoir from which gas-well gas sales (or residue gas derived therefrom) are being made, it may file a proposed price increase pursuant to section 4 of the Natural Gas Act, indicating to what gas the higher price will be applicable. With each filing the producer will include (i) copies of all documents filed with or issued by local or State regulatory agencies relating to the discovery of the reservoir from which the gas is produced, and (ii) a statement by the buyer of the gas that the gas qualifies for the price sought, or why the buyer believes it does not. The producer shall also furnish any additional material in its possession or available to it which the Commission may request in writing. Documents or other data previously filed with this Commission, whether by the producer or another, may be incorporated by reference in any filing hereunder. Similar information shall be filed in any pending section 4 proceeding to which it is relevant. The Commission will follow the determination made by the appropriate State agency in determining the date of discovery of a reservoir. In the event the State agency changes its classification of a reservoir, the Commission shall follow such change as of the date of the new classification. Whenever the reclassification of a reservoir affects the applicable ceiling rate the producer and the buyer shall notify the Commission.

(l) *Pipeline production.* Natural gas production from leases owned by a pipeline or a pipeline affiliate may be priced at the rate prescribed in paragraph (a) of this section pursuant to the provisions of § 2.66(c) of this part (18 CFR 2.66 (c)).

(m) *Termination of rate ceiling.* The rate prescribed in paragraph (a)(1) of this section shall remain in effect until such time as rates are established pursuant to paragraph (n) of this section.

(n) *Review of National rate ceiling.* Prior to January 1, 1977, the Commission shall initiate such proceedings as shall be necessary to establish a just and reasonable rate to be effective from the date of establishment of rates by order of the Commission through December 31, 1978, for the sales described in paragraph (a)(2) of this section and for all wells commenced on or after January 1, 1977, and prior to January 1, 1978, all new dedications of natural gas to interstate commerce for the period January 1, 1975, through December 31, 1976.

(o) *Revision of § 2.56(h) (18 CFR 2.56 (h)).* By Opinion No. 699, the Commission promulgated a national rate structure as subsection (h) of Section 2.56 of its General Policy Statements and Interpretations (18 CFR 2.56(h)). By this Opinion No. 699–E, said § 2.56(h) is revised and designated as § 2.56a (18 CFR 2.56a). All certificates which may have been issued prior to this date pursuant to § 2.56(h) are hereby amended to reflect the change in codification of the national rate structure.

(p) *Effective date.* The effective date of this § 2.56a is July 27, 1976.

(B) Section 2.56(f) of the Commission's General Policy Statements and Interpretations, Part 2 of Subchapter A of Chapter I, Title 18, Code of Federal Regulations, is amended by adding a new paragraph (3) as follows:

§ 2.56 Area price levels for natural gas sales by independent producers.

* * * * * * *

(f) * * *

(3) *Reservoirs discovered or dedicated to interstate commerce on or after January 1, 1973.*—The rate for new reservoirs discovered or dedicated to interstate commerce on or after January 1, 1973, shall be determined by § 2.56a(a) if the proposed sale comes within one of the classes enumerated in § 2.56a (a)(1).

* * * * * * *

(C) Section 2.66 of the Commission's General Policy Statements and Interpretations, Part 2 of Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations, is amended by adding a new paragraph (c) as follows:

§ 2.66 Pricing of new gas produced by pipelines and pipeline affiliates.

* * * * * * *

(c) *National rate for pipeline or pipeline affiliate production.* Notwithstanding any other provision of this section 2.66, natural gas production from any lease owned by a pipeline company or a pipeline affiliate, regardless of the date of acquisition of the lease, shall be priced for ratemaking purposes at the rate prescribed in § 2.56a(a)(1) of this part if such production qualifies under the provisions of one or more of the enumerated classes of sales set forth in § 2.56a(a)(2) of this part. The provisions of § 2.56(f) (18 CFR 2.56(f)) shall apply to natural gas production which qualifies for the national rate treatment pursuant to this section.

(D) Notwithstanding the provisions of Section 154.38(d)(4)(iv) of the Regulations Under the Natural Gas Act [18 C.F.R. Section 154.38(d)(4)(iv)], any jurisdictional pipeline company having a purchased gas adjustment clause in effect as of the date of this order may file on or before September 27, 1976, a special rate increase to become effective October 27, 1976, to track the rates prescribed in Section 2.56(j). The special rate increase will be limited to those independent producer increases actually filed with the Commission on or before August 26, 1976. In addition, such pipeline company may file a surcharge to become effective on October 26, 1976, which will permit recovery of producer increases attributable to this opinion and actually collected prior to the adjustment date.

In the event any pipeline chooses to utilize the adjustment dates of its effective PGA clause in lieu of the above adjustment date, it will be permitted to do so. Should the special PGA filing not be submitted on or before September 27, 1976, the pipeline company will be required to use its regular PGA adjustment dates. After utilization of the special PGA adjustment permitted herein, any future adjustments to recover the effects at periodic escalations will be made under the regular operation of the individual company's effective PGA clause.

(E) Section 154.109b of the Commission's Regulations Under the Natural Gas Act, Part 154 of Subchapter E of Chapter I, Title 18, Code of Federal Regulations, is hereby amended by adding a new paragraph (d) as follows:

§ 154.109b Area rates—Rocky Mountain Area.

* * * * * * *

(d) No rate or charge, made, demanded, or received under a rate schedule filed pursuant to this part for gas produced in the Rocky Mountain Area shall exceed 35.0 cents per Mcf measured at 14.73 psia and 60° F, subject to adjustment upward and downward Btu adjustment on a proportional basis from a base Btu content of 1,000 Btu's per cubic foot measured on a saturated basis, and exclusive of all State or Federal production, severance, or similar taxes, and sold under contracts dated on or after October 1, 1968, for wells commenced prior to January 1, 1973. This rate shall also be subject to a gathering allowance not to exceed 1.0 cents per Mcf where delivery is made to the buyer at a central point in the field, the tailgate of a processing plant, or a point on the buyer's pipeline.

(F) The Secretary shall cause prompt publication of this order be made in the Federal Register.

By the Commission.

Commissioner Smith, dissenting, filed as part of original document.

KENNETH F. PLUMB,
Secretary.

APPENDIX D—STAFF IMPACT ANALYSIS

While the evidence is clear that $1.42/Mcf is a just and reasonable cost-based price, both economics and the law dictate that we also consider the price in relationship to other non-cost factors, including commodity value, economic impacts, and supply-demand equilibrium. The best way to evaluate such factors is in an economic framework.

The approach used here is to simulate the process of shifting the economy to a market-clearing long-run equilibrium, and then to derive the specific characteristics of that shift.

This estimation of the future is necessarily uncertain. It does, however, relate various aspects of the problem to one another with some consistency. Thus we can note that if a higher rate yields a large amount of added gas, the problem of higher costs (from more gas selling at higher rate) is partly offset by the degree to which the added gas displaces a corresponding amount of more expensive alternate fuels. These relative, or differential, effects are frequently more reliable than the absolute magnitudes involved in the estimation; they are also usually the most significant effects.

We begin by making several different estimates of the commodity value of natural gas. We then look at inflation impacts from the transition to such a value, and finally analyze the impacts on producers and consumers.

(1) *Reconciliation With Commodity Value*

(A) BASIC EFFICIENCY ARGUMENTS

An efficient price for a good is the price at which it pays to produce exactly as much of the good as consumers want at that price. In other words, an efficient price for natural gas would induce just enough supply to satisfy consumer demand at that price. If such a price were always reached in the market place, there would be little reason for regulation. However, the market's price is susceptible to two fundamental infirmities, called equity and efficiency distortions, respectively. Equity distortion occurs when the distribution of income and assets is such that the market's price is determined mainly by the preferences of a few. Efficiency distortions arise from many causes, including misinformation, monopoly, and externalities such as environmental costs.

Regulation should attempt to determine a "normative" price, which we may view (and define, for the present purpose) as the price which would be established in a market free of equity and efficiency distortions. For our purpose, the most serious relevant distortions are those which might spring from producer monopoly. It is clear that OPEC is maintaining a monopolistic price for oil, for instance. It is also clear that insofar as the Natural Gas Act assumes potential producer monopoly, this Commission cannot accept intrastate gas prices of the industry as normative. Nor do we. We must, however, consider what such a normative price might be, and determine whether the cost-based rate is also reasonable by that standard.

This does not mean the normative price must be adopted. It may be socially preferable to charge customers a higher or lower price. But any such pricing choice ought to be made with the clearest possible understanding of relevant economic forces.

(B) EQUILIBRIUM OF JURISDICTIONAL GAS

One approach to determining a normative price was the effort of the FPC Task Force on Deregulation, which sought to estimate the price a competitive market might set in the absence of regulation. In its Report,[1] the Task Force estimated that in the case of partial deregulation the 1975 marginal supply price would have been $1.49/Mcf.[2]

While the Task Force found that "a conclusive determination and quantification of the impacts has not as yet been demonstrated," the estimate is still the result of a thorough effort to analyze the process by which the supply and the apparent demand for natural gas could be brought into equilibrium. The estimated marginal supply price, adjusted for inflation, would equate to about $1.65/Mcf today.[3]

The determination was sensitive to a number of assumptions (detailed below) about supply and demand elasticities, future gas demand and availability, and the prices of intrastate gas and alternate fuels. The estimates cited herein are for a case which was

[2] *Ibid.*; this is an average of the range of cases studied by the Task Force.

[3] *Ibid.*, Table 2, Page 5.

[1] Preliminary Evaluation of the Cost of Natural Gas Deregulation, FPC, January 1975.

V 41 154 AUG 9 76 UMI

an average of the range of parametric assumptions used by the Task Force.

This estimate implies that the cost-based price established herein is consistent with a commodity value for gas which would be determined on the basis of the estimated supply, demand, and elasticity relationships within the domestic market for gas.

(C) EQUILIBRIUM WITH INTRASTATE GAS

The regulation of the price of natural gas was based on the premise that workable competition does not exist in the gas-producing industry. If this premise is true, then observed prices in the unregulated markets will be higher than would prevail under competitive conditions. Others contend that in the absence of barriers to entry, production is competitive.

We have been mindful of these opposite views in weighing the price of non-jurisdictional gas as a factor in our price determination.

Intrastate prices have risen dramatically over the past few years, as the prices reported in Exhibit indicate. The most recent average intrastate price is $1.55/Mcf for the first quarter of 1976. Since a competitive market price tends toward the cost of producing the good or service in question, insofar as the intrastate markets are competitive, this price indicates a cost-based price for natural gas. The price we set with this opinion is somewhat lower than this most recent average. The differential may be due to a lack of workable competition in those markets, or a supply/demand imbalance in those markets that results in the current price not being that which would prevail in long run equilibrium.

(D) EQUILIBRIUM IN ENERGY MARKETS

A third approach to determining the normative price is to examine what natural gas price is consistent with world prices for all fuels, still in an equilibrium framework. Several lines of analysis, discussed below, suggest that OPEC is charging a rational monopoly price; that is, a price which is the normative oil price plus a monopolist's rent just sufficient to maximize OPEC profits. That rent is probably under $2/barrel, which suggests that the normative price for oil is about $10.50/barrel, or roughly $1.75/Mcf equivalent.

It is estimated that OPEC production is at about half of its potential level at present, which is consistent with the notion that OPEC is maximizing its monopoly rents. It does not follow, however, that those rents are the entire difference between its pre-embargo price, or its production costs, and the current price. There is another cost component which is often ignored, called "user cost," which is not related to monopoly.

Natural resource economics includes "user cost," the value of a resource in the ground. Prior to 1970, the world tended to feel that only extraction cost mattered, that fuels were infinitely abundant, and worthless until extraction. Recent awareness of resource limits and of environmental quality has changed this view. Energy user costs have become large. Their recognition can account for much of the OPEC price rise.

One way to approximate these "user costs" is to note that environmental control costs have been estimated[4] at roughly $.20 (for 1971) per pound of sulfur emitted, or about $12 for each ton of coal which contains 3% sulfur. The decision to control sulfur emissions effectively added $3 to the worth of a barrel of oil as a substitute for the costs of burning such coal. Adding this value to the 1971 cost of OPEC oil, and adjusting for inflation, gives us a resource value of about $10 for a barrel of oil today. (While domestic sulfur-control policies doubtless were not so fully shifted to OPEC oil, the recent recognition of resource limits must play some role which is not being considered here.)

Historically, gas prices have not matched Btu-parity with oil, but have been 15%–25% lower. This is apparently due to the influence of coal as a ready substitute in many fuel-intensive utility and industry applications where gas is used mainly because it has been so cheap. If we assume gas should be 15% cheaper than oil on a Btu basis, a price of $1.50/Mcf would be implied for a competitive-oil world, and a price of $1.75/Mcf would seem correct if we accept OPEC pricing as part of the real-world alternatives we face. Therefore, in addition to our estimate of a possible market-clearing price, we also note in Exhibits 28 and 29 the actual prices of competitive fuels within the U.S. economy.

To compare these prices, we have taken observed prices of oil in various sectors of the country, and estimated the well-head price for natural gas which would be competitive at the average market. This estimation takes account of the cost of transporting gas from well to the average market, and of the historic energy relationship noted above, with gas selling at about 85% of the Btu-equivalent price of oil.[5]

Exhibit 28 reports prices paid by electric utilities for residual (No. 6) fuel oil over the twelve months ended January 1976, for the major oil-consuming sections of the country. Exhibit 29 uses the most recent spot price data from the Oil and Gas Journal. When the regional prices are weighted by each region's gas consumption we get the following results:

	1,000 ft³ equivalent
Contract No. 6 oil to utilities	$1.43
Spot Market No. 6 oil to utilities	1.28
Recent spot No. 2 distillate	1.57
Recent spot No. 6 residual	1.31

These prices clearly indicate that our cost-based estimate is not far from an equilibrium price with marginal alternate energy sources, at historic price ratios.

(2) *Inflation Impacts*

(A) TYPES OF INFLATION

The Nation is concerned with two kinds of inflation. The first is more obvious, and arises when the money supply expands faster than the supply of goods and services. The second is less obvious, and arises when the economy functions inefficiently, so that the Nation's efforts produce less than they might have. These have sometimes been characterized as demand-pull and cost-push inflation, respectively.

This Commission cannot affect the first kind of inflation. If the price of gas increases while the money supply stays constant, the prices of all other goods and services will decline slightly; there will be no inflation. If just enough new money is printed to pay the extra cost of gas, that money will add to inflation.

The second kind of inflation is produced by any regulatory action which causes the economy to function inefficiently. Some such inefficiencies are desirable at times, mainly for equity reasons. Other inefficiencies arise because the regulatory process often does not keep up with the dynamics of a changing world. The important point to remember is that regulation can produce inefficiencies by setting prices either too high or too low. We will discuss this point in detail below.

(B) EFFECTS OF PRICE CHANGE

In addition to the above kinds of inflation, there is considerable public resistance (especially during periods of general inflation) to specific price increases. If world conditions for a commodity change (as with our environmental awakening, or with formation of OPEC) the value of the commodity will usually also change. In the presence of a stable money supply, the values of all other goods will tend to move in the opposite direction so that there is no general inflation. Even so, the prices which rise will arouse more consumer concern than the prices which decline. This awareness of rising prices should not, however, be confused with concern over inflation. In a dynamic world, it is neither possible nor desirable for government to maintain all prices at some former "status quo" relationship indefinitely, nor even to retard their adaptation, except for clear-cut equity or efficiency reasons.

An equity problem could arise if the price of natural gas rises faster than the consumer can adjust, or when the transition is sharp enough to drive out of business firms which might in time have survived the transition. Inefficiencies could occur if the price change exceeds the proper level, or if the transition creates uncertainty and frictional unemployment in its own right. We discuss both of these possibilities below, under "Demand Impacts." They are not, strictly speaking, inflationary impacts and cannot be analyzed as such.

(C) EFFECTS OF TOO HIGH PRICE

The market price can be "too high" (higher than the normative price) for a number of reasons. The most plausible relevant reason would be on the assumption that gas production is monopolistic, and the Commission sets a price which allows monopoly profits. The process here is that monopolists make the greatest profits when their price is high enough that they sell significantly less of their product than they might sell at competitive prices. When this happens, the consumer loses the benefits of both the added output which would have been available at competitive prices, and also of the consumer surplus which is being captured by the monopolist.

This would mean, for instance, that much of the demand for gas at competitive (or normative) prices would instead seek alternate fuels that would, at competitive gas prices, be less desirable. This means that the economy gets the benefit of less gas than is optimal, it uses more alternate fuel than is optimal, and consumers have less purchasing power than is optimal. The end result is that a given level of national economic activity produces less consumer satisfaction than it would if there were no monopoly.

Monopolies are regulated precisely to avoid this kind of inefficiency. (If equity—the excess profits of monopolies—were the main problem, it could be solved with appropriate taxes.) This kind of inflation is a major and obvious concern.

(D) EFFECTS OF TOO LOW PRICE

Too low a price creates similar, but less obvious, kinds of inflationary inefficiency. If the price is "too low," consumers will use "too much" of the good, and producers will supply "too little" of it. Once again, a given level of national economic activity produces less consumer satisfaction than it otherwise might.

In theory, government can engage in a series of direct allocation, curtailment, and rationing programs to spread the limited supply to the appropriate recipients. In fact, any such program is very limited, especially in light of its poor response to the dynamics of a changing world. Every imperfection means that some of the underpriced good is wasted (rather than correctly husbanded) by someone who undervalues it, while someone who values it more highly must buy a more expensive alternate good—and, in the process, bid up the price of that alternate even higher.

Though this kind of indirect effect from under-pricing is less obvious, it is becoming more widely perceived to be a real cost of regulatory activity. While the Commission has no direct mandate to include inflationary effects as part of our rate-making, it seems clear that setting the price as close as possible to that which would result from a competitive model (normative price) would minimize the total inflationary impact.

(3) *Supply impacts*

(A) RETURN ON PRESENT PRICE

The DCF methodology used in determining the cost-based price also shows that the current 699–H price of $.52/Mcf is sufficient to yield only about 3% return on current-period costs of production. The yield is this low because of methodological shortcomings in 699–H, major increases in tax liability as a result of the removal of percentage depletion, and increased demand for gas as a substitute (given its low price) for hard-to-clean coal and expensive oil. (While OPEC should not be determinant of U.S. fuel price, it is clear that when a substitute for gas becomes expensive, gas becomes more valuable—the proper dynamic response of the market to such a situation is to expand gas production more expensively.)

On close scrutiny, it seems that the 699–H rate allows only about 2% return for onshore gas, where increased drilling (even at low productivity) reflects the high prices this gas can command in the intrastate market. At the same time, the rate allows a return of only about 5% for off-shore gas. Here, drilling activity has declined, presumably since such gas sells under the 699–H ceiling and is not profitable enough to attract new risk capital. The end result is that the Nation's average gas productivity is declining. This is a specific illustration of the way a low price leads to a more costly result.

(B) EFFECTS OF TOO HIGH PRICE

If the rate is set higher than the normative price, and if gas production is competitive, new gas will be sold for less than the ceiling rate (i.e., at the normative price). If production is sufficiently monopolistic, the rate will allow excess profits to producers as a class. In any event, profits will be highest for off-shore gas. This Commission expects Federal leasing policies to be able to capture some or all of the extra off-shore profits, which seems to constitute a more equitable treatment of the National benefits of gas than a simple distribution, through lower prices, to consumers (mainly industry) who happen to have access to gas supplies. It is also possible that these extra profits will be eroded by expansion of production until it is less profitable. At worst, gas production will be suboptimal and gas producers will receive rents which are only partly captured by income

(C) EFFECTS OF TOO LOW PRICE

If the rate is set lower than the normative price, there will still be a higher profit on off-shore gas, and added (though sub-optimal) quantities will flow to the interstate market. On-shore production would earn a lower yield, and would therefore try to command a yet higher price in the intrastate market. While some on-shore gas would surely move interstate, there would remain some shortage.

(4) *Demand impacts*

(A) SHORT-RUN PRICE IMPACTS

The main impact on consumers from the new national rate will be the added assurance of gas supply. Based on our understanding of current gas supply prospects, we would hesitate to predict that higher prices will reverse the downtrend of gas production that has been experienced during the past few years—we note, for example, that marketed production in the first quarter of 1976 was 2.8 percent lower than a year earlier and that domestic sales to interstate pipelines were 4.3 percent lower.[6] Nevertheless, we are confident that the supply situation would deteriorate more rapidly, especially in the interstate market, if prices were not allowed to increase. The consequence of such deterioration would be the further shift of energy use to higher-priced alternate fuels, notably oil imported from the Middle East. The increased availability of incremental gas supplies at the national rate we have prescribed will be a less expensive alternative for the Nation's consumers.

It should also be noted that natural gas has been supplying almost 50 percent of the energy consumed by the industrial sector of the economy.[7] The availability of increased gas supplies to the industrial sector, particularly where gas cannot efficiently be replaced with other fuels, will contribute to increased productivity and a growing national economy.

These direct and indirect benefits to consumers cannot be achieved at the currently prevailing level of natural gas prices. There is a short-run cost attached to the benefits, a cost that will be determined by the gas volumes that will receive the national rate.

The volume of new supply that will become available to the interstate market at the new gas rate can only be conjectured.[8] It is estimated that on April 1, 1976, gas flowing under 699–H rates exclusive of rollover contracts amounted to 850 Bcf/year from the 1973–74 biennium, and 750 Bcf/year from the current biennium. We will assume that a total of 1750 Bcf is now flowing under 699–H, and that an additional 600 Bcf/year will flow by the end of the coming year.

All 699–H gas now averages about 55.6 cents/Mcf (including gathering allowance and state taxes.) In the next year consumers will pay approximately $1.07/Mcf for 850 Tcf from the 1973–74 biennium, and from $1.50 to $1.53/Mcf for escalating gas (with an estimated annual flow rate of 900 Tcf in the coming quarter, increasing to an annual rate of 1350 Tcf in the last quarter) under the new rate for the current biennium. The total extra cost (versus the 699–H rate) will be about $1.52 billion. This cost, spread over the 11.6 Tcf of interstate volume in 1975, would add 13 cents to the average price paid by the interstate pipelines. The average residential gas customer in the United States consumed 120 Mcf in 1974; a price increase of 13 cents/Mcf would add about $15.60 to the annual bill. The added cost to residential customers in various parts of the country will, of course, vary with their gas consumption. Some illustrative cases based on the above estimate of average-price increase are shown below:

State	Average residential consumption per customer (1974 gas facts) (thousand cubic feet)	Estimated increase in annual bills
Ohio	178	$23.14
Illinois	165	21.45
Pennsylvania	137	17.81
California	101	10.40
New York	90	11.70
Florida	40	5.20

We can also compare the price of gas with its old price, with the general consumer price index, and with oil and electricity prices. We do this with the aid of the latest BLS estimates,[9] for May, 1976 for several representative cities. We start with the May 1976 price from BLS. Then we show the new price, by adding the above 13 cents per Mcf. Then we show the percentage increase in residential gas price for that city. This is followed by an estimate of the change in the average residential bill. Next we show an estimate of each city's revised gas-price index (from BLS Table 4; 1967=100, Maq 1976 CPI=69.2). Next we show the constant-dollar increase in gas price since 1967; that is, the degree to which gas prices have out-run general inflation. Finally we show the ratio of the new gas price to the heating oil price and electricity price on a per-Btu basis.

Exhibit 30 shows that of the 108 cent per Mcf rate increase from 699–H, 44 cents goes to direct taxes, 17 cents goes to royalties, 22 cents goes to cover higher investment costs, and 21 cents goes to producer profits. Of the increase on vintaged 1973–1974 gas, about 35 cents goes to taxes, and less than 20 cents to costs and net profits. Of the entire first-year

	Washington	Boston	Chicago	San Francisco
Average price, May 1976	2.45	3.24	1.87	1.54
New price	2.58	3.37	2.00	1.67
Percent increase	5.3	4.0	6.9	7.8
1974 consumption	93	89	165	101
Bill at May 1976 price	232.75	288.36	308.55	155.54
Bill at new price	245.10	299.93	330.00	168.67
Increase in bill	12.35	11.57	21.45	13.13
New index (1967=100)	189.7	203.5	198.3	229.0
Real price rise since 1967 (percent)	12.1	20.3	14.2	35.3
Ratio to oil price	.84	1.11	.72	.56
Ratio to electric price	.21	.23	.16	.18

cost of $1.5 billion, producer costs will claim about $400 million, tax liabilities will claim $820 million, and producers will receive $280 million in net income.

(B) FUTURE CONSUMPTION TRENDS

Neither the letter nor the spirit of the Natural Gas Act binds the Commission to be concerned only with the welfare of consumers who are presently using natural gas. This fact is obvious, yet it is often overlooked. For instance, a recent study by the Congressional Research Service [10] characterized the possible production of more gas as a "cost to consumers", overlooking the fact that purchasers of such gas would buy it only if it were cheaper than their alternatives.

For analytic purposes, we consider consumers in several classes. Direct consumers of gas are divided into residential, industry, and utility sectors. Potential consumers of gas are divided into the same sectors, and include all consumers who do not presently have access to gas, but who would choose gas if it were available at an equilibrium price. All costs incurred by the utility and industry sectors (whether for more expensive gas, or for curtailments and yet more expensive alternate fuels) are viewed as indirect costs to the population as a whole.

In the discussion which follows, we will focus on the 1980 demand situation for gas at various prices, with explicit consideration for newly cost-effective conservation, and for those gas users who may not be able to get the gas they want. Such consumers must buy a higher-cost alternate fuel to meet their needs, putting added upward pressure on the price of that alternate fuel.

It has been estimated [11] that the national welfare gain from all cost-effective conservation measures would be about $9 billion in 1980. Present natural gas consumers account for a disproportionate share of the costs of energy waste, in large measure because their gas has been so cheap. The analysis which follows takes account of the significant degree of conservation which is possible in each sector if consumers take those efficiency-improving steps that did not pay for themselves at old prices, but do pay in saving the higher-priced gas (even at the rolled-in price).

In the Deregulation Task Force Report, supra, it was estimated that in 1980 gas production would lie between 22.6 and 24.9 Tcf if this Commission adhered to pricing strategies which led, respectively, to level production or level reserve additions. In the "Worst Case" estimate (shown in Table H-16) it was assumed that elasticities were relatively low and demand high; in the "Best Case" estimate (Table H-61) elasticity was assumed higher and total demand lower. These cases implied 8.2 and 1.4 Tcf of unsatisfied demand, respectively.

The characteristics of the average demand and supply projections for 1980 were as follows:

Sector	Total demand	Met by gas	Curtailed
Residential	8.66	7.62	1.04
Industrial	14.78	12.46	2.32
Utility	5.16	3.70	1.46
Total	28.60	23.78	4.82

[10] Economic Impact of S. 2310's Pricing Provisions, 12/22/75.

[11] "Economic Benefits of Energy Conservation", Proceedings of U. of Miami/ERDA Forum on Energy Conservation, December 1975.

There is no present or planned direct curtailment of gas delivery to residential consumers; but we must remain aware of the growing number of new homes for which no new gas connections are permitted. For many of these, the alternative is electricity, even for their heating needs. This alternative is far more expensive to the economy than gas itself, for it requires more primary input energy plus more capital for the generation system.

The model works by estimating the way a changed price for new gas (and expiring contracts) will stimulate supply, and will lower demand by raising the rolled-in price of all gas, so that all the potential demand is satisfied. It is assumed that the alternate fuel would ultimately be supplied from imports, and we estimate the national cost of imports by the first-round taxes which would be paid by domestic producers of the same fuels.

(C) LONG-RUN PRICE IMPACTS

To estimate long-run impacts of this opinion on various consumers, we will deal with the effects of a normative price determined within the gas market. As we noted above, the Task Force addressed this question in asking what price would bring equilibrium between gas supply and demand. In effect we will use that analysis to study the equity effects of shifting toward the efficient price. (This does not imply deregulation, of course—the analysis determines the price which would be reached by a competitive market for gas, while the Commission sets a ceiling price which potential monopolists may not exceed.) We begin by returning to the "Worst" and "Best" demand gaps.

The prices which closed the demand gaps (in 1974 dollars, as the well-head price for new gas, expiring contracts, and intrastate gas) were $1.91/Mcf and $.78/Mcf, respectively; the demand gaps were closed by only 2.02 and .38 Tcf of new gas, plus greater (6.2 and 1.0 Tcf) cost-effective conservation by all the consumers of existing gas.

Since the Task Force analysis seems to be the only model that considers specific classes of present and potential consumer, we will use its results to describe the impact of the current opinion. The two extreme cases have an average well-head price for marginal gas of $1.81/Mcf in 1980 ($1.35 measured in 1974 dollars, adjusted for 5% annual inflation), which is compatible with a 1976 price of $1.65/Mcf plus $.04 annual escalation.

Below we list some of the relevant attributes of the average of these two cases:

Added gas volume due to higher price (trillion cubic feet)	1.20
Saved gas equivalent of alternate fuels (trillion cubic feet)	4.80
Increased revenues of gas producers (barrel)	$9.88
Decreased revenues (e.g., of imports) (barrel)	7.79
Net increase in consumer outlays (barrel)	2.09
Increased outlays by consuming sector:	
Status-quo residential consumers (barrel)	1.45
"Curtailed" residential consumers (barrel)	−.81
All residential consumers (barrel)	.63
Status-quo industrial and utility (barrel)	2.95
Curtailed industrial and utility (barrel)	−1.49
All non-residential consumers (barrel)	1.46

This Table means that the direct outlays, by residential consumers of gas, will rise by $.63 billion; an increase of $1.45 billion to present ("Status-Quo") consumers will be partially offset by a saving of $0.81 billion on the part of consumers who otherwise wouldn't have access to gas. While this change has equity or redistributional aspects, it should be remembered that consumers who already have gas (and will therefore be hurt) have had the historic benefit of a significant subsidy in this low-priced valuable fuel.

The indirect costs to consumers are the added outlays by industry and utilities for gas, minus the national benefits from a reduced reliance on imports. Of the indirect price impact of $1.46 billion, only $0.10 billion is paid through utilities; at the higher price for existing gas, the utilities would lower their total demand (e.g., by load management techniques) enough that their fuel outlays would rise only a little. The remaining $1.36 billion is the added outlay for fuel by industry, all of which must be absorbed by consumers of the industrial products.

We next examine the size and incidence of the costs. First, the costs are not multiplicative—only during monetary inflation (if then) can a producer raise his product cost by 10% because his fuel bill went up 10%. (Some such behavior underlies the idea of "ripple effects".) For a price realignment which reflects true resource costs, there is every reason to think that there is a simple dollar-for-dollar pass through. For instance, in 1971 "Food Processing" used about 5% of industry's natural gas. In addition, "Chemicals" used another 27%, but since only 4% of "Chemicals" gas goes to "Agricultural Chemicals", Food absorbs another 1% of industry's burden by this route. In total, consumers appear to pay only 6% of the $1.36 billion (or about $80 million) extra for their food. This $80 million adds about 0.05 percent to food costs.

Second, the costs are not distributed regressively, at least in the sense that a large fraction of the indirect costs fall on the poor, or on essential products. It has been shown that direct fuel cost is slightly regressive, indirect fuel cost is slightly progressive, and total fuel cost is approximately neutral.

To consider taxes, we note that the above values were derived by averaging Tables H-16 and H-61 of the Preliminary Task Force Report. The assumptions meant that some 13.15 Tcf of total production in 1980 would increase an average of $.63/Mcf from the so-called Status-Quo prices; in addition, there would be 1.2 Tcf of added gas at $1.35/Mcf (in 1974 dollars). Producers would have incremental revenues of $8.26 billion on the former, and an earned income of $1.62 billion on the latter. If we assume (as seems likely) that the former income would be taxable at 48%, and the latter at an average rate of 10%, the total tax receipts would be about $4.1 billion, roughly double the increased consumer outlays. If the alternate fuels ultimately come from imports, and the imports are displaced by conservation and new supply, these tax receipts represent a net gain to the economy. (They are an indirect gain to the consumer for exactly the same reason that industry outlays are an indirect consumer cost.)

The aggregate effect, as best we can predict it, would be that by 1980 consumers will be paying a total of $.63 billion more (than in the "Status-Quo" case) in direct purchases of gas; they will also be paying an indirect amount of $1.46 billion extra for gas through the commodities they buy; but they will also receive the indirect benefit (in the form of a lower tax burden than otherwise) of $4.1 billion in taxes paid by producers from income which goes to domestic, rather than foreign, producers. Thus, the total effect of shifting from the "Status Quo" price to the normative price would be a benefit of $2.0 billion ($4.1−$0.63−$1.46)—the benefit of removing the inefficiency associated with the present underpricing of natural gas.

(D) EFFECT OF TOO HIGH PRICE

The notion of "too high" a price can be represented in two related ways. We can either ask what happens if a price higher than the normative price is used as a ceiling, or we can ask what happens if the normative price itself is lower. The latter case can arise only if the real-world situation is "better" than the "average case"; in which situation we would have larger supplies, lower demand, and less import reliance than was modeled. If gas production is competitive, the lower normative price will prevail, and consumers will be better off. Otherwise, consumer costs are higher, and the added costs are only partly recovered by taxes on producers.

Specifically, if producers charge monopolist prices at a ceiling rate that is too high, the net cost of each 1-cent error in setting the rate is roughly $10 million. A 5-cent error would mean that consumers would pay an extra $100 million, of which about $48 million would be recovered in marginal taxes on the producers.

(E) EFFECTS OF TOO LOW PRICE

On the other hand, "too low" a price can be represented by a world in which demand is greater, supplies are lower, and imports are higher. In this case, we clearly have an element of additional "excess" demand which can be supplied only from alternate fuels at a higher price than that allowed for gas. In this case, consumer costs are higher by the extra cost of the alternate fuel, plus whatever national cost is attributed to the added reliance on foreign fuel supplies.

An error in the direction of too low a price ought also to have a net cost of about $10 million for each one-cent error. In this case, a price 5 cents too low should lead to present consumers of gas saving about $30 million, while other consumers would be forced to spend about $80 million more on the purchase of alternate fuels.

PROFESSIONAL STANDARDS REVIEW

Procedures for Designating Statewide Areas

V41154 AUG 9 76 UMI

Title 42—Public Health

CHAPTER I—PUBLIC HEALTH SERVICE, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 101—PROFESSIONAL STANDARDS REVIEW

Procedures for Designating Statewide Areas

On April 28, 1976, there was published in the FEDERAL REGISTER (41 FR 17868) a proposal to amend Subpart A of Part 101 of Title 42, Code of Federal Regulations. This amendment is required to implement the new paragraph (g) which was added to section 1152 of Title XI, Part B of the Social Security Act by section 105 of Pub. L. 94–182.

The amendment adds a new § 101.2a to Subpart A of Part 101 which establishes the procedures under which the Secretary will conduct polls in States where two or more areas have been designated and the Secretary had not entered into an agreement with any organization designating it as the PSRO for any area in such States prior to December 31, 1975. The polls will be conducted to determine whether doctors of medicine and doctors of osteopathy in each area in the State support a change from the present area designations to a single statewide area designation. If, in each PSRO area, more than 50 percent of the doctors responding vote to support a change, the Secretary will establish the entire State as a single PSRO area.

Interested parties were invited to submit written comments, suggestions or objections concerning section 101.2(a) on or before May 28, 1976. No written comments, suggestions, or objections were received in a timely manner and the proposed amendment is hereby adopted without change, except for correction of several typographical errors made in publication of the proposal and is set forth below.

Effective date: This amendment shall become effective August 9, 1976.

Dated: July 9, 1976.

THEODORE COOPER,
Assistant Secretary for Health.

Approved: August 2, 1976.

MARJORIE LYNCH,
Acting Secretary.

§ 101.2a Special Procedures for Statewide Designation.

(a) *Policy and Applicability.* (1) Section 1152(g) of the Act reads as follows:

(g)(1) In any case in which the Secretary has established, within a State, two or more appropriate areas with respect to which PSROs may be designated, he shall, prior to designating a PSRO for any such area, conduct in each such area a poll in which the doctors of medicine and osteopathy engaged in active practice therein will be asked: 'Do you support a change from the present local and regional PSRO area designation to a single statewide area designation?' If, in each such area, more than 50 per centum of the doctors responding to such question respond in the affirmative, then the Secretary shall establish the entire State as a single PSRO area.

(2) The provisions of paragraph (1) shall not be applicable with respect to the designation of PSRO areas in any State, if, prior to the date of enactment of this subsection,[1] the Secretary has entered into an agreement (on a conditional basis or otherwise) with an organization designating it as the PSRO for any area in the State.

(2) This section is applicable to the special procedures for statewide designation pursuant to Section 1152(g) of the Act.

(b) *Determination of Number of Doctors in each PSRO Area in the State.* In each State identified by the Secretary under paragraph (a) as requiring a poll on the change to statewide designation, the Secretary will determine, on the basis of the latest available information which he deems appropriate for such purposes, the names, current mailing addresses, and total number of doctors of medicine or osteopathy engaged in active practice in each PSRO area in such State, as designated in this Subpart. The information on the basis of which the total number of doctors in each such area is determined by the Secretary will be available for public inspection in accordance with 5 U.S.C. § 552 and 45 CFR 5.1 et seq.

(c) *Notice of Poll.* The Secretary will publish a Notice in the FEDERAL REGISTER and in at least one newspaper of general circulation serving each of the areas in the State, and will notify by letter appropriate State and county medical societies, that he will conduct a poll in each such area in the State to determine whether the doctors engaged in actual practice in each area support a change from the present local PSRO area designation to a statewide area designation, pursuant to Section 1152(g) of the Act. The Notice will set forth the dates on which such poll will be initiated and completed and will state that doctors in such area who have not received a ballot within five (5) days after initiation of the poll may request a ballot prior to the expiration of the polling period from the Secretary at the address specified in the Notice.

(d) *Mailing of Ballots.* The Secretary will mail, by regular mail, to each individual doctor of medicine or osteopathy whom the Secretary determines, pursuant to paragraph (b), to be engaged in the active practice of medicine or osteopathy in each PSRO area in the State, the following:

(1) a ballot in which the doctor is requested to check one of two boxes indicating an affirmative or negative response to the question: "Do you support a change from the present local and regional Professional Standards Review Organization area designation to a single statewide area designation?";

(2) a preaddressed, franked and coded envelope; and

(3) a cover letter describing the purpose of the poll, and specifically including:

[1] Section 1152(g) was added by section 105 of P.L. 94–182, enacted December 31, 1975.

(i) The date of initiation of the poll, which will be not more than two days prior to the date on which the polling material is mailed;

(ii) A request that the doctor complete the ballot and mail it by regular mail in the enclosed envelope;

(iii) A statement that if, in each PSRO area in the State, more than 50 per centum of the doctors responding to the poll indicate that they support a change from the present local area designations to a statewide area designation, the Secretary will establish the entire State as a single PSRO area;

(iv) A statement that all completed ballots which are mailed in the enclosed self-addressed envelope, and postmarked within 30 days of the date of initiation of the poll and received by the Department of Health, Education, and Welfare officer, whose address appears on the enclosed envelope, will be counted in determining the result of the poll; and

(v) A statement that doctors who are identified by the Secretary as being in active practice in more than one area may vote with respect to each of the areas in which they practice.

(e) *Tabulation of Ballots.* After the expiration of 30 days following the date of initiation of the poll, as described in paragraph (d)(3)(i), the Secretary will tabulate the completed ballots which have been received in the self-addressed envelopes provided and which are postmarked prior to the end of such 30-day period.

(1) The ballots will be tabulated separately for each area in the State, to determine whether or not, in each PSRO area in the State, more than 50 percent of the doctors responding to the poll indicate that they support a change from the present local area designations to a Statewide area designation.

(2) The ballots will be tabulated in such a fashion as to assure that the vote of each individual doctor responding to the poll will not be disclosed.

(3) The tabulation proceeding will be publicly announced and will be open to the public in a central location in the State.

(f) *Retention of Ballots.* All ballots received by the Secretary will be retained for such period as may be necessary to assure their availability for a recount in accordance with paragraph (h), and will be available for public inspection during such period at a place announced in the Notice published pursuant to paragraph (g).

(g) *Notice of Poll Results.* After tabulating the ballots received for each area in the State, the Secretary will publish a Notice in the FEDERAL REGISTER and in at least one newspaper of general circulation in each area, and will notify by letter the appropriate State and county medical societies, as follows:

(1) That more than 50 percent of the doctors, in each PSRO area of the State, by checking the appropriate box on the ballot, responded in the affirmative to the question: "Do you support a change from the present local and regional Professional Standards Review Organization area designation to a single statewide area designation?" and, therefore, the Secretary will proceed to establish the entire State as a single PSRO area; or

(2) That, in one PSRO area in the State (or the number of such areas if more than one) more than 50 percent of the doctors, by checking the appropriate box on the ballot, responded in the negative to the question: "Do you support a change from the present local and regional Professional Standards Review Organization area designation to a single statewide PSRO area?" and, therefore, the PSRO areas established in the State under this Subpart A will remain in effect.

(h) *Recount.* The count under paragraph (e) will be final, except that the Secretary will conduct a recount of an area in the State if at least five (5) doctors in such area so request in writing, postmarked within 10 days following the date of publication of the Notice in the FEDERAL REGISTER under paragraph (g). Such recount will be conducted in a public proceeding, and the result of the recount will be final.

Federal Highway Administration

Urban Mass Transportation Administration

FEDERAL AND FEDERALLY ASSISTED PROGRAMS AND PROJECTS

Coordination

V41 154 AUG 9 76 UMI

Title 23—Highways

CHAPTER I—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

PART 420—PROGRAM MANAGEMENT AND COORDINATION

Coordination of Federal and Federally Assisted Programs and Projects

• Purpose. The purpose of this document is to issue final joint regulations implementing OMB Revised Circular A-95, "Evaluation, Review and Coordination of Federal and Federally Assisted Programs and Projects" (41 FR 2052, January 13, 1976). •

Interim regulations were issued by the Federal Highway Administration (FHWA) on November 19, 1975 (40 FR 53726), and by the Urban Mass Transportation Administration (UMTA) on March 10, 1976 (41 FR 10316), with the intention of combining the unilateral regulations in a final issuance.

The public was invited to participate in these regulations through submission of written comments. In arriving at the final regulations set forth below, UMTA and FHWA have given consideration to all comments received insofar as they relate to matters within the scope of the interim regulations. Review of the comments received resulted in only minor editorial changes to the regulations as originally proposed. However, in view of the interest expressed in these regulations those sections of the final regulations which were the subject of major interest are discussed in this commentary.

The majority of comments received on the FHWA and UMTA interim regulations expressed satisfaction with the primary intent to simplify and rationalize the transportation planning/A-95 review process by integrating the A-95 elements of consideration with the FHWA/UMTA comprehensive planning/programing requirements 23 CFR 450C, (40 FR 42979). Where the Metropolitan Planning Organization (MPO), 23 CFR 450A, (40 FR 42976) is the same as the A-95 agency (41 FR 12482), the basic procedure required by these regulations to accomplish our primary intent allows the MPO endorsement of the transportation improvement program/annual element (TIP/AE) to satisfy the A-95 notification and review requirements. Since this procedure generated several comments, the following paragraphs are in response to the major issues raised by those comments.

A principal issue in the comments concerned the lack of a provision for clearinghouses to obtain additional information for certain projects contained in an annual element. Paragraph (a)(1) of § 420.306 allows the applicant and the clearinghouses to establish mutually acceptable procedures for A-95 notification, consultation and review. We intend this to mean that if an A-95 clearinghouse requires additional information for certain projects at any stage of development, it can arrange for acceptable procedures for the receipt of this additional information.

Many of the comments expressed doubt over the minimum acceptable procedures in § 420.306 (b), (c), and (e), that FHWA/UMTA are requiring to fulfill the provisions of the OMB A-95 Circular. For example, where the MPO is the A-95 agency and the MPO has endorsed the TIP/AE, then the requirements of the OMB A-95 Circular will also be fulfilled. Several comments indicated that this single endorsement action is not consistent with the two-fold responsibility of the clearinghouse, i.e., assuring regional planning agency review and soliciting comments from other local agencies. In response to this concern, it is necessary to compare the functions of the planning process as described in the FHWA/UMTA planning regulations 23 CFR 450A (40 FR 42976), through which the TIP/AE is developed, with the clearinghouse functions as described in OMB Circular A-95 (41 FR 2052, Part I, Par. 3). This comparison reveals nearly identical elements of consideration; i.e., provide for cooperative decisionmaking on a metropolitan level through participation of principal elected officials of general purpose local government; provide for consideration of social, economic, and environmental effects; provide for consistency with civil rights laws; provisions to ensure public involvement; etc. In addition, the FHWA/UMTA planning regulations require adequate representation on the MPO so that all agencies with concerns have a chance to voice them in the development of the TIP/AE. With these integrated A-95/planning process procedures, both the clearinghouses and FHWA/UMTA have a means to monitor metropolitan planning and the progress of particular, federally assisted projects that pass from planning into other stages of development. It is also expected that these procedures will stimulate concern early in the planning process for those elements required both under the clearinghouse functions and the FHWA/UMTA planning regulations.

Another issue that was the subject of several comments concerned the limited time allowed to review the annual element. Under past A-95 procedures, the A-95 review was accomplished on a project-by-project basis with 30 days allowed to review each project. Under these new procedures, where clearinghouses are not the same as the MPO and have not identified certain projects that would require additional information, the A-95 review of the annual element is allowed 30 days. When additional information is required for an FHWA project in an annual element or when review of an application for an UMTA assisted project is requested, an additional 30 days is available for A-95 review. Where the A-95 clearinghouse is not the same as the MPO, it is expected that the clearinghouse will be able to perform complete A-95 reviews with the information in the annual element for the majority of projects while a smaller number of large, major impact capital projects will require more information and further review at subsequent stages of development. Since large, major impact capital project must be implemented in stages, i.e., engineering, right-of-way acquisition, construction, each successive stage is required to be reported in an annual element and will, thereby, automatically be subject to an A-95 review of 30 days. Again, when more information is required at these subsequent stages of development, the clearinghouses will be allowed 30 days to review it.

There were some comments concerning the practice of project grouping as described in the transportation improvement program regulations (40 FR 42979, § 450.312(c)) and its potential to prevent adequate A-95 notification and review of projects in the grouping. The types of projects that we expect to see grouped are those for which OMB has granted FHWA an exemption from the A-95 process, i.e., certain minor traffic engineering and highway safety projects including: channelization of intersections, including turn bays; modification of traffic signals and control systems; intersection approach lane widening; intersection widening to include turn bays; traffic control signs and markings; pavement skid treatment by overlay or grooving; highway lighting; pedestrian over- or under-crossing structures; bridge widening for safety clearances and increased lane widths; railroad-highway crossing warning devices; and installation of breakaway signs or lighting supports, fence, impact attenuators, guardrails, or median barriers. Where a clearinghouse desires more information than would normally accompany a grouping of small scale projects, the regulations provide clearinghouses with a recourse through § 420.306(a)(1), the provision for mutually acceptable procedures between applicants and clearinghouses.

It should be noted that § 420.306(e) was revised to include a request to OMB to exempt UMTA bus replacement and operating assistance projects from the A-95 review requirements if the projects fall within the criteria established by the existing OMB exemption for FHWA traffic engineering and highway safety projects, i.e., they consist of rehabilitation or modernization of existing facilities or require no additional right-of-way. It should be noted that the proposed exemption is subject to OMB approval.

Several comments on FHWA's interim regulations indicated confusion with the relationship between the term "applicant," the A-95 review of the annual element (AE), and the "program" approval action by FHWA. For urbanized areas, the State highway agency must select those urban systems, Interstate substitution, urban extensions of primary and secondary projects, and projects on the Interstate System in which it concurs from the annual element for inclusion in the statewide "program" required by 23 U.S.C. 105. The statewide 105 program will also contain all federally assisted projects outside of urbanized areas.

A number of comments were critical of including non-Federal projects for A-95 review. It is emphasized that non-Federal projects are not subject to A-95 review and comment but are required by

the FHWA/UMTA planning/programing regulations to be included in the annual element for information only. There were some comments on whether or not UMT Act Section 16(b)(2) projects (elderly and handicapped services) are subject to A-95 review. Since 16(b)(2) projects are funded with Section 3 funds, they are subject to these regulations according to § 420.304(a)(3).

A number of sections in the interim regulations which primarily concerned non-regulatory procedures have been dropped from the final regulations. It was judged that those procedures should not be interpreted as regulatory constraints on an application for Federal assistance, but as non-regulatory guidelines. It is the intent of both FHWA and UMTA to follow these procedures to the best of our ability as they are mandated by the OMB A-95 Circular. For instance, mandatory use of Standard Form 424 both by the applicant and in response to clearinghouses by the Federal agency is flexibly interpreted recognizing that OMB may grant a waiver in the use of this form. In another instance, it was judged inconsistent with Federal goals to reduce "red tape" to require the Federal approving agency to return applications for Federal assistance that contained omissions or errors. The A-95 procedures that are absolute prerequisites to receiving FHWA or UMTA assistance are clearly set forth in these regulations. In no case will any FHWA or UMTA projects be approved that do not follow these procedures. In the third instance, a section of the interim regulations requiring rereview of applications not acted on within one year has been determined to be unnecessary. Any projects which are not completed during the year must be included in a subsequent annual element thereby automatically subjecting it to rereview.

With regard to the deletion of the requirement in the interim regulations for singling out comments on the environmental and civil rights aspects of projects for special emphasis in the documentation before Federal approval can proceed, this has been changed to reflect the breadth of subjects on which the clearinghouses are required to comment and, consequently, that the applicant must include in the project documentation. Singling out certain subjects for special consideration would result in arbitrarily diminishing the importance of other subjects for clearinghouse comment, which is not consistent with the spirit of OMB's A-95 Circular. Finally, it should be noted that § 420.306(h)(2) requires the Federal approving agency to explain its reasons for approval when a clearinghouse has recommended against the approval. By association, this includes the requirement that when the clearinghouse has recommended against approval because the project conflicts with or duplicates another Federal or federally assisted project, the funding agency will consult with the agency assisting the referenced project prior to acting. Finally, where an application for UMTA assistance is submitted by a special purpose unit of local government, UMTA will assure that the provisions of the OMB Circular A-95, Part I, Para. 6. (f) are followed.

In consideration of the foregoing, and under the authority of OMB Circular No. A-95; Pub. L. 89-754, 80 Stat. 1262, 42 U.S.C. 3334; Pub. L. 90-577, 82 Stat. 1104, 42 U.S.C. 4233; Pub. L. 91-190, 83 Stat. 852, 42 U.S.C. 4332; Pub. L. 88-352, 78 Stat. 252, 42 U.S.C. 2000; 23 U.S.C. 104(f)(3), 105, 134, 307, 315, and 324; the UMT Act (49 U.S.C. 1602, 1603, 1604, 1605, 1607(a), and 1612); 49 CFR 21.7(a); and the delegation of authority by the Secretary of Transportation at 49 CFR 1.48(b) and 1.51(f), Chapter I of Title 23 of the Code of Federal Regulations is hereby amended by adding a new Part 420, Subpart C as set forth below.

Effective date: Pursuant to Office of Management and Budget Circular A-95 as published in the January 13, 1976 edition of the FEDERAL REGISTER (41 FR 2052), these final regulations are effective on August 9, 1976.

Issued: August 4, 1976.

NORBERT T. TIEMANN,
Federal Highway Administrator.

ROBERT E. PATRICELLI,
Urban Mass Transportation Administrator.

Subpart C—Coordination of Federal and Federally Assisted Programs and Projects

§ 420.300 Purpose.

The purpose of this subpart is to implement the regulations in Office of Management and Budget (OMB) Circular No. A-95 which furnishes guidance to Federal agencies for cooperation with State and local governments in the evaluation, review, and coordination of Federal and federally assisted programs and projects.

§ 420.302 Definitions.

(a) The terms used in the subpart are as defined in OMB Circular No. A-95 (revised), Section 101(a) of Title 23, U.S.C., and the Urban Mass Transportation Act of 1964, as amended (UMT Act), except as otherwise provided.

(b) As used herein:

"Transportation Improvement Program (TIP)" means, in urbanized areas, a staged multiyear program of transportation improvements including an annual element prepared pursuant to 23 CFR Part 450, Subpart C and 49 CFR Part 613, Subpart B.

"Annual Element (AE)" means a list of transportation improvement projects proposed for implementation during the first program year.

"Statewide 105 Program" means the program or programs of proposed projects prepared by the State highway agency pursuant to 23 CFR Part 630, Subpart A.

"Applicant" means any local or State agency which applies for Federal transportation assistance, including but not limited to cities, Metropolitan Planning Organizations, transit operators, State highway agencies, and designated recipients of the Urban Mass Transportation Administration (UMTA) funds.

"Metropolitan Planning Organizations (MPO)" means that organization designated by the Governor as being responsible, together with the State, for carrying out the provisions of 23 U.S.C. 134, as provided in 23 U.S.C. 104(f)(3), and capable of meeting the requirements of Sections 3(a)(2) and (e)(1), 4(a), and 5(g)(1) and (l) of the UMT Act (49 U.S.C. 1602(a)(2) and (e)(1), 1603(a), and 1604(g)(1) and (l). This organization is the forum for cooperative decisionmaking by principal elected officials of general purpose local government.

"Unified Planning Work Program (UWP)" means the planning work program required by 23 CFR Part 450, Subpart A, and 49 CFR Part 613, Subpart A.

"Highway Planning and Research Program (HPR)" means the statewide highway planning, research and development effort described in an annual two-part statement of proposed work and estimated cost as required by 23 U.S.C. 307.

§ 420.304 Applicability.

This subpart is applicable to:

(a) The programs listed in Attachment D to OMB Circular No. A-95 or Appendix I of the Catalog of Federal Domestic Assistance, whichever bears the later date. At this time, the programs covered are as follows:

(1) 20.205 Highway Research, Planning, and Construction.

(2) 20.214 Highway Beautification—Control of Outdoor Advertising, Control of Junkyards, Landscaping, and Scenic Enhancement.

(3) 20.500 Urban Mass Transportation Capital Improvement Grants under Section 3 of the UMT Act.

(4) 20.501 Urban Mass Transportation Capital Improvement Loans under Section 3 of the UMT Act.

(5) 20.505 Urban Mass Transportation Technical Studies Grants under Section 9 of the UMT Act.

(6) 20.506 Urban Mass Transportation Demonstration Grants under Section 6 of the UMT Act.

(7) 20.507 Urban Mass Transportation Capital and Operating Assistance Formula Grants under Section 5 of the UMT Act.

(b) Direct Federal development activities including, but not limited to the

V 41 I 154 AUG 9 76 UMI

acquisition, use and disposal of Federal real property.

§ 420.306 Project notification and review system.

(a) *General.* (1) State and areawide clearinghouses and applicants shall develop mutually acceptable procedures for handling program or application notification, consultation, and review, including significant substantive changes to previously reviewed programs and applications. Conformance with the minimums set forth below in (b), (c), (d), and (e) of this section will satisfy Federal requirements for OMB Circular No. A–95 notification, consultation and review.

(2) Notification shall include a summary description of the project containing the information required by Attachment A, Part I, Paragraph 2.(a) of OMB Circular A–95 and comply with Par. 2(c).

(b) *FHWA Capital and UMTA Discretionary and Formula Capital Projects.* (1) *Urbanized areas.*—Where the MPO is the areawide clearinghouse, endorsement of the transportation improvement program/annual element (TIP/AE) will meet the areawide clearinghouse review requirements of OMB Circular No. A–95, Part I, Pars. 3 and 4, for each project in the AE. Where the MPO is not the areawide clearinghouse, the annual element and amendments thereto shall be furnished to the appropriate areawide clearinghouse for review and comment. In each case, the annual element and the amendments thereto shall be furnished to the State clearinghouse for review and comment.

(2) *All other areas.*—The State highway agency shall ensure that the appropriate areawide and State clearinghouses are provided an opportunity to review and comment on applicable portions of the Statewide 105 Program of Projects. Applicants for UMTA assistance shall furnish proposed transit projects to appropriate State and areawide clearinghouses for review and comment at the earliest feasible time.

(c) *FHWA/UMTA planning assistance projects.* (1) *Urbanized areas.*—Where the MPO is the areawide clearinghouse, endorsement of the unified planning work program (UWP) will meet the areawide clearinghouse review requirements of OMB Circular A–95, Part I, Pars. 3 and 4, for each project in the UWP. Where the MPO is not the areawide clearinghouse, the UWP shall be furnished to the appropriate areawide clearinghouse for review and comment. In each case, the UWP shall be furnished to the State clearinghouse for review and comment.

(2) *All other areas.*—The State highway agency shall ensure that the appropriate areawide and State clearinghouses are provided an opportunity to review and comment on applicable portions of Part I of the Statewide Highway, Planning and Research (HPR) Program. Applicants for UMTA planning assistance shall furnish applications for assistance to appropriate State and areawide clearinghouses at the earliest feasible time.

(d) *Other projects.* The State highway agency shall ensure that the appropriate areawide and State clearinghouses are provided an opportunity to review and comment on applicable portions of Part II of the HPR Program, except as set forth in § 420.306(e)(4). Applicants for UMTA demonstration assistance, except as set forth in § 420.306(e)(4), shall submit applications for assistance to appropriate State and areawide clearinghouses at the earliest feasible time.

(e) *Exceptions and Limitations.* (1) Traffic engineering, highway safety and other projects that consist of rehabilitation or modernization of existing facilities and that do not change the use, scale, or intensity of existing facilities or require additional right-of-way are exempt from the requirements of this section. Projects requiring major construction should not be exempted from the requirements of this section without the concurrence of the appropriate clearinghouse(s).

(2) UMTA operating assistance projects and discretionary and formula capital assistance projects which consist of replacement of capital equipment that do not change the use, scale or intensity of such facilities or require additional right-of-way, are exempt from the requirements of this section.

(3) Highway and transit projects of small scale and local impact may be exempted from the requirements of this section by agreement between the applicant and the appropriate clearinghouse(s) according to the OMB No. A–95 Circular, Part I, Par. 8(f).

(4) Experimental studies or operational tests of techniques or concepts, such as those in Part II of the annual statewide HPR program and those under UMTA Section 6, Demonstration Grants, that are as yet unproven and which require further study or demonstration to determine if they should be encouraged on a national scale, are exempt from the requirements of this section. For UMTA, operational test is defined as a controlled, non-fixed facility type project of limited duration, impacting on a small, carefully defined area of the community.

(5) In the case of applications for projects involving land or water use and development or construction in the National Capital Region (as defined in section 1(b) of the National Capital Act of 1952, as amended), a copy of the application shall be sent to the National Capital Planning Commission in addition to the areawide clearinghouse and appropriate State clearinghouses.

(f) *Clearing house review time.* Clearing houses may have a period of 30 days to review programs or applications submitted to them for certification. The procedures referred to in § 420.306(a)(1) may include an agreement for further review of certain projects at subsequent stages of development or at specified periods of time. At a clearinghouse's request, it may have an additional 30 days to review completed applications for UMTA funded projects or to review additional information furnished for FHWA funded projects

(g) *Applicant procedures.* The applicant shall include the following with a request for FHWA approval of a program of projects or for UMTA approval of a project application:

(1) Standard multipurpose form, SF 424, Federal Assistance, unless a waiver has been granted by OMB.

(2) Any comments or recommendations made by or through clearinghouses in accordance with the clearinghouse functions listed in Part I, Paragraph 3 of OMB Circular No. A–95.

(3) A statement that such comments have been considered or a statement that the procedures outlined in this subpart have been followed and that no comments or recommendations have been received.

(h) *Federal agency procedures.* (1) Within seven working days of any major action taken on a project, Statewide 105 program, or HPR program, the Federal approving agency will notify any clearinghouses that have reviewed such projects or programs. For UMTA, major action occurs at the project approval stage for each individual project. For FHWA, the major action occurs at the statewide 105 program and HPR program approval stage. The UMTA may approve an application for a project that was included in the annual element of a TIP provided that an A–95 review of the annual element in which the project is included was conducted and the documentation required under § 420.306(g) which the applicant received as a result of the review is submitted with the application. For FHWA, the project documentation required under § 420.306(g) need only be submitted with the request for Statewide 105 and HPR program approval.

(2) Where a clearinghouse has recommended against approval or for approval only with specific and major substantive changes and FHWA or UMTA approve the program or application substantially as submitted, reasons for approval will be explained in the clearinghouse notification. Where a State clearinghouse has assigned an identification number to an application, that number will be referred to in the notification. Standard Form 424, or any other form approved by OMB, will be used for notifying clearinghouses.

§ 420.308 Direct Federal development.

(a) The Federal agency will consult with Governors, State and areawide clearinghouses, and local elected officials at the earliest practicable stage of a project or plan for direct Federal development in accordance with the requirements of OMB Circular No. A–95, Part II, Par. 2. (1)–(4).

(b) The notification to State and areawide clearinghouses and Governors and local elected officials should state that review of a direct Federal project should be handled in the same way that a State or local agency application is handled as described in paragraphs (a)(2), (f), (g)(2)–(3), and (h)(1)–(2) of § 420.306.

§ 420.310 Coordination of planning in multijurisdictional areas.

(a) *Common or consistent planning and development districts or regions.* Local agencies not falling within the jurisdiction of an MPO and desiring approval for the designation or redesignation of a multijurisdictional transportation planning area will follow the procedures set out in OMB Circular No. A–95, Part IV, Par. 2. (a)–(c).

(b) *Common and consistent planning bases and coordination of related activities in multijurisdictional areas.* (1) In urbanized areas, when the MPO is different from the A–95 agency, there shall be an agreement between the two organizations which prescribes the means by which their activities will be coordinated as required by 23 CFR 450.108(b) and 49 CFR 613.100.

(2) In all other areas, if a local applicant for areawide multijurisdictional planning assistance is other than the areawide comprehensive planning agency, they shall follow the procedures set out in OMB Circular A–95, Part IV, Par. 3.

Title 49—Transportation

CHAPTER VI—URBAN MASS TRANSPORTATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

PART 613—PLANNING ASSISTANCE AND STANDARDS

Coordination of Federal and Federally Assisted Programs and Projects

● Purpose. The purpose of this document is to issue final regulations implementing OMB revised Circular No. A–95, "Evaluation, Review and Coordination of Federal and Federally Assisted Programs and Projects" (41 FR 2052, January 13, 1976.) ●

Interim regulations were issued by FHWA on November 19, 1975 (40 FR 53726), and by UMTA on March 10, 1976 (41 FR 10316), with the intention of combining the unilateral regulations in a final issuance.

The final regulations are published in full under 23 CFR Part 420, Subpart C. The purpose of the regulations published below is to incorporate 23 CFR Part 420, Subpart C, into 49 CFR Part 613, Subpart C.

The preamble to the joint FHWA/UMTA regulations, 23 CFR Part 420, Subpart C, published at page 33440 of this edition of the FEDERAL REGISTER and which are incorporated by reference in 49 CFR Part 613, Subpart C, is hereby incorporated as the preamble for the following regulations.

Pursuant to the authority of OMB Circular No. A–95; Pub. L. 89–754, 80 Stat. 1262, 42 U.S.C. 3334; Pub. L. 90–577, 82 Stat. 1104, 42 U.S.C. 4233; Pub. L. 91–190, 83 Stat. 852, 42 U.S.C. 4332; Pub. L. 88–352, 78 Stat. 252, 42 U.S.C. 2000; 23 U.S.C. 104(f)(3), 105, 134, 307, 315, and 324; the UMT Act (49 U.S.C. 1602, 1603, 1604, 1605, 1607(a), and 1612); 49 CFR 21.7(a); and the delegation of authority by the Secretary of Transportation at 49 CFR 1.48(b) and 1.51(f), Chapter VI of Title 49 of the Code of Federal Regulations is amended by adding a new Part 613, Subpart C, as set forth below.

Effective date: Pursuant to Office of Management and Budget Circular A–95 as published in the January 13, 1976 edition of the FEDERAL REGISTER (41 FR 2052), these final regulations are effective on August 9, 1976.

Issued on: August 4, 1976.

NORBERT T. TIEMANN,
Federal Highway Administrator.

ROBERT E. PATRICELLI,
Urban Mass Transportation Administrator.

Subpart C of Part 613 is added as set forth below:

Subpart C—Coordination of Federal and Federally Assisted Programs and Projects

Sec.
613.300 Coordination of Federal and federally assisted programs and projects.

AUTHORITY: Pub. L. 89–754, 80 Stat. 1262, 42 U.S.C. 3334; Pub. L. 90–577, 82 Stat. 1104, 42 U.S.C. 4233; Pub. L. 91–190, 83 Stat. 852, 42 U.S.C. 4332; Pub. L. 88–352, 78 Stat. 252, 42 U.S.C. 2000; OMB Circular A–95; 23 U.S.C. 104(f)(3), 105, 134, 307, 315, 324; 49 CFR 1.48(b) and 1.51(f); 49 CFR 21.7(a); The Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1602, 1603, 1604, 1605, 1607(a), and 1612)

Subpart C—Coordination of Federal and Federally Assisted Programs and Projects

§ 613.300 Coordination of Federal and federally assisted programs and projects.

The coordination of Federal and federally assisted programs and projects implementing OMB revised Circular No. A–95, which are set forth in 23 CFR Part 420, Subpart C, are incorporated into this subpart.

MONDAY, AUGUST 9, 1976

PART VI:

DEPARTMENT OF STATE

INFORMATION ON POLITICAL CONTRIBUTIONS AND FEES OR COMMISSIONS IN CONNECTION WITH THE SALE OF DEFENSE ARTICLES OR SERVICES

Proposed Conditions Under Which Reporting Is Required; Information To Be Furnished; and Recordkeeping

V41 I54 AUG 9 76 UMI

DEPARTMENT OF STATE

[22 CFR Part 130]

[Docket No. SD–121]

INFORMATION ON POLITICAL CONTRIBUTIONS AND FEES OR COMMISSIONS IN CONNECTION WITH THE SALE OF DEFENSE ARTICLES OR SERVICES

Proposed Conditions Under Which Reporting Is Required; the Information To Be Furnished; and Recordkeeping

Notice is hereby given that the Secretary of State proposes to amend the International Traffic in Arms Regulations (ITAR), 22 CFR Subchapter M (Parts 121–128), by adding a new Part 130 on political contributions and fees or commissions paid, or offered or agreed to be paid, in connection with the sale of defense articles or defense services under the Foreign Military Sales program (section 22 of the Arms Export Control Act, 22 U.S.C. 2762) as well as commercial sales for which licensing or other approval of exports is required under the ITAR (section 38 of the Arms Export Control Act, 22 U.S.C. 2778).

Section 604(b) of the International Security Assistance and Arms Export Control Act of 1976 (Pub. L. 94–329, 90 Stat. 767) enacted a new section 39 of the Arms Export Control Act entitled "Fees of Military Sales Agents and Other Payments." This law directs the Secretary of State to require by regulation adequate and timely reporting on political contributions, gifts, commissions and fees paid, or offered or agreed to be paid, by any person in connection with:

(a) Sales of defense articles or defense services under section 22 of the Arms Export Control Act; or

(b) Commercial sales of defense articles or defense services licensed or approved under section 38 of the Arms Export Control Act;

to or for the armed forces of a foreign country or international organization in order to solicit, promote or otherwise secure the conclusion of such sales. It also provides that such regulations shall specify the amounts and kinds of payments, offers and agreements to be reported, and the form and timing of reports, and shall require reports on the names of sales agents and other persons receiving such payments. The Secretary of State is also authorized to require by regulation such recordkeeping as he determines is necessary.

The proposed regulations divide the payments to be reported into two main categories: "Political contributions" and "fees or commissions." Both are broadly defined. "Political contribution" includes payments to any foreign public employees, officials, candidates, political parties or fractions to solicit, promote or otherwise secure the conclusion of a sale. Such payments by any person to whom a fee or commission is paid to secure a sale are included within the meaning of the term "political contribution". A payment or other form of compensation which might otherwise be regarded as a fee or commission is considered, for purposes of the proposed regulations, a political contribution if the recipient is a public official or other person identified in the definition of political contribution. However, taxes, customs duties and other similar charges required by law or regulation are not regarded as political contributions.

A "fee or commission" is essentially any payment, gift or offer which is made to solicit, promote or otherwise secure the conclusion of a sale. It includes payments made to sales representatives who are formally hired, as well as those who are not engaged pursuant to a written contract. However, "fee or commission" does not include payments solely for the purchase by an applicant, supplier or vendor of specific goods or technical, operational or advisory services which are not made in order to solicit or promote a sale and which are not disproportionate in amount with the value of the specific goods or services actually furnished. For example, such payments for transportation, storage, translation of documents and specific legal advice are not considered to be fees or commissions.

The obligation to report under the proposed regulations is occasioned by political contributions aggregating $5,000 or more, or fees or commissions (other than political contributions) aggregating $100,000 or more. In each case, the amounts to be reported include payments, in cash or in kind, made or offered, directly or indirectly, to solicit, promote or otherwise secure a sale, whether made by seller or its vendors. "Vendor" is defined as a manufacturer, subcontractor or other person from or through whom an applicant or supplier has obtained defense articles or defense services valued at $100,000 or more. Accordingly, the proposed regulations under specific circumstances oblige those vendors involved in the chain from manufacturer to exporter to supply pertinent information to the person required to report to the Office of Munitions Control. Political contributions by a representative of a party to a sales transaction are treated as political contributions by that party.

The detailed information otherwise required to be reported need not be supplied in the case of payments of less than $2,500 in the case of political contributions and $10,000 in the case of fees or commissions. A supplemental report on the details of such payments may be requested, however.

Supplemental reports are also required for relevant payments not previously reported which are made or offered or agreed to after the initial report is submitted. The maintenance of certain records is required.

Information may be designated as "confidential business information" by the applicant, supplier or vendor, and no person may publish or divulge any information so designated to any extent not authorized by law. All information reported and records maintained shall be made available, upon request, for utilization by standing committees of the Congress and subcommittees thereof, as well as by United States Government agencies in accordance with section 39(d) of the Arms Export Control Act. All reports and records identified as confidential business information shall be protected against disclosure to the extent provided by 18 U.S.C. 1905.

The text of the proposed amendment, addition of a new Part 130 to Title 22, Code of Federal Regulations, is set out below. Interested persons are invited to submit written comments, suggestions or data to the Office of Munitions Control, Bureau of Politico-Military Affairs, Department of State, Washington, D.C. 20520. Comments received on or before September 9, 1976 will be considered before final action is taken on the adoption of the proposed amendment. Copies of all written comments received will be available for inspection in the public reading room of the Department of State, 2201 C Street NW., Washington, D.C. 20520.

In addition, interested persons will be given the opportunity to offer comments orally on the proposed regulations. A public meeting for this purpose will be held at 10 a.m., September 14, 1976 in the West Auditorium, Department of State, Washington, D.C. 20520. Interested persons wishing to offer oral comments at the public meeting must submit to the Office of Munitions Control, Bureau of Politico-Military Affairs, Department of State, Washington, D.C. 20520, written notice of their intention to do so no later than September 9, 1976. Such notice must state the name of the person wishing to speak at the public meeting and the organization, if any, that person represents. Interested members of the public are invited to attend the public meeting.

These regulations are proposed to become effective on October 1, 1976 as to any application for license or approval thereafter received by the Office of Munitions Control, Department of State, or contract thereafter entered into with the Department of Defense for the sale of defense articles or defense services sold or to be sold under section 22 of the Arms Export Control Act.

In consideration of the foregoing, it is proposed to amend 22 CFR Subchapter M (Parts 121–128) by adding Part 130 to read as follows:

PART 130—INFORMATION ON POLITICAL CONTRIBUTIONS AND FEES OR COMMISSIONS IN CONNECTION WITH THE SALE OF DEFENSE ARTICLES OR SERVICES

Sec.

130.01 Definitions.
130.11 Obligation to furnish information to the Office of Munitions Control, Department of State.
130.12 Information to be furnished by applicant or supplier to the Office of Munitions Control, Department of State.
130.13 Supplementary reports.
130.21 Information to be furnished by vendor to applicant or supplier.
130.22 Information to be furnished to applicant, supplier or vendor by recipient of fee or commission.
130.23 Recordkeeping.
130.31 Confidential business information.
130.32 Other reporting requirements.
130.33 Utilization of and access to reports and records.

AUTHORITY: Sec. 604(b), Pub. L. 94–329, (90 Stat. 729) (22 U.S.C. 2779); sec. 212, Pub. L. 94–329, (90 Stat. 729) (22 U.S.C. 2778); secs. 101 and 105, E.O. 10973, 25 FR 10469.

§ 130.01 Definitions.

For the purposes of this part:

(a) "Applicant" means any person who applies to the Office of Munitions Control, Department of State, for any license or approval under this subchapter in connection with a commercial sale of defense articles or defense services to or for the armed forces of a foreign country or international organization.

(b) "Supplier" means any person who enters into a contract with the Department of Defense for the sale of defense articles or defense services under section 22 of the Arms Export Control Act (22 U.S.C. 2762).

(c) "Vendor" means any manufacturer, subcontractor or other person from or through whom an applicant or a supplier has obtained, or contracted for, directly or indirectly, defense articles or defense services, or major components thereof, valued in an amount of $100,000 or more, which form the whole or part of either:

(1) A sale requiring a license or approval from the Office of Munitions Control, Department of State; or

(2) A sale pursuant to a contract with the Department of Defense under section 22 of the Arms Export Control Act (22 U.S.C. 2762).

(d) "Political contribution" means any loan, gift, donation or other payment of $500 or more made, or offered or agreed to be made, directly or indirectly, whether in cash or in kind, which is:

(1) To or for the benefit of, or at the direction of, any foreign candidate, committee, political party, political faction, or government, or government subdivision, or any individual elected, appointed or otherwise designated as an employee or officer thereof; and

(2) For the solicitation or promotion or otherwise to secure the conclusion of a sale of defense articles or defense services to or for the armed forces of a foreign country or international organization. Taxes, customs duties, license fees, and other charges required to be paid by generally applicable law or regulation shall not be regarded as political contributions.

(e) "Fee or commission" means any loan, gift, donation or other payment of $500 or more (other than a political contribution or a payment excluded by paragraph (d) from the definition of political contribution) made, or offered or agreed to be made, directly or indirectly, whether in cash or in kind, and whether or not pursuant to a written contract, which is:

(1) To or at the direction of any person, irrespective of nationality, whether or not employed by or affiliated with an applicant, a supplier or a vendor; and

(2) For the solicitation or promotion or otherwise to secure the conclusion of a sale of defense articles or defense services to or for the armed forces of a foreign country or international organization.

The term "fee or commission" includes all payments made, or offered or agreed to be made, whatever their ostensible purpose, for representing an applicant, supplier or vendor with respect to potential sales of defense articles or defense services, by sales promotion or solicitation or any other type of activity intended to influence a procurement decision of a prospective buyer. The term "fee or commission" does not include payments made, or offered or agreed to be made, solely for the purchase by an applicant, supplier or vendor of specific goods or technical, operational or advisory services, which payments are not made, offered or agreed to in order to solicit or promote a sale and which are not disproportionate in amount with the value of the specific goods or services actually furnished.

(f) "Armed forces" means the army, navy, marine, air force and coast guard, as well as the national guard and national police, of a foreign country. This term also includes any military unit or military personnel organized under or assigned to an international organization.

§ 130.11 Obligation to furnish information to the Office of Munitions Control, Department of State.

(a) (1) Each applicant shall inform the Office of Munitions Control, Department of State, as to whether applicant and/or its vendors have paid, or offered or agreed to pay, in respect of any sale for which a license or approval is requested:

(i) Political contributions in an aggregate amount of $5,000 or more, or

(ii) Fees or commissions in an aggregate amount of $100,000 or more.

If so, applicant shall furnish to such office the information specified in § 130.12. The furnishing of such information shall be a condition precedent to the granting of the relevant license or approval.

(2) The requirements of this paragraph shall not apply in the case of an application with respect to a sale for which all information specified in § 130.12 which is required by this section to be reported shall already have been furnished.

(b) Each supplier shall inform the Office of Munitions Control, Department of State, as to whether supplier and/or its vendors have paid, or offered or agreed to pay, in respect of any sale:

(1) Political contributions in an aggregate amount of $5000 or more, or

(2) Fees or commissions in an aggregate amount of $100,000 or more.

If so, supplier shall furnish to such office the information specified in § 130.12. The information required to be furnished pursuant to this paragraph shall be so furnished no later than 30 days after the contract award to such supplier, or such earlier date as may be specified by the Department of Defense. For purposes of this paragraph, a contract award includes a purchase order, exercise of an option or other procurement action requiring a supplier to furnish defense articles or defense services to the Department of Defense for the purposes of section 22 of the Arms Export Control Act (22 U.S.C. 2672).

(c) In determining whether an applicant and/or its vendors, or a supplier and/or its vendors, as the case may be, have paid, or offered or agreed to pay, political contributions in an aggregate amount of $5,000 or more in respect of any sale so as to require a report under this section, there shall be included in the computation of such aggregate amount any political contributions in respect of the sale which are paid, by or on behalf of, or at the direction of, any person to whom the appliant, supplier or vendor has paid, or offered or agreed to pay, a fee or commission in respect of the sale. Any such political contributions shall be deemed for purposes of this part to be political contributions by the applicant, supplier or vendor who paid or offered or agreed to pay the fee or commission.

(d) Any applicant or supplier which has informed the Office of Munitions Control under this section that neither it nor its vendors have paid, or offered or agreed to pay, political contributions or fees or commissions in an aggregate amount requiring the information specified in § 130.12 to be furnished shall subsequently furnish such information within 30 days after learning that it and/or its vendors have paid, or offered or agreed to pay, political contributions or fees or commissions in respect of a sale in an aggregate amount which, if known to applicant or supplier at the time of its previous communication with the Office of Munitions Control, would have required the furnishing of information under § 130.11 at that time. Any report furnished under this paragraph shall, in addition to the information specified in § 130.12, include a detailed statement of the reasons why applicant or supplier did not furnish the information at the time specified in paragraph (a) or paragraph (b) of this section, as applicable.

§ 130.12 Information to be furnished to the Office of Munitions Control, Department of State.

(a) Every person required under § 130.11 to furnish information specified in this section in respect of any sale shall furnish to the Office of Munitions Control, Department of State:

(1) The total contract price of the sale;

(2) The name, nationality, address and principal place of business of the applicant or supplier, as the case may be, and, if applicable, its employer and title;

(3) The name, nationality, address and principal place of business, and, if applicable, employer and title of each foreign purchaser, including the ultimate end user, involved in the sale;

(4) Except sa provided in paragraph (c), a statement setting forth with respect to such sale:

V 41 154 AUG 9 76 UMI

(i) The amount of each political contribution paid, or offered or agreed to be paid, and/or the amount of each fee or commission paid, or offered or agreed to be paid;

(ii) The date or dates on which each reported amount was paid, or offered or agreed to be paid;

(iii) The recipient(s) of each such amount paid, or intended recipient(s) if not yet paid;

(iv) The person(s) who paid, or offered or agreed to pay such amount; and

(v) The aggregate amounts of political contributions and of fees or commissions, respectively, which shall have been reported.

(b) In responding to paragraph (a)(4) of this section, the statement shall:

(1) With respect to each payment reported, state whether such payment was in cash or in kind, and if in kind, include a description and valuation thereof (where precise amounts are not available because a payment has not yet been made, an estimate of the amount offered or agreed to be paid shall be provided);

(2) With respect to each recipient, state:

(i) Its name;

(ii) Its nationality;

(iii) Its address and principal place of business;

(iv) Its employer and title; and

(v) Its relationship, if any, to applicant, supplier, or vendor, and to any foreign purchases or end user.

(c) In submitting a report required by § 130.11, the detailed information specified in paragraphs (a)(4) and (b) of this section need not be included in the case of payments which do not exceed:

(1) $2,500 in the case of political contributions; and,

(2) $10,000 in the case of fees or commissions.

In lieu of reporting detailed information with respect to such payments the aggregate amount thereof shall be reported, identified as miscellaneous political contributions or miscellaneous fees or commissions, as the case may be.

(d) Every person required to furnish the information specified in paragraphs (a) and (b) of this section shall respond fully to each subdivision of those paragraphs and, where the correct response is "none" or "not applicable," shall so state.

§ 130.13 Supplementary reports.

(a) Every applicant or supplier who is required under § 130.11 to furnish the information specified in § 130.12 shall submit a supplementary report in connection with each sale in respect of which applicant or supplier has previously been required to furnish information if:

(1) Any political contributions aggregating $2,500 or more or fees or commissions aggregating $10,000 or more not previously reported are paid, or offered or agreed to be paid by applicant or supplier or any vendor;

(2) Subsequent developments cause the information initially reported to be no longer accurate or complete (as in the case where a payment actually made is substantially different in amount from a previously reported estimate of an amount offered or agreed to be paid); or

(3) Where additional details are requested by the Office of Munitions Control with respect to any miscellaneous payment or payments reported under § 130.12(c).

(b) Supplementary reports shall be sent to the Office of Munitions Control, Department of State, within 30 days after the payment, offer or agreement reported therein or, when requested by the Office of Munitions Control, within 30 days after such request, and shall include:

(1) Any information specified in § 130.12 required or requested to be reported and which was not previously reported; and

(2) The Munitions control license number(s), if any, and the Department of Defense contract number(s), if any, related to the sale.

§ 130.21 Information to be furnished by vendor to applicant or supplier.

(a) Every applicant or supplier:

(1) In order to determine whether it is obliged under § 130.11 to furnish the information specified in § 130.12 with respect to a sale; and

(2) Prior to furnishing such information to the Office of Munitions Control, Department of State, shall obtain from each vendor, if any, from or through whom the applicant acquired defense articles or defense services forming the whole or a part of the sale, and such vender shall forthwith furnish to such applicant or supplier upon the latter's request, a timely statement containing a full disclosure by the vendor of all political contributions or fees or commissions paid, or offered or agreed to be paid, by vendor with respect to such sale. Such disclosure shall include responses to all the information pertaining to vendor required to enable applicant or supplier, as the case may be, to comply fully with §§ 130.11 and 130.12.

(b) At the time of making its request of a vendor under paragraph (a) of this section, the applicant or supplier shall also request the vendor to furnish from time to time such supplementary reports as may be necessary to enable the applicant or supplier, as the case may be, to comply fully with §§ 130.11, 130.12 and 130.13. Each vendor shall submit such supplementary reports in a timely manner.

(c) Applicant or supplier shall include any political contributions and any fees or commissions paid, or offered or agreed to be paid, by each vendor in determining whether applicant or supplier is required under § 130.11 to furnish information specified in § 130.12, and if so required, shall include the information furnished by each vendor in providing the information specified.

(d) Any vendor which has been requested by an applicant or supplier to furnish an initial statement under paragraph (a) of this section shall furnish such statement in a timely manner and not later than 20 days of receipt of such request.

(e)(1) If upon the 25th day after the date of its request to vendor, applicant or supplier has not received from vendor the initial statement required by paragraph (a) of this section, the applicant or supplier shall submit to the Office of Munitions Control a signed statement attesting to:

(i) The manner and extent of applicant's or supplier's attempt to obtain from vendor the initial statement required under paragraph (a) of this section;

(ii) Vendor's failure to comply with paragraphs (a) and (d) of this section; and

(iii) The amount of time which has elapsed between the date of applicant's or supplier's request and the date of the signed statement;

(2) The failure of a vendor to comply with paragraph (a)(2) or (d) of this section shall not relieve any applicant or supplier otherwise required by § 130.11 to submit a report to the Office of Munitions Control, Department of State, from submitting such a report.

§ 130.22 Information to be furnished to applicant, supplier or vendor by recipient of fee or commission.

(a) Every applicant or supplier, and each vendor thereof:

(1) In order to determine whether it is obliged under §§ 130.11 or 130.21 to furnish information specified in § 130.12, with respect to a sale; and

(2) Prior to furnishing such information shall obtain from each person, if any, to whom it has paid, or offered or agreed to pay, a fee or commission in respect of such sale a timely statement containing a full disclosure by such person of all political contributions paid, or offered or agreed to be paid, by it or on its behalf, or at its direction, in respect of such sale. Such disclosure shall include responses to all the information required to enable the applicant, supplier or vendor, as the case may be, to comply fully with §§ 130.11, 130.12 and 130.21.

(b) In obtaining information under paragraph (a) of this section, the applicant, supplier or vendor, as the case may be, shall also require each person to whom a fee or commission is paid, or offered or agreed to be paid, to furnish from time to time such reports of its political contributions as may be necessary to enable the applicant, supplier or vendor, as the case may be, to comply fully with §§ 130.11, 130.12, 130.13 and 130.21.

(c) The applicant, supplier or vendor, as the case may be, shall include any political contributions paid, or offered or agreed to be paid, by or on behalf of, or at the direction of, any person to whom it has paid, or offered or agreed to pay, a fee or commission in determining whether applicant supplier or vendor is required by §§ 130.11, 130.13 or 130.21 to furnish information specified in § 130.12.

§ 130.23 Recordkeeping.

Each applicant, supplier and vendor shall maintain a record of any information it was required to furnish or obtain under this part and all records upon

which its reports are based for a period of not less than six years following the date of the report to which they pertain.

§ 130.31 Confidential business information.

(a) Any applicant, supplier or vendor who is required to furnish information under this part may identify any information furnished hereunder which it considers confidential business information. No person, including any applicant or supplier, shall publish, divulge, disclose or make known in any manner, or to any extent, not authorized by law or regulation any information so identified by a vendor or other person.

(b) For purposes of this section, "confidential business information" means commercial or financial information which by law is entitled to protection from disclosure. (See, e.g., 5 U.S.C. 552(b)(4); 18 U.S.C. 1905, Rule 26(c)(7), Federal Rules of Civil Procedure).

§ 130.32 Other reporting requirements.

The submission of reports under this part does not relieve any person of any requirements to furnish information to any federal, state or municipal agency, department or other instrumentality as required by law, regulation or contract.

§ 130.33 Utilization of and access to reports and records.

(a) All information reported and records maintained under this part shall be made available, upon request, for utilization by standing committees of the Congress and subcommittees thereof, and by United States Government agencies, in accordance with section 39(d) of the Arms Export Control Act (22 U.S.C 2779(d)), and reports based upon such information shall be submitted to Congress in accordance with sections 36(a)(8) and 36(b)(1) of that Act (22 U.S.C. 2776(a)(8) and (b)(1)).

(b) All reports and records identified by an applicant, supplier or vendor as confidential business information under § 130.31 shall be protected against disclosure in their utilization to the extent provided in 18 U.S.C. 1905.

Effective date: This part becomes effective on October 1, 1976, as to any

(a) Application for license or approval thereafter received by the Office of Munitions Control, Department of State; or

(b) Contract thereafter entered into with the Department of Defense for the sale of defense articles or defense services sold or to be sold under section 22 of the Arms Export Control Act (22 U.S.C. 2762), on or after that date.

(Sec. 604(b), Pub. L. 94-329, (90 Stat. 729) (22 U.S.C. 2779); sec. 212, Pub. L. 94-329, (90 Stat. 729) (22 U.S.C. 2778); secs. 101 and 105, E.O. 10973, 25 F.R. 10469.)

CARLYLE E. MAW,
Under Secretary of State for Security Assistance.

DIRECTORY OF FEDERAL REGIONAL STRUCTURE

V 41 I 154 AUG 9 76 UMI

DIRECTORY OF FEDERAL REGIONAL STRUCTURE

This directory of Federal agency regional structure is designed to give practical information about regional offices of Federal departments and agencies.

The Standard Federal Regional Boundaries System was established in 1969 to streamline Federal field office operations and encourage Federal-State-local interchange. Boundaries were drawn and regional office locations designated for 10 regions, and agencies urged to adopt the uniform system. A map of the Standard Federal Regions, and tables of the agencies conforming to this system can be found on pages 33454 to 33463.

The regional maps of agencies not conforming to the uniform regional system begin on page 33463. Each map is accompanied by a table showing addresses, telephone numbers, and key officials for all regions.

The information contained in this directory was compiled with agency assistance, as of May 1, 1976.

FRED J. EMERY,
Director, Office of
the Federal Register.

would you like to know

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the "Cumulative List of CFR Sections Affected," the "Federal Register Index," or both.

Cumulative List of CFR Sections Affected **$10.00** per year

The "Cumulative List of CFR Sections Affected" is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index **$8.00** per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the "Cumulative List of CFR Sections Affected" will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:
Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

There is enclosed $_____ for _____ subscription(s) to the publications checked below:

..... **CUMULATIVE LIST OF CFR SECTIONS AFFECTED ($10.00 a year domestic; $12.50 foreign)**
..... **FEDERAL REGISTER INDEX ($8.00 a year domestic; $10.00 foreign)**

reminders

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.)

Rules Going Into Effect Today

NOTE: There were no items eligible for inclusion in the list of RULES GOING INTO EFFECT TODAY.

List of Public Laws

This is a continuing numerical listing of public bills which have become law, together with the law number, the title, the date of approval, and the U.S. Statutes citation. The list is kept current in the FEDERAL REGISTER and copies of the laws may be obtained from the U.S. Government Printing Office.

S. 2054..... Pub. Law 94–376
To amend sections 203 and 204 of the Communications Act of 1934
(Aug. 4, 1976; 90 Stat. 1080)

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: Questions, corrections, or requests for information regarding the contents of this issue only may be made by dialing 202–523–5286. For information on obtaining extra copies, please call 202–523–5240. To obtain advance information from recorded highlights of selected documents to appear in the next issue, dial 202–523–5022.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of Agriculture

Section 213.3313 is amended to show that two additional positions of Confidential Assistant to the Deputy Under Secretary for Congressional and Public Affairs are excepted under Schedule C.

Effective August 10, 1976, § 213.3313 (c) (6) is amended as set out below:

§ 213.3313 Department of Agriculture.

• • • • • •

(c) *Office of the Under Secretary.* • • •

(6) Eleven Confidential Assistants to the Deputy Under Secretary for Congressional and Public Affairs.

• • • • • •

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.76-23264 Filed 8-9-76;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Agriculture

Section 213.3313 is amended to show that one position of Assistant Deputy Administrator, Programs is excepted under Schedule C.

Effective August 10, 1976, § 213.3313 (h) (2) is added as set out below:

§ 213.3313 Department of Agriculture.

• • • • • •

(h) *Agricultural Stabilization and Conservation Service.* • • •

(2) One Assistant Deputy Administrator, Programs.

• • • • • •

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.76-23265 Filed 8-9-76;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Housing and Urban Development

Due to reorganization, § 213.3384(b) is amended to show that the functions formerly under the Assistant Secretary for Housing Management and the Assistant Secretary for Housing Production and Mortgage Credit (Federal Housing Administration Commissioner) have been merged into the new Assistant Secretary for Housing—Federal Housing Commissioner. It is further amended to show that the position of Deputy Assistant Secretary for Housing—Deputy Federal Housing Commissioner is excepted under Schedule C.

Effective August 10, 1976, the headnote of § 213.3384(b) is amended and § 213.3384(b) (5) is added as set out below:

§ 213.3384 Department of Housing and Urban Development.

• • • • • •

(b) *Office of the Assistant Secretary for Housing—Federal Housing Commissioner.* • • •

(5) Deputy Assistant Secretary for Housing—Deputy Federal Housing Commissioner.

• • • • • •

(5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.76-23262 Filed 8-9-76;8:45 am]

PART 213—EXCEPTED SERVICE

Department of the Interior

Section 213.3312 is amended to show that one position of Special Assistant to the Director (American Samoa) is excepted under Schedule C.

Effective August 10, 1976, § 213.3312 (l) (4) is added as set out below:

§ 213.3312 Department of the Interior.

• • • • • •

(l) *Office of the Director of Territorial Affairs.* • • •

(4) One Special Assistant to the Director (American Samoa).

• • • • • •

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.76-23263 Filed 8-9-76;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Labor

Section 213.3315 is amended to show that one position of Staff Assistant to the Secretary and one position of Executive Assistant to the Assistant Secretary for Labor-Management Relations are excepted under Schedule C. This section is further amended to show that the following positions are no longer excepted under Schedule C; one position of Special Assistant to the Secretary, one position of Private Secretary to the Secretary, and one position of Assistant to the Assistant Secretary for Labor-Management Relations.

Effective August 10, 1976, §§ 213.3315 (a) (1) and (a) (6) are amended and § 213.315(a) (50) is added as set out below:

§ 213.3315 Department of Labor.

(a) *Office of the Secretary.* (1) One Special Assistant, one Confidential Assistant, and two Staff Assistants to the Secretary.

• • • • • •

(6) One Assistant to each Assistant Secretary for Labor appointed by the President, except the Assistant Secretary for Manpower and the Assistant Secretary for Labor-Management Relations.

• • • • • •

(50) One Executive Assistant to the Assistant Secretary for Labor-Management Relations.

• • • • • •

(5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.76-23266 Filed 8-9-76;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Labor

Section 213.3315 is amended to show that one position of Staff Assistant to the Under Secretary is no longer excepted under Schedule C and that one position of Executive Assistant to the Under Secretary is expected under Schedule C.

Effective August 10, 1976, § 213.3315 (a) (43) is revoked and § 213.3315(a) (49) is added as set out below:

§ 213.3315 Department of Labor.

(a) *Office of the Secretary.* • • •

(43) [Revoked]

• • • • • •

(49) One Executive Assistant to the Under Secretary.

• • • • • •

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

V 41 155 AUG 10 76 UMI

Title 7—Agriculture

CHAPTER XVII—RURAL ELECTRIFICATION ADMINISTRATION, DEPARTMENT OF AGRICULTURE

PART 1701—PUBLIC INFORMATION

Appendix A—REA Bulletins

Part 1701, Title 7, is hereby amended to include revisions to the Appendix A listing and summary description of REA bulletins and supplements thereto providing the program policies and requirements of the Rural Electrification Administration. The revision reflects both new and revised REA bulletins issued after publication in the FEDERAL REGISTER under proposed rule making procedures to secure public comment and participation.

Public comments were received on REA Bulletin 384–3, General Specifications for Common Control Office Equipment, included in this update of the complete Appendix A listing published in the FEDERAL REGISTER of April 9, 1975, (40 FR 16074). There were no public comments or suggestions received on other proposed revisions of REA bulletins issued in this period.

The comments on the proposed revision of REA Bulletin 384–3 pointed out that metals used in the construction of its relay or switch contacts were not listed in the specifications for this purpose. They further stated that relay or switch contacts made with their metals would meet the electrical and technical requirements of the specification.

REA agreed to broaden the provision in the specification to allow, upon REA's acceptance, the use of materials other than those listed.

The following listings of revised REA bulletins and the summary descriptions of bulletins add to or replace existing listings in Appendix A to Part 1701 (40 FR 16074).

APPENDIX A—REA BULLETINS

REA bulletin number and date of last issuance	*Description of content*
JOINT RURAL ELECTRIFICATION AND TELEPHONE PROGRAM BULLETINS	
40–2:340–5; Apr. 1976.	Insurance Requirements of REA borrowers, contractors, engineers, architects, including bonding requirements for borrowers' contractors.
RURAL ELECTRIFICATION PROGRAM BULLETINS	
43–5; July 1975 (additional supplements).	Supplements dated Oct. 1975, and Jan. and Apr. 1976, amending the July 1975 basic list of materials acceptable to REA for use on systems of REA electric borrowers.
44–1; Jan. 1973 (added).	Added to correct the omission of this bulletin, stating REA requirements concerning specifications for materials and equipment, from the Apr. 9, 1975, Appendix A listing in the FEDERAL REGISTER.
RURAL ELECTRIFICATION PROGRAM BULLETINS—Continued	
120–1; July 1970 (additional supplement).	A supplement dated June 1976 concerning the deletion of REA Form 342.
184–2; Sept. 1973 (additional supplement).	A supplement dated Mar. 1976 concerning REA's blanket work order procedure.
RURAL TELEPHONE PROGRAM BULLETINS	
344–2; Jan. 1975	Supplements 3 and 4 dated Jan. and May 1976, respectively, amending the Jan. 1975 basic list of materials acceptable to REA for use on systems of REA telephone borrowers.
346–56; Mar. 1976 (replacing Aug. 1972).	Specifications of REA for station carrier equipment installed on borrowers' telephone systems.
345–63; May 1976 (replacing Nov. 1970).	The standards for REA acceptance tests and measurements of telephone plant installed on borrowers' telephone systems.
384–3; Feb. 1976 (replacing Aug. 1973).	The procedure of REA for the use of central office contracts and specifications by telephone borrowers.
408–1; Nov. 1970 (additional Supplement).	A supplement dated June 1976 to this bulletin concerning the reporting of carrier equipment and carrier maintenance expenses on REA Form 479A.

Dated: July 30, 1976.

DAVID A. HAMIL,
Administrator.

[FR Doc.76-23062 Filed 8-9-76;8:45 am]

Title 12—Banks and Banking

CHAPTER VI—FARM CREDIT ADMINISTRATION

FARM CREDIT SYSTEM

Organization; Funding; General Provisions

The Farm Credit Administration, by its Federal Farm Credit Board, took final action on amendments to its regulations and authorized their issuance effective July 27, 1976. These amendments: (1) Clarify when retirements may be made of Federal intermediate credit bank Class B stock, participation certificates, and allocated legal reserve, (2) Increase the limitation on compensation of district board members, (3) Require the district board to adopt a policy applicable to expenses of spouses, (4) Clarify the limitation on special assignments of district board members, and (5) Clarify the application of travel regulations adopted by the district board.

By a notice published in the FEDERAL REGISTER on June 21, 1976, interested persons were afforded the opportunity to file written comments or suggestions on the first amendment listed above by July 21, 1976. Three comments were received. As a result, § 5320(b)(3)(ii) was revised. The other amendments were adopted by the Federal Farm Credit Board in final form after notice to the Farm Credit districts and an opportunity for each of them to make comments. All comments received were considered by the Federal Board in arriving at the final regulations. For these reasons, it is found as to these amendments that notice of proposed rulemaking provided for in 5 U.S.C. 553 is unnecessary. Copies of communications received on all amendments are available for examination by interested persons in the Office of Director, Information Division, Office of Administration, Farm Credit Administration.

Chapter VI of Title 12 of the Code of Federal Regulations is amended by revising § 611.1020, adding § 611.1022, and revising §§ 611.1031, 615.5320, and 618.8270, as follows:

PART 611—ORGANIZATION

§ 611.1020 Compensation of district board members.

Directors may be compensated for attendance at board meetings and special assignments, including reasonable travel time from and to their residences. Such compensation shall not exceed $125 per day plus reasonable travel, actual subsistence, and other related expenses incurred in connection with such meetings and assignments. Compensation at the regular per diem rate for normal travel time to and from board meetings and special assignments, when the distance and meeting or special assignment schedule involved require travel on any portion of the day prior to or following the meeting or special assignment date, may be allowed on a full-day basis, or on a part of a full-day basis in increments of half-days, as authorized in a policy established by the board. Travel time in excess of one full day may be permitted under unusual conditions if provided for in the policy of the board.

§ 611.1022 Reimbursement for expenses of district board members.

Each district board shall adopt a policy which will identify and justify the events or occasions, if any, where travel and subsistence for directors' spouses is a necessary expense for which reimbursement will be made.

§ 611.1031 Limitation on special assignments.

Special assignments requiring service in one calendar year totaling more than 30 days (not counting time needed for attendance at board meetings) must have prior approval of the Farm Credit Administration. Prior approval is hereby given for the following and they may be excluded from the 30-day limitation: attendance at the National Farm Credit Directors Conferences; meetings of the Fiscal Agency Committee; meetings of the Governing Body of Farmbank Services; meetings of the District Directors Policy Coordinating Committee; and attendance at a particular time or place requested by the Farm Credit Administration.

PART 615—FUNDING AND FISCAL AFFAIRS

§ 615.5320 Retirement of Federal intermediate credit bank class B stock, participation certificates, and allocated legal reserve.

(a) When there is no stock held by the Governor, the bank may retire class B stock at par, participation certificates at face amount, and allocated legal reserve at fair book value without preference to all holders thereof and in such manner that the oldest outstanding stock, participation certificates, or allocated legal reserve will be retired first provided that after such retirements, the net worth structure of the bank meets the minimum requirements approved by the Farm Credit Administration.

(b) Notwithstanding the provisions of paragraph (a) of this section, the following shall be applicable:

(1) Class B stock, participation certificates, and allocated legal reserve may be retired at fair book value thereof, not exceeding par or face amount as the case may be, in the event of an equalization of the ownership by production credit associations of capital stock, participation certificates, and allocated legal reserve of the bank, whether in connection with an assessment for capital stock or otherwise, provided that when an association surrenders stock, participation certificates, or allocated legal reserve, it shall first surrender that which was acquired by purchase to the extent available and thereafter, surrender that acquired by patronage distributions from the bank;

(2) When authorized by the bank board, class B stock, participation certificates, and allocated legal reserve may be retired at the fair book value thereof, not exceeding par value or face amount as the case may be:

(i) In the case of total or partial liquidation of the debt of a production credit association or an other financing institution which is in default;

(ii) In case of liquidation or dissolution of a production credit association under § 611.1130 of these regulations; or

(iii) In case of liquidation or dissolution of an other financing institution.

(3) The bank board may authorize the retirement of unimpaired participation certificates at face amount and allocated legal reserve at fair book value owned by an other financing institution as follows:

(i) Upon termination of the financing agreement; or,

(ii) If the participation certificates were purchased and are in excess of the capital needed to support the amount of credit outstanding. The board may delegate to bank management authority to approve such retirements within prescribed bank policy guidelines.

PART 618—GENERAL PROVISIONS

§ 618.8270 Travel.

Travel and subsistence expenses of directors, officials and employees of the banks, and their spouses where appropriate, shall be allowed in accordance with travel regulations adopted by the district board. Similar travel regulations shall be prescribed for directors, officials and employees of associations by the supervising bank under policy established by the district board or shall be developed and adopted by the board of directors of the associations under district board policy and approved by the bank. The regulations shall contain a statement of policy on the use of official cars for private use and will take into consideration regulations issued by the Internal Revenue Service which are applicable to the employer.

(Secs. 5.9, 5.12, 5.18, 85 Stat. 619, 620, 621)

W. M. HARDING,
Governor,
Farm Credit Administration.

[FR Doc.76-23177 Filed 8-9-76;8:45 am]

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

[Revision 2]

PART 105—STANDARDS OF CONDUCT

Correction

In FR Doc. 76-20744 published July 19, 1976 (41 FR 29656) the following preface should have been included.

The Small Business Administration has completely revised its Standards of Conduct for employees, making both technical and substantive changes in the code for employees' conduct.

The revision of the regulation has involved extensive reorganization and editing, deletion of obsolete provisions, and addition of new provisions and procedures. Some of the more significant changes are as follows:

GENERAL REVISIONS

1. Even where the substance of a regulation is not changed, the language and format often are changed extensively in the interest of clarity.

2. The currently designated Ad Hoc Committee for reviewing ethics and conflicts questions is renamed the Standards of Conduct Committee.

3. Except where specifically noted in the revision, standards of conduct for both "employees" and "Special Government Employees" are the same.

4. The revised regulations provide guidelines and criteria for Standards of Conduct Committee consideration of a matter wherever possible. This is done both to assist the Committee and the employees in using the regulations.

5. Unlike the previous regulations, this Revision will not track the language of criminal statutes from which certain regulatory provisions are derived. The purpose of this change is to adapt the ethical concept involved to regulatory needs and format rather than simply following the statutory language which is designed for a different criminal law purpose. Generally, this will result in a broadening of the scope and effect of the regulation and will result in greater ease in administration by the Agency and understanding by employees.

6. The numbering system for the regulation is changed in the interests of administrative convenience and clarity.

SPECIFIC REVISIONS

(1) *Section 105.101.* Section 105.101 generally follows the Purpose clause in the previous regulations. A provision is added, however, to point out that SBA administers only its own regulations, and that definitive interpretations and decisions regarding other laws can be obtained only from the administering agency. For example, criminal statutes, from which some SBA "conflicts" regulations are derived, are administered by the Department of Justice.

(2) *Section 105.201.* New definitions are provided in this Section for "Employee", "Person", "Member of Household", "his" and "SBA Assistance." These new definitions are generally technical in effect. The generally broad definition of "SBA Assistance", however, can have significant substantive effect, since proscriptions in the regulations often relate to recipients of and applicants for "SBA Assistance."

(3) *Section 105.301.* The General Requirements of Section 105.301 reposition in one place similar statements previously scattered throughout Revision No. 1.

(4) *Sections 105.403–404.* The "post-employment" limitations derived from 15 USC 642 are made more meaningful in the revision by providing specific enforcement authority against a recipient of "SBA Assistance" which retains a former employee in derogation of the regulation. Secondly, these limitations are extended to situations where applicants for SBA assistance have former SBA employees as owners, creditors, debtors or stockholders, as well as employees. Furthermore, the regulation is clarified by specifying the limitations in terms of assistance applicants which are associated by employment or business interest with former SBA officials as well as in terms of post employment of the former employees.

(5) *Section 105.501.* Section 105.501 deals with "conflicts" arising where an employee acts in a representative capacity for or receives compensation from another party in a matter in which the Government has an interest. The revision adapts the language of the companion criminal statute, rather than tracking it, in order to suit its regulatory needs.

This is a provision where the exception for "Special Government Employees" is retained, but in a slightly narrower version. As changed, a "Special Government Employee" may appear in a case against the Government, but only if the matter is not pending at SBA during his service as a "Special Government Employee", he was not personally involved in the matter, and the matter had not been subject to his official responsibility, either as a "Special Government Employee" or otherwise. The latter "official responsibility" restriction is new.

V 41 155 AUG 10 76 UMI

(6) *Section 105.502.* Section 105.502 deals with "conflicts" arising where an employee receives compensation in connection with his official duties from a non-Government source. That provision in Revision No. 1, based upon 18 USC 209, followed the criminal statute in exempting "Special Government Employees" from its restrictions. This revision would delete the exemption for "Special Government Employees" insofar as the regulation is concerned on the ground that the "conflicts" danger is equal, if not greater, for "Special Government Employees". This would result in the SBA "conflicts" regulation being more restrictive to this extent than the criminal statute upon which it is based.

(7) *Section 105.503.* One of the exceptions in the previous regulations to the "no gifts" rule relates to gifts from family members. This exception has been expanded to include gifts of a "personal" nature.

An exception to the "no gifts" rule is provided for business lunches and refreshments of nominal value. This is a new provision.

(8) *Section 105.056.* The previous regulations separately treated SBA employees' interests in Small Business Investment Companies and in other concerns receiving SBA assistance. The proposed revision would combine the limitations under a common rule prohibiting purchases of interests in applicants for, and recipients of, SBA assistance but permitting retention if approved by the Standards of Conduct Committee. This latter provision is designed to accommodate situations where the interests were acquired prior to the SBA employment or where the acquisition may have been passive, for example, by inheritance.

The revised rules would add employee interests in financial institutions participating in SBA programs to the proscribed interests. In effect, this would apply the restrictive rules of this provision to the ownership of bank and similar stock.

The current regulation, which tracks 18 USC 208, prohibits employee participation in matters involving the employee's "financial interests." The proposed revision expands this limitation, insofar as the regulation is concerned, to include all interests (e.g., employment, membership). The revision would grant exemptive authority from this proscription to the Standards of Conduct Committee. However, exemptive approval would still be required from the Administrator where the interest in question was "financial", thus conforming with the requirements of 18 USC 208.

Also, in connection with the problem of employee involvement in official matters relating to his personal financial interests, the current regulations provide exemptions where debt interests are not in excess of $10,000 and equity interests are less than $10,000 and 1 percent of equity. The proposed revision deletes these dollar and ownership percentage exemptions, on the ground that they cannot be equitably or effectively applied either from the Government's or the employee's point of view. For example, a $10,000 debt interest might be insignificant to an affluent employee, while to a less affluent employee, it could constitute a considerable "conflicts" temptation. Experience indicates that the problems can more effectively be handled on a case-by-case basis by the Standards of Conduct Committee, and that full disclosure is more important to the Agency than the satisfaction of an arbitrary standard.

The previous regulation requiring a Certificate of Compliance from new employees is deleted. It is reasoned that the regulations apply to all employees regardless of whether they provide such a certificate. It is noted that this change in no way prevents the Office of Personnel from obtaining such a certificate from new employees.

The previous regulations confine the limitations against SBA assistance to concerns in which employees have an ownership interest to those cases where the interest is 10 percent or more. This percentage limitation is deleted from the revision on the grounds that it is not flexible enough. For example, 9 percent or even 1 percent ownership in a particular "SBA assistance" recipient by an employee might raise a serious "conflicts" question. Experience indicates that the matter can be handled effectively by the Standards of Conduct Committee on a case-by-case basis, and that full disclosure is more important to the Agency than the satisfaction of an arbitrary standard.

(9) *Section 105.509.* Subsection (4) of this provision is new. It is added to make it clear that false statements to the detriment of the Government or another employee are within the scope of proscribed conduct.

(10) *Section 105.510.* Express guidelines for consideration of outside employment requests are provided in the revision.

(11) *Section 105.511.* The requirement to file Confidential Statements of Employment and Financial Interests is changed to include all employees involved in discretionary activities rather than merely those at GS–13 and above, as is the case under the current regulations. In SBA's decentralized organization, many of the field personnel immediately involved in the approval and disbursement of loans and other SBA assistance are under the GS–13 level.

The current regulations specify that incumbents in certain high ranking agency positions must file Statements solely by virtue of their official positions. In order to avoid the technical difficulties that arise when position titles are changed or new positions are added, the revision would require "ex officio" filing from all employees classified at Executive Levels IV & V and GS–17 and 18.

The revised rules provide greater precision and guidance regarding the mechanics of filing Statements, e.g., the determination as to who must file, with whom, and how, filing should be effected.

The present distinction in filing requirements between regular employees and "Special Government Employees" is eliminated. It is reasoned that "Special Government Employees" are subject to equal, if not greater, "conflicts" dangers as regular employees and thus should be subject to at least the same reporting requirements.

(12) *Section 105.517.* The current regulation requires employees to report possible irregularities in official functions to the Director of Personnel. The revision would add the Director, Security & Investigations Division, as a required recipient of such reports.

(13) *Section 105.518.* This revised regulation is a new provision expressly requiring employee compliance with all rules, regulations and official directions. It is intended to delineate clearly the full scope of an employee's responsibilities.

(14) *Section 105.519.* The revision transfers approval authority for exceptions to the antigambling rule from the Administrator to the Director of Personnel.

(15) *Section 105.601.* The current regulation requires Ad Hoc [Standards of Conduct] Committee approval for SBA assistance to persons employed by other Government agencies at GS–13 and above or equivalent and a letter of "no objection" from the other Government department in the case of employees under GS–13. Experience has demonstrated that this is excessive regulation, resulting in the creation of unnecessary administrative work and documentation. The revision would merely require a letter of "no objection" for employees GS–13 and above. No approval procedure for other employees would be required.

The revision establishes a new requirement that assistance to officers and employees of the legislative and judicial branches of the U.S. Government can be granted only with Standards of Conduct Committee approval.

(16) *Section 105.602.* The revision would add a new provision requiring Standards of Conduct Committee approval for SBA assistance to SCORE and ACE volunteers. In addition, criteria for this Committee review are provided in the regulation.

Because Part 105 consists of rules relating to Agency management and personnel, adoption of the revised regulations through the rulemaking procedure prescribed in 5 USC 553 is not required and this revised Part 105 is hereby adopted without resort to those procedures. In accordance with Agency policy, however, interested persons may submit written comments concerning the revised Part 105 to Mr. Donald W. Farrell, Associate General Counsel, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

This revision of Part 105 was approved by the Civil Service Commission on June 11, 1976, and shall be effective August 10, 1976.

Dated: July 12, 1976.

MITCHELL P. KOBELINSKI,
Administrator.

[FR Doc.76–23221 Filed 8–9–76;8:45 am]

[Rev. 3, Amdt. 10]

PART 122—BUSINESS LOANS

Guaranteed Loans—Notification of Default

The Small Business Administration is amending its business loan regulations to further modify the requirement for notification to SBA by participating lenders regarding borrower default on loans as previously amended by Revision 3, Amendments 7 and 8, 41 FR 10415, 41 FR 16146.

In lieu of the prior requirement that SBA receive written notification within 45 or 90 days of default with the provision for termination of the guaranty if notification is not received within 90 days, the revised provision will require receipt of notification within 45 days of default. Where SBA receives written notice of uncured default after 45 days from the date of default by the borrower, the lender shall not be entitled to receive at any time accrued interest on the guaranteed portion of unpaid principal of the loan from the date of default by the borrower to the date of receipt by SBA of written notice of said default. The amendment also prescribes the methods whereby late receipt or nonreceipt of written notification of default may be excused. If SBA receives notification more than 45 days after default, SBA will determine before it purchases the guaranteed portion whether the untimely notification caused any substantial harm to the Government.

Since this amendment is less restrictive than the regulations it replaces and will be beneficial to loan participants without imposing any additional burden on small business borrowers, it is not necessary or appropriate to invite public comment prior to its adoption. This amendment will, therefore, be effective on August 10, 1976. However, any comments on this amendment may be submitted to the Associate Administrator for Finance and Investment, Small Business Administration, 1441 L St. NW., Washington, D.C. 20416. Until such time as further changes are made on the basis of the comments thus received or otherwise, § 122.10 (a)(1) and (b)(1) as set forth hereinafter shall remain in effect.

Pursuant to the authority of 72 Stat. 387, as amended, 15 U.S.C. 636, sec. 5, 72 Stat. 385, 15 U.S.C. 634, Part 122 of Chapter I of Title 13 of the Code of Federal Regulations is hereby amended, by revising §§ 122.10 (a)(1) and (b)(1) thereof to read as follows:

§ 122.10 Guaranteed loans.

(a) *Individually guaranteed loans.* (1) Individually guaranteed loans are loans made by a lender to small business concerns under a Guaranty Agreement between SBA and the lender which is applicable only to a specific loan to an identified small business concern. Under such a Guaranty Agreement, SBA is obligated to purchase not more than 90 percent of the outstanding balance of the loan authorized thereunder, together with accrued interest, in the event the borrower has defaulted for not less than 60 days. SBA also has the right to purchase at any time the guaranteed percentage of the loan. Written notification of any uncured default on a guaranteed loan hereunder shall be received by SBA within 45 days after such default. (Default as used in this subparagraph means nonpayment of principal or interest on the due date.) Where SBA receives written notice of uncured default after 45 days from the date of default by the borrower, the lender shall not be entitled to receive at any time accrued interest on the guaranteed portion of unpaid principal of the loan from the date of default by the borrower to the date of receipt by SBA of written notice of said default; *Provided, however,* That SBA shall not purchase the guaranteed percentage unless SBA shall first determine that said delay in notification of default did not cause any substantial harm to the Government. Late receipt or nonreceipt of such required notice within 45 days by SBA will be excused only where written notification was sent by registered or certified mail not later than the fifth day, or by mailgram not later than the third day prior to the forty-fifth day after the original date of the uncured default. The evidence to establish the date of mailing shall be the U.S. Postal Service postmark on the wrapper or on the original receipt from the U.S. Postal Service. The evidence to establish the date of transmission by mailgram shall be the automatic date indication appearing on the mailgram. If the postmark in the case of mail or the automatic date indication in the case of a mailgram is illegible, the notification date shall be established by the best evidence available. The lender shall be responsible to establish and to retain evidence of delivery of the required written notification to SBA.

* * * * *

(b) *Simplified blanket guaranty loans.* (1) Simplified blanket guaranteed loans are loans made by a lender under a Guaranty Agreement between SBA and the lender which is applicable to future loans to small business concerns as authorized by SBA. Under such a Guaranty Agreement, SBA is obligated to purchase not more than 90 percent of the outstanding balance of each loan authorized thereunder together with accrued interest in the event the borrower has defaulted for not less than 60 days. SBA also has the right to purchase at any time the guaranteed percentage of any loan. Any eligible loan which the lender would make only with the guaranty of SBA may be authorized by SBA under said Guaranty Agreement. Written notification of any uncured default in any guaranteed loan shall be received by SBA within 45 days after such default. (Default as used in this subparagraph means nonpayment of principal or interest on the due date.) Where SBA receives written notice of uncured default after 45 days from the date of default by the borrower, the lender shall not be entitled to receive at any time accrued interest on the guaranteed portion of unpaid principal of the loan from the date of default by the borrower to the date of receipt by SBA of written notice of said default; *Provided, however,* That SBA shall not purchase the guaranteed percentage unless SBA shall first determine that said delay in notification of default did not cause any substantial harm to the Government. Late receipt or nonreceipt of notice within 45 days by SBA will be excused only where written notification was sent by registered or certified mail not later than the fifth day, or by mailgram not later than the third day prior to the forty-fifth day after the original date of the uncured default.

The evidence to establish the date of mailing shall be the U.S. Postal Service postmark on the wrapper or on the original receipt from the U.S. Postal Service. The evidence to establish the date of transmission by mailgram shall be the automatic date indication appearing on the mailgram. If the postmark in the case of mail or the automatic date indication in the case of a mailgram is illegible, the notification date shall be established by the best evidence available. The lender shall be responsible to establish and to retain evidence of delivery of the required written notification to SBA.

Title 20—Employees' Benefits

CHAPTER III—SOCIAL SECURITY ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[Reg. No. 10]

PART 410—FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969, AS AMENDED, TITLE IV—BLACK LUNG BENEFITS (1969.....)

Subpart C—Relationship and Dependency

REQUIREMENTS FOR ENTITLEMENT TO CHILD'S BENEFITS

On April 1, 1976, there was published in the FEDERAL REGISTER (41 FR 13940) a notice of proposed rulemaking with proposed amendment to Subpart C, Regulations No. 10. The amendment revises the regulations with respect to the determination of an individual's status as a child of a miner or his widow.

Section 402(g) of the Federal Coal Mine Health and Safety Act, as amended, 30 USC 902(g), provides, in part, that "an individual's status as the 'child' of" a miner or [his] widow "shall be made in accordance with section 216(h) (2) or (3) of the Social Security Act as if such miner or widow were the 'insured individual' referred to therein." Section 216 (h)(3), 42 U.S.C. 416(h)(3) provides, in pertinent part, that a child born out of wedlock to an insured individual entitled to old age insurance benefits or disability

V 41 155 AUG 10 76 UMI

insurance benefits is a "child" of the insured individual for purposes of entitlement to child's insurance benefits if the insured individual was decreed by a court to be the child's father or was ordered by a court to contribute to the child's support because the child is his or her son or daughter, or acknowledged in writing that the child is his or her son or daughter, prior to the beneficiary's entitlement to benefits; or is shown to be the child's father by other satisfactory evidence and was living with the child or contributing to the child's support at the time the insured individual became entitled to benefits.

Under present black lung benefit regulations, certain children born out of wedlock to a beneficiary after the latter's entitlement to black lung benefits has begun are precluded from being considered a "child" for purposes of such benefits. The proposed amendment changes the regulations to conform with the U.S. Supreme Court's decision in *Jimenez v. Weinbeger*, 417 U.S. 628 (1974), which declared unconstitutional the time requirements for meeting the support test, in section 216(h)(3)(B). Thus the time of determining an individual's status as a "child" of a miner or his widow is proposed to be changed from the time of the miner's or widow's entitlement to black lung benefits to the time the miner or widow died or the request for augmented benefits is made. This change would be effective with respect to benefit payments for months beginning June 1974. It is contemplated that the change will affect a very small number of claimants since it would apply in the case of a child born out of wedlock to a beneficiary who is entitled, or if now deceased at the time of death was entitled, to black lung benefits under Part B of title IV of the Federal Coal Mine Health and Safety Act, as amended, and such child was born after such beneficiary became entitled to such benefits. The proposed amendment is in conformity with the corresponding amendments to the regulations applicable to title II of the social security program (20 CFR 404.1101(e)) published in final form in the FEDERAL REGISTER on July 10, 1975, at 40 FR 29072.

After the publication of the Notice of Proposed Rule Making, interested persons were given the opportunity to submit, within 30 days, data, views or arguments with regard to the proposed changes. The comment period has expired, and no adverse comments were received. The proposed amendment is hereby adopted without change and is set forth below.

(Secs. 402(g), 411(a), 426(a), 508, Federal Coal Mine Health and Safety Act of 1969, as amended, 86 Stat. 152, 83 Stat. 793, as amended; 83 Stat. 798; 83 Stat. 803 (30 U.S.C. 902(g), 921(a), 936(a), 957).)

This amendment shall be effective on August 10, 1976.

(Catalog of Federal Domestic Assistance Program No. 13,806, Special Benefits for Disabled Coal Miners.)

Dated: July 9, 1976.

J. B. CARDWELL,
Commissioner of Social Security.

Approved: August 4, 1976.

DAVID MATHEWS,
Secretary of Health, Education, and Welfare.

Part 410 of Chapter III of title 20 of the Code of Federal Regulations is amended by adding paragraph (g) to § 410.330 to read as follows:

§ 410.330 Determination of relationship; child.

As used in this section, the term "beneficiary" means only a widow entitled to benefits at the time of her death (see § 410.211), or a minor, except where there is a specific reference to the "father" only, in which case it means only a minor. An individual will be considered to be the child of a beneficiary if:

• • • • • •

(g) Such individual is the natural son or daughter of a beneficiary but does not have the relationship of child to such beneficiary under paragraph (a), (b), or (c) of this section, and is not considered to be the child of the beneficiary under paragraph (d) or (e) of this section, such individual shall nevertheless be considered to be the child of such beneficiary for months no earlier than June 1974, if:

(1) Such beneficiary has acknowledged in writing that the individual is his son or daughter, or has been decreed by a court to be the father of the individual, or he has been ordered by a court to contribute to the support of the individual (see § 410.395(c)) because the individual is his son or daughter; and in the case of a deceased individual such acknowledgement, court decree, or court order was made before the death of such beneficiary; or

(2) Such beneficiary is shown by satisfactory evidence to be the father of the individual and was living with or contributing to the support of the individual at the time such request for benefits is made.

[FR Doc.76-23198 Filed 8-9-76;8:45 am]

Title 22—Foreign Relations

CHAPTER VI—UNITED STATES ARMS CONTROL AND DISARMAMENT AGENCY

PART 606—CONDUCT OF EMPLOYEES

Subpart G—Statements of Employment and Financial Interests

EMPLOYEES REQUIRED TO SUBMIT STATEMENTS

Paragraph (a) of § 606.735–71 lists the employees who are required to submit statements of employment and financial interest and paragraph (a) of § 606.735–72 references that list. The Agency is revising these paragraphs in order to reflect more specifically the criteria to be followed by the Agency in determining which employees will be required to submit statements, and to ensure that the list of positions occupied by such employees, available for inspection in the Agency's Personnel Office, is periodically reviewed and kept up-to-date.

Because these amendments relate to Agency management and personnel, notice of proposed rulemaking is not required pursuant to 5 U.S.C. 553. Accordingly, 22 CFR Part 606 is hereby amended as follows effective on August 10, 1976.

1. Section 606.735–71 is amended by revising paragraph (a) to read as follows:

§ 606.735–71 Employees required to submit statements.

(a) (1) The following employees of ACDA (including persons assigned or loaned to ACDA) are required to submit statements of employment and financial interests:

(i) Employees paid at a level of the Executive Schedule in subchapter II of Chapter 53 of Title 5, United States Code.

(ii) Employees classified at GS–13 and above or equivalent pay level who execute or approve the award of contracts, or engage in activities in which the final decision or action may have a significant economic impact on the interests of any business enterprise.

(iii) All special Government employees.

(2) The ACDA Executive Officer shall review all Agency positions at least annually to assure that the position description for each position occupied by employees listed in paragraph (a) (1) of this section includes a statement that the incumbent of the position must file a statement of employment and financial interests as required by this section. This review, and any necessary modifications of position descriptions, may be accomplished at the time performance or efficiency ratings are given, or incident to other prescribed annual reviews. A list of positions affected by this section will be available for inspection in the ACDA Personnel Office. Determinations by the Executive Officer as to the applicability of this section will be subject to review by the Director of ACDA.

2. Section 606.735–72 is amended by revising the first sentence to read as follows:

§ 606.735–72 Submission of statements and supplementary statements.

(a) *Regular officers and employees.* Each regular officer and employee (including persons assigned or loand to ACDA) occupying a position covered by one of the categories described in § 606.735–71(a) must submit a fully completed ACDA Form 18 in duplicate to the Office of the General Counsel no later than 30 days after occupying such position. • • •

• • • • • •

Dated: August 2, 1976.

JOHN LEHMAN,
Acting Director.

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-2247]

PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

Status of Participating Communities

• The purpose of this notice is to list those communities wherein the sale of flood insurance is authorized under the National Flood Insurance Program (42 U.S.C. 4001–4128). •

Insurance policies can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurers Association servicing company for the state (addresses are published at 40 FR 57210–212 and 41 FR 1062). A list of servicing companies is also available from the Federal Insurance Administration (FIA), HUD, 451 Seventh Street SW., Washington, D.C. 20410.

The Flood Disaster Protection Act of 1973 requires the purchase of flood insurance as a condition of receiving any form of Federal or Federally related financial purposes in a flood plain area having special hazards within any community identified by the Secretary of Housing and Urban Development.

The requirement applies to all identified special flood hazard areas within the United States, and no such financial assistance can legally be provided for acquisition or construction in these areas unless the community has entered the program. Accordingly, for communities listed under this Part no such restriction exists, although insurance, if required, must be purchased.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

Section 1914.4 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence new entries to the table. In each entry, a complete chronology of effective dates appears for each listed community. The date that appears in the fourth column of the table is provided in order to designate the effective date of the authorization of the sale of flood insurance in the area under the emergency or the regular flood insurance program. These dates serve notice only for the purposes of granting relief, and not for the application of sanctions, within the meaning of 5 U.S.C. § 551. The entry reads as follows:

§ 1914.4 List of Eligible Communities.

State	County	Location	Effective date of authorization of sale of flood insurance for area	Hazard area identified	Community No.

Issued: July 29, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[FR Doc.76-22999 Filed 8-9-76;8:45 am]

[Docket No. FI-2244]

PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

Status of Participating Communities

• The purpose of this notice is to list those communities wherein the sale of flood insurance is authorized under the National Flood Insurance Program (42 U.S.C. 4001–4128). •

Insurance policies can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurers Association servicing company for the state (addresses are published at 40 FR 57210–212 and 41 FR 1062). A list of servicing companies is also available from the Federal Insurance Administration (FIA), HUD, 451 Seventh Street SW, Washington, D.C. 20410.

The Flood Disaster Protection Act of 1973 requires the purchase of flood insurance as a condition of receiving any form of Federal or Federally related financial assistance for acquisition or construction purposes in a flood plain area having special hazards within any community identified by the Secretary of Housing and Urban Development.

The requirement applies to all identified special flood hazard areas within the United States, and no such financial assistance can legally be provided for acquisition or construction in these areas unless the community has entered the program. Accordingly, for communities listed under this Part no such restriction exists, although insurance, if required, must be purchased.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

Section 1914.4 of Part 1914 of Subchapter E of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence new entries to the table. In each entry, a complete chronology of effective dates appears for each listed community. The date that appears in the fourth column of the table is provided in order to designate the effective date of the authorization of the sale of flood insurance in the area under the emergency or the regular flood insurance program. These dates serve notice only for the purposes of granting relief, and not for the application of sanctions, within the meaning of 5 U.S.C. § 551. The entry reads as follows:

[Docket No. FI-942]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for City of Charles City, Floyd County, Iowa

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (§ 1917.10)), hereby gives notice of his finnal determinations of flood elevations for the City of Charles City, Floyd County, Iowa under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at City Hall Lobby, City Hall, 105 Milwaukee Mall, Charles City, Iowa.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
Cedar River	Corporate limits	994.5	260	(1)
	College Ave. (extended)	996.0	120	390
	U.S. Highway 18	996.9	150	−40
	Joslin St. (extended)	1,002.5	410	230
Hyers Creek	Riverside Avenue Bridge	1,005.7	1,040	(1)
	Grand Ave.	1,009.9	1,670	360
	Corporate limits	1,003.5	140	200
Shermans Creek	U.S. Highway 218	1,004.0	350	220
	Corporate limits	1,008.9	220	140

[1] Outside corporate limits.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: July 27, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-940]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for City of Chillicothe, Peoria County, Illinois

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (§ 1917.10)), hereby gives notice of his final determinations of flood elevations for the City of Chillicothe, Peoria County, Illinois under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Counter at City Hall, 908 North Second Street, Chillicothe, Illinois.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
Illinois River	Park Blvd.	460	210	
	Clover Dale Rd.	460	80	
	Hickory St.	460	490	
	Sycamore St.	460	440	
	Beech St.	460	490	
	Elm St.	460	410	
	Walnut St.	460	280	
	Pine St.	460	290	
	Chestnut St.	460	300	
	Cedar St.	460	420	
	Ash St.	460	490	
	Trult St.	460	400	
	Oak St.	460	280	

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: July 27, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-945]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for City of East Orange, New Jersey

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973, (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.10)), hereby gives notice of the final determinations of flood elevations for City of East Orange, New Jersey under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at 44 City Hall Plaza, East Orange, New Jersey 07019.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width from shoreline or bank of stream (facing downstream) to 100-yr flood boundary (feet)	
			Right	Left
Nishuane Brook	Hayward St	150	(1)	100
	Dodd St	116		200
	Erie Lackawanna R.R	145	150	150
Second River	Springdale Ave	145	200	300
	North Park St	144	50	150
	Rustic Bridge	126	50	50

[1] To corporate limits.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: July 29, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-939]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for City of Prescott, Yavapai County, Arizona

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.10)), hereby gives notice of his final determinations of flood elevations for the City of Prescott, Yavapai County, Arizona under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain mangement in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the City Hall Lobby, City Hall, 201 South Cartez Street, Prescott, Arizona.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream

[Docket No. FI-945]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for Town of Clinton, New Jersey

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.10)), hereby gives notice of the final determinations of flood elevations for Town of Clinton, New Jersey under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Town must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at Town Hall, 43 Lehigh Street, Clinton, New Jersey 08809.

V 41 155 AUG 10 76 UMI

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width from shoreline or bank of stream (facing downstream) to 100-yr flood boundary (feet)	
			Right	Left
South Branch Raritan River.	West Main St.	191	0	1,475
	Main and East Main St.	193	20	(1)
	Halstead St.	200	300	0
Beaver Brook	Lehigh St.	193	250	910

(1) Total length of street.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: July 30, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-948]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for Town of West Seneca, Erie County, N.Y.

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (§ 1917.10)), hereby gives notice of his final determinations of flood elevations for the Town of West Seneca, Erie County, New York under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Town must adopt flood plain mangement measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Meeting Room, Town Hall, 1250 Union Road, West Seneca, New York.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
Cayuga Creek	Harlan Rd.	594.0	70	110
	Clinton St.	596.1	100	(1)
	North corporate limits	600.6	590	(1)
Buffalo Creek	Penn Central R.R.	608.1	110	140

Title 25—Indians

CHAPTER I—BUREAU OF INDIAN AFFAIRS, DEPARTMENT OF THE INTERIOR

SUBCHAPTER F—ENROLLMENT

PART 41—PREPARATION OF ROLLS OF INDIANS

Qualifications for Enrollment and Deadline for Filing Applications—Apache Tribe of Oklahoma

AUGUST 5, 1976.

This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Commissioner of Indian Affairs by 230 DM 2.

The authority to issue regulations is vested in the Secretary of the Interior by 5 U.S.C. 301 and sections 463 and 465 of the Revised Statutes (25 U.S.C. 2 and 9).

On page 26021 of the FEDERAL REGISTER of June 24, 1976 (41 FR 26021), there was published a notice of proposed rulemaking to amend § 41.3, Part 41, Subchapter F, Chapter I of Title 25 of the Code of Federal Regulations by adding a new paragraph designated (aa). The amendment was proposed to carry out the provisions of the plan, developed under the Indian Judgment Fund Act of 1973, for the use and distribution of funds derived from a judgment awarded the Kiowa, Comanche and Apache Indians by the Indian Claims Commission. The plan become effective June 8, 1976.

The amendment specifies requirements for enrollment and establishes a deadline for filing applications for enrollment as a member of the Apache Tribe.

Interested persons were given 30 days in which to submit written comments, suggestions or objections. No comments, suggestions or objections were received.

The only change made in the text of the amendment is the insertion of an actual deadline date for filing enrollment applications. Accordingly, with that change, the proposed amendment is hereby adopted and is set forth below.

The 30-day deferred effective date would delay completion of the roll and apportionment of the funds among the three tribes concerned and distribution of shares to eligible enrollees. Therefore, the 30-day deferred effective date is dispensed with under the exception provided in subsection (d)(3) of 5 U.S.C. 553 (1970). Accordingly, this amendment will become effective August 10, 1976.

JOSE A. ZUNI,
Acting Deputy Commissioner of Indian Affairs.

The new paragraph (aa) is added to § 41.3 of Part 41, Subchapter F, Chapter I of Title 25 of the Code of Federal Regulations and reads as follows:

§ 41.3 Qualifications for enrollment and the deadline for filing applications.

* * * * *

(aa) *Apache Tribe of Oklahoma.* (1) For the purpose of preparing a roll of members of the Apache Tribe of Oklahoma to be used as the basis for distributing funds derived from a judgment awarded in Indian Claims Commission Dockets 257 and 259–A the following persons shall be included as members, provided they were born on or prior to and living on June 8, 1976, and provided further they have not received land or money by virtue of being enrolled as members of another tribe:

(i) All persons of Apache Indian or captive blood who received an allotment of land as members of the Apache Tribe under the Act of June 6, 1900 (31 Stat. 672), and subsequent Acts, shall be included as fullblood members of the Apache Tribe of Oklahoma.

(ii) All living direct descendants by blood of allottees, including captives, eligible for membership under the provisions of paragraph (aa)(1)(i) of this section (i) who possess at least one-fourth (¼) degree Apache Indian or captive blood, as defined and derived from paragraph (aa)(1)(i) of this section provided they file an application for enrollment.

(2) Applications for enrollment as members of the Apache Tribe of Oklahoma to share in the per capita distribution of the judgment funds must be filed with the Area Director, Bureau of Indian Affairs, Post Office Box 368, Anadarko, Oklahoma 73005, and must be received by the Director no later than close of business September 10, 1976.

(3) Appeals from rejected applications shall be handled in accordance with Part 42 of this Chapter.

[FR Doc.76-23274 Filed 8-9-76;8:45 am]

Title 29—Labor

CHAPTER XIV—EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

PART 1602—RECORDS AND REPORTS

Subpart E—Apprenticeship Recordkeeping

STANDARD RACE/ETHNIC CATEGORIES

In memoranda from the Office of Management and Budget and the General Accounting Office dated April 15, 1975, and September 9, 1975, respectively, the Commission was advised that its survey forms must use the standard race/ethnic categories. On April 27, 1976, there was published in the FEDERAL REGISTER (41 FR 17601) a notice of the change to the standard race/ethnic categories on the EEO–1, EEO–2, EEO–2E, and EEO–3 reports. This necessitates a revision of the categories for applicant identification in 29 CFR 1602.20(b). The change to the standard race/ethnic categories is one of nomenclature and not substance. The change does not involve a significant departure from the prior definitions. This amendment is entirely administrative in nature. Therefore the public rulemaking process is inappropriate and is waived. Amendment will become effective on August 10, 1976.

By virtue of the authority vested in it by section 713(a) of Title VII of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000e–12(a)), 78 Stat. 265, the Equal Employment Opportunity Commission hereby amends Title 29, Chapter XIV, § 1602.20 as follows:

1. Section 1602.20 is amended by revising paragraph (b) as follows:

§ 1602.20 Records to be made or kept.

* * * * *

(b) Every employer, labor organization, and joint labor-management committee subject to Title VII which controls an apprenticeship program (regardless of any joint or individual obligation to file a report) shall, beginning August 1, 1967, maintain a list in chronological order containing the names and addresses of all persons who have applied to participate in the apprenticeship program, including the dates on which such applications were received. (See section 709(c), Title VII, Civil Rights Act of 1964.) Such list shall contain a notation of the sex of the applicant and of the applicant's identification as "White," "Black," "Hispanic," "Asian or Pacific Islander" or "American Indian or Alaskan Native." The methods of making such identification are set forth in the instruction accompanying Report EEO–2. The words "applied," "applicant" and "application" as used in this section refer to situations involving actual applications only. An applicant is considered to be a person who files a formal application, or in some informal way indicates a specific intention to be considered for admission to the apprenticeship program. A person who casually appears to make an informal inquiry about the program, or about apprenticeship in general, is not considered to be an applicant. The term "apprenticeship program" as used herein refers to programs described in the instructions accompanying Report EEO–2.

* * * * *

It is hereby certified that the revised regulation has been assessed for the need of an Inflationary Impact Statement. Because of the minor nature of the changes, this revision does not require an Inflationary Impact Statement.

Signed at Washington, D.C., on this 4th day of August 1976.

ETHEL BENT WALSH,
Vice Chairman, Equal Employment Opportunity Commission.

[FR Doc.76-23176 Filed 8-9-76;8:45 am]

Title 42—Public Health

CHAPTER I—PUBLIC HEALTH SERVICE, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 110—HEALTH MAINTENANCE ORGANIZATIONS

Subpart E—Loans and Loan Guarantees for Initial Operating Costs

DEFINITION OF "OPERATING COST"

On October 18, 1974, there was published in the FEDERAL REGISTER (39 FR 37308–37323) a regulation implementing certain provisions of the Health Maintenance Organization Act of 1973, Pub. L. 93–222, which enacted Title XIII of the Public Health Service Act, 42 U.S.C. 300e et seq. Section 1305 of the PHS Act, 42 U.S.C. 300e–4, authorizes the Secretary of Health, Education, and Welfare to provide loan and loan guarantee assistance to certain health maintenance organizations "* * * to assist them in meeting the amount by which their operating costs in the period of the first thirty-six months of their operation exceed their revenues in that period." The definition of the term "operating cost" included in the October 18, 1974, regulation (42 CFR 110.502(a)) has, in the course of operation, proved to be too restrictive in that it excludes from the scope of such term (and hence reduces the amount of loan assistance) certain costs which the Department views as being reasonable and necessary costs of operating a health maintenance organization, such as the repayment of the principal of existing loans, payments into reserve funds required by State law, and accounts payable at the beginning of the thirty-six month period of assistance. Accordingly, the Department has concluded that 42 CFR 110.502(a) should be amended.

Because immediate corrective action is necessary to implement the loan and loan guarantee programs without imposing undue hardships on those health maintenance organizations whose thirty-six months period of assistance will soon begin, the Department has concluded that notice and public procedure thereon are impractical and contrary to the public interest and has found good cause for their omission. As a rule which relieves a restriction, this amendment will be effective August 10, 1976.

Effective date: This amendment shall be effective August 10, 1976.

Dated: May 7, 1976.

JAMES F. DICKSON,
Acting Assistant Secretary for Health.

Approved: August 4, 1976.

DAVID MATHEWS,
Secretary.

42 CFR Part 110 is amended by revising § 110.502(a) to read as follows:

§ 110.502 Definitions.

(a) "Operating cost" means any cost which under generally accepted accounting principles or under accounting practices prescribed or permitted by State regulatory authority is not a capital cost and which is incurred on or after the first day of the applicable period of operation or expansion as defined in paragraph (b) of this section: *Provided*, That payments made by a health maintenance organization during such applicable period to reduce balance sheet liabilities existing at the beginning of such period are operating costs to the extent that they are expressly approved by the Secretary at the time the loan or loan guarantee is made.

* * * * *

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 121d—EARLY EDUCATION FOR HANDICAPPED CHILDREN

Subpart C—Implementation of Statewide Early Education Plans

Notice of proposed rulemaking was published in the FEDERAL REGISTER on March 17, 1976 (41 FR 11180–11181) setting forth a proposed amendment to Title 45 of the Code of Federal Regulations which would add a new Subpart C to Part 121d. These regulations would govern the administration of awards for Statewide early education plans (under section 624 of the Education of the Handicapped Act, 20 U.S.C. 1424). The proposed regulation set forth rules and criteria to govern awards to State Educational Agencies for the implementation of these Statewide plans for preschool and early education for handicapped children, and the acceleration of special services to those children.

Under section 431(b)(2)(A) of the General Education Provisions Act (20 U.S.C. 1232(b)(2)(A)) interested parties were invited to comment on the proposed regulation. These comments were considered in writing the final regulation. The following comments were sent to the Office of Education. After the summary of each comment, a response is set forth stating changes which have been made in the regulation or the reasons why no change is necessary. The comments are arranged in the order of the sections of the final regulations.

SUMMARY OF COMMENTS AND RESPONSES

1. SECTION 121d.3 APPLICATIONS

Comment. A commenter suggested that the words "comprehensive services" be removed from proposed § 121d.53(a)(2) and that the phrase "related services" be inserted.

Response. The term "comprehensive services" has been deleted and the term "special education and related services" has been inserted to be consistent with the amendments to the Education of the Handicapped Act made by Pub. L. 94–142 (The Education of All Handicapped Children Act).

Comment. A commenter stated that proposed §121d.53(a)(3) may encourage an unnecessary categorization of preschool children.

Response. No change has been made in the regulation. The Office of Education shares the concern regarding the possible adverse effects of categorization of children. However, grouping handicapped children according to their needs is the most practical method of assessing early education needs and of providing special education and related services under the Statewide plan. Further, grouping by need is not the same as labeling children and should not create the problem raised by the commenter.

Comment. A commenter suggested that proposed § 121d.53(a)(2), which relates to strategies for providing services, may be redundant with proposed § 121d.53(a)(3), which relates to procedures for grouping children according to their needs.

Response. No change has been made in the regulation. The sections are not redundant. Strategies for providing services and a description of procedures for grouping children to enable them to receive those services are different activities and should be stated separately in the Statewide plan.

2. DEFINITION

Comment. A commenter suggested that a definition of "Statewide plan for preschool and early education for handicapped children" be included in the regulation.

Response. No change has been made in the regulation. The terms used in the phrase are used in their normal meanings.

3. RELATIONSHIP OF THE REGULATIONS WITH THE EDUCATION OF ALL HANDICAPPED CHILDREN ACT, PUB. L. 94–142

Comment. A commenter suggested that the preamble to the final regulations clarify the relationship between the Statewide plan for preschool and early education for all handicapped children and the individualized education program required by Pub. L. 94–142. Another commenter suggested that a new subpart be added to the regulation which would require the States to plan for the extension of the procedural safeguards as specified in section 615 of Pub. L. 94–142, to include all preschool educational programs.

Response. No change has been made in the regulation. Regulations under Pub. L. 94–142 will be published separately in the FEDERAL REGISTER. In addition, § 121d.53(c) requires that an application describe the relationship of the Statewide plan to Part B of the Education of the Handicapped Act, as amended by Pub. L. 94–142. Statewide plans under this subpart would be for providing early education and preschool programs for all children of that age group. An individualized education program under Part B would be for a particular child. Further, it should be noted that a State will not be required under Part B to provide education to its children aged 3–5 if it "would be inconsistent with State law or or practice, or the order of any court, respecting public education in the State." (Section 612(2)(B) of the Education of the Handicapped Act, added by Pub. L. 94–142. Effective October 1, 1977.)

Comment. A commenter suggested that § 121d.53(b) be expanded to require that the States' "maintenance of effort in preschool education for the handicapped shall not be less than the States' effort at the time Pub. L. 94–142 was signed."

Response. No change has been made in the regulation. As stated above, regulations to implement Pub. L. 94–142 will be issued separately. However, there is no requirement in that statute for the type of rule suggested by the commenter.

Comment. A commenter suggested that a review of the States' rules and procedures under proposed § 121.53(b) should include a review of all departments of State government which provide education for preschool handicapped children. It was suggested that this review should include recommendations for bringing the State into compliance with section 613(a)(11) of the Education of the Handicapped Act.

Response. No change has been made in the regulation. The suggestion relates to a State plan for all handicapped children. As with the other suggestions for implementing Pub. L. 94–142, it is not within the statutory scope of this program to impose such a requirement. These regulations are only to assist State efforts to provide services to preschool and early childhood handicaped children. Section 121.53(b) provides for an application which includes a review of existing State rules, policies, procedures and goals for the preschool and early education of handicapped children. In addition, § 121d.53(f) requires a description of efforts to coordinate the services of Statewide programs to accelerate services to meet the needs of these children.

After consideration of all comments, Title 45 of the Code of Federal Regulations is amended by adding a new Subpart C to Part 121d to read as set forth below.

Effective date. Pursuant to section 431(d) of the General Education Provisions Act, as amended (20 U.S.C. 1232(d)), this regulation has been transmitted to the Congress concurrently with the publication in the FEDERAL REGISTER. That section provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmission, subject to the provisions therein concerning Congressional action and adjournment.

(Catalog of Federal Domestic Assistance 13.444, Handicapped Early Childhood Assistance.)

Dated: July 15, 1976.

Approved: August 4, 1976.

WILLIAM F. PIERCE,
Acting U.S. Commissioner of Education.

MARJORIE LYNCH,
Acting Secretary of Health, Education, and Welfare.

Subpart C—Implementation of Statewide Early Education Plans

Sec.
121d.50 Eligible parties.
121d.51 Purpose.
121d.52 Other applicable regulations.
121d.53 Applications.
121d.54 Criteria for selection of applications.

AUTHORITY: Sec. 624, Education of the Handicapped (20 U.S.C. 1424).

Subpart C—Implementation of Statewide Early Education Plans

§ 121d.50 Eligible parties.

Parties eligible to receive awards under this subpart are State Educational Agencies.

(20 U.S.C. 1424)

§ 121d.51 Purpose.

Payment of Federal funds under this subpart may be made for the purpose of assisting eligible parties in the implementation of Statewide plans for preschool and early education for handicapped children, and the acceleration of special services to those children.

(20 U.S.C. 1424)

§ 121d.52 Other applicable regulations.

(a) Funds provided under this subpart are subject to applicable provisions contained in Parts 100, 100a, 121, and 121e of this chapter.

(b) Subpart A (Early Education Projects) of this part shall not apply to funds provided under this subpart.

(20 U.S.C. 1424)

§ 121d.53 Applications.

An application under this subpart shall include: (a) A detailed Statewide plan for preschool and early education (as defined in § 121d.15) for all handicapped children in that State, which includes:

(1) A description including the age level and handicapping conditions of those children;

(2) Strategies for the provision of special education and related services for all of those children;

(3) A description of procedures for grouping those children according to their individual needs of special problems, for the provision of special services under the Statewide plan;

(4) A discussion of the overall goals and objectives of the Statewide plan;

(5) A timetable for the implementation of those goals and objectives for preschool and early education; and

(6) Strategies for providing parental participation in activities to be carried out under the Statewide plan.

(b) A review of existing State rules, policies, procedures and goals for the preschool and early education of handicapped children;

(c) A discussion of the relationship of the Statewide plan to the State's annual program plan under Part B of the Act;

(d) Strategies for training professional and allied personnel engaged in or preparing to engage in preschool or early education programs for handicapped children;

(e) A description of research and information gathering activities which are necessary to provide a full range of comprehensive services to meet the special needs or problems of handicapped children and their families;

(f) Plans for the development and coordination of programs which will accelerate special services to handicapped children throughout the State;

(g) A discussion of the anticipated impact of the Statewide plan on the handicapped preschool and early education population; and

(h) A description (including background and time commitment) of the staff (which may include an early childhood specialist at least half-time) to carry out the Statewide plan and activities under that plan.

(20 U.S.C. 1231d, 1424)

§ 121d.54 Criteria for selection of applications.

Applications submitted under this subpart will be evaluated under the criteria set forth in § 100a.26(b) of this chapter.

(20 U.S.C. 1424)

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20655; RM-2563]

PART 73—RADIO BROADCAST SERVICES

Television Broadcast Stations; Table of Assignments

In the Matter of Amendment of § 73.606(b), table of assignments, television broadcast stations. (Cumberland and Oakland, Maryland.)

1. The Commission here considers comments received on a proposal to reassign Channel *36 from Cumberland, Maryland, to Oakland, Maryland, made in a Notice of Proposed Rule Making, 40 FR 59451, adopted December 11, 1975. The assignment is sought by the Maryland Center for Public Broadcasting (MCPB), the public broadcasting authority for the state of Maryland, which states that it is chartered by the Maryland General Assembly to develop, operate, and maintain a system of state, regional and local facilities to provide educational cultural television programming in the state.

2. As discussed in the Notice, MCPB has determined that Garrett County (in which Oakland is located) lacks public television service whereas Allegany County (in which Cumberland is located) is adequately served by public television from WWPB–TV in Hagerstown, as well as cable services. MCPB in its comments restates its position that the establishment of an educational television broadcast facility at Oakland, an area of the state where there is presently no Maryland public television service, represents a much more efficient use of resources than establishment of such a facility at Cumberland where a high percentage of the population already receives public television service. MCPB states its intention to apply for and establish a new television facility to serve the educational television programming needs of the people in that area if Channel *36 is assigned to Oakland.

3. Comments supporting the reassignment were also received from Tim Dugan, County Planning Director for Garrett County. Dugan informs us that the Garrett County Planning Commission has reviewed the petition and confirms that the facts of the case are correctly stated, and that locating Channel *36 at Oakland would be the most effective way to extend educational television coverage to the largest portion of Garrett County's population. The Planning Commission supports the proposal and states that it would be an exceptionally beneficial compliment to local educational agencies. There were no comments filed in opposition to the proposal.

4. The Commission finds the proposed reassignment to be in the public interest. The TV Table of Assignments was established before state plans for educational television service. The proposed change will allow the state to provide educational services to its citizens with greater efficiency and at lower cost. There being no opposition, and in view of the foregoing, the Commission is persuaded that a sufficient public interest showing has been made to warrant adopting the proposal.

5. Accordingly, it is hereby ordered, That the Television Table of Assignments (§ 73.606(b) of our Rules) is hereby amended effective September 13, 1976, with respect to the Maryland cities listed below:

City:	*Channel No.*
Cumberland	52+, 65
Oakland	*36+

6. The Commission's authority for the above action is contained in Sections 4(i), 5(d)(1), 303 (g) and (r) of the Communications Act of 1934, as amended, and Section 0.281 of the FCC Rules and Regulations.

7. It is further ordered, That this proceeding is terminated.

V 41 155 AUG 10 76 UMI

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; 47 U.S.C. 154, 165, 305.)

Adopted: July 29, 1976.

Released: August 4, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[FR Doc.76-23203 Filed 8-9-76;8:45 am]

[Docket No. 20803; RM-2629]

PART 73—RADIO BROADCAST SERVICES

Television Broadcast Stations; Table of Assignments

In the matter of amendment of § 73.606(b), table of assignments, television broadcast stations. (Park Falls, Wisconsin.)

1. The Commission has under consideration its Notice of Proposed Rule Making adopted May 11, 1976 (41 Fed. Reg. 20707), proposing the assignment of Channel 36 to Park Falls, Wisconsin, as a reserved noncommercial educational channel. Petitioner, The State of Wisconsin—Educational Communications Board (ECB) is the only commenting party.

2. Park Falls (pop. 2,953)[1] is located in Price County (pop. 14,520) in the northern part of Wisconsin. It has no local television service. The subject assignment has been proposed to provide a first educational service to 75,600 persons, or 57% of the population within the proposed station's service area. Presently ECB is licensed or affiliated with 7 stations throughout the state.[2]

3. Petitioner states in comments that Park Falls is located in a remote region and that educational and cultural resources are lacking in the area. For example, American Indian leaders in the area, which includes four reservations, regard the proposed assignment as an opportunity to further the education of the general public about Indian heritage. As stated in the Notice, the assignment of Channel *36 when combined with other ECB owned or affiliated stations will enable approximately 97.4% of Wisconsin residents to receive educational television service.

4. The proposed assignment will comply with all technical requirements of our rules. In addition, Canadian concurrence in the assignment has been obtained.

5. Petitioner has requested that we act as early as possible on this petition in order to allow it to take advantage of appropriated funds from HEW and from the State Building Commission. We have done so in this case as we do in all such cases where an educational institution is dependent on funding from HEW which usually makes such grants on a tentative basis and for a specified period of time. Thus, to allow EBC to take advantage of the funding that, according to petitioner, has been approved for July 1, 1976, we have acted at the earliest possible date.

6. Accordingly, and pursuant to authority contained in Sections 4(i), 5(d)(1), 303 and 307(b) of the Communications Act of 1934, as amended, and Section 0.281(b)(6) of the Commission's rules, it is ordered, That, effective September 13, 1976, Section 73.606(b) of the Commission's rules is amended as follows for the city listed below:

City	Channel No.
Park Falls, Wisconsin	*36

7. It is further ordered, That this proceeding is terminated.

(Secs. 4, 5, 303, 307, 48 Stat., as amended, 1066, 1068, 1082, 1083; 47 U.S.C. 154, 155, 303, 307.)

Adopted: July 29, 1976.

Released: August 4, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[FR Doc.76-23204 Filed 8-9-76;8:45 am]

PRIVACY ACT OF 1974

Receiving and Processing Applications

Notice is hereby given that the Farmers Home Administration has under consideration the amendment of § 1801.3(d)(4)(i) of Subpart A of Part 1801, Title 7, Code of Federal Regulations. The purpose of this amendment is to implement provisions of the Privacy Act of 1974 which provide for the release of credit reports to the subject of the report in response to the subject's request.

Interested persons are invited to submit written comments, suggestions or objections regarding the proposed amendment to the Chief, Directives Management Branch, Farmers Home Administration, United States Department of Agriculture, Room 6316, South Building, Washington, D.C. 20250, on or before September 9, 1976. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Chief, Directives Management Branch, during regular business hours (8:15 a.m. to 4:45 p.m.).

As proposed, § 1801.3(d)(4)(i) will read as follows:

§ 1801.3 Processing Applications.

* * * * *

(d) * * *

(4) * * *

(i) If a loan is refused because of information in a credit report, the County Supervisor will inform the applicant in writing that he was denied credit because of information contained in a credit report; supply him with the name and address of the company that made the credit report; and make the credit report available if the applicant requests the report under the provisions of the Privacy Act of 1974.

[FmHA Instruction 451.1]

ACCOUNT SERVICING POLICIES

Proposed Change in Notification Form and Follow-up Actions Subsequent Servicing Form

Notice is hereby given that the Farmers Home Administration has under consideration the amendment of § 1861.1(d) of Subpart A of Part 1861, Title 7, Code of Federal Regulations (37 FR 13703). The purpose of this amendment is to change the form used in notifying borrowers that their past due payments were not received, and to make use of an additional form in noting servicing followup actions.

Interested persons are invited to submit written comments, suggestions or objections to the Chief, Directives Management Branch, Farmers Home Administration, United States Department of Agriculture, Room 6316, South Building, Washington, D.C. 20250, on or before September 9, 1976.

All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Chief, Directives Management Branch, during regular business hours (8:15 a.m. to 4:45 p.m.).

As proposed, § 1861.1(d) will read as follows:

§ 1861.1 General.

* * * * *

(d) *Subsequent servicing.* If a borrower fails to make a payment as agreed upon, the County Supervisor will write or otherwise contact the borrower or request him to make the payment or request him to come to the office to discuss the reasons why the payment was not made and to develop specific plans for making the payment. Form FmHA 451-35, "Past Due Notice" may be used to notify borrowers who make payments directly to the Finance Office that their payment has not been received. In the event the borrower refuses to make the payment when he has the income, or it is determined that his farming operations will not permit him to make the payment in a reasonable length of time, as well as make future payments, action will be taken to protect the Government's security interest in accordance with applicable FmHA requirements. Follow-up actions for subsequent servicing will be noted on Form FmHA 405-1, "Management System Card—Individual," or Form FmHA 405-5, "Management System Card—Individual (Rural Housing Only)" or Form 405-10, "Management System Card—Association or Organization."

[FmHA Instruction 1980-E]

GUARANTEED LOAN PROGRAMS

Business and Industrial Loan Program

Notice is hereby given that the Farmers Home Administration (FmHA) has under consideration the proposed amendment of §§ 1980.419; 1980.451; 1980.471; 1980.476 and Appendix C of Subpart E of Part 1980, Title 7, Code of Federal Regulations (40 FR 57643; 41 FR 11807) as follows:

1. Section 1980.419 is amended to allow certain foreign owned lenders with 10 years' experience in the community to be considered for eligibility.

2. Section 1980.451 and the Administrative provisions at the end of this section are amended to provide notices to applicants in compliance with the Privacy Act of 1974.

3. Section 1980.471 is amended to allow lenders the option to liquidate a prior loan made under provisions of this subpart, or under previous regulations.

4. Section 1980.476 and the Administrative provisions at the end of this section are amended to allow cash downpayments to be made to transferors in the event of a Transfer and Assumption.

5. Appendix C, Lender's Agreement, is amended in paragraph XI G and in the first sentences of the third and fourth paragraphs of paragraph XII to eliminate automatic repurchase of the guaranteed portion of the loan since the regulation was amended earlier to allow the Lender the option to repurchase in event of default.

Interested persons are invited to submit written comments, suggestions or objections regarding the proposed amendment to the Office of the Chief, Directives Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6316, South Building,

V 41 155 AUG 10 76 UMI

Washington, D.C. 20250, on or before September 9, 1976. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Chief, Directives Management Branch, during regular business hours, (8:15 a.m. to 4:45 p.m.).

As proposed, Subpart E of Part 1980 is amended by revising various sections and Appendix C to read as follows:

1. In § 1980.419, paragraph (g) is revised to read as follows:

§ 1980.419 Eligible lenders.

* * * * *

(g) All lenders will be owned and controlled as provided in paragraph V of Form FmHA 449–35, "Lender's Agreement." However, in a case where a lender has had foreign ownership for at least ten years and has been in operation in the community where the project is or will be located for a similar period of time, such lender may be considered for eligibility under the provisions of paragraph (b)(2) of this section. If such a lender is determined to be eligible by FmHA, paragraph V of the Lender's Agreement will be deleted and initiated by both the lender and FmHA.

* * * * *

2. Section 1980.451(i) is amended by adding subparagraph (19) as follows:

§ 1980.451 Filing and processing applications.

* * * * *

(i) * * *

(19) Notices of compliance with the Privacy Act of 1974:

(i) If the applicant is acting in a personal capacity and not as an enterpreneur for such entities as proprietorships, partnerships, or corporations, and FmHA solicits personal information from him, the individual will be provided Form FmHA 410–9, "Statement Required by the Privacy Act."

(ii) If FmHA desires to obtain information concerning an individual from any source, FmHA will provide such source with Form FmHA 410–10, "Privacy Act Statement to References."

* * * * *

3. The Administrative text following § 1980.451 is revised by adding paragraps A. 3. and 4. as follows:

ADMINISTRATIVE

A. *The County Supervisor and District Director.* * * *

3. The County Supervisor will furnish all individuals acting in a personal capacity at the time of filing a preapplication or application, two copies of Form FmHA 410–9. The individual will sign both copies, retaining one and providing FmHA with the other copy which becomes a part of the loan file

4. The County Supervisor will provide any source from whom FmHA obtains information concerning an individual with two copies of Form FmHA 410–10. The source will sign both copies, retaining one and providing FmHA with the other copy which becomes a part of the loan file.

* * * * *

Section 1980.471 is revised to add paragraphs (a) and (b). The Administrative portion following this section remains unchanged. Accordingly, § 1980.471 as revised, reads as follows:

§ 1980.471 Liquidation.

(a) For liquidation provisions under this subpart, refer to paragraphs XII, of Form FmHA 449–35.

(b) In the event a lender has made a B&I loan guaranteed by FmHA under previous regulations, and the lender concludes that liquidation of the guaranteed loan is necessary because of one or more defaults or third party actions that the borrower cannot or will not cure, the lender has the option to liquidate the loan under the provisions of this subpart, or under the provisions of previous regulations. The lender will notify the State Director in writing within 10 days after its decision to liquidate if it desires to proceed under this subpart.

* * * * *

4. In § 1980.476 paragraphs (f), (g), (h), and (i) are revised; paragraphs (j) through (o) are added, and read as follows:

§ 1980.476 Transfer and assumptions.

* * * * *

(f) Any proceeds received from the sale of secured property prior to a transfer and assumption will be credited on the transferor's guaranteed loan debt in inverse order of maturity before the transfer and assumption transaction is closed.

(g) In cases where the transferee makes any cash downpayment in connection with the transfer and assumption:

(1) The lender will employ an independent appraiser, subject to concurrence of both the transferor and transferee, to make an appraisal to determine the fair market value of all the collateral securing the loan. Such appraisal report fee and any other costs related thereto will be paid by the transferor and the transferee as they mutually agree.

(2) The market value of the secured property being acquired by the transferee, plus any additional security the transferee proposes to give to secure the debt must be adequate to secure the balance of the total guaranteed loan owed, plus any prior liens. If any cash downpayment is made it may be paid directly to the transferor as payment for his equity in the project, provided:

(i) The lender recommends and FmHA approves the cash downpayment be released to the transferor. The lender and FmHA may require that an amount be retained for an established period of time in escrow as a reserve account as security for use against any future default on the loan. Any interest accruing on such an escrow account may be paid periodically to the transferor.

(ii) Any payments that are to be made by the transferee to the transferor in respect to the downpayment do not suspend the transferee's obligation to continue to meet the guaranteed loan payments as they come due under the terms of the assumption.

(iii) The transferor must agree not to take any actions against the transferee in connection with such transfer in the future without first obtaining the approval of FmHA and the lender.

(iv) The lender determines that there is repayment ability for the guaranteed debt assumed and any other indebtedness of the transferee.

(h) The lender will make, in all cases, a complete credit analysis to determine viability of the project, subject to FmHA review and approval, including any requirements for deposits in an escrow account as security to meet its determined equity requirements for the project.

(i) The lender will issue a statement to FmHA that the transaction can be properly transferred and the conveyance instruments will be filed, registered or recorded, as appropriate, and legally permissible.

(j) FmHA will not guarantee any additional loans to provide equity funds for a transfer and assumption.

(k) The assumption will be made on the lender's form of assumption agreement.

(l) The assumption agreement must contain the FmHA case number of the transferor and transferee.

(m) Loan terms cannot be changed by the Assumption Agreement unless previously approved in writing by FmHA, with the concurrence of any holder(s) and concurrence of the transferor (including guarantors) if they have not been released from personal liability. Any new loan terms cannot exceed those authorized in this subpart. The lender's request will be supported by:

(1) An explanation of the reasons for the proposed change in the loan terms.

(2) Certification that the lien position securing the guaranteed loan be maintained or improved, proper hazard insurance will be continued in effect, and all applicable Truth in Lending requirements will be met.

(n) In the case of a transfer and assumption, it is the lender's responsibility to see that all such transfer and assumptions will be noted on all originals of the Loan Note Guarantee(s). The lender will provide FmHA a copy of the transfer and assumption agreement. Notice must be given by the lender to FmHA prior to any borrower or guarantor being released from liability.

(o) The holder(s), if any, need not be consulted on a transfer and assumption case unless there is a change in loan terms.

4a. In the Administrative text following § 1980.476 paragraphs A, A.1. and 2. are revised; paragraphs C. and D. are added and read as follows:

ADMINISTRATIVE

A. The State Director may approve all transfer and assumption provisions if the guaranteed loan debt balance is within his individual loan approval authority including:

1. Concurrence in writing of his decision concerning release of the transferor and guarantors from liability.

2. Any changes in loan terms.

NOTE.—The assumption should be reviewed as if it were a new loan. Assurance that the Loan Note Guarantee(s) will be endorsed in the space provided on the form(s).

* * * * *

C. The District Director and County Supervisor will submit recommendations to the State Director.

D. If the guaranteed loan debt balance is in excess of the State Director's loan approval authority, the State Director will forward the file, together with his recommendations and those of the District Director and County Supervisor, to the National Office for approval.

5. In Appendix C, paragraph XI.G. and the first sentences of the third and fourth paragraphs of paragraph XII. are amended as follows:

APPENDIX C—FORM FMHA 449–35

UNITED STATES DEPARTMENT OF AGRICULTURE

FARMERS HOME ADMINISTRATION

LENDER'S AGREEMENT

* * * * *

XI. *Defaults by borrower.* * * *

G. Lender will also repurchase the guaranteed portion of the loan consistent with paragraph 10 of the Loan Note Guarantee.

XII. *Liquidation.* * * *

When the decision to liquidate is made, the lender may proceed to purchase from Holder(s) the guaranteed portion of the loan. * * *

If the lender does not purchase the guaranteed portion of the loan, FmHA will be notified immediately in writing. * * *

* * * * *

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Parts 0 and 64]

[FCC 76–745; Docket No. 20828]

PARTICIPATION IN DATA PROCESSING BY COMMUNICATIONS COMMON CARRIERS

Furnishing Data Processing Services

In the matter of Amendment of § 64.702 of the Commission's rules and regulations.

By the Commission: [1]

INTRODUCTION

1. On November 10, 1966 and on March 2, 1967, the Commission issued notices of inquiry [2] in Docket No. 16979 (hereinafter referred to as "Computer Inquiry") with respect to the regulatory and policy questions raised by the interdependence of computer services and technology and communications facilities and services of common carriers.

2. In those notices we sought information regarding actual and potential computer uses of communication facilities and services. We attempted to develop views and recommendations as to whether there was any need for new or improved common carrier service offerings, or for revised rates, regulations and practices of carriers to meet the emerging communication requirements for the processing of data and other computer services involving the use of communication facilities. We further sought to determine whether such services should be free from, or subject to, government regulation and whether the entry into the provision of such computer services by common carriers and others required regulatory control.[3]

3. We noted that it was being alleged that common carriers were about to offer data processing services and that unregulated entities were offering communication services.[4] This raised a number of issues. First, a major regulatory concern of the Commission was the appropriateness of a carrier utilizing part of its communications switching plant to offer a data processing service. Further there was the issue of whether communication common carriers should be permitted to sell data processing services and, if so, what safeguards should be imposed to insure that the carriers would not engage in anti-competitive or discriminatory practices. There was also concern as to the extent to which data processing organizations should be permitted to sell communications as part of a data processing package not subject to regulation. In order to even being dealing with this situation it was necessary to define what was meant by "communication services" and what was meant by "data processing services." [5]

Section 64.702 Furnishing of Data Processing Services.

(a) For the purpose of this subpart—

(1) "Data processing" is the use of a computer for the processing of information as distinguished from circuit or message-switching. "Processing" involves the use of the computer for operations which include, inter alia, the functions of storing, retrieving, sorting, merging and calculating data, according to programmed instructions.

(2) "Message-switching" is the computer-controlled transmission of messages, between two or more points, via communications facilities, wherein the content of the message remains unaltered.

(3) "Local Data Processing Service" is an offering of data processing wherein communications facilities are not involved in serving the customer.

(4) "Remote Access Data Processing Service" is an offering of data processing wherein communications facilities, linking a central computer to remote customer terminals, provide a vehicle for the transmission of data between such computer and customer terminals.

(5) "Hybrid Service" is an offering of service which combines Remote Access data processing and message-switching to form a single integrated service.

(i) Hybrid Data Processing Service is a hybrid service offering wherein the message-switching capability is incidental to the data processing function or purpose.

(ii) Hybrid Communication Service is a hybrid service offering wherein the data processing capability is incidental to the message-switching function or purpose.

4. In addition two basic regulatory and policy questions had to be resolved: (a) the nature and extent of the regulatory jurisdiction which could and should be applied to data processing services, and (b) whether, under what circumstances, and subject to what conditions or safeguards, common carriers should be permitted to engage in data processing.

5. Looking to the basic purpose of our regulatory activity as well as our specific statutory guidelines, we determined not to assert regulatory authority over data processing services whether or not such services employed communications facilities in order to link the terminals of the subscribers to centralized computers.[6] We recognized, however, that the provision of data processing services by common carriers, might given risen to certain regulatory problems. Primarily, we were concerned about the possibility that common carriers might favor their own data processing activities by discriminatory services, cross subsidization, improper pricing of common carrier services, and related anticompetitive practices and activities which could result in burdening or impairing the carrier's provision of its other regulated services. We therefore adopted a policy of maximum separation whereby communication common carriers would be required to furnish data processing services only through separate corporate entities.[7]

6. Consideration was also given to those "hybrid service" offerings which combined data processing and message switching to form a single integrated service. One question was under what circumstances should a message-switching capability, when offered in combination with data processing services, be treated as a sale of communications for hire subject to regulation. We stated general principles applicable in determining this question. Where message-switching is offered as an incidental feature of an integrated service offering that is primarily data processing, we stated there

---

[1] Commissioner Hooks' concurring statement filed as part of original.

[2] 7 FCC 2d 11, 7 FCC 2d 19.

[3] While the Computer Inquiry encompassed a broad spectrum of regulatory topics such as improved common carrier service offerings and the possible need for revised rates, we are presently concerned only with that aspect of the Computer Inquiry which focused on the use of a computer in the provision of communications or data processing services.

[4] Report and Further Notice of Inquiry, 17 FCC 2d 587 (referred to as "First Report").

[5] The final definitions arrived at were embodied in Section 64.702 of the Commission's Rules, 47 CFR 64.702.

[6] Notice of Proposed Rule Making and Tentative Decision, 28 FCC 2d 267 (1970) (hereinafter referred to as "Tentative Decision").

[7] We required that the subsidiary have separate books of accounts, separate officers, separate operating personnel and separate equipment and facilities devoted exclusively to the rendition of data processing services. Further, the furnishing of communications services and facilities by the carrier to its data processing affiliate would, in all cases, be pursuant to a tariff, thereby minimizing the risks of undue discrimination in violation of Section 202(a) of the Communications Act.

V 41 155 AUG 10 76 UMI

would be total regulatory forebearance with respect to the entire service. Where the package offering is oriented to satisfy the communications or message-switching requirements of the subscriber, and the data processing feature or function is incidental to the message-switching function, we concluded that the entire integrated service would be treated as a communications service. We further set forth the criteria for such a determination: (a) whether the service, by virtue of its message-switching capability, has the attributes of the point-to-point services offered by conventional communication common carriers and is basically, a substitute therefor; (b) the extent to which the message-switching feature of the service facilitates or is related to the data processing component, or whether such message-switching is essentially independent of such data processing. Thus we determined that we would look to the facts surrounding a package offering with a view toward determining the primary thrust of the service offered.

THE NEED FOR RE-EXAMINATION

7. The Computer Inquiry was a vehicle for the identification and better understanding of the problems spawned by the confluence of computer and communications technologies which had taken place during the previous decade. While the scope of the Computer Inquiry was very broad and determinations were made based on the state of the art as it then existed, it was recognized that because of technological advancements which could not be predicted it would not be a final resolution of the problems presented therein.

TRENDS IN TECHNOLOGY AND APPLICATIONS

8. Since the release of our *Final Decision*, we have witnessed technological advances, in hardware and software, which are tending to cause a blurring of the distinctions between data processing and communications which we had then established. In particular, the dramatic advances made in large scale integrated circuit technology have permitted the fabrication of minicomputers, micro-computers, and other special purpose devices, which are capable of duplicating many of the data-manipulative capabilities which were previously available only at centralized locations housing large scale general purpose computers. With this new technology, users are finding it cost-beneficial to remove some of the computing power from the centralized computer location and distribute it to the terminals, or, incorporate some of it into the network itself. We have witnessed the emergence of a new phenomenon—the distributed computer network, wherein the new computers and terminals are performing both data processing and communications control applications, both within the network and at the terminal. These networks are being constructed by common carriers and also by private entities using carrier furnished dedicated channels.

9. The versatility of the user terminals which are available today further complicates our efforts to establish regulatory boundaries.[8] Many of the input/output processing functions necessary to establish: (a) network control and (b) interaction of a computer with specific terminals—which were formerly performed by the central computer—are now done by distributed terminals. Microprocessor technology also permits the terminal to perform many sophisticated arithmetic and word processing functions at the remote location while reducing the processing load at the central location. With the trend to the decentralization of computing functions we can see the communications and data processing functions together being taken over by "smart" terminals which are: (a) offered to users by the regulated carrier sector and by the unregulated terminal equipment manufacturing sector and, (b) under the control of the user—not the Carrier.

10. The distribution of computing power from the central processing location can also be accomplished by placing some of this intelligence within a carrier's network—rather than in a user-owned terminal. One important application involves the use of carrier processing facilities to allow terminals to "converse" with each other even though they may have disparate communications line disciplines and alphanumeric character codes. Such services are currently being offered by Telenet and the offering of similar features, in the future, has been announced by AT&T officials and reported in trade journals.[9] Another application of network-located computer processing capability arises where the carrier offers some of the performance features which would be otherwise incorporated into a "smart" terminal. This would give the user the option of using a less sophisticated terminal. Thus, features such as automatic call forwarding, restricted and abbreviated dialing, and special announcements could be provided, for example, by Bell and its new ESS equipment rather than be implemented by a terminal at a user's premises.

ADEQUACY OF EXISTING DEFINITIONAL STRUCTURE

11. In the original inquiry we posited a set of definitions in order to implement the fundamental regulatory policies we had established.[10] The pivotal definition is the one for data processing. We stated:

> Data Processing is the use of a computer for the processing of information as distinguished from circuit or message-switching. "Processing" involves the use of computer for operations which include, inter alia, the functions of storing, retrieving, sorting, merging and calculating data, according to programmed instructions.

The distinction between data processing service and the permissible use of computers by carriers was thus made by establishing a dichotomy between data processing, on one hand, and message and circuit switching on the other. We then went on to define message-switching as:

> "Message-Switching" is the computer-controlled transmission of messages, between two or more points, via communications facilities, wherein the content of the message remains unaltered.

12. The consequence of establishing such a dichotomy is that any carrier offering a service to the public which uses a computer for purposes other than message or circuit switching, could have the service considered data processing and would need to establish a separate subsidiary. One question we have to face now is whether the restriction of the use of computers by a carrier to these two applications is in the public interest when we consider the state of current technology. As in the case of the terminal technology, we observe that special purpose computers, mini-computers, and microprocessors are finding many applications to communications network operations. Several of these applications are related to transmission technology rather than switching.[11] Other applications involve the use of switching computers to provide radically new features which were hitherto impractical with the older technology.[12] It is now necessary to consider if our rules need to be changed in order to give the public the total benefit of this modern technology and at the same time prevent the abuses that concerned us in the original Computer Inquiry. One solution may be to give a more positive definition of data processing service. This would allow carriers to enhance their communications service accordingly but still prevent the potential abuses that concern us.

13. When the original rules were adopted, we recognized that there might be instances where an entity might find it desirable to offer a combination of communications and data processing service. We did not wish to foreclose such opportunities for carriers or unregulated entities. We therefore embodied the regulatory ground rules for such operations in Rule 64.702 by defining hybrid services and the conditions under which they can be offered by carriers or unregulated entities. For a service to be

[8] These include, inter alia: PBXs and telephone service ancillaries, transaction terminals, word processing terminals, credit card readers, and pre-processing computers. Versatility, and regulatory complications, result in part from the use of newer technologies, such as microprocessors, in conjunction with devices which traditionally were considered to be merely communications terminals.

[9] "Switched Network Service for Banking-Type Usage in AT&T's Near Future," Computerworld, March 15, 1976. Also, "AT&T's Big Plans for a Value Added Service," Datamation, December 1975.

[10] Specifically, (1) Commission forbearance in the regulation of data processing, (2) the maximum separation principle for carriers wishing to offer data processing.

[11] Typical examples include signal processing, error control, and multiplexing.

[12] We have seen, for example, the introduction of packet switching networks—which were not considered in the Rules. We also note the introduction of the No. 4 ESS by Bell, whose 1-A processor can be programmed to provide optional features for circuit switched services.

hybrid. § 64.702(a)(5) invokes the condition that remote access data processing and message-switching be combined "to form a single service." Otherwise these would be considered to be separate services.

14. Once a service has been found to be hybrid it becomes necessary to further classify it as hybrid data processing or hybrid communications in order to determine whether or not Title II jurisdiction applies. Sections 64.702(a)(5)(i) and (ii) respectively attempt to make this distinction. The criterion offered here is that "incidental." Thus if a service has been found to be hybrid, and the communications portion is "incidental to the data processing function or purpose," the service can be found to be hybrid data processing. If the data processing portion is incidental, we have a hybrid communications service. The unambiguous resolution of this matter is of critical importance in establishing a regulatory boundary since we have ruled that hybrid communications services are subject to our jurisdiction.

THE REVISED RULES

15. In Appendix A we offer for comment a revised version of § 64.702. The amended section continues to maintain the fundamental regulatory policies set forth in our original inquiry, namely: (1) carriers may not offer data processing services except through a separate subsidiary organized in accordance with the separation principles stated in § 64.702(c), and (2) total regulatory forebearance regarding the offering of data processing services.

16. In the § 64.702(a) we have sought to define data processing positively, in terms of what it is, rather than by exception as we had previously done. By so doing we expect to achieve two related policy goals: (1) an objective identification of those uses of computers by carriers which require a separate subsidiary, and (2) the stimulation of economic activity in the regulated communications sector by removing ambiguities in the previous definition. By defining data processing positively, we can also approach the carriers' role from a different perspective—a carrier may use computers for any purpose which is not data processing.

17. Our new definition is written in recognition that any computer [13] has certain basic processing capabilities which include:

arithmetic computation—the basic operations of count, add, subtract, multiply, and divide

logical computation—operations which include: and, or, not, compare, and branch

storage, retrieval, and transfer—of alphanumeric or graphical data.

These operations may be ordered and combined into a program [14] which is capable of achieving very sophisticated results—which may or may not constitute data processing as we have defined it.

18. In our new definition we state the generic criterion for identifying the data processing function as:

> the use of a computer for the purpose of processing information wherein: (a) the semantic content, or meaning, of input data is in any way transformed, or (b) where the output data constitute a programmed response to input data.[14a]

In contrast, the generic characteristic of the communications function is that the semantic content of information is not changed at the completion of a given process. A message entering a network is intended to arrive at its destination unchanged. Several computer operations, such as message and circuit switching, may be required to permit the message to transit the network. In this process, individual symbols may be processed, as in code conversion and error correction. Or the message may be accompanied by addressing information, such as dial pulses or message headers, which are used by the communications network for centralized message routing. The purpose of these computer operations is, nevertheless, the transmission of an unaltered message through a network and they do not constitute a data processing service.

19. We now cite some examples of data processing services, or functions, which exist within the context of our new proposed definitions. At the time of the original Computer Inquiry, the preponderance of data processing applications was addressed to the manipulation of numerical quantities. There were ubiquitous applications to business and scientific data processing. These trends continue. On a lesser scale, there were several non-computational applications of data processing—to information retrieval, and transaction oriented systems for example. These applications are much more significant now than in 1971.

20. Since data processing applications now encompass a much broader range than previously, it may be useful to accept the concept that the term "data processing service" comprehends at least three reasonably distinct subclasses, which may be commingled in specific applications:

arithmetic processing—general commercial accounting, payroll, inventory control, banking and point-of-sale processing, financial and econometric modeling, scientific calculations, etc.

word processing—a rapidly developing application resulting from advances in mass memory technology and word processing software. Applications include: interactive information retrieval systems, management information systems, text editing, translation, typesetting, etc.

process control—the increased reliability and availability of computers is leading to an expansion of applications where a computer is used to monitor and control some process which is occuring continuously—such as a nuclear-powered generating station, an electric power distribution grid, an automatic machine tool, or a fire detection and control system.

Given our new definition, all of these applications would be considered data processing and could not be offered by carriers except under the maximum separation conditions of § 64.702.

21. We also wish to cite those examples of the use of computers by carriers which would not be within the ambit of the definition of data processing. These applications fall into two categories:

network control and routing—applications include: Message and circuit switching,[15] speed and code conversion, pulse format conversion, error detection and correction, analog to digital and digital to analog conversion, signal processing,[16] and time division multiplexing.

input/output processing—this category comprises the uses of a computer capability resident in a carrier network facility for the purpose of making disparate computers and terminals compatible with each other. Typical functions are the formatting, editing, and buffering of data to make it compatible with the electrical characteristics of different transmission media.

22. The new definition provides a demarcation between data processing services and communication services. By so defining data processing, we have deleted the "hybrid service" concept. Henceforth a service would be characterized as either data processing or communications. A service or offering would be considered data processng if it meets the data processing criterion set forth in our new definition. Where such criterion is met a carrier would be required to offer the service subject to our maximum separation policy as enunciated in Section 64.702 of our Rules. To the extent that a service does not meet the criterion for data processing under our new definition then it would be considered a communications service or offering and subject to regulation under Title II.

23. Accordingly, notice is hereby given that we propose to amend § 64.702 of our Rules as set forth below by: (a) posi-

[13] By the term computer we mean any device which is capable of performing the functions described herein.

[14] We use program in its broadest sense, here. It includes stored programs which can be altered by a user as well as hard-wired or read only memory (ROM) devices.

[14a] The second condition (b) brings services such as process control and proprietary information retrieval within the ambit of the definition of data processing (see Para. 20 below). In the process control case, a message or other stimulus results in a change of state in the process which is being controlled. In the proprietary information retrieval case, the arrival of an input message—the information request—is operated upon by the computer and results in an output which is the specific information requested.

[15] These categories are meant to include packet switching (and its variations) and time-division circuit switching. We also would consider permissible, the use of switching computers to provide ancillary functions such as automatic call-forwarding, abbreviated dialing, restricted dialing, and special announcements.

[16] Signal processing comprises the use of computers in applications which maintain the information content of an electrical signal. These include signal detection and regeneration, and the adaptive equalization of transmission channels.

V 41 155 AUG 10 76 UMI

tively defining data processing and deleting the remaining terms and definitions contained in § 64.702(a), (b) deleting entirely subsections (e), (f) and (g) which deal with hybrid services.[17] Since all references to "hybrid" services are being omitted, we would also delete § 0.308 of our Rules pertaining to delegation of authority as to hybrid services.

ITEM OF INQUIRY

24. In view of the foregoing we seek to obtain information, views, and recommendations from interested members of the public in order to assist the Commission in resolving the regulatory and policy questions presented by the technological advancements being made in the communications and information processing fields. We specifically request respondents to address the following:

(a) The adoption of the proposed amendment to § 64.702 of the Commission's Rules and Regulations as set forth below.

25. Accordingly, pursuant to Section 4(i), 4(j), 403 and 404 of the Communications Act of 1934, *it is ordered*, That the aforementioned inquiry and rulemaking proceeding is hereby instituted.

26. Pursuant to the applicable procedures set forth in § 1.415 of the Commission's rules, interested persons may file comments on or before October 12, 1976, and reply comments on or before November 11, 1976. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision in this proceeding, the Commission may also take into account other relevant information before it, in addition to the specific comments invited by this Notice.

27. In accordance with the provisions of § 1.419 of the Commission's rules, an original and 11 copies of all statements, briefs or comments shall be furnished the Commission. All comments received in response to the Notice of Proposed Rule Making will be available for public inspection in the Docket Reference Room in the Commission's Offices in Washington, D.C.

28. *It is further ordered*, That the proceeding herein shall be subject to further order by the Commission.

Adopted: July 29, 1976.

Released: August 9, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

§ 0.308 [Deleted]

1. Section 0.308 is deleted.

2. Section 64.702 is amended to read as follows:

[17] Section 64.702(g) encompasses the discontinuance of hybrid as well as non-hybrid services. With the deletion of § 64.702(g) authorization for the discontinuance of tariffed service offerings must still be obtained pursuant to section 214 of the Communications Act.

§ 64.702 Furnishing of data processing services.

(a) "Data Processing" is the use of a computer for the purpose of processing information wherein: (a) the semantic content, or meaning, of input data is in any way transformed, or (b) where the output data constitute a programmed response to input data.

(1) The term, "computer" comprehends, inter alia: general purpose stored program processors, general and special purpose mini-computers and micro-processors.

(2) "Processing" entails the use of a computer for operations upon data which include inter alia: arithmetic and logical operations, storage, retrieval, and transfer.

(b) Except as provided herein, no common carrier subject, in whole or in part, to the Communications Act shall engage directly or indirectly in furnishing data processing service to others except as expressly provided in paragraph (c) of this section. This prohibition shall apply to all communications common carriers, including Section 2(b)(2) carriers, where any carrier itself has annual operating revenues exceeding $1,000,000 or any such carrier is directly or indirectly controlled by, or is under common control with, another carrier or carriers, and the combined annual revenues of all such carriers exceed $1,000,000.

(c) Common carriers may, subject to other provisions of law, have a controlling or lesser interest in, or be under common control with, a separate corporate entity that furnishes data processing service to others provided the following conditions are met:

(1) Each such separate corporation must maintain its own books of account, have separate officers, utilize separate operating personnel, and utilize computing equipment and facilities separate from those of the carrier for its data processing service offerings.

(2) Each such common carrier shall file with the Commission a complete statement of the terms and conditions of every written or oral contract, agreement or other arrangement entered into between such carrier and any such separate corporation within thirty days after the contract, agreement or other arrangement is made.

(3) No such common carrier subject to the prohibition of paragraph (b) of this section shall engage in the sale or promotion of data processing services on behalf of any such separate corporation.

(d) No common carrier subject in whole or in part to the Communications Act of 1934, as amended, shall sell, lease or otherwise make available to any other entity any capacity or computer system component on its computer system or systems which that carrier uses in any way for the provision of its common carrier communications services.

[Docket No. 20414; RM-2452, RM-2420, RM-2396]

FM BROADCAST STATIONS; TABLE OF ASSIGNMENTS

Order Establishing New Cut-Off Dates for Filing Comments and Reply Comments

In the Matter of Amendment of § 73.202(b), table of assignments, FM broadcast stations. (Harlan and Red Oak, Iowa; and Blair, Nebraska)

1. On November 13, 1975, the Broadcast Bureau issued, under delegated authority, a Further Notice of Proposed Rule Making (40 FR 54260) in the above entitled proceeding. On November 24, 1975, John W. Talbott, one of the petitioners for rule making in this proceeding, filed, pursuant to Section 1.115 of the Commission's Rules, an Application for Review of the Further Notice. Subsequently, on December 4, 1975, Talbott filed a Request for Extension of Time in which he asked that the cut-off dates for filing comments and reply comments be indefinitely extended by the Chief, Broadcast Bureau, pending action by the Commission on the Application for Review. In response, the Broadcast Bureau indefinitely extended the dates for filing comments and reply comments to the Further Notice. Order Extending Time for Filing Comments and Reply Comments, Docket No. 20414, adopted December 29, 1975, 41 FR 1089.

2. On July 20, 1976, the Commission issued a Memorandum Opinion and Order (FCC 76-592, Mimeo No. 41014), in which Talbott's application for review was denied. The effect of the Commission's action is that the Further Notice of Proposed Rule Making has been upheld. Consequently interested parties should file comments on or before September 13, 1976, and reply comments on or before October 5, 1976.

3. This action is taken pursuant to authority found in sections 4(i), 5(d)(1), and 303(r) of the Communications Act of 1934, as amended, and Section 0.281 and 1.46 of the Commission's Rules.

Adopted: July 29, 1976.

Released: August 4, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

FEDERAL HOME LOAN BANK BOARD

[12 CFR Part 584]

[No. 76-567]

SAVINGS AND LOAN HOLDING COMPANIES

Withdrawal of Proposed Amendments Relating to Holding Company Indebtedness

AUGUST 4, 1976.

The Federal Home Loan Bank Board, by Resolution No. 75-261, dated March 19, 1975, proposed to amend § 584.6(b) of the regulations for Savings and Loan Holding Companies (12 CFR 584.6(b)) for the purpose of changing the indebtedness restrictions applicable to mortgage-banking subsidiaries of non-diversified savings and loan holding companies and clarifying existing introductory language. Notice of such proposed rulemaking was duly published in the FEDERAL REGISTER on April 16, 1975 (40 FR 17004), with an invitation to interested persons to submit written comments by May 19, 1975.

In light of the lack of public response regarding the proposed changes, and other considerations, the Board considers it desirable to withdraw the proposed amendments for further study.

Accordingly, the Board hereby withdraws from consideration the proposed amendments to Part 584 of the Regulations for Savings and Loan Holding Companies (12 CFR 584) contained in said Resolution No. 75-261.

(Sec. 408, 48 Stat. 1256, as amended; sec. 408, 48 Stat. 1261, as added by 73 Stat. 69, as amended; 12 U.S.C. 1725, 1730a. Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943-48 Comp., p. 1071)

By the Federal Home Loan Bank Board.

SMALL BUSINESS ADMINISTRATION

[13 CFR Part 120]

BUSINESS LOAN POLICY

Proposed Rulemaking

Notice is hereby given that pursuant to the authority contained in section 5 of the Small Business Act, 15 U.S.C. 631 et seq., it is proposed to amend, as set forth below, § 120.2(d)(7) of Part 120 of Chapter I, Title 13 of the Code of Federal Regulations.

Prior to the final adoption of such amendment, consideration will be given to any comments. Such comments should be submitted in writing, in triplicate, to the Associate Administrator for Finance and Investment, Small Business Administration, Washington, D.C. 20416, on or before August 30, 1976.

Information. Section 120.2(d)(7) of SBA's Part 120 Regulation (Business Loan Policy) prohibits SBA financial assistance for the construction or acquisition, improvement, or operation of real property to be held primarily for sale or investment. In addition, § 120.2(d)(2) forbids such assistance where it will provide or free funds for speculation in real estate or any other kind of property, and § 120.2(d)(6) prohibits financing for investment purposes. In line with these provisions, SBA has heretofore not permitted loans to small general contractors engaged in constructing homes or other buildings for sale for their own account, except in special situations where the contractor could demonstrate that it already had in hand a firm contract for sale of the property. Even in that event, none of the loan proceeds could be used to purchase the building-site or other vacant land, the funds provided being for construction purposes only.[1]

Due to sharply decreased activity in the building construction industry during the last several years, small general contractors have suffered severe economic stresses and hardship attended by a correspondingly marked decline in the employment of construction workers. In the judgment of the Small Business Administration, it would be in furtherance of the best interests of the small business segment of the economy, and the public interest generally, if SBA financial assistance were afforded to competent small general contractors who construct new residential and commercial properties (or rehabilitate existing structures) for immediate resale for their own account as distinguished from acquisition or construction for operational/holding, investment or speculative purposes by the applicant. It is proposed that a firm written contract of sale no longer be required in advance of construction, if the demonstrated purpose is immediate sale on completion. The loan would be made on a deferred participation (guaranty) basis and be repayable in not more than 18 months, plus the estimated period of construction or rehabilitation. None of the loan proceeds could be used to purchase the building-site or other vacant or unimproved land on which construction is to take place; and none may be utilized to hold or operate real property for investment or speculative purposes contrary to § 120.2(d)(2) and (6).

As noted, the newly constructed or improved building(s) erected or acquired by the small general contractor for its own account would have be offered for immediate sale on completion of its work.

In order to give effect to the foregoing policy, it is proposed to amend § 120.2(d)(7) to authorize SBA guaranteed business loans to small general contractors for (1) new construction or (2) acquisition of existing structures for prompt and significant rehabilitation, for their own account and for immediate sale on completion of their work.

SBA financial assistance covered by this proposal will be limited to guaranteed business loans approved under Part 122 (Business Loans) of SBA Regulations pursuant to section 7(a) of the Small Business Act. It will not extend to other SBA loan programs, such as loans to development companies, handicapped assistance loans, Economic Opportunity loans, and economic injury loans under Parts 108, 118, 119, and 123, respectively, of SBA Regulations.

It is proposed to amend § 120.2(d)(7) by adding two provisos at the end thereof, so that it would read as follows:

§ 120.2 Business loans and guarantees.

* * * * * *

(d) * * *

* * * * * *

(7) If the purpose of the financial assistance is to finance the acquisition, construction, improvement or operation of real property which is, or is to be, held primarily for sale or investment: *Provided, however*, That financial assistance on a deferred participation (guaranty) basis, repayable within 18 months (plus the period of construction or rehabilitation), secured by a first lien on the land and improvements thereon, may be granted by SBA under Part 122 of this chapter pursuant to section 7(a) of the Act, to finance the construction, or the acquisition and prompt and significant repair, alteration, conversion, extension, renovation, rehabilitation, or improvement, of residential or commercial buildings, for immediate sale, on completion, for the small concern's own account: and *Provided, further*, That no part of such financing may be used to purchase, or free other funds to purchase, building-sites or other vacant land, or to operate or hold residential or commercial rental property for the account of the applicant or an affiliate for other investment or speculative purposes.

* * * * *

Dated: August 5, 1976.

MITCHELL P. KOBELINSKI,
Administrator.

[FR Doc.76-23212 Filed 8-9-76;8:45 am]

[1] For the purposes of this Notice, the term, "construction," is intended to include repair, alteration, conversion, extension, renovation, rehabilitation, or other improvement, as well as new construction, of residential or commercial buildings. "Construction" includes underground connections to water, sewer, or gas mains, underground or above ground connections for electric or telephone service, septic tank construction, and landscaping of the property, but it does not include streets, curbs, open spaces or construction of public water and sewer mains, or of waste disposal facilities, or costs of community improvements that benefit more than the structure(s) constructed or rehabilitated with SBA financial assistance.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF DEFENSE

Department of the Army

REACTIVATION OF TEST AREA AT BLOSSOM POINT, MD.

Environmental Impact Statement; Negative Declaration

Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969; Part 1500.6e of the Council on Environmental Quality Guideline issued on August 1, 1973, the Department of the Army U.S. Department of Defense, gives notice that an Environmental Impact Statement is not being prepared for the reactivation of the fuze test area at Blossom Point, Maryland.

The Environmental Impact Assessment of this action identified that this facility was used as a test area from 1942 to 1974, when the testing was temporarily suspended. The testing of fuzes has been without incident and the area has been maintained as a primitive state without noticeable change. Based on the results of tests and a review of current information, it is concluded that the resumption of fuze testing will not cause a significant environmental impact, and its implementation will not be environmentally controversial. This action is not considered to be a major federal action. As a result of these findings, Mr. Charles R. Ford, Deputy Assistant Secretary of the Army (Civil Works) has determined that the preparation and review of an Environmental Impact Statement is not needed for this project.

There is presently under preparation a final Environmental Impact Statement for the Formation of the US Army Electronics Research and Development Command which proposes additional uses for this test facility in conjunction with the fuze testing covered by this action.

The Environmental Impact Assessment is available for inspection during regular working hours at the following location:

U.S. Department of the Army, Harry Diamond Laboratories, Office of the Environmental Coordinator, Building 103, Room 01, 2800 Powder Mill Road, Adelphi, Maryland 20783.

Dated: August 3, 1976.

BRUCE A. HILDEBRAND,
Deputy for Environmental Affairs, Office of Assistant Secretary of the Army (CW).

NATIONAL ADVISORY COMMITTEE ON JUVENILE JUSTICE AND DELINQUENCY PREVENTION

Meeting

Notice is hereby given that the National Advisory Committee on Juvenile Justice and Delinquency Prevention and the three subcommittees will meet Wednesday, Thursday and Friday, August 25, 26 and 27 at the New England Center for Continuing Education, in Durham, New Hampshire. On August 25, the meeting of the full Committee is scheduled to convene at 2:00 p.m. and will adjourn at 4:00 p.m.

The Advisory Committee for the National Institute for Juvenile Justice and Delinquency Prevention (the National Institute Committee), the Advisory Committee on Concentration of Federal Effort (the Concentration of Federal Effort Committee) and the Advisory Committee to the Administrator on Standards for the Administration of Juvenile Justice (the Standards Committee) will then meet from 4:00 p.m. to 6:00 p.m. In addition, the Standards Committee will conduct an evening meeting beginning at 8:00 p.m. and continuing until 10:00 p.m.

On August 26 the full Committee will convene at 9:30 a.m. The activities of the day will include: (1) discussion of the First Annual National Advisory Committee Report and Recommendations, (2) reports from each of the subcommittees, and (3) a panel discussion by State Advisory Group members from the Boston Region.

On August 27 the full Committee will convene at 9:30 a.m. and will consider standards approved by the Standards Committee for submission on September 30, 1976, to the President and Congress regarding the jurisdiction and organization of the court handling delinquency, non-criminal misbehavior and neglect and abuse proceedings; the rights and procedures which should apply in those proceedings; the dispositional alternatives which should be available; and, the criteria on which intake, detention, emergency custody and dispositional decisions should be make. The full Committee meeting will adjourn at 12:00 noon. The Executive Committee will then convene at 1:30 p.m. for an evaluation session; the Standards Committee will meet from 2:00 p.m. until 5:00 p.m.

All meetings will be open to the public. For further information, contact Mr. Frederick P. Nader, Deputy Assistant Administrator, Office of Juvenile Justice and Delinquency Prevention, Law Enforcement Assistance Administration, 633 Indiana Avenue, N.W., Washington, D.C. 20531.

THOMAS J. MADDEN,
Acting Attorney Advisor, Office of General Counsel.

MOUNTAIN FUEL SUPPLY CO.

Pipeline Application

AUGUST 2, 1976.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (41 Stat. 449), as amended (30 U.S.C. 185), Mounntain Fuel Supply Company, 180 E. First South, P.O. Box 11368, Salt Lake City, Utah 84139, has applied for a right-of-way for a 4½ inch o.d. lateral gathering system to two wells in Rio Blanco County, Colorado, crossing approximately 2.87 miles of the following National Resource Land:

T. 2 S., R. 103 W., 6th P.M.
Sections 10, 11, 12, 15.

The facility will enable the applicant to construct, operate and maintain a 4½ inch o.d. buried gas pipeline gathering system in Rio Blanco County, Colorado.

The purposes of this notice are: to inform the public that the Bureau of Land Management will be proceeding with the preparation of environmental and other analyses necessary for determining whether the application should be approved and, if so, under what terms and conditions; to allow interested parties to comment on the application, and to allow any persons asserting a claim to the lands or having bona fide objections to the proposed natural gas gathering pipeline right-of-way to file their objections in this office. Any person asserting a claim to the lands or having bona fide objections must include evidence that a copy thereof has been served on the applicant.

Any comment, claim, or objections must be filed with the Chief, Branch of Land Operations, Bureau of Land Management, Colorado State Office, Room 700, Colorado State Bank Building, 1600 Broadway, Denver, Colorado 80202, as promptly as possible after publication of this notice.

ALAN D. CAMPBELL,
Acting Chief, Branch of Land Operations.

[Colorado 24146]

NORTHWEST PIPELINE CORP.

Pipeline Application

AUGUST 2, 1976.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (41 Stat. 449), as amended (30 U.S.C. 185), Northwest Pipeline Corporation, P.O. Box 1526, Salt Lake City, Utah 84110, has applied for right-of-way C-24146 for four 4½ inch o.d. natural gas gathering pipelines crossing approximately 0.412 miles of the following described National Resource Land in Rio Blanco and Garfield Counties:

T. 4 S., R. 102 W., 6th P.M.
Sec. 25: NE¼SW¼, NE¼NW¼
Sec. 36: NW¼NW¼
T. 5 S., R. 102 W., 6th P.M.
Sec. 2: W½E½

The facility will enable applicant to constuct, operate and maintain the subject natural gas gathering pipelines as additions to applicant's gathering system and will help meet additional natural gas need in applicant's customer service area.

The purposes of this notice are: to inform the public that the Bureau of Land Management will be proceeding with the preparation of environmental and other analyses necessary for determining whether the application should be approved, and, if so, under what terms and conditions; to allow interested parties to comment on the application, and to allow any persons asserting a claim to the lands or having bona fide objections to the proposed natural gas gathering pipeline right-of-way to file their objections in this office. Any person asserting a claim to the lands or having bona fide objections must include evidence that a copy thereof has been served on the applicant.

Any comment, claim, or objections must be filed with the Chief, Branch of Land Operations, Bureau of Land Management, Colorado State Office, Room 700, Broadway, Denver, Colorado 80202, as promptly as possible after publication of this notice.

ALAN D. CAMPBELL,
Acting Chief, Branch of Land Operations.

ENDANGERED SPECIES PERMIT

Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under section 10 of the Endangered Species Act of 1973 (Pub. L. 93-205).

Applicant: Cheyenne Mountain Zoological Park, Post Office Box 158, Colorado Springs, Colorado 80901, Don G. Davis, Director.

OMB NO. 42-R170

DEPARTMENT OF THE INTERIOR
U.S. FISH AND WILDLIFE SERVICE

FEDERAL FISH AND WILDLIFE LICENSE/PERMIT APPLICATION

1. APPLICATION FOR [ ] IMPORT OR EXPORT LICENSE [X] PERMIT

2. BRIEF DESCRIPTION OF ACTIVITY FOR WHICH REQUESTED LICENSE OR PERMIT IS NEEDED.
Transport one snow leopard (endangered species) in international commerce in the course of a commercial activity, for captive propagation

3. APPLICANT. (Name, complete address and phone number of individual, business, agency, or institution for which permit is requested)
Cheyenne Mountain Zoological Park
P. O. Box 158
Colorado Springs, Colorado 80901
(303) 633-3522

4. IF "APPLICANT" IS AN INDIVIDUAL, COMPLETE THE FOLLOWING:
☐ MR. ☐ MRS. ☐ MISS ☐ MS. | HEIGHT | WEIGHT
DATE OF BIRTH | COLOR HAIR | COLOR EYES
PHONE NUMBER WHERE EMPLOYED | SOCIAL SECURITY NUMBER
OCCUPATION

5. IF "APPLICANT" IS A BUSINESS, CORPORATION, PUBLIC AGENCY, OR INSTITUTION, COMPLETE THE FOLLOWING:
EXPLAIN TYPE OR KIND OF BUSINESS, AGENCY, OR INSTITUTION
Non-profit corporation--public zoological exhibits for the recreation and education of mass audiences

ANY BUSINESS, AGENCY, OR INSTITUTIONAL AFFILIATION HAVING TO DO WITH THE WILDLIFE TO BE COVERED BY THIS LICENSE/PERMIT

NAME, TITLE, AND PHONE NUMBER OF PRESIDENT, PRINCIPAL OFFICER, DIRECTOR, ETC.
Don G. Davis, Dir. (303) 633-3522
IF "APPLICANT" IS A CORPORATION, INDICATE STATE IN WHICH INCORPORATED
Colorado

6. LOCATION WHERE PROPOSED ACTIVITY IS TO BE CONDUCTED
Export from Colorado Springs, Colorado to Calgary, Alberta, Canada

7. DO YOU HOLD ANY CURRENTLY VALID FEDERAL FISH AND WILDLIFE LICENSE OR PERMIT? ☐ YES ☐ NO
(If yes, list license or permit numbers)

8. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU PROPOSE? ☐ YES ☐ NO
(If yes, list jurisdictions and type of documents)
N/A

9. CERTIFIED CHECK OR MONEY ORDER (if applicable) PAYABLE TO THE U.S. FISH AND WILDLIFE SERVICE ENCLOSED IN AMOUNT OF
$ N/A

10. DESIRED EFFECTIVE DATE: 15 Jul 76

11. DURATION NEEDED: 30 days

12. ATTACHMENTS. THE SPECIFIC INFORMATION REQUIRED FOR THE TYPE OF LICENSE/PERMIT REQUESTED (See 50 C.F.R. 13.12(a)) MUST BE ATTACHED, IT CONSTITUTES AN INTEGRAL PART OF THIS APPLICATION. LIST SECTIONS OF 50 CFR UNDER WHICH ATTACHMENTS ARE PROVIDED.

CERTIFICATION

I HEREBY CERTIFY THAT I HAVE READ AND AM FAMILIAR WITH THE REGULATIONS CONTAINED IN TITLE 50, PART 13, OF THE CODE OF FEDERAL REGULATIONS AND THE OTHER APPLICABLE PARTS IN SUBCHAPTER B OF CHAPTER I OF TITLE 50, AND I FURTHER CERTIFY THAT THE INFORMATION SUBMITTED IN THIS APPLICATION FOR A LICENSE/PERMIT IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF. I UNDERSTAND THAT ANY FALSE STATEMENT HEREIN MAY SUBJECT ME TO THE CRIMINAL PENALTIES OF 18 U.S.C. 1001.

SIGNATURE (In ink) Don G. Davis | DATE 24MAY76

V 41 155
AUG 10 1976
UMI

COLORADO SPRINGS, COLO., *May 7, 1976.*

MR. LYNN A. GREENWALT,
Director (FWS/LE), Fish and Wildlife Service, U.S. Department of the Interior, P.O. Box 19183, Washington, D.C.

DEAR SIR: Please note by this letter the request of the Cheyenne Mountain Zoological Park for a permit to export one (1) male snow leopard, *Panthera uncia*, in foreign commerce and in the course of a commercial activity to:

The Calgary Zoological Society, St. George's Island, Calgary, Alberta T2G 3H4, Canada

for the purpose of captive propagation, as provided in Title 50 CFR, Chapter 1, Subchapter B, section 17.22.

The specimen to be covered by this permit is now alive and being held at the Cheyenne Mountain Zoological Park, where it was captive-born on 23 May 75.

The Cheyenne Mountain Zoological Park has successfully raised five snow leopards in the past two years and wishes to place some of these captive-born specimens with other zoological institutions that are willing and able to continue the propagation project thus begun.

The administrators of the Calgary Zoo have indicated such desires and abilities. A description of their facilities, a resume of their expertise and their intentions are contained below in a letter and a master plan booklet as provided by Mr. Greg Tarry, Curator of Operations for the Calgary Zoological Society. Additionally, though the studbook for snow leopards hasn't been completed, we at the Cheyenne Mountain Zoological Park feel assured that the appropriate staff member(s) at the Calgary Zoo would contribute to such records when they are finally instituted.

It is the intention of the Cheyenne Mountain Zoological Park to transport the snow leopard to the Calgary Zoo in a crate measuring 48" long, 24" wide, and 36" high. This crate is made from ¾" plywood which is supported by a frame of 2 x 4's and is lined inside with sheet metal. There is a guillotine-type door at one end and this door has a ventilation port measuring 6" x 12" which is covered with expanded metal. Also, the door is secured by a hasp and lock. The Cheyenne Mountain Zoological Park will transport the specimen by truck to Denver, Colorado where it will be transferred to Western Airlines' flight No. 480 leaving Denver at 10:50 a.m., MDT and arriving in Calgary at 1:00 p.m., MDT. Because of the short period of travel involved and because of the nature of the specimen, no provisions will be made for feeding and watering en route.

The only snow leopard deaths at the Cheyenne Mountain Zoological Park in the past five years may be attributed to age or maternal incompetence. We lost an adult male on 23 Nov 74 to acute, necrotizing hepatitis, which our veterinarian felt was a senile condition. That specimen was acquired on 28 Feb 68 as an adult of unknown age. On 21 Apr 73 a litter of one male and two female cubs was born at the Cheyenne Mountain Zoological Park. The male and one female died of aspiration pneumonia on 22 and 25 Apr 73, respectively. The second female died 30 Apr 73 of a blockage of the bowel. A second litter was born to the same pair on 9 May 74, consisting of two males and two females. One cub of each sex was immediately destroyed by the mother, but the remaining pair was successfully hand-reared and still reside at the Cheyenne Mountain Zoological Park. On 22 Apr 75, this same pair again reproduced, this time, a single female cub. This specimen had a congenital hip deformity and was, on 15 Mar 76, donated to the Cleveland Zoo. On 23 May 75, a second female, previously mated to the non-breeding male that died in 1974 (see above) delivered her first litter of two males and one female. The female cub was abandoned on the den floor and died of pneumonia on 26 May 75. The two male cubs were hand-raised in the zoo nursery and it is one of these that we wish to export to Canada.

Therefore, because the Cheyenne Mountain Zoological Park has been relatively successful in the captive propagation of snow leopards and because the long-term objectives of captive propagation and conservation of this delicate and beautiful species would be better served by placing captive-born specimens in other zoological collections, we respectfully request that this permit application receive favorable consideration.

I hereby certify that I have read and am familiar with the regulations contained in Title 50, Part 13, of the Code of Federal Regulations and the other applicable parts in Subchapter B of Chapter 1 of Title 50, and I further certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement hereon may subject me to the criminal penalties of 18 U.S.C. 1001.

DON G. DAVIS,
Director,
Cheyenne Mountain Zoological Park.

DAVID E. ALLEN,
Assistant Director,
Cheyenne Mountain Zoological Park.

WILLIAM V. ARAGON,
Curator,
Cheyenne Mountain Zoological Park.

cc: MR. HARRY STILES,
Special Agent-in-Charge,
(FWS/LE) Denver, Colorado.

JOHN M. MERTENS,
Chairman, A.A.Z.P.A. Conservation of Wildlife Committee.

MR. PETER KARSTEN,
Director, Calgary Zoo.

CALGARY, AB T2G 3H4, *April 5, 1976.*

UNITED STATES DEPARTMENT OF INTERIOR,
Fish and Wildlife Service.

DEAR SIRS: We have been asked by Don Davis, Director of the Zoo in Colorado Springs, Colorado, to give you some information about our zoo and specifically about our desire to obtain one male snow leopard from Colorado Springs.

The Calgary Zoo has been located on St. George's Island since its inception in 1918. Since that time it has grown to a zoo with an inventory of 334 species with an operating budget of $1,500,000.00 per year and attendance figures in excess of 600,000 people per year. The Calgary Zoo is financed and operated jointly by the City of Calgary and the Calgary Zoological Society. The Calgary Zoological Society provides capital funds to build the buildings and buy the animals and the City provides the operating funds to maintain the buildings and the animal collection.

All of the keeper staff at the Calgary Zoo go through an in-service, 4 year apprenticeship program. This program, one of the most highly recognized in North America, prepares the apprentice to work in all parts of the zoo plus giving him a sound theoretical background in a formal 60 lecture classroom training program. We have a staff at the present time of twenty-three apprentice zoo keepers and zoo keepers.

The Calgary Zoo's administration staff consists of: the Zoo Director, Curator of Operations, an Education Director, a Technical Services Department and a full time staff Veterinarian. All administrative staff had academic training in animal husbandry and in related fields. The Education Department is quite active in both contact with the public school system and in-zoo public education in the form of graphics and lectures. The Technical Services Department looks after all the records systems of the zoo. The zoo has recently acquired an Olivetti S-14 word retrieval system similar to the one in use in Denver and Philadelphia Zoos. This, we feel, gives us one of the most advanced zoo record system in North America. In conjunction with this internal system we are also a paid up and fully supporting member of th ISIS (International Species Inventory System) program and have been since its inception.

The Calgary Zoo is also a paid up and supporting member of both the American Association of Zoological Parks and Aquariums and the recently formed Canadian Association of Zoological Parks and Aquariums of which our director, Peter Karsten, is the president.

The integrity and reputation of the Calgary Zoo with all levels of Canadian Government can be verified by contacting any of the following people:

Mr. John Heppes, Administrator, Convention on International Trade in Endangered Species, Canadian Wildlife Service, Ottawa, Ontario K1A 0E3.
Mr. Gordon Kerr, Director of Fish and Wildlife, Natural Resources Building, 109th Street and 99th Avenue, Edmonton, Alberta T5K 2E1.
Dr. Lewis, Health of Animals Branch, Agriculture Canada, Ottawa, Ontario K1A 0C5.

I have taken the liberty of enclosing a copy of our master plan which will give you an idea of what exactly we have planned for the Calgary Zoo in the next few years. Our philosophy as explained on pages 4 and 5 of the booklet is to display fewer animals well and to concentrate on reproducing, in particular, rare and endangered species. It is for this reason that we wish to acquire snow leopards. We feel that this species will fit in well with our display philosophy and, in particular, our climate. We plan to acquire an unrelated female from another zoo and so establish a good breeding pair and have already made contact with several zoos to try and accomplish this.

The snow leopard will be displayed in an exhibit that will be approximately 3600 square feet of predominantly natural ground. The exhibit will have a glass front facing the public, wire mesh at the back and will be covered with wire mesh. The den will be approximately 600 square feet with three separate dens and two cubbing dens off of two of the day pens. The buildings will be serviced by power, water and sewer to insure the health and comfort of these animals.

The Calgary Zoo has had many breedings, births and hatchings over the years of difficult and rare species. These include: spectacled bears, black leopards, grizzly bears, polar bears, muskox, dall sheep, pronghorn antelope, European eagle owls, sarus crane and coscoroba and trumpeter swans. We feel that we have the expertise and we soon will have the facilities to handle the rarest and most sensitive of zoo animals and it is for this reason that we are applying for the permit to move this snow leopard to the Calgary Zoo.

I hope that between this letter and the master plan booklet, we have answered any questions you may have had concerning this transaction. If I can be of any further help, please feel free to contact me.

Sincerely,

CALGARY ZOOLOGICAL SOCIETY
GREG TARRY,
Curator of Operations.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Suite 600, 1612 K Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE), U.S. Fish and Wildlife Service, Post Office Box 19183, Washington, D.C. 20036. This application has been assigned File Number PRT 2-279-07; please refer to this number when submitting comments. All relevant comments received on or before September 9, 1976 will be considered.

National Park Service

BLUE RIDGE PARKWAY

Intention To Issue a Concession Permit

Pursuant to the provisions of section 5 of the Act of October 9, 1965, (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that thirty (30) days after the date of publication of this notice (September 9, 1976), the Department of the Interior, through the Superintendent, Blue Ridge Parkway, proposes to issue a concession permit to Mr. Homer Harris authorizing him to continue to provide concession facilities and services for the public at Mabry Mill, Blue Ridge Parkway, for a period of five (5) years from January 1, 1976, through December 31, 1980.

An analysis of the environmental impact of this proposed action has been made and it has been determined that it will not significantly affect the quality of the environment, and that it is not a major Federal action having a significant impact on the environment under the National Environmental Policy Act of 1969. The environmental analysis may be reviewed in the Office of the Superintendent, Blue Ridge Parkway.

The foregoing concessioner has performed his obligations under a prior permit to the satisfaction of the National Park Service and, therefore, pursuant to the Act cited above, is entitled to be given preference in the renewal of the permit and in the negotiation of a new permit. However, under the Act cited above, the National Park Service is also required to consider and evaluate all proposals received as a result of this notice. Any proposal to be considered and evaluated must be submitted on or before September 9, 1976.

Interested parties should contact the Superintendent, Blue Ridge Parkway, Post Office Box 7606, Asheville, North Carolina 28807, for information as to the requirements of the proposed permit.

Dated: June 29, 1976.

DAVID D. THOMPSON, Jr.,
Regional Director, Southeast Region.

NATIONAL REGISTER OF HISTORIC PLACES

Notification of Pending Nominations

Nominations for the following properties being considered for listing in the National Register were received by the National Park Service before July 30, 1976. Pursuant to § 60.13(a) of 36 CFR Part 60, published in final form on January 9, 1976, written comments concerning the significance of these properties under the National Register criteria for evaluation may be forwarded to the Keeper of the National Register, National Park Service, U.S. Department of the Interior, Washington, D.C. 20240. Written comments or a request for additional time to prepare comments should be submitted by August 20, 1976.

JERRY L. ROGERS,
Acting Director, Office of Archeology and Historic Preservation.

ALABAMA

Calhoun County

Anniston, *U.S. Post Office*, 1129 Noble St.

ALASKA

Nome Division

Nome vicinity, *Bear Rock Monument*, N of Nome near Salmon Lake.

ARIZONA

Cochise County

Cochise, *Cochise Hotel*, off U.S. 666.

CALIFORNIA

Yolo County

Woodland, *Gibson, William B., House*, 512 Gibson Rd.

DISTRICT OF COLUMBIA

Capitol Hill Historic District, roughly bounded by Va. Ave SE, S. Capitol, F St. NE, and 14th Sts. NE and SE.

KENTUCKY

Mercer County

Harrodsburg, Clay Hill, *Magoffin-Thompson House*, 433 Beaumont Ave.

MARYLAND

Carroll County

Union Bridge, *Pipe Creek Friends Meetinghouse*, Quaker Hill Rd.
Union Bridge, *Union Bridge Station*, N end of Main St.

MICHIGAN

Keweenaw County

Isle Royale National Park, *Rock Harbor Lighthouse*, Rock Harbor.

MISSISSIPPI

Alcorn County

Corinth vicinity, *Federal Siege Trench*, N of Corinth off U.S. 45.

MISSOURI

St. Louis (independent city)

Laclede's Landing, area between Eads and Veterans Memorial bridges and between Mark Twain Expwy. and the Mississippi River.

NEW YORK

Onondaga County

Syracuse, *Syracuse City Hall*, 233 E. Washington St.

Sullivan County

Jeffersonville vicinity, *Stone Arch Bridge*, S of Jeffersonville on NY 52.

OREGON

Lake County

Paisley vicinity, *Coffeepot Flat Cabin*, S. of Paisley on Fremont National Forest.

PENNSYLVANIA

Adams County

Gettysburg, *Sheads House*, 331 Buford Ave.

Allegheny County

Pittsburgh, *Phipps Conservatory*, Schenley Park.

Centre County

Bellefonte, *Bellefonte Academy*, 225 E. Bishop St.

Office of the Secretary

LAND AND WATER RESOURCES

Public Hearing

Notice is hereby given that public hearings will be held for the purpose of receiving testimony and comments on the availability of Federal lands for mineral exploration and development. As a result of recent public concern over the availability of public lands for mineral development under the General Mining Law (30 U.S.C. 21) and the Mineral Leasing Laws (30 U.S.C. 181–287, 351–359, 1001–1025), the Secretary of the Interior on January 12, 1976, directed that a special Task Force be established to examine and report on this matter.

In order to provide the maximum opportunity for public involvement at an early stage in its work and to provide information which will be useful in determining the extent to which mineral exploration and development is or is not restricted on Federal lands because of withdrawals, segregations, or other actions, the Task Force has determined that public hearings should be held.

Secretary Kleppe in a memorandum of January 12, 1976, established a Departmental Task Force on the Availability of Federally-Owned Mineral Lands. He gave the following objectives to the Task Force:

1. Determine which lands—of all public lands and lands where the Government owns the mineral estate—have been withdrawn, segregated, or otherwise restricted from mineral exploration and development.

2. Review present administrative policies and procedures governing withdrawal of public lands and other restrictions; and review modification and termination of withdrawals and restrictions.

3. Review alternatives to the present withdrawal system and other restrictive actions.

The public hearings will be held on the following dates at the following locations:

SEPTEMBER 8–9, 1976

SALT PLACE, SALT LAKE CITY, UTAH

SEPTEMBER 15–16, 1976

DEPARTMENT OF THE INTERIOR, SOUTH BUILDING AUDITORIUM, CONSTITUTION AVE., WASHINGTON, D.C.

Hearings at both locations will be held from 9 a.m. to 12 noon and 1 p.m. to 5 p.m. Interested individuals, representatives of organizations, and public officials wishing to appear at the hearings should contact the Office of the Assistant Secretary for Land and Water Resources, Department of the Interior, 18th & C Streets NW., Washington, D.C. not later than September 2. Written comments from those unable to attend and from those wishing to supplement their oral presentations at the hearings should be received by the Office of the Assistant Secretary for Land and Water Resources on or before September 30.

Oral statements at the hearings will be limited to 15 minutes. To the extent that time is available after presentation or oral statements by those who have given advanced notice, the hearings officer will give others present an opportunity to make a statement. Because of time limitations, those presenting oral statements at one of the above identified locations will not be permitted to present statements at other locations. The hearings are open to the public. All written statements received pursuant to this notice will be included in the hearing record. A record of the hearings will be available for public inspection 30 days after the last hearing date at the Office of the Assistant Secretary for Land and Water Resources.

Further information concerning these hearings may be obtained from Mr. Dennis Sachs, Chairman of the Mineral Lands Availability Task Force, Room 6616, Main Interior Building, 18th & C Streets, NW., Washington, D.C.

AUGUST 6, 1976.

DENNIS SACHS,
Chairman,
Deputy Assistant Secretary.

DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

TRI-STATE GENERATION AND TRANSMISSION ASSOCIATION, INC.

Electric Power Facility Loan; Draft Environmental Statement

Notice is hereby given that the Rural Electrification Administration intends to prepare a Draft Environmental Impact Statement in accordance with section 102(2)(C) of the National Environmental Policy Act of 1969 in connection with a loan application from Tri-State Generation and Transmission Association, Inc., 10520 Melody Drive, Northglenn, Colorado (Mailing Address: P.O. Box 29198, Denver, Colorado). The Statement covers two 50 MW combustion turbine generating units to be installed at a 43 acre site in Kit Carson County, Colorado and accessory facilities which include bus work for interconnection with the Burlington Substation presently under construction, fuel supply and fuel storage facilities, water storage reservoir, evaporative cooler blowdown storage reservoir and site peripheral irrigation system with associated pumps, and an office and parts warehouse building.

Interested persons are invited to submit comments which may be helpful in preparing the Draft EIS.

Comments should be forwarded to the Assistant Administrator—Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250, with a copy to the borrower whose address was given above. Additional information may be obtained at the borrower's office during regular business hours.

Dated at Washington, D.C. this 4th day of August 1976.

DAVID H. ASKEGAARD,
Acting Administrator, Rural Electrification Administration.

DEPARTMENT OF COMMERCE

Bureau of the Census

SPECIAL CENSUSES

Tabulations Completed in July 1976

The Bureau of the Census conducts a program whereby a local or State government can contract with the Bureau to conduct a special census of population. The content of a special census is ordinarily limited to questions on relationship to the head of the household, age, race, and sex, although additional items may be included at the request and expense of the sponsor. The enumeration in a special census is conducted under the same concepts which govern the Decennial Census.

Summary results of special censuses are published semiannually in the Current Population Reports—Series P–28, prepared by the Bureau of the Census. For each area which has a special census population of 50,000 or more, a separate publication showing data for that area by age, race, and sex is prepared. If the area has census tracts, these data are shown by tracts.

The data shown in the following table are the results of special censuses conducted since December 31, 1975, for which tabulations were completed between July 1, 1976, and July 31, 1976.

Dated: August 3, 1976.

VINCENT P. BARABBA,
Director, Bureau of the Census.

State and place or special area	County	Date of census	Population
Arkansas:

National Bureau of Standards

STRUCTURAL GLUED LAMINATED TIMBER STANDARD

Publication of Amendment

The National Bureau of Standards is giving public notice of the publication of Amendment No. 1 to Voluntary Product Standard PS 56–73, "Structural Glued Laminated Timber." The amendment, published in accordance with section 10.10(c) of the Department of Commerce's "Procedures for the Development of Voluntary Product Standards," became effective July 19, 1976. Amendment No. 1 to PS 56–73 provides clarification in line with changing technology and marketing practices, updates referenced publications, and adds definitions.

Copies of this amendment may be obtained from the Standards Development Services Section, National Bureau of Standards, Washington, D.C. 20234.

ERNEST AMBLER,
Acting Director.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Center for Disease Control

COAL MINE HEALTH RESEARCH ADVISORY COMMITTEE

Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92–463), the Center for Disease Control announces the following National Institute for Occupational Safety and Health Committee meeting:

Name: Coal Mine Health Research Advisory Committee.
Date: September 24, 1976.
Place: Conference Room G, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852.
Time: 9 a.m.
Type of Meeting: Open: 9 a.m. to 2:30 p.m., on September 24. Closed: Remainder of meeting.
Contact Person: Marilyn K. Hutchison, M.D., Executive Secretary, Park Building, Room 3–14, NIOSH, 5600 Fishers Lane, Rockville, Maryland 20852, Phone: 301–443–6377.
Purpose: The Committee is charged with advising the Secretary, Department of Health, Education, and Welfare, on matters involving or relating to coal mine health research, including grants and contracts for such research.
Agenda: Agenda items for the open portion of the meeting will include announcements, consideration of minutes of previous meeting, administrative and staff reports, an overview of the National Advisory Committee on Occupational Safety and Health, coal health standards, and Appalachian Laboratory for Occupational Safety and Health, including the status of the National Coal Study, the third round of medical examinations of coal miners, and the fiscal year 1977 research program. During the closed session beginning at 2:45 p.m., the Committee will be performing the final review of coal research grant applications for Federal assistance, and will not be open to the public, in accordance with the provisions set forth in Section 552(b)(5) and (6), Title 5, U.S. Code, and the Determination by the Director, Center for Disease Control, pursuant to Public Law 92–463.

Agenda items are subject to change as priorities dictate.

The portion of the meeting so indicated is open to the public for observation and participation. A roster of members and other relevant information regarding the meeting may be obtained from the contact person listed above.

Dated: August 3, 1976.

DAVID J. SPENCER,
Director,
Center for Disease Control.

Food and Drug Administration

[Docket No. 75P–0294]

LISTING OF INGREDIENTS IN PET FOOD LABELING

Notice Reaffirming Regulatory Policy; Extension of Time for Compliance

The Food and Drug Administration (FDA) is extending until June 7, 1977, the time for compliance with the notice published in the FEDERAL REGISTER of April 14, 1976 (41 FR 15731), which reaffirmed FDA regulatory policy with respect to the declaration of water as an ingredient of pet food.

The April 14 notice required that all pet food products initially introduced into interstate commerce after October 12, 1976, conform with the provisions of 21 CFR 1.10(e) (redesignated as 21 CFR 1.10(a); see the FEDERAL REGISTER of January 6, 1976 (41 FR 1165)). That effective date was established to give manufacturers whose labeling was not in compliance with this section because of conflicting interpretations of the existing requirements of Federal and State regulations a reasonable transition period to bring their labeling into compliance.

The Commissioner of Food and Drugs has received a request that the effective date be further delayed because compliance by October 12, 1976, will impose a harsh economic burden on the entire industry, particularly the smaller manufacturers. The economics of the pet food industry require most manufacturers to purchase their labels 2 to 6 months prior to use; the smaller manufacturers, however, often must acquire their labels as much as 1 or 2 years in advance. Thus, the October effective date provides many affected parties little if any relief, and the Commissioner has determined that more time is necessary to accomplish the equitable period of transition originally sought.

Based on the foregoing, therefore, the Commissioner has concluded that the effective date of the time for compliance shall be June 7, 1977.

Dated: August 3, 1976.

JOSEPH P. HILE,
Acting Commissioner of Food and Drugs.

[Docket No. 76N–0225; DESI 5010]

MEPERIDINE HYDROCHLORIDE TABLETS AND ELIXIR

Drugs for Human Use; Drug Efficacy Study Implementation; Followup Notice and Opportunity for Hearing

Correction

In FR Doc. 76–21309 in the FEDERAL REGISTER for Friday, July 23, 1976 make the following correction at page 30377: In the middle column, paragraph numbered "3", line 11 should read "complete container labeling if current container labeling has not been sub-".

[Docket No. 76C–0345]

GLENN M. W. SCOTT

Filing of Petition for Color Additive

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 706(d), 74 Stat. 402 (21 U.S.C. 376(d))), notice is given that a petition (CAP 6CP0123) has been filed by Glenn M. W. Scott, 6211 Orion Rd., Louisville, KY 40222, requesting that:

(1) The listing of the color additive FD&C Blue No. 1 (21 CFR 8.206 and 8.4021) be repealed.

(2) The following petitions be referred to an advisory committee under section 706(b)(5)(C)(i) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 376(b)(5)(C)(i)).

(i) The petition to repeal the listing of FD&C Blue No. 1.

(ii) The petition to list FD&C Green No. 3, notice of filing of which was pub-

V 41 155 AUG 10 76 UMI

lished in the FEDERAL REGISTER of November 20, 1968 (33 FR 17205).

(iii) The petition to list FD&C Red No. 4, notice of filing of which was published in the FEDERAL REGISTER of November 20, 1968 (33 FR 17205).

The petition is dated March 2, 1976 and is deemed to have been filed on March 12, 1976.

Dated: August 6, 1976.

Health Services Administration

CALIFORNIA

Notice to Physicians Regarding Agreement To Designate Professional Standards Review Organization

On March 25, 1976, the Secretary of Health, Education, and Welfare published in the FEDERAL REGISTER a notice in which he announced his intention to enter into an agreement with the San Francisco Peer Review Organization, Inc. designating it as the Professional Standards Review Organization for PSRO Area V of the State of California, which area is designated a Professional Standards Review Organization Area in 42 CFR 101.7.

Such notice was also published in three consecutive issues of "The San Francisco Examiner" and the "San Francisco Chronicle" on March 25, 26, and 27, 1976. In addition, copies of the notice were mailed to organizations of practicing doctors of medicine or osteopathy, including the appropriate State and county medical and specialty societies, and hospitals and other health care facilities in the area, with a request that each such society or facility inform those doctors in its membership or on its staff who are engaged in active practice in PSRO Area V of the State of California of the contents of the notice.

The notice requested that any licensed doctor of medicine or osteopathy engaged in active practice in PSRO Area V of the State of California who objects to the Secretary entering into an agreement with the San Francisco Peer Review Organization, Inc. on grounds that such organization is not representative of the doctors in PSRO Area V of the State of California, mail such objection in writing to the Secretary, Department of Health, Education, and Welfare, P.O. Box 1588, FDR Station, New York, New York 10022 on or before April 26, 1976.

After reviewing the final tabulation of objections from doctors of medicine or osteopathy in PSRO Area V of the State of California, the Secretary has determined, pursuant to 42 CFR 101.105, that not more than 10 per centum of the doctors engaged in the active practice of medicine or osteopathy in PSRO Area V of the State of California have expressed timely objection to the entering into an agreement with the San Francisco Peer Review Organization, Inc. Therefore, the Secretary will proceed to enter into an agreement with the San Francisco Peer Review Organization, Inc. designating it as the Professional Standards Review Organization for PSRO Area V of the State of California.

Dated: August 5, 1976.

JOHN E. MARSHALL,
Associate Administrator for Operations, Health Services Administration.

CANCER CONTROL COMMUNITY ACTIVITIES REVIEW COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Cancer Control Community Activities Review Committee, September 13, 1976, National Institutes of Health, Building 31C, Conference Room 10. This meeting will be open to the public from 8:30 a.m. to 9:00 a.m. on September 13, 1976, to review administrative details. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552(b)(4), 552(b)(5) and 552(b)(6); Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on September 13, 1976 from 9:00 a.m. to adjournment, for the review, discussion and evaluation of individual initial pending grant applications and individual contract proposals. The closed portion of the meeting involves solely the internal expression of views and judgments of committee members on individual grant applications and individual contract proposals containing detailed research protocols, designs, and other technical information; financial data, such as salaries; and personal information concerning individuals associated with the applications and proposals.

Mrs. Marjorie F. Early, Committee Management Officer, NCI, Building 31, Room 3A16, National Institutes of Health, Bethesda, Maryland 20014 (301/496-5708) will furnish summaries of the meeting and roster of committee members upon request. Dr. Robert F. Browning, Executive Secretary, Blair Building, Room 7A07, National Institutes of Health, Bethesda, Maryland, 301/427-7945, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.399, National Institutes of Health.)

Dated: July 26, 1976.

RONALD W. LAMONT-HAVERS,
Deputy Director, National Institutes of Health.

CANCER CONTROL INTERVENTION PROGRAMS REVIEW COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Cancer Control Intervention Programs Review Committee, National Cancer Institute, Blair Building, Room 110, 8300 Colesville Road, Silver Spring, Maryland 20901 on September 9-10, 1976.

This meeting will be open to the public from 8:30 a.m. to 12:00 noon on September 9, 1976, and from 8:30 a.m. to adjournment on September 10, 1976, for the review of contract projects supported by the National Institutes of Health. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552(b)(4) and 552(b)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed on September 9, 1976, from 12:00 noon to 5:00 p.m. for the review, discussion, and evaluation of individual contract proposals. The contract proposals contain information of a proprietary or confidential nature, including detailed research protocols, designs, and other technical information; financial data, such as salaries, and personal information about individuals associated with the contract proposals.

Mrs. Marjorie F. Early, Committee Management Officer, NCI, Building 31, Room 3A16, National Institutes of Health, Bethesda, Maryland 20014 (301/496-5708) will furnish summaries of the meeting and rosters of committee members.

Dr. Carlos E. Caban, Executive Secretary, Blair Building, Room 7A07, National Institutes of Health, Bethesda, Maryland 20014 (301/427-7945) will furnish substantive program information.

NATIONAL ADVISORY ALLERGY AND INFECTIOUS DISEASES COUNCIL

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the National Advisory Allergy and Infectious Diseases Council, National Institute of Allergy and Infectious Diseases, September 30, October 1 and 2, 1976, in Building 31, Conference Room 6, Bethesda, Maryland. This meeting will be open to the public on September 30 from 1:30 p.m. until recess, and on October 1 from 9:00 a.m. until 5:00 p.m., to discuss administrative, program, and policy matters. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552(b)(4), 552(b)(5), and 552(b)(6), Title 5, U.S. Code, and section 10(d) of Public Law 92-463, the meeting of the Council will be closed to the public on September 30 from 9:00 a.m. until 1:30 p.m., and on October 2 from 9:00 a.m. until adjournment, for the review, discussion, and evaluation of individual initial pending, supplemental and renewal grant applications. The closed portions of the meetings involve solely the internal expression of views and judgments of Council members on individual grant applications containing detailed research protocols, designs, and other technical information; financial data, such as salaries; and personal information concerning individuals associated with the applications.

Mr. Robert L. Schreiber, Chief, Office of Research Reporting and Public Response, National Institute of Allergy and Infectious Diseases, Building 31, Room 7A32, Bethesda, Maryland, telephone (301) 496-5717, will furnish rosters of Council members, a summary of the meeting, and other information pertaining to the meeting.

(Catalog of Federal Domestic Assistance Program Nos. 13.855, 13.856, 13.857, and 13.858, National Institutes of Health.)

Dated: August 3, 1976.

SUZANNE L. FREMEAU,
Committee Management Officer, National Institutes of Health.

[FR Doc.76-23192 Filed 8-9-76;8:45 am]

NATIONAL ADVISORY CHILD HEALTH AND HUMAN DEVELOPMENT COUNCIL

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the National Advisory Child Health and Human Development Council, September 22-23, 1976, Building 31, Conference Room 10, National Institutes of Health, Bethesda, Maryland. The meeting will be open to the public on September 22 from 9:00 a.m. to 5:00 p.m. with current status reports, review of the Growth and Development Program, and scientific presentations. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552(b)(4), 552(b)(5), and 552(b)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on September 23 from 9:00 a.m. to adjournment for the review, discussion and evaluation of individual initial pending, supplemental, and renewal grant applications. The closed portion of the meeting involves solely the internal expression of views and judgments of committee members on individual grant applications containing detailed research protocols, designs, and other technical information; financial data, such as salaries; and personal information concerning individuals associated with the applications.

Mrs. Marjorie Neff, Council Secretary, NICHD, Building 31, Room 2A-04, National Institutes of Health, Bethesda, Maryland, Area Code 301, 496-1848, will

V 41 155 A AUG 10 76 UMI

provide summaries of meetings and a roster of Council members as well as substantive program information.

(Catalog of Federal Domestic Assistance Program Nos. 13.864 and 13.865, National Institutes of Health.)

Dated: August 3, 1976.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

NATIONAL ADVISORY NEUROLOGICAL AN COMMUNICATIVE DISORDERS AND STROKE- COUNCIL

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the National Advisory Neurological and Communicative Disorders and Stroke Council, National Institutes of Health, September 23, 24, and 25, 1976, at 9:00 a.m. in Building 31-C, Conference Room 6, Bethesda, Maryland.

The meeting will be open to the public from 9:00 a.m. until 1:00 p.m. on September 23, 1976, and from 9:00 a.m. to 10:00 a.m., and from 3:00 p.m. until the conclusion of the meeting on September 24, 1976, to discuss program planning and program accomplishments. Attendance by the public will be limited to space available. In accordance with the provisions set forth in sections 552(b)(4), 552(b)(5), and 552(b)(6) of Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public from 1:00 p.m. on September 23, 1976, until the conclusion of the meeting that day, and from 10:00 a.m. until 3:00 p.m. on September 24, and from 9:00 a.m. until the conclusion of the meeting on September 25, 1976, for the review, discussion and evaluation of individual initial pending and renewal research grant applications and applications for Teacher-Investigator Awards and Research Career Development Awards. The closed portion of the meeting involves solely the internal expression of views and judgments of committee members on individual grant applications which contain information of a proprietary or confidential nature, including detailed research protocols, designs, and other technical information; financial data, such as salaries; and personal information concerning individuals associated with applications for research grants.

The Chief, Office of Scientific and Health Reports, Mrs. Ruth Dudley, Building 31, Room 8A03, NINCDS, NIH, Bethesda, Maryland, telephone: (301) 496-5751, will furnish summaries of the meeting and rosters of committee members.

Dr. Murray Goldstein, Executive Secretary, Federal Building, Room 1016A, Bethesda, Maryland, telephone: (301) 496-9248, will furnish substantive program information.

NATIONAL ADVISORY NEUROLOGICAL AND COMMUNICATIVE DISORDERS AND STROKE COUNCIL PLANNING SUBCOMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the National Advisory Neurological and Communicative Disorders and Stroke Council Planning Subcommittee, September 9, 1976, at 8:30 a.m. in the Connecticut Room, The Holiday Inn, 8120 Wisconsin Avenue, Bethesda, Maryland. The meeting will be open to the public from 8:30 a.m. to 10:30 a.m. on September 9, 1976, to discuss program planning and program accomplishments. Attendance by the public will be limited to space available. In accordance with the provisions set forth in sections 552(b)(4), 552(b)(5), and 552(b)(6) of Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public from 10:30 a.m. on September 9, 1976, to adjournment on September 9, 1976 for the review, discussion and evaluation of individual initial pending and renewal grant applications. The closed portion of the meeting involves solely the internal expression of views and judgments of committee members on individual grant applications which contain information of a proprietary or confidential nature, including detailed research protocols, designs, and other technical information; financial data, such as salaries; and personal information concerning individuals associated with applications for research grants.

The Chief, Office of Scientific and Health Reports, Mrs. Ruth Dudley, Building 31, Room 8A03, NIH, NINCDS, Bethesda, Maryland, telephone: (301) 496-5751, will furnish summaries of the meeting and rosters of committee members.

Dr. O. Malcolm Ray, Executive Secretary of the Committee, Room 1020C, Federal Building, NIH, NINCDS, Bethesda, Maryland, telephone: (301) 496-9234, will provide substantive program information.

NATIONAL LIBRARY OF MEDICINE BOARD OF REGENTS

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Board of Regents of the National Library of Medicine on September 23-24, 1976, in the Board Room of the National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland, and the meeting of the Extramural Programs Subcommittee of the Board of Regents of the National Library of Medicine on the preceding day, September 22, 1976, from 2:00 to 5:00 p.m., in Conference Room "B" of the Library.

The meeting of the Board will be open to the public all day on September 23 and from 9:00 to 9:30 a.m. on September 24 for administrative reports and program and operation discussions. Attendance by the public will be limited to space available. In accordance with provisions set forth in sections 552(b)(4), 552(b)(5), and 552(b)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the entire meeting of the Subcommittee on September 22 will be closed to the public, and the regular Board meeting on September 24 will be closed from 9:30 a.m. to adjournment, for the review, discussion and evaluation of individual initial pending and renewal grant applications. The closed portions of the meetings involve solely the internal expression of views and judgments of committee members on individual grant applications containing detailed research protocols, designs, and other technical information; financial data, such as salaries; and personal information concerning individuals associated with the applications.

Mr. Robert B. Mehnert, Chief, Office of Inquiries and Publications Mangement, National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland 20014, Telephone Number: 301-496-6308, will furnish a summary of the meeting, rosters of Board members, and other information pertaining to the meeting.

PUBLIC ADVISORY COMMITTEES

Renewal

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776), the National Institutes of Health announces the renewal by the Secretary, HEW, with the concurrence of the Office of Management and Budget Committee Management Secretariat, of the following committees:

Committee	Termination date
Animal Resources Advisory Committee.	May 31, 1978.
Chemical / Biological Information-Handling Review Committee.	Do.
Clinical Trials Review Committee.	June 30, 1977.
General Clinical Research Centers Committee.	May 31, 1978.
General Research Support Program Advisory Committee.	Do.
Genetics study section	June 30, 1978.
Hematology study section	Do.
Human embryology and development study section.	Do.
Lipid Metabolism Advisory Committee.	June 30, 1977.
Medicinal chemistry A study section.	June 30, 1978.
Medicinal chemistry B study section.	Do.
Metabolism study section	Do.
Microbial chemistry study section.	Do.
Molecular biology study section.	Do.
National Advisory Research Resources Council.	May 31, 1978.
Neurology B study section	June 30, 1978.
Nutrition study section	Do.
Pathology A study section	Do.
Pathology B study section	Do.
Pharmacology study section	Do.
Physiology study section	Do.
Population research study section.	Do.
Pulmonary Diseases Advisory Committee.	June 30, 1977.
Reproductive biology study section.	June 30, 1978.
Surgery B study section	Do.
Tropical medicine and parasitology study section.	Do.
Virology study section	Do.
Visual sciences A study section.	Do.

Authority for these committees will expire on the dates indicated unless the Secretary formally determines that continuance is in the public interest.

The following committees, established by an Act of Congress, shall file a charter upon the expiration of each successive two-year period in accordance with Pub. L. 92-463. That rechartering date is indicated below.

Committee	Rechartering date
National Cancer Advisory Board.	June 30, 1978.
President's Cancer Panel	Do.

Dated: August 4, 1976.

R. W. LAMONT-HAVERS,
Acting Director,
National Institutes of Health.

PULMONARY DISEASES ADVISORY COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Pulmonary Diseases Advisory Committee, National Heart, Lung, and Blood Institute, on October 19, 1976, in Conference Room 7, Building 31, at the National Instiutes of Health, Bethesda, Maryland.

The entire meeting will be open to the public from 8:30 a.m. to 6:00 p.m. on October 19, to discuss the Committee plans for the year. Attendance by the public will be limited to the space available.

Mr. York Onnen, Chief, Public Inquiries and Reports Branch, National Heart, Lung, and Blood Institute, Building 31, Room 5A03, National Institutes of Health, Bethesda, Maryland 20014, phone (301) 496-4236, will provide summaries of the meeting and rosters of the committee members.

Dr. Malvina Schweizer, Executive Secretary of the Committee, Westwood Building, Room 6A18, National Institutes of Health, Bethesda, Maryland 20014, phone (301) 496-7208, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.838, National Institutes of Health)

Dated: August 3, 1976.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

RECOMBINANT DNA MOLECULE PROGRAM ADVISORY COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Recombinant DNA Molecule Program Advisory Committee on September 13-14, 1976, 9 a.m., at the National Institutes of Health, Building 1, Wilson Hall, Bethesda, Maryland. This meeting will be open to the public on September 13, from 9 a.m. to 5 p.m., and September 14, from 9 a.m. to 3 p.m. to discuss: guidelines for research involving recombinant DNA molecules, the status of research in the field, research studies required, the mechanisms by which such studies should be supported, and the identification of facilities and resources needed in their performance. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552(b)(4), 552(b)(5) and 552(b)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on September 14 from 3 p.m. to 5 p.m. for the review, discussion and evaluation of initial pending and renewal grant applications. The closed portion of the meeting involves solely the internal expression of views and judgments of committee members on individual grant applications containing detailed research protocols, designs, and other technical information; financial data, such as salaries; and personal information concerning individuals associated with the applications.

Dr. William J. Gartland, Executive Secretary, National Institutes of Health, Building 31, Room 4A52, Bethesda, Maryland 20014, telephone (301) 496-2323, will provide summaries of the meeting, rosters of committee members and substantive program information.

Dated: August 2, 1976.

R. W. LAMONT-HAVERS,
Deputy Director,
National Institutes of Health.

Office of Education

NATIONAL ADVISORY COUNCIL ON EDUCATION PROFESSIONS DEVELOPMENT

Meeting

Notice is hereby given, pursuant to section 10(a)(2) Pub. L. 92-463, that the next meeting of the National Advisory Council on Education Professions Development will be held on Wednesday, September 15, 1976, 2 p.m. to 5 p.m., and Thursday, September 16, 1976, 9 a.m. to 5 p.m., local time, at the Statler-Hilton Hotel, Washington, D.C.

The National Advisory Council on Education Professions Development is established under Section 502 of the Education Professions Development Act (Pub. L. 90-35). The Council is charged with the review of the Education Professions Development Act and of all other Federally supported programs for the training and development of educational personnel.

The meeting of the Council is open to the public. The proposed agenda includes discussion of legislative developments concerning education professions development, and planning.

Records are kept of all Council proceedings and are available for public inspection at the Council offices, located at 1111 20th Street, NW., Suite 306, Washington, D.C. 20036.

Signed at Washington, D.C. on August 4, 1976.

GEORGE ARNSTEIN,
Executive Director.

CIVIL AERONAUTICS BOARD

[Docket No. 29606; Order 76-8-19]

TRANSPORTES AEREOS PORTUGUESES S.A.R.L. (TAP)

Order of Investigation and Suspension Regarding U.S.-Portugal Nonaffinity Group Fares

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 26th day of July 1976.

By Order 76-4-143, April 16, 1976, the Board suspended, pending investigation, a tariff proposal by Transportes Aereos Portugueses S.A.R.L. (TAP) to establish nonaffinity group fares between the United States and Portugal at New York-Lisbon levels of $296.00, $325.00, and $379.00 (winter, shoulder, and peak season respectively) in place of the existing affinity group fares.[1] The proposal was suspended on the basis that the fares were far below the costs of providing service; that even on a short-term basis, it was doubtful the fares would have a favorable impact on the carrier's earnings position; that removal of the affinity requirement on these fares, coupled with their low levels, would destroy any meaningful restrictions on their use, causing significant diversion from higher-fare categories and dilution of overall yields; and that if approved, the fare would likely spread to other U.S.-Europe markets, further weakening carrier profitability in overall North Atlantic service.

TAP subsequently withdrew the suspended nonaffinity fares, and increased the previously existing affinity group fares to New York-Lisbon levels of $337.00 (shoulder) and $387.00 (peak).[2] On July 9, 1976, TAP then filed new tariff revisions proposing to remove the affinity requirement applicable to the increased fares, effective August 8, 1976.

Trans World Airlines, Inc. (TWA) has filed a complaint requesting suspension and investigation of TAP's renewed proposal for U.S.-Portugal nonaffinity fares. Reiterating the arguments advanced in its complaint against the original filing, TWA submits further that the slight increase in level does nothing to alleviate the minimal restrictions applicable to the proposed fare, which would still result in massive revenue dilution; and that if approved, the fare would inevitably spread to other European markets, thus compounding its deleterious effects.

TAP, in answer to TWA's complaint, asserts that the conditions attached to the fare are sufficiently restrictive to prevent diversion from other fare categories, and cites its experience in the Canada-Portugal market where the nonaffinity group fare was permitted to become effective; and that approval of the fare will not necessarily lead to the filing of similar tariffs for other countries since the Board has clearly not refrained from suspending such proposals.

Upon full consideration of the tariff filing, complaint and answer, and all other relevant factors, the Board has determined to suspend the TAP filing pending investigation. Although the fare is proposed at marginally higher levels, it is still so far below demonstrated industry cost levels that it remains patently uneconomic on a fully allocated cost basis and, considering the minimal restrictions attached to its use, it would present a serious potential for diversion from higher-fare categories and a consequent dilution of overall carrier earnings.[3] TAP has presented no reason why this type of fare, only recently suspended, should now be approved at a slightly higher level.

The Board is also concerned that the fare, once permitted to become effective, would spread to other European destinations. The Board recognizes the interests of many transatlantic carriers in a low-level promotional fare in scheduled service, inspired largely by their desire to compete with charters. However, the price of such a fare must reflect the economics of scheduled service; the applicable conditions must be significantly and appropriately restrictive; and the fare should be directed to individuals rather than groups so as to eliminate the serious tariff abuses long associated with group travel. TAP's proposed nonaffinity fare satisfies none of these requirements and is clearly a step in the wrong direction.

Accordingly, pursuant to the Federal Aviation Act of 1958, as amended, and particularly sections 204(a), 403, 404, 801, and 1002 thereof:

It is ordered, That: 1. An investigation be instituted to determine whether the provisions in Exception No. 2 to Rule 85(C) on 25th Revised Page 31 to Passenger Fares Tariff No. PF-4, C.A.B. No. 44, issued by Air Tariffs Corporation, Agent, and rules, regulations, or practices affecting such provisions, are or will be unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and, if found to be unlawful, to take appropriate action to prevent the use of such provisions or rules, regulations, or practices;

2. Pending hearing and decision by the Board, the tariff provisions specified in ordering paragraph one above are suspended and their use deferred from August 8, 1976 to and including August 7, 1977, unless otherwise ordered by the Board; and that no changes be made therein during the period of suspension except by order or special permission of the Board;

3. The suspension herein shall not stay the cancellation of 24th Revised Page 31 to Passenger Fares Tariff No. PF-4, C.A.B. No. 44, issued by Air Tariffs Corporation, Agent;

4. This order shall be submitted to the President[4] and shall become effective on August 8, 1976;

5. The investigation ordered herein be assigned for hearing before an administrative law judge of the Board at a time and place hereafter to be designated;

6. Copies of this order be filed in the aforesaid tariffs and be served upon Transportes Aereos Portugueses, S.A.R.L. and Trans World Airlines, Inc.; and

7. Except to the extent granted, the complaint of Trans World Airlines, Inc. in Docket 29521 be and hereby is dismissed.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.76-23229 Filed 8-9-76;8:45 am]

[Docket 29589 and 26838; Order 76-7-124]

WIEN AIR ALASKA, INC.

Air Freight Rates Increase; Order of Suspension and Investigation; Correction

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 30th day of July, 1976.

The docket number assigned to the investigation instituted in this order, published at 41 FR 32639, August 4, 1976, regarding the proposal by Wien Air Alaska, Inc. to increase air freight rates should appear as Docket 29589 rather than Docket 25989 on page one in the heading and on page three in ordering paragraphs 3 and 4.

By the Civil Aeronautics Board.

Dated: August 3, 1976.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.76-23230 Filed 8-9-76;8:45 am]

[1] By Order 76-4-175, April 30, 1976, the Board later disapproved the U.S.-Portugal affinity group fares proposed at these same levels in our action on the overall IATA North Atlantic agreement.

[2] No winter season fare is on file.

[3] Order 76-4-143 cited industry costs, developed from the IATA Cost Committee Report, of 7.75 cents per revenue passenger-mile. Even at the slightly increased levels the fare proposed here would produce yields of only 5.01-5.75 cents per mile.

[4] This order was submitted to the President on July 26, 1976.

CIVIL SERVICE COMMISSION

COMMODITY FUTURES TRADING COMMISSION

Revocation of Authority To Make a Noncareer Executive Assignment

Under authority of § 9.20 of Civil Service Rule IX (5 CFR 9.20), the Civil Service Commission revokes the authority of the Commodity Futures Trading Commission to fill by noncareer executive assignment in the excepted service the position of Executive Assistant to the Chairman, Office of the Chairman.

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc. 76-23102 Filed 8-9-76;8:45 am]

FEDERAL ENERGY ADMINISTRATION

Title Change in Noncareer Executive Assignment

By notice of May 14, 1975, FR Doc. 75-12603 the Civil Service Commission authorized the Federal Energy Administration to fill by noncareer executive assignment the position of Deputy Director of Intergovernmental, Regional, and Special Programs and Director of Intergovernmental Relations, Office of Intergovernmental, Regional, and Special Programs. This is notice that the title of this position is now being changed to Deputy Director of Intergovernmental Relations and Special Programs.

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.76-23103 Filed 8-9-76;8:45 am]

NATIONAL TRANSPORTATION SAFETY BOARD

Title Change in Noncareer Executive Assignment

By notice of March 27, 1971, FR Doc. 71-4292 the Civil Service Commission authorized the Department of Transportation to fill by noncareer executive assignment the position of General Manager, National Transportation Safety Board. This is notice that the title of this position is now being changed to Managing Director, National Transportation Safety Board.

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

RECORDS AND REPORTS

Local Union Report EEO-3; Apprenticeship Information Reports EEO-2 and EEO-2E; Waiver of Filing Reports for Calendar Year 1975

At a duly constituted meeting on June 22, 1976, the Equal Employment Opportunity Commission voted to waive the requirement for filing the Local Union Report EEO-3 and the Apprenticeship Information Reports EEO-2 and EEO-2E for the calendar year 1975. The recordkeeping requirements for calendar year 1975 remain unchanged and are not waived. The Commission reafirms its filing requirements for these reports on an annual basis including calendar year 1976.

NOTE.—Since the reporting requirements have been waived and no forms have been mailed to entities required to report, no further reporting action is required on 1975 reports.

Signed at Washington, D.C. this 4th day of August 1976.

ETHEL BENT WALSH,
Vice Chairman, Equal Employment Opportunity Commission.

ENVIRONMENTAL PROTECTION AGENCY

[OPP-33000/442 & 443; FRL 597-6]

NOTICE OF RECEIPT OF APPLICATION FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (39 FR 31862) its interim policy with respect to the administration of section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended ["Interim Policy Statement"]. On January 22, 1976, EPA published in the FEDERAL REGISTER a document entitled "Registration of a Pesticide Product—Consideration of Data by the Administrator in Support of an Application" [41 FR 3339]. This document described the changes in the Agency's procedures for implementing section 3(c)(1)(D) of FIFRA, as set out in the Interim Policy Statement, which were effectuated by the enactment of the recent amendments to FIFRA on November 28, 1975 [Pub. L. 94-1401, and the new regulations governing the registration and re-registration of pesticides which became effective on August 4, 1975 [40 CFR Part 162].

Pursuant to the procedures set forth in these FEDERAL REGISTER documents, EPA hereby gives notice of the applications for pesticide registration listed below. In some cases these applications have recently been received; in other cases, applications have been amended by the submission of additional supporting data, the election of a new method of support, or the submission of new "offer to pay" statements.

In the case of all applications, the labeling furnished by the applicant for the product will be available for inspection at the Environmental Protection Agency, Room 209, East Tower, 401 M Street, S.W., Washington DC 20460. In the case of applications subject to the new Section 3 regulations, and applications not subject to the new Section 3 regulations which utilize either the 2(a) or 2(b) method of support specified in the Interim Policy Statement, all data citations submitted or referenced by the applicant in support of the application will be made available for inspection at the above address. This information (proposed labeling and, where applicable, data citations) will also be supplied by mail, upon request. However, such a request should be made only when circumstances make it inconvenient for the inspection to be made at the Agency offices.

Any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after January 1, 1970, is being used to support an application described in this notice, (c) desires to assert a claim under section 3(c)(1)(D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data or the status of such data under section 10 must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Product Control Branch, Registration Division (WH-567), Office of Pesticide Programs, Environmental Protection Agency, 401 M St SW, Washington DC 20460. Every such claimant must include, at a minimum, the information listed in the Interim Policy Statement of November 19, 1973.

V 41 155 AUG 10 76 UMI

Specific questions concerning applications made to the Agency should be addressed to the designated Product Manager (PM), Registration Division (WH–567), Office of Pesticide Programs, at the above address, or by telephone as follows:

PM 11, 12, and 13—202/755–9315; PM 15, 16, and 17—202/426–9425; PM 21 and 22—202/426–2454; PM 23—202/755–1397; PM 24—202/755–2196; PM 25—202/755–7012; PM 31—202/426–2635; PM 32—202/426–9486; PM 33—202/755–9041; PM 34—202/426–9490.

The Interim Policy Statement requires that claims for compensation be filed within 60 days of publication of this notice. With the exception of 2(c) applications not subject to the new section 3 regulations, and for which a sixty-day hold period for claims is provided, EPA will not delay any registration pending the assertion of claims for compensation or the determination of reasonable compensation. Inquiries and assertions that data relied upon are subject to protection under section 10 of FIFRA, as amended, should be made on or before September 9, 1976.

Dated: August 3, 1976.

JOHN B. RITCH, JR.,
Director, Registration Division.

APPLICATIONS RECEIVED (OPP–3300/442)

EPA Reg. No. 2749–369. Aceto Chemical Co., Inc., 126–02 Northern Blvd., Flushing NY 11368. DIURON DL WEED KILLER. Active Ingredients: Diuron [3-(3,4-Dichlorophenyl)-1,1-dimethylurea] 28%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM25

EPA File Symbol 38330-I. Arco Chemical Co., PO Box 370, Sand Springs OK 74063. ARO-CIDE D–632. Active Ingredients: Poly-[oxyethylene(dimethyliminio)ethylene(dimethyliminio)ethylenedichloride] 32.0%. Method of Support: Application proceeds under 2(b) of interim policy. PM34

EPA Reg. No. 10088–5. Athea Labs., Inc., 4180 N. First St., Milwaukee WI 53212. SELECTIVE HERBICIDE #3 BROADLEAF WEED KILLER. Active Ingredients: Alkanolamine Salts (Ethanol and Isopropanol Series) of 2,4-Dichlorophenoxyacetic Acid 38.3%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 7969–40. BASF Wyandotte Corp., Agricultural Chemicals Dept., 100 Cherry Hill Rd., Parsippany NJ 07054. U–46 D4 HERBICIDE. Active Ingredients: Dimethylamine Salt of 2,4-Dichlorophenoxyacetic acid 49.6%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA File Symbol 7969–UI. BASF Wyandotte Corp. U–46 D4–RR HERBICIDE. Active Ingredients: Dimethylamine Salt of 2,4-Dichlorophenoxyacetic acid 49.6%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 4715–114. Colorado International Corp., 5321 Dahlia St., Commerce City CO 80022. BEST 4 SERVIS BRAND BUTYL ESTER 400 2,4–D WEED KILLER. Active Ingredients: Butyl ester 2,4-Dichlorophenoxyacetic Acid 57.0%. Method of Support: Application proceeds under 2(b) of iterim policy. Application for reregistration. PM23

EPA Reg. No. 3770–9. Economy Products Co., Inc., PO Box 427, Shenandoah IA 51601. A BUTYL ESTER FORMULATION 2,4–D 4 LB ACID. Active Ingredients: Butyl ester of 2,4-Dichlorophenoxyacetic Acid 56.44%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 3770–10. Economy Products Co., Inc. AN AMINE SALT FORMULATION 2,4–D 4 LB ACID. Active Ingredients: Dimethyl Amine Salt of 2,4-Dichlorophenoxyacetic Acid 50.6%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23.

EPA Reg. No. 3770–43. Economy Products Co., Inc. 2,4-D LAWN WEED KILLER (GRANULAR). Active Ingredients: 2,4-Dichlorophenoxyacetic acid, Isooctyl ester 2.41%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 5605–81. Farmingdale Garden Laboratories, Inc., 136 Verdi St., Farmingdale, Long Island NY 11735. 2,4-D LAWN WEED & DANDELION KILLER. Active Ingredients: Alkanolamine Salts (of the Ethanol and Isopropanol series) of 2,4-Dichlorophenoxyacetic Acid 16.25%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 5606–12. Farmingdale Garden Laboratories, Inc. READY MIXED HOSE SPRAY FARMINGDALE'S 2,4-D LAWN WEED & DANDELION KILLER. Active Ingredients: Alkanolamine Salts (of the Ethanol and Isopropanol Series) of 2,4-Dichlorophenoxyacetic Acid 4.0%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA 5905–95. Helena Chemical Co., Clark Tower, 5100 Poplar Ave., Suite 3200, Memphis TN 38137. HELENA BRAND 2,4-D ESTER 4. Active Ingredients: Mixed butyl and isopropyl esters of 2,4-Dichlorophenoxyacetic acid 55.9%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 334–305. Hysan Corp., 919 W. 38th St., Chicago, IL 60609. GCC 545 GROUNDS CONTROL CHEMICALS. Active Ingredients: Dimethylamine Salt of dicamba (3,6-dichloro-o-anisic acid) 18.4%; Dimethylamine Salts of related acids 3.2%; Dimethylamine Salt of 2,4-dichlorophenoxyacetic acid 36.8%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 10404–2. Lakeshore Equipment & Supply Co., 300 S. Abbe Rd., Elyria OH 44035. LAKESHORE LESCOPAR HERBICIDE FOR CONTROL OF BROAD-LEAF WEEDS IN TURF, FAIRWAYS AND LAWNS. Active Ingredients: Diethanolamine salt of 2-(2-methyl-4-chlorophenoxy) propionic acid 30.1%; Diethanolamine salt of 2,4-dichlorophenoxyacetic acid 14.9%: Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA File Symbol 35969–E. L. A. Lux Co., 2285 Scranton Rd., Cleveland OH 44113. ALGAECIDE 100. Active Ingredients: Poly [oxyethylene(dimethyliminio)ethylene(dimethyliminio)-ethylenedichloride] 10.0%. Method of Support: Application proceeds under 2(b) of interim policy. PM34

EPA File Symbol 11411–T. Leslie's Pool Mart, 7756 Balboa Blvd., Van Nuys CA 91406. LESLIE'S SUPER 90. Active Ingredients: Trichloro-s-triazinetrione 100%; available chlorine 90.0%. Method of Support: Application proceeds under 2(b) of interim policy. MP34

EPA Reg. No. 524–126. Monsanto Co., Agricultural Products, 800 N. Lindbergh Blvd., St. Louis MO 63166. 2,4-D AMINE SIX POUNDS ACTIVE PER GALLON. Active Ingredients: Dimethylamine Salt of 2,4-Dichlorophenoxyacetic Acid 70.4%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 524–125. Monsanto Co. 2,4-D AMINE FIVE POUNDS ACTIVE PER GALLON. Active Ingredients: Dimethylamine Salt of 2,4-Dichlorophenoxyacetic Acid 60.1%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 524–94. Monsanto Co. D-LEET HERBICIDE. Active Ingredients: Isooctyl Ester of 2,4-Dichlorophenoxyacetic Acid 97.3%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 524–22. Monsanto Co. 2,4-D ISOPROPYL ESTER. Active Ingredients: Isopropyl Ester of 2,4-Dichlorophenoxyacetic Acid 98.8%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 4825–19. Ringer Corp., 6860 Flying Cloud Dr., Eden Prairie MN 55343. KILLER KANE KARTRIDGES FOR DANDELIONS AND BROADLEAF WEEDS. Active Ingredients: 2,4-Dichlorophenoxyacetic Acid 35%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 228–141. Riverdale Chemical Co., 220 E. 17th St., Chicago Heights IL. RIVERDALE BUTOXY 2,4-D LOW VOLATILE ESTER. Active Ingredients: Butoxy Ethanol ester of 2,4-Dichlorophenoxyacetic acid 65.4%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 228–139. Riverdale Chemical Co. RIVERDALE 2,4-D LOW VOLATILE ESTER. Active Ingredients: Isooctyl Ester of 2,4-Dichlorophenoxyacetic Acid 70.1%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 228–132. Riverdale Chemical Co. RIVERDALE 2,4-D BUTYL ESTER–6. Active Ingredients: Butyl ester of 2,4-Dichlorophenoxyacetic acid 77.3%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 228–123. Riverdale Chemical Co. RIVERDALE SODIUM SALT OF 2,4-D. Active Ingredients: Monohydrate sodium salt of 2,4-dichlorophenoxyacetic acid 94.4%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA File Symbol 39183–R. Syntec Corp., 215 Ford Rd., Bala Cynwyd PA 19004. BIOCIDE 170–15. Active Ingredients: Poly[oxyethylene(dimethyliminio)ethylene(dimethyli - minio)ethylenedichloride] 15.0%. Method of Support: Application proceeds under 2 (b) of interim policy. PM34

EPA File Symbol 39183–E. Syntec Corp. BIOCIDE 170–10. Active Ingredients: Poly-[oxyethylene(dimethyliminio)ethylene(dimethyliminio)ethylenedichloride] 10.0%. Method of Support: Application proceeds under 2(b) of interim policy. PM34

EPA Reg. 449–225. Techne Corp., c/o Regulatory Affairs Dept., Farmland Industries, Inc., PO Box 7305, Kansas City MO 64116. TECHNE 20%, 2,4-D GRANULES. Active Ingredients: 2,4 - Dichlorophenoxyacetic acid, issooctyl ester 30.52%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA File Symbol 449–LLL. Techne Corp., TECHNE 20% 2,4-D GRANULES. Active Ingredients: 2,4 - Dichlorophenoxyacetic acid, isooctyl ester 30.32%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

NOTICE OF RECEIPT OF APPLICATION FOR PESTICIDE REGISTRATION

Data To Be Considered In Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (39 FR 31862) its interim policy with respect to the administration of section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended ["Interim Policy Statement"]. On January 22, 1976, EPA published in the FEDERAL REGISTER a document entitled "Registration of a Pesticide Product—Consideration of Data by the Administrator in Support of an Application" [41 FR 3339]. This document described the changes in the Agency's procedures for implementing section 3(c)(1)(D) of FIFRA, as set out in the Interim Policy Statement, which were effectuated by the enactment of the recent amendments to FIFRA on November 28, 1975 [Pub. L. 94-140], and the new regulations governing the registration and re-registration of pesticides which became effective on August 4, 1975 [40 CFR Part 162].

Pursuant to the procedures set forth in these FEDERAL REGISTER documents, EPA hereby gives notice of the applications for pesticide registration listed below. In some cases these applications have recently been received; in other cases, applications have been amended by the submission of additional supporting data, the election of a new method of support, or the submission of new "offer to pay" statements.

In the case of all applications, the labeling furnished by the applicant for the product will be available for inspection at the Environmental Protection Agency, Room 209, East Tower, 401 M Street, SW., Washington DC 20460. In the case of applications subject to the new section 3 regulations, and applications not subject to the new section 3 regulations which utilize either the 2(a) or 2(b) method of support specified in the Interim Policy Statement, all data citations submitted or referenced by the applicant in support of the application will be made available for inspection at the above address. This information (proposed labeling and, where applicable, data citations) will also be supplied by mail, upon request. However, such a request should be made only when circumstances make it inconvenient for the inspection to be made at the Agency offices.

Any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after January 1, 1970, is being used to support an application described in this notice, (c) desires to assert a claim under section 3(c)(1)(D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data or the status of such data under section 10 must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Product Control Branch, Registration Division (WH-567), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW, Washington DC 20460. Every such claimant must include, at a minimum, the information listed in the Interim Policy Statement of November 19, 1973.

Specific questions concerning applications made to the Agency should be addressed to the designated Product Manager (PM), Registration Division (WH-567), Office of Pesticide Programs, at the above address, or by telephone as follows:

PM 11, 12, and 13—202/755-9315; PM 15, 16, and 17—202/426-9425; PM 21 and 22—202/426-2454; PM 23—202/755-1397; PM 24—202/755-2196; PM 25—202/755-7012; PM 31—202/426-2635; PM 32—202/426-9486; PM 33—202/755-9041; PM 34—202/426-9490.

The Interim Policy Statement requires that claims for compensation be filed within 60 days of publication of this notice. With the exception of 2(c) applications not subject to the new section 3 regulations, and for which a sixty-day hold period for claims is provided, EPA will not delay any registration pending the asssertion of claims for compensation or the determination of reasonable compensation. Inquiries and assertions that data relied upon are subject to protection under section 10 of FIFRA, as amended should be made on or before September 9, 1976.

Dated: August 3, 1976.

JOHN B. RICTH, JR.,
Director, Registration Division.

APPLICATIONS RECEIVED (OPP—33000/444)

EPA Reg. No. 1145-134. Amoco Oil Co., 200 E. Randolph Dr., Chicago IL. AMOCO 2,4-D WEED KILLER NO. 6B-M. Active Ingredients: Butyl esters of 2,4-Dichlorophenoxyacetic acid 79.2%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 352-342. E. I. Du Pont De Nemours & Co., Inc., Biochemicals Dept., 6054 Dupont Bldg., Wilmington DE 19898. LANNATE METHOMYL INSECTICIDE FOR USE ON COTTON. Active Ingredients: Methomyl S-methyl N-[(methylcarbamoyl)oxy]-thioacetimidate 90%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added use. PM12

EPA Reg. No. 352-342. E. I. Du Pont De Nemours & Co., Inc. LANNATE METHOMYL INSECTICIDE FOR USE ON PEANUTS. Active Ingredients: Methomyl S-methyl N-[(methylcarbamoyl)oxy] - thioacetimidate 90%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added use. PM12

EPA Reg. No. 352-342. E. I. Du Pont De Nemours & Co., Inc. LANNATE METHOMYL INSECTICIDE FOR USE ON PEACHES. Active Ingredients: Methomyl S-methyl N-[(methylcarbamoyl)oxy] - thioacetimidate 90%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added use. PM12

EPA Reg. No. 352-342. E. I. Du Pont De Nemours & Co., Inc., LANNATE METHOMYL INSECTICIDE FOR USE ON ONIONS. Active Ingredients: Meethomyl S-methyl N-[(methylcarbamoyl)oxy]thioacetimidate 90%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added use. PM12

EPA Reg. No. 352-342. E. I. Du Pont De Nemours & Co., Inc., LANNATE METHOMYL INSECTICIDE FOR USE ON COLLARDS. Active Ingredients: Methomyl S-methyl N-[(methylcarbamoyl)oxy]thioacetimidate 90%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added use. PM12

EPA Reg. No. 352-342. E. I. Du Pont De Nemours & Co., Inc., LANNATE METHOMYL INSECTICIDE FOR USE ON MELONS, CUCUMBER AND SQUASH. Active Ingredients: Methomyl S-methyl N-[(methylcarbamoyl)oxy]thioacetimidate 90%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added use. PM12

EPA Reg. No. 352-342. E. I. Du Pont De Nemours & Co., Inc., LANNATE METHOMYL INSECTICIDE FOR USE ON CUCUMBER AND MELONS IN THE SOUTHEAST. Active Ingredients: Methomyl S-methyl N-[(methylcarbamoyl) oxy]thioacetimidate 90%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added use. PM12

EPA Reg. No. 352-342. E. I. Du Pont De Nemours & Co., Inc., LANNATE METHOMYL INSECTICIDE FOR USE ON COLLARDS. Active Ingredients: Methomyl S-methyl N-[(methylcarbamoyl) oxy]thioacetimidate 90%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added use. PM12

EPA Reg. No. 352-342. E. I. Du Pont De Nemours & Co., Inc., LANNATE METHOMYL INSECTICIDE FOR USE ON MELONS, CUCUMBER AND SQUASH. Active Ingredients: Methomyl S-methyl N-[(methylcarbamoyl)oxy]thioacetimidate 90%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added use. PM12

EPA Reg. No. 352-342. E. I. Du Pont De Nemours & Co., Inc., LANNATE METHOMYL INSECTICIDE FOR USE ON CUCUMBER AND MELONS IN THE SOUTHEAST. Active Ingredients: Methomyl S-methyl N-[(methylcarbamoyl)oxy]-thioacetimidate 90%. Methcd of Support: Application proceeds under 2(a) of interim policy. Republished: Added use. PM12

EPA Reg. No. 352-362. E. I. Du Pont De Nemours & Co., Inc. LANNATE WP METHOMYL INSECTICIDE FOR USE ON PEACHES. Active Ingredients: Methomyl S - methyl - N - [(methylcarbamoyl) oxy]-thioacetimidate 25%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added use. PM12

EPA Reg. No. 352-370. E. I. Du Pont De Nemours & Co., Inc. LANNATE L METHOMYL INSECTICIDE FOR USE ON ONIONS. Active Ingredients: Methomyl S-methyl N-[(methylcarbamoyl)oxy] thioacetimidate 24%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added use. PM12

EPA Reg. No. 352-370. E. I. Du Pont De Nemours & Co., Inc. LANNATE L METHOMYL INSECTICIDE FOR USE ON COTTON. Active Ingredients: Methomyl S-methyl N-[(methylcarbamoyl)oxy]-thioacetimidate 24%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added use. PM12

EPA Reg. No. 746-35. MFA Oil, PO Box 519, Columbia MO 65201. 2,4-D AMINE WEED KILLER. Active Ingredients: Dimethylamine salt of 2,4-Dichlorophenoxyacetic acid 49.4%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 352-370. E. I. Du Pont De Nemours & Co., Inc. LANNATE L METHOMYL INSECTICIDE FOR USE ON PEANUTS. Active Ingredients: Methomyl S-methyl N-[(methylcarbamoyl)oxy]-thioacetimidate 24%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added use. PM12

EPA Reg. No. 352-370. E. I. Du Pont De Nemours & Co., Inc. LANNATE L METHOMYL INSECTICIDE FOR USE ON PEACHES. Active Ingredients: Methomyl S-methyl N-[(methylcarbamoyl)oxy]-thioacetimidate 24%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added use. PM12

EPA Reg. No. 352-370. E. I. Du Pont De Nemours & Co., Inc. LANNATE L METHOMYL INSECTICIDE FOR USE ON COLLARDS. Active Ingredients: Methomyl S-methyl N-[(methylcarbamoyl)oxy] thioacetimidate 24%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added use. PM12

EPA Reg. No. 352-370. E. I. Du Pont De Nemours & Co., Inc. LANNATE L METHOMYL INSECTICIDE FOR USE ON CUCUMBER AND MELONS IN THE SOUTHEAST. Active Ingredients: Methomyl S-methly N-[(methylcarbamoyl) oxy]thioacetimidate 24%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added use. PM12

EPA Reg. No. 912-72. Farmers Union Central Exchange, Inc., PO Box "G", St. Paul MN 55165. 334 ESTER WEED KILLER. Active Ingredients: 2,4 - Dichlorophenoxyacetic acid, butyl esters 51.0%. Method of Support Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 912-33. Farmers Union Central Exchange, Inc. BUTYL 400 A 2,4-D WEED KILLER. Active Ingredients: 2,4-Dichlorophenoxyacetic Acid, Butyl Esters 58.6%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. 912-1. Farmers Union Central Exchange, Inc. 40 WEED KILLER. Active Ingredients: Dimethylamine 2,4-Dichlorophenoxy Acetate 49.3%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 279-2876. FMC Corp., Agricultural Chemical Div., 100 Niagara St., Middleport NY 14105. FURADAN 4 FLOWABLE. Active Ingredients: Carbofuran 40.64%. Method of Support: Application proceeds under 2(b) of interim policy. Republished. Added uses. PM12

EPA Reg. No. 407-271. Imperial, Inc., PO Box 423, Shenandoah IA 51601. IMPERIAL 2, 4-D AM400 WEED KILLER 4 LB AMINE. Active Ingredients: Dimethylamine Salt of 2,4-Dichlorophenoxyacetic acid 50.6%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 407-268. Imperial, Inc. IMPERIAL 2,4-D HV400 WEED KILLER 4 LB BUTYL ESTER. Active Ingredients: Butyl Ester of 2,4-Dichlorophenoxyacetic acid 58.96%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 746-36. MFA Oil. 40% BUTYL ESTER WEED KILLER. Active Ingredients: Butyl ester of 2,4-Dichlorophenoxyacetic acid 40%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA 746-37. MFA Oil. NO. 4 WEED KILL BUTYL ESTER 2,4-D. Active Ingredients: Butyl ester of 2,4-Dichlorophenoxyacetic acid 57.6%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 524-116. Monsanto Co., Agricultural Products, 800 N. Lindbergh Blvd., St. Louis MO 63166. 2.4-D GRANULAR. Active Ingredients: Isooctyl ester of 2,4-Dichlorophenoxyacetic acid 30.2%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 731-14. Sudbury Laboratory, Inc., 672 Dutton Rd., Sudbury MA 01776. CHAPERONE RABBIT AND DEER REPELLENT. Active Ingredients: Thiram (Tetramethythiuramdisulphide) 7%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM11

FEDERAL COMMUNICATIONS COMMISSION

FM AND TV TRANSLATOR APPLICATIONS

Available for Processing

Notice is hereby given pursuant to §§ 1.472(c) and 1.573(d) of the Commission's rules, that on September 16, 1976, the TV and FM translator applications listed in the attached Appendix will be considered as ready and available for processing. Pursuant to §§ 1.227(d) and 1.519(b) of the Commission's rules, an application, in order to be considered with any application appearing on the attached list or with any other application on file by the close of business on September 15, 1976, which involves a conflict necessitating a hearing with any application on this list, must be substantially complete and submitted for filing at the offices of the Commission in Washington, D.C., by the close of business on September 15, 1976.

The attention of any party in interest desiring to file pleadings concerning any pending TV and FM translator application, pursuant to section 309(d)(1) of the Communication Act of 1934, as amended, is directed to § 1.580(i) of the Commission's rules for provisions governing the time for filing and other requirements relating to such pleadings.

Adopted: July 28, 1976.

Released: August 4, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

VHF/UHF TV TRANSLATOR APPLICATION

ERRATA

The following entry appeared on the Public Notice (66289) released June 15, 1976, listing translator application which would be considered as ready and available for processing on August 3, 1976.

BPTTV-5572 (K71BL), Norfolk, Nebrasks, Chronicle Broadcasting Co. Req: To change frequency to Ch-61, 752-758 MHz.

The entry is corrected to read as follows:

BPTT-3003A (K71BL), Norfolk, Nebraska, Chronicle Broadcasting Co. Req: To change frequency to Ch-61, 752-758 MHz.

FM TRANSLATOR APPLICATIONS

BPPT-331 (New), Gold Beach, Oregon and Vicinity, Community TV Association, Inc. Req: Channel 296, 107.1 MHz, 1 watt. Primary: KTMT-FM, Medford, Oregon.

BPFTB-9 (New), Ventura, California, Radio Ojai, Inc. Req: Channel 288, 105.5 MHz, 10 watts. Primary: KOVA(FM), Ojai, California.

UHF TV TRANSLATOR APPLICATIONS

BPTT-3019 (New), Conneaut and surrounding area, Ohio, Ohio Educational TV Network Commission. Req: Channel 64, 1,000 watts. Primary: WVIZ-TV, Cleveland, Ohio.

BPTT-3026 (New), Georgetown, Ohio, Ohio Educational TV Network Commission. Req: Channel 58, 1,000 watts. Primary: WCET (TV), Cincinnati, Ohio.

BPTT-3027 (New), Eastlake and surrounding area, Ohio, Ohio Educational TV Network Commission. Req: Channel 61, 1,000 watts. Primary: WVIZ(TV), Cleveland, Ohio.

BPTT-3028 (New), Maplewood Area, Ohio, Ohio Educational TV Network Commission. Req: Channel 63, 1,000 watts. Primary: WOET(TV), Kettering, Ohio.

BPTT-3028A (K75BW), Rural Sanpete County, Aurora and Rural Juab County, Utah, KUTV, Inc. Req: To delete Rural Sanpete County, Utah, from present principal community.

BPTT-3029 (New), Ottumwa and surrounding area, Iowa, State Educational Radio and Television Facility Board. Req: Channel 33, 1 watt. Primary: KDIN(TV), Des Moines, Iowa.

BPTT-3030 (New), Cookeville, Tennessee Edward M. Johnson d/b/as Cumberland Television Company. Req: Channel 28, 100 watts. Primary: WCPT-TV, Crosseville, Tennessee.

BPTT-3031 (K68AG), Clarksdale, Arizona, KOOL Radio-Television, Inc. Req: To add Verde Valley, Arizona, to present principal community.

BPTT-3033 (New), Madras & Culver, Oregon, Jefferson County Television, Inc. Req: Channel 69, 100 watts. Primary: KPTV (TV), Portland, Oregon.

VHF TV TRANSLATOR APPLICATIONS

BPTTV-5606 (New), Toponas, Colorado, Yampa Valley TV. Req: Channel 12, 10 watts. Primary: KOA(TV), Denver, Colorado.

BPTTV-5610 (New), Ganado, Arizona, Ganado Community Television Club. Req: Channel 13, 1 watt. Primary: KOOL-TV, Phoenix, Arizona.

BPTTV-5611 (New), Point Hope, Alaska, North Slope Borough School Board. Req: Channel 4, 10 watts. Primary: KYUK, Bethel KUAC, Fairbanks, and KAKM, Anchorage, Alaska.

BPTTV-5612 (New), Wainwright, Alaska, North Slope Borough School Board. Req: Channel 4, 10 watts. Primary: KYUK, Bethel, KUAC, Fairbanks, and KAKM, Anchorage, Alaska.

BPTTV-5613 (New), Nuiqsut, Alaska, North Slope Borough School Board. Req: Channel 4, 10 watts. Primary: KYUK, Bethel, KUAC, Fairbanks, and KAKM, Anchorage, Alaska.

BPTTV-5614 (New), Point Lay, Alaska, North Slope Borough School Board. Req: Channel 4, 10 watts. Primary: KYUK, Bethel, KUAC, Fairbanks, and KAKM, Anchorage, Alaska.

BPTTV-5615 (New), Katovik (Barter Island), Alaska, North Slope Borough School Board. Req: Channel 4, 10 watts. Primary: KYUK, Bethel, KUAC, Fairbanks, and KAKM, Anchorage, Alaska.

BPTTV-5616 (New), Barrow, Alaska, North Slope Borough School Board. Req: Channel 11, 10 watts. Primary: KYUK, Bethel, KUAC, Fairbanks, and KAKM, Anchorage, Alaska.

BPTTV-5617 (New), Granger, Wyoming, Town of Granger. Req: Channel 3, 1 watt. Primary: KUTV(TV), Salt Lake City, Utah.

BPTTV-5618 (New), Granger, Wyoming, Town of Granger. Req: Channel 8, 1 watt. Primary: KTVX(TV), Salt Lake City, Utah.

BPTTV-5619 (New), Granger, Wyoming, Town of Granger. Req: Channel 7, 1 watt. Primary: KSL(TV), Salt Lake City, Utah.

BPTTV-5620 (New), Nulato, Alaska, City of Nulato. Req: Channel 12, 10 watts. Primary: AFTV(TV), Galena, Alaska.

BPTTV-5621 (New), Keystone Valdez Pipeline Camp, Alaska, Northern Television, Incorporated. Req: Channel 12, 10 watts. Primary: KTVA-TV, KENI-TV, KIMO-TV, Anchorage, Alaska.

BPTTV-5622 (K07NK), Fort Liscum Valdez Pipeline Camp, Alaska, Northern Television, Inc. Req: To add Keystone Camp, Alaska, to present principal community.

BPTTV-5623 (New), Silver Springs, Nevada, American Legion Post No. 13. Req: Channel 13, 1 watt. Primary: KTVN(TV), Reno, Nevada.

MICROBAND CORP. OF AMERICA, ET AL.

Designating Applications for Consolidated Hearing on Stated Issues

In re applications of Microband Corporation of America, Eastern Microwave, Inc. and Alfred E. Anscombe, for construction permits in the multipoint distribution service for new stations at Buffalo, New York.

1. The Commission has before it the above-referenced applications of Microband Corporation of America (Microband), filed on October 5, 1971, Eastern Microwave, Inc. (Eastern), filed on November 19, 1971 and Alfred E. Anscombe (Anscombe), filed on December 17, 1971. All three applications proposed Channel 1 operation in the Multipoint Distribution Service (MDS) in the Buffalo, New York area, and thus are mutually exclusive and require comparative consideration. All three applications have been amended as a result of informal requests of the Commission staff for additional information, and no petitions to deny or other objections to any of the applications have been received.

2. Microband holds MDS licenses in nine cities, including Washington, D.C., New York, New York, and has been granted construction permits in several other cities. Eastern, a wholly-owned subsidiary of Newhouse Broadcasting Corporation, holds MDS construction permits in nine cities, including Pittsfield, Massachusetts; Binghamton, Burlington, Elmira, Syracuse, Utica, and Watertown, New York. In addition, Newhouse Broadcasting has interests in broadcasting or cable systems in Syracuse, Elmira, and Binghamton, New York. Anscombe has only the above-referenced MDS application on file.

3. Upon review of the captioned applications, we find that the three applicants are legally, technically, financially, and otherwise qualified to provide the services which they propose, and that a hearing will be required to determine, on a comparative basis, which of these applications should be granted.

4. Accordingly, it is hereby ordered, That pursuant to Section 309(e) of the Communications Act of 1934, as amended, and Section 0.291 of the Commission's Rules, the above-captioned applications are designated for hearing, in a consolidated proceeding, at the Commission's offices in Washington, D.C., on a date and before an Administrative Law Judge to be specified by later order, to determine, on a comparative basis, which of the above-captioned applications should be granted in order to best serve the public interest, convenience and necessity. In making such a determination, the following factors shall be considered: [1]

(a) The relative merits of each proposal with respect to service area and efficient frequency use;

(b) The nature of the services and facilities proposed, and whether they will satisfy service requirements known to exist or likely to exist in the Buffalo, New York area:

(c) The anticipated quality and reliability of the service proposed, including selection of equipment, installation, subscriber security, and maintenance.

(d) The charges, regulations and conditions of the service to be rendered, and their relation to the nature, quality and costs of service; and

(e) The managerial and entrepreneurial qualifications of the applicants.

5. It is further ordered, That Microband Corporation of America, Eastern Microwave, Inc. and Alfred E. Anscombe, and the Chief, Common Carrier Bureau, are made parties to this proceeding.

6. It is further ordered, That parties desiring to participate herein shall file their notices of appearance in accordance with the provisions of § 1.221 of the Commission's Rules.

Adopted: July 22, 1976.

Released: August 3, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
JOSEPH A. MARINO,
Deputy Chief for Chief, Common Carrier Bureau.

[FR Doc.76-23201 Filed 8-9-76;8:45 am]

FEDERAL ENERGY OFFICE

CASES FILED WITH THE OFFICE OF EXCEPTIONS AND APPEALS

Week of July 16 Through July 23, 1976

Notice is hereby given that during the week of July 16 through July 23, 1976, the appeals and applications for exception or other relief listed in the Appendix to this notice were filed with the Federal Energy Office's Office of Exceptions and Appeals.

Under the FEO's procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the FEO action sought in such cases may file with the FEO written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this notice (August 10, 1976), or the date of receipt by the aggrieved person of actual notice, whichever occurs first.

Dated: August 4, 1976.

MICHAEL F. BUTLER,
General Counsel.

[1] Consideration of these factors shall be made in light of the Commission's discussion in *Peabody Telephone Answering Service*, et. al., 55 F.C.C. 2d 626 (1975).

APPENDIX.— *List of cases received by the Office of Exceptions and Appeals—July 16 to 23, 1976*

Date	Name and location of applicant	Case No.	Type of submission
July 16, 1976...	Kalbab Lubricating Specialists, Phoenix, Ariz. (If granted: Kalbab Lubricating Specialists would receive an extension of the price relief granted in the FEA's Mar. 12, 1976 decision and order.)	FEE-2768	Extension of exception relief in Kalbab Lubricating Specialists, 3 FEA par. 83,125 (Mar. 12, 1976).
Do.....	Southland Oil Co., Jackson, Miss. (If granted: The historical profit margin which the FEA is utilizing to measure entitlement exception relief would be increased.)	FEA-0902	Appeal of the FEA's exception decision and order in Southland Oil Co., 3 FEA par. ..... (June 18, 1976).
Do.....	Southland Oil Co., Jackson, Miss. (If granted: The FEA's June 18, 1976 decision and order would be modified and Southland's earnings in the months of April and May 1976 would be excluded in considering its exception from the old oil entitlements program.)	FEA-0903	Appeal of the FEA's exception decision and order in Southland Oil Co., 3 FEA par. ..... (June 18, 1976).
July 19, 1976...	Colonial Oil Co., Jacksonville, Fla. (If granted: Colonial Oil Co. would be assigned a new, lower-priced supplier of motor gasoline on the basis that it is continuing to experience a serious hardship.)	FEE-2771	Extension of exception relief Colonial Oil Co., 3 FEA par. 83,141 (Mar. 31, 1976).
Do.....	Doric Petroleum, Inc. (Newcastle) Washington, D.C. (If granted: Doric Petroleum, Inc., would be permitted to increase its prices for natural gas liquid products produced at its Newcastle plant to reflect nonproduct cost increases in excess of $0.005 per gallon.)	FEE-2772	Price exception (section 212.165).
Do.....	Energy Corp. of Louisiana, Ltd., New Orleans, La. (If granted: Energy Corporation of Louisiana Ltd. would receive an exception from the requirement that it reduce its crude oil run-to-stills for residual fuel oil sold into the east coast marketing area.)	FEE-2767	Allocation exception (section 211.67(d)(4)).
Do.....	Great Atlantic & Pacific Aeroplane Co., Van Nuys, Calif. (If granted: Great Atlantic & Pacific Aeroplane Co. would receive an increase in its base period use of aviation fuel.)	FEE-2780	Exception to increase base period use.
Do.....	Great Atlantic & Pacific Aeroplane Co., Van Nuys, Calif. (If granted: Great Atlantic & Pacific Aeroplane Co. would receive an increase in its base period use of kerosene jet fuel.)	FEE-2781	Exception to increase base period use.
Do.....	McGehee, Frank II., Natchez, Miss. (If granted: Crude oil produced from the USA 26-6 well would be sold at upper tier ceiling prices.)	FEE-2769	Price exception (section 212.74).
Do.....	McMahan Oil Co., Easton, Md. (If granted: The FEA's July 8, 1976 remedial order would be revoked and McMahan Oil Co. would not be required refund $38,088 to the Easton Utilities Commission to account for overcharges in its sales of No. 2-D diesel fuel.)	FEA-0901	Appeal of the FEA's remedial order issued July 6, 1976.
Do.....	Navajo Refining Co., Washington, D.C. (If granted: The exception relief granted in the FEA's June 21, 1976, decision and order would be modified to reflect a restatement of Navajo's financial statements due to a change in accounting method.	FEA-0905	Appeal of the FEA's exception decision and order in Navajo Refining Co., 3 FEA par. ..... (June 21, 1976).
Do.....	Peoples Gas Co., Chicago, Ill. (If granted: The FEA's June 11, 1976, decision and order would be revoked and Peoples Gas Co. would be designated as a first priority refinery under the mandatory Canadian crude oil allocation program.)	FEA-0900	Appeal of the FEA's exception decision and order in Peoples Gas Co., 3 FEA par. ..... (June 11, 1976).
Do.....	Rich Oil Co., Cucamonga, Calif. (If granted: Rich Oil Co. would be assigned a new, lower priced supplier of motor gasoline to replace its base period supplier, Ashland Oil Co. of California.)	FEE-2765	Exception to change supplier (section 211.9).
Do.....	Southland Oil Co., Savannah, Ga. (If granted: Southland Oil Co. would be assigned a new, lower priced supplier of motor gasoline on the basis that it is continuing to experience a serious hardship.)	FEE-2770	Extension of exception relief in Southland Oil Co., 3 FEA par. 83,151 (Mar. 31, 1976).
Do.....	Tenneco Oil Co., Houston, Tex. (If granted: The FEA's June 8, 1976 remedial order would be rescinded and Tenneco Oil Co. would not be required to recalculate its base period production control levels for any of its crude oil producing properties or to make refunds for overcharges.)	FEA-0904	Appeal of the FEA's remedial order issued June 8, 1976.
Do.....	Union Oil Co. of California, Los Angeles, Calif. (If granted: The FEA's June 29, 1976, remedial order would be rescinded and Union would not be required to accept T&E credit card sales invoices as payment by Union dealers.	FEA-0907 FES-0907	Appeal of the FEA's region IX remedial order issued June 29, 1976. Stay request.
July 20, 1976...	Charter Oil Co., Jacksonville, Fla. (If granted: Charter Oil Co. would receive an exception from the old oil entitlements program which would relieve the firm of any obligation to purchase entitlements beginning in the month of August 1976.)	FEE-2775 FES-2775	Allocation exception (section 211.67) stay request.
Do.....	OKC Corp., Washington, D.C. (If granted: OKC Corp. would receive an exception from the old oil entitlements program which would relieve the firm of any obligation to purchase entitlements.)	FEE-2777	Allocation exception (section 211.67).
Do.....	Sid Richardson Carbon & Gasoline Co., Fort Worth, Tex. (If granted: Sid Richardson would receive an extension of the price relief granted in the FEA's Apr. 23, 1976, decision and order.)	FEE-2776	Extension of exception relief in Sid Richardson Carbon & Gasoline Co., 3 FEA par. 83,170 (Apr. 23, 1976).
Do.....	Vessels Gas Processing Co., Denver, Colo. (If granted: Vessels Gas Processing Co. would be permitted to increase its prices for natural gas liquid products at its Irondale plant to reflect nonproduct cost increases in excess of $.005 per gallon.	FEE-2744	Price exception (section 212.165).
July 21, 1976	Zack's Gulf Service Station, Wilkes-Barre, Pa. (If granted: Zack's would be assigned a new, lower priced supplier of motor gasoline to replace its base period supplier, Gulf Oil Corp.)	FEE-2766	Exception to change supplier (section 211.9).

V 41 155 AUG 10 76 UMI

Date	Name and location of applicant	Case No.	Type of submission
July 22, 1976	Capitol Oil Co., Baltimore, Md. (If granted: The FEA's July 6, 1976, remedial order would be revoked and Capitol Oil Co. would not be required to refund overcharges in its sales of No. 2 fuel oil.)	FEA-0008 FES-0008 FST-0010	Appeal of the FEA's region III remedial order issued July 6, 1976. Stay request.
Do	James M. Cunningham, Inc., Lafayette, La. (If granted: James M. Cunningham, Inc., would receive an extension of the crude oil price relief granted in the FEA's Apr. 30, 1976, decision and order.)	FEE-2773	Extension of exception relief, James M. Cunningham, Inc., 3 FEA par. 83,176 (Apr. 30, 1976).
Do	Jim's Mobil, Rolling Meadows, Ill. (If granted: Jim's Mobil would be assigned a new, lower priced supplier of motor gasoline to replace its base period supplier, Nicot Oils Co., Inc.)	FEE-2779	Exception to change supplier.
Do	Teche Production Co., Inc., Lafayette, La. (If granted: Teche Production Co., Inc., would receive an extension of the crude oil price relief granted in the FEA's Apr. 2, 1976 decision and order.)	FEE-2778	Extension of exception relief, Teche Production Co., Inc., 3 FEA par. 83, 154 (Apr. 2, 1976).
July 23, 1976	Linden's Propane, Inc., La Grande, Ohio. (If granted: The remedial order issued to Linden's Propane, Inc., by FEA region V on July 7, 1976, would be rescinded and the firm would not be required to refund previous overcharges to its propane customers.)	FEA-0909 FES-0909	Appeal of FEA region V's July 7, 1976, remedial order. Stay requested.
Do	Rancho Oil Co., Dallas, Tex. (If granted: Rancho Oil Co.'s Moyers and Prideaux leases would be reclassified as stripper well leases for the month of February 1976.)	FEE-2782	Price exception (section 212.74).

FEDERAL MARITIME COMMISSION

BARBER LINES, ET AL.

Agreement Filed

Notice is hereby given that the following agreement, accompanied by a statement of justification, has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814)

Interested parties may inspect and obtain a copy of the agreement and the statement of justification at the Washington office of the Federal Maritime Commission, 1100 L Street, NW Room 10126; or may inspect the agreement and the statement of justification at the Field Offices located at New York, NY, New Orleans, Louisiana, San Francisco, California and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before August 30, 1976. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

John K. Cunningham, Chairman, American West African Freight Conference, 67 Broad Street, New York, New York 10004.

Agreement No. 10259, among Barber Lines, A/S; Black Star Line; Compagnie Maritime Belge, S.A.; Compagnie Maritime Des Chargeurs Reunis, S.A.; Compagnie Maritime Zairoise, S.A.R.L.; Companhia Nacional De Navegacao/Companhia De Navegacao Angolana S.A.R.L.; Dafra Lines; Delta Steamship Line, Inc.; Elder Dempster Lines, Ltd.; Farrell Lines Incorporated; and Westwind Africa Line, all of whom are members of the American West African Freight Conference, would permit the lines to rationalize their services in the trade between U.S. Atlantic and Gulf ports and the port of Port Harcourt, Nigeria, for a period of ninety days and thereafter for additional ninety day periods upon the affirmative vote of two-thirds of the parties. Notice of any such extensions, or of the termination of the arrangement, shall be promptly dispatched to the Federal Maritime Commission.

By order of the Federal Maritime Commission.

Dated: August 4, 1976.

FRANCIS C. HURNEY,
Secretary.

[FR Doc.76-23235 Filed 8-9-76;8:45 am]

CERTAIN CARRIERS OPERATING IN THE U.S. NORTH PACIFIC-CANADA-ALASKA TRADE

Waiver of Statutory Requirements

An application for an exemption, under Section 35 of the U.S. Shipping Act, 1916, from the tariff filing requirements of that Act has been filed on behalf of Foss Launch and Tug Co. This application covers the Foss Launch and Tug operation between North Vancouver, British Columbia, Canada and Seattle and Tacoma, Washington. Because of the complex rate schedule employed by Foss which is predicated solely upon rail rates filed with the Interstate Commerce Commission and the Canadian Transport Commission, it appears virtually impossible for Foss to file timely or meaningful port-to-port rates as required by the Act.

Further, the Commission is of the opinion that a similar Section 35 exemption should be granted to other water carriers participating in the through rail service between United States Puget Sound ports and British Columbia, Canada, and between Canadian ports and other Puget Sound/British Columbia, Canada ports on the one hand and ports and points in Alaska on the other hand. The carriers are more particularly described in the North Pacific Coast Freight Bureau Joint Division Sheet, and the Alaska Railroad Freight Tariffs 95 and 65–B. Any exemption would be conditioned on all affected carriers filing their through rates with the Interstate Commerce Commission and/or the Canadian Transport Commission; and provided further that these water carriers shall submit to the Federal Maritime Commission certified true copies of: (1) Their division sheets or tariffs containing the divisions; and (2) any and all agreements, arrangements and concurrences entered into in connection with the transportation of cargo within 30 days of the effectiveness of such sheets, tariffs, agreements, arrangements and/or concurrences. This exemption shall not apply to cargoes originating in or destined to foreign countries other than Canada.

Interested parties may inspect and obtain a copy of the application at the Washington Office of the Federal Maritime Commission, 1100 L Street, NW., Room 11413; or may inspect a copy of the application at the Field Offices. New York, New York; New Orleans, Louisiana; San Francisco, California; and San Juan, Puerto Rico. Comments on such applications, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before August 23, 1976. Any person desiring a hearing on the proposed application shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or that the approval of this application would substantially impair effective regulation by the Federal Maritime Commission shall be accompanied by a statement describing the discrimination or the impairment of effective regulation with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the facts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the application (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of application filed by:

David B. Ballash, President, Foss Launch & Tug Co., 660 West Ewing Street, Seattle, Washington 98119.

William Karas, Rosemary Boyd Avery, Galland, Kharasch, Calkins & Brown, 1054 31st Street, N.W., Washington, D.C. 20007.

Dated: August 4, 1976.

By order of the Federal Maritime Commission.

FRANCIS C. HURNEY,
Secretary.

[Docket No. 76-42]

HAPAG-LLOYD AKTIENGESELLSCHAFT ET AL.

Order of Investigation and Hearing Regarding Heavy Lift Practices and Charges

From August, 1974 until July, 1975, the North Atlantic Westbound Freight Association (NAWFA)—of which Hapag-Lloyd Aktiengesellschaft (Hapag) is a member—charged $2,140.00 for a 40-ton heavy lift on shipments from the United Kingdom to any port on the United States Atlantic Coast.[1] For an identical shipment destined to any Great Lakes port, Europe Canada Lakes Line (ECLL)—which was then a joint service of Hapag and Ernst Russ pursuant to FMC Agreement No. 9912—charged $7,719.30.[2] This great disparity in rates charged by Hapag for seemingly identical services appears to have unduly preferred Atlantic Coast shippers and ports at the expense of their Great Lakes counterparts in violation of section 16, Shipping Act, 1916 (46 U.S.C. 815).[3] Moreover, to the extent a heavy lift charge is a charge for "receiving, handling, storing or delivering of property" ECLL's Great Lakes rates may have been so high as to have been unreasonable within the meaning of section 17, second paragraph, Shipping Act, 1916 (46 U.S.C. 816).

The Commission's record also indicate that since at least August 1974 the tariffs of NAWFA and ECLL have provided that shipments of 50 tons or more will be charged a "to be agreed upon" rate, and that "for three or more lifts of over 10 tons in one vessel from one shipper from one Port of Loading to one Port of Discharge the line[s] have liberty to apply a reduction of 10 percent off the freight."[4]

Section 18(b)(1) of the Shipping Act, 1916 (46 U.S.C. 817(b)(1)) requires that foreign commerce carriers file tariffs with the Commission showing all their rates and charges and stating any rules or regulations which in anyway change, affect or determine any part of the aggregate of such rates or charges. This language has long been construed to require an exact statement of all applicable tariff charges, without the possibility of discretionary judgments by the carrier. See generally Eastbound Intercoastal Rates on Squash Seed, 1 U.S.S.B.B. 355 (1935); *Sea-Land Service, Inc.* v. *TMT Trailer Ferry, Inc.*, 10 F.M.C. 395, 399 (1967). The purpose of section 18(b) is to provide the public with advance notice of the rates certain to be charged and which will be charged equally to all shippers for the same services. Neither the "to be agreed" nor the optional "10% discount" provisions appear to inform a shipper of the exact charges which he and his competitors must pay for heavy lift services, and carriers operating under such tariffs may be violating Shipping Act section 18(b).

Should it be determined that the "to be agreed" and "10% discount" clauses are contrary to section 18(b)(1) and that ECLL or any NAWFA member line offered or accepted different heavy lift charges from different shippers in the U.S./U.K. trades pursuant to these tariff clauses, then any carrier who engaged in such discriminatory treatment may also have violated sections 16 First and 17, Shipping Act, 1916.

Therefore, it is ordered, That pursuant to section 22 of the Shipping Act, 1916 (46 U.S.C. 821), a proceeding is hereby instituted to determine whether:

(1) The disparate heavy lift charges and practices of Hapag-Lloyd Aktiengesellschaft between England and U.S. North Atlantic and Great Lakes ports during the period August 4, 1974 through July 9, 1975, were violative of section 16 or 18(b) of the Shipping Act, 1916;

(2) The heavy lift charges of Europe Canada Lakes Line between England and U.S. Great Lakes ports during the period August 4, 1974 through July 9, 1975 were violative of section 17, second paragraph, of the Shipping Act, 1916;

(3) The "to be agreed" and "10% discount" heavy lift provisions of North Atlantic Westbound Freight Association FMC Tariff No. 36 and Europe Canada Lakes Line FMC Tariff No. 3 are violative of section 18(b)(1), Shipping Act, 1916;

(4) Europe Canada Lakes Line or any member line of the North Atlantic Westbound Freight Association has offered or accepted different heavy lift charges for similar services from different shippers pursuant to the "to be agreed" or "10% discount" heavy lift provisions of their tariffs within the past five years, and, if so, whether such preferential treatment violated sections 16 and 17 of the Shipping Act, 1916.

It is further ordered, That Hapag-Lloyd Aktiengesellschaft, Europe Canada Lakes Line, and the North Atlantic Westbound Freight Association and its member lines listed in the Appendix attached hereto shall be Respondents in this proceeding.

It is further ordered, That this proceeding be referred for public hearing before an Administrative Law Judge of the Commission's Office of Administrative Law Judges and that the hearing be held at a date and place to be determined and announced by the Presiding Administrative Law Judge, but in any event the hearing shall commence no later than February 3, 1977; and

It is further ordered, That this Order be published in the FEDERAL REGISTER; and

It is further ordered, That all persons (including individuals, corporations, associations, firms, partnerships and public bodies) having an interest in this proceeding and desiring to intervene therein should notify the Secretary of the Commission immediately, and petition for leave to intervene in accordance with § 502.72 of the Commission's rules of practice and procedure (46 CFR 502.72), with a notice to all parties to this proceeding;

And it is further ordered, That all future notices issued by or on behalf of the Commission in this proceeding be mailed directly to all parties of record.

By the Commission.

FRANCIS C. HURNEY,
Secretary.

APPENDIX

RESPONDENTS

A. North Atlantic Westbound Freight Association (NAWFA) and its member lines, to wit:

(1) American Export Lines, Inc., 17 Battery Place, New York, New York 10004.
(2) Atlantic Container Line (G.I.E.), 80 Pine Street, New York, New York.
(3) Atlantic Gulf Service AB., Packhusplatsen 6, Gothenburg, Sweden.
(4) Combi Line—A joint service of: Hapag-Lloyd A.G. Co., c/o United States Navigation Co., Inc., 17 Battery Place, New York, New York, and Intercontinental Transport (ICT) B.V., P.O. Box 545, Rotterdam, Holland.
(5) Dart Containerline Company, Limited, Reid House, Reid Street, Hamilton, Bermuda.
(6) Hapag-Lloyd A.G., c/o United States Navigation Co., Inc., 17 Battery Place, New York, New York 10004.
(7) Neel Container Line, c/o Atlantic Coast Agencies, Inc., 17 Battery Place, New York, New York 10004.
(8) Sea-Land Service, Inc., 75 Route 27, Aselin, New Jersey 08830.
(9) Seatrain International S.A., Port Seatrain, Weehawken, New Jersey 07087.
(10) United States Lines, Inc., 1 Broadway, New York, New York.

B. Europe Canada Lakes Lines—A service of Ernst Russ., 1 North La Salle Street, Chicago, Illinois 60602.

*C. Hapag-Lloyd Aktiengesellschaft, c/o United States Navigation Co., Inc., 17 Battery Place, New York, New York 10004.

[FR Doc.76-23237 Filed 8-9-76;8:45 am]

[1] FMC Tariff No. 34, and First Revised original page 162 effective August 5, 1974 through July 9, 1975.

[2] FMC Tariff No. 17, original page 31, effective March 29, 1974 through January 21, 1976.

[3] See, for example, the February 5, 1976 complaint of Ace Machinery Company concerning Hapag's charges for transporting a 44-ton Bliss Toledo Knuckle Joint Press from Grangemouth, England to Chicago, Illinois (FMC Docket No. 76-5).

[4] NAWFA presently operates under FMC Tariff No. 36, original page 7, effective April 6, 1976. ECLL is operating under FMC Tariff No. 3, original page 31, effective March 20, 1976. Agreement No. 9912 has been dissolved. Hapag dropped out of the U.K./Great Lakes Trade effective December 31, 1975 and Europe Canada Lakes Line is now solely the service of Ernst Russ.

[Docket No. 76-43]

MATSON NAVIGATION CO.

Proposed Rate Increases in the United States Pacific Coast/Hawaii Domestic Offshore Trade; Order of Investigation

On June 18, 1976, Matson Navigation Company (Matson) filed with this Commission revisions of several of its tariffs.[1] These revisions will result in a general rate increase of 3½ percent. The increase applies to all commodities for which Matson publishes rates in the U.S. Pacific Coast/Hawaii trades with the exceptions of eastbound bulk sugar and molasses. These revisions became effective August 2, 1976.

Two formal protests were timely received from the Military Sealift Command (MSC) and the State of Hawaii (Hawaii). Both protests request a suspension and investigation of Matson's proposed rate increases. Hawaii alternatively requests rejection of Matson's proposed increases. The subject matter of the protests includes the following considerations:

1. The proposed increase will continue to perpetuate a system of rates that unfairly burden the shippers of high rated commodities, who pay rates greatly in excess of the fully allocated costs of carriage;

2. Matson's financial results for the year ended April 30, 1976 show no need for a further increase in rates, and

3. An increase in rates by Matson places a burden on shippers, ratepayers and the general population of the State of Hawaii in a manner which adversely impacts on the economy of the State.

Matson has submitted financial and operating exhibits in conformity with this Commission's regulations governing the submission and contents of such exhibits, and it is our opinion that there is no financial justification for the suspension of the proposed increases. There are, however, issues relating to the methodology employed by Matson in arriving at its rate of return figures, including its depreciated rate base and deferred income tax calculations, which are presently the subject of litigation in Commission Dockets Nos. 73-22, "Matson Navigation Co.—Proposed Changes in Rates Between U.S. Pacific Coast and Hawaii, et al.", and 75-57—"Matson Navigation Company—Proposed Rate Increases in the United States Pacific Coast/Hawaii Domestic Offshore Trade."

The instant increases are amendments of rates which have been under continuous investigation by this Commission since April 20, 1973, and may be considered to be within the scope of Dockets Nos. 73-22 and 75-57. However, the hearings in those proceedings are complete, Docket No. 73-22 is before the Administrative Law Judge and Docket No. 75-57 is presently at the briefing stage. To include the instant rate increase in one of those proceedings would necessitate reopening the record in that proceeding and would cause unnecessary delay.

Upon consideration of the above matters, the Commission is of the opinion that Matson's proposed tariff revisions listed in Appendix A below should be made the subject of a public investigation and hearing to determine whether they are unjust, unreasonable or otherwise unlawful under section 18(b) of the Shipping Act, 1916 and/or section 4 of the Intercoastal Shipping Act, 1933. The Commission is of the further opinion that action should be deferred in this investigation until the issues relating to the above described methodology in either Docket No. 73-22 or Docket No. 75-57 are resolved and a final Commission decision therein issued, because a resolution of those issues in either of these cases will directly affect the course of this investigation.

Now, therefore, it is ordered, That pursuant to sections 18(a) and 22 of the Shipping Act, 1916, and Section 4 of the Intercoastal Shipping Act, 1933, an investigation is hereby instituted into the lawfulness of the tariff matter listed in Appendix A for the purpose of making such findings as the facts and circumstances warrant. In the event the tariff matter is further changed, amended, or reissued, such changes are hereby ordered to be included in this investigation;

It is further ordered, That as part of this investigation a determination shall be made as to whether Matson's proposed increase in rates is unreasonable under section 18(a) of the Shipping Act, 1916, and Section 4 of the Intercoastal Shipping Act, 1933;

It is further ordered, That copies of this Order shall be filed with the appropriate tariff schedules in the Bureau of Compliance of the Federal Maritime Commission;

It is further ordered, That Matson Navigation Company be named as respondent in this proceeding;

It is further ordered, That the State of Hawaii and the Military Sealift Command be named as complainants in accordance with the Commission's rules of practice and procedure;

It is further ordered, That this proceeding be assigned for public hearing before an Administrative Law Judge of this Commission's Office of Administrative Law Judges and that the hearing(s) be held at a date and place to be determined by the Presiding Administrative Law Judge, but in any event, the hearing date shall not be set until this Commission issues a final decision on the issues relating to methodology in either Docket No. 73-22 or Docket No. 75-57;

It is further ordered, That (1) a copy of this Order be served upon each respondent and complainant herein and upon this Commission's Bureau of Hearing Counsel, and published in the FEDERAL REGISTER, and (2) the respondent, complainants, and Hearing Counsel be duly served with notice of time and place of hearing(s).

All persons (including individuals, corporations, associations, firms, partnerships, and public bodies) having an interest in this proceeding and desiring to intervene therein, should notify the Secretary of the Commission promptly and file petitions for leave to intervene in accordance with Rule 5(1) of the Commission's rules of practice and procedure (46 C.F.R. 502.72) with a copy to all parties to this proceeding.

By the Commission.

FRANCIS C. HURNEY,
Secretary.

SOUTH CAROLINA STATE PORTS AUTHORITY AND UNITED STATES LINES, INC.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before August 20, 1976. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination

[1] See Appendix A below.

V 41 155 AUG 10 76 UMI

or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

Marion S. Moore, Jr., Traffic Manager, South Carolina State Ports Authority, P.O. Box 817, Charleston, South Carolina 29402.

Agreement No. T-3104-1, between South Carolina State Ports Authority (Authority) and United States Lines, Inc., (USL), modifies the basic agreement between the parties which provides for USL's five-year lease (with options to renew) of certain improved terminal facilities and preferential use of Berth No. 1 at the Authority's Columbus Street Terminal in Charleston, South Carolina. The purpose of the modification is to lower USL's guaranteed wharfage minimum to 75,000 short tons for the first twelve-month period of the lease agreement.

Dated: August 6, 1976.

By Order of the Federal Maritime Commission.

SOUTH SEA ISLANDS RATE AGREEMENT

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, NY., New Orleans, Louisiana, San Francisco, California and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission Washington, D.C., 20573, on or before August 30, 1976. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

P. Conger Fawcett, Esquire, Graham & James, 1 Maritime Plaza, San Francisco, California 94111.

Agreement No. 10205-1, among A/S Thor Dahl, Pacific Far East Line, Inc. and Polynesia Line, Ltd., amends Article 1 of the approved basic agreement to clarify the procedure to be followed when a party is desirous of exercising its right of independent action authorized thereunder. Specifically, it is proposed that a party shall give notice at least 48 hours in advance of the filing of any tariff amendment necessary to effect said desire. At the present time, a party is required to give 48 hours advance notice of its intention to exercise its right of independent action.

Dated: August 4, 1976.

By order of the Federal Maritime Commission.

FRANCIS C. HURNEY,
Secretary.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposal

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on August 4, 1976. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed FCC form are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed form, comments (in triplicate) must be received on or before August 30, 1976, and should be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, Room 5216, 425 I Street, N.W., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-376-5425.

FEDERAL COMMUNICATIONS COMMISSION

FCC requests clearance of a revision of Form 501, Application for Ship Radio Station License. The Commission has adopted and prescribed in its Rules and Regulations (Section 83.36) the use of this form. Section 83.301 of the Commission's Rules and Regulations was amended October 15, 1975, effective October 31, 1976, to provide that only the owner of a vessel, or operator of a leased vessel may be the licensee of a public ship station. Form 501 is required to be filed when applying for a new, modified, or renewed ship station license in the case of radiotelephone stations subject to the Safety of Life at Sea Convention and stations having radiotelegraph equipment pursuant to FCC rules. The revision to Form 501 adds one new question, "3b. Relationship of applicant to vessel: owner, owner/operator, operator, or other (specify)." FCC estimates respondent burden to average 20 minutes per response. FCC receives approximately 1500 applications annually.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

PERMIAN BASIN CAPITAL CORP.

[License No. 06/06-0161]

Application for Transfer of Control of Licensed Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration (SBA), pursuant to § 107.701 of the regulations governing small business investment companies (13 CFR 107.701(1976)), for transfer of control of Permian Basin Capital Corporation (Permian), 303 West Wall Avenue, Midland, Texas 79701, a Federal Licensee under the Small Business Investment Act of 1958, as amended (the Act), (15 U.S.C. 661 et seq.), and the Rules and Regulations promulgated thereunder.

Permian was licensed on January 3, 1973, and has a paid-in capital and paid-in surplus of $500,000. The class "A" voting common stock of permian is owned 49 percent by the First National Bank of Midland (FNBM), Midland, Texas, 17 percent by the First National Bank in Brownwood, Brownwood, Texas, 17 percent by the First National Bank of Lea County, Hobbs, New Mexico, and 17 percent by the Western State Bank of Midland, Midland, Texas. In addition, FNBM owns 100 percent of the class "B" nonvoting common stock.

Public Law 94-305 permits a bank to own up to 100 percent of a small business investment company (SBIC). As such, under the terms of a purchase agreement, FNBM proposes to buy all the class A voting common stock from the aforestated three banks. As a result, FNBM would own all the issued and outstanding stock of Permian.

The proposed transfer of control is subject to the approval of SBA. If such approval is given, the officers and directors of Permian will be as follows:

Wilbur A. Yeager, Chairman of the Board, 1500 Country Club Drive, Midland, Texas 79701.
William B. Johnston, President, Director; P.O. Box 325, Midland, Texas 79701.
G. Arthur Donnelly III, Vice President, Secretary, Treasurer, Director; 1608 Gulf, Midland, Texas 79701.
William B. Yarborough, Director, 2005 Sinclair, Midland, Texas 79701.
William B. Blakemore II, Director, 620 Commercial Bank Tower, Midland, Texas 79701.

There are no proposed changes to Permian's present Articles of Incorporation, Bylaws and current operations.

Matters involved in SBA's consideration of the application include the general business reputation and character of management and shareholders, and the probability of successful operations of Permian under their management, in accordance with the Act and Regulations.

Notice is further given that any person may, not later than August 25, 1976, submit to SBA in writing, comments on the proposed transfer of control of Permian. Any such comments should be addressed to: Associate Administrator for Finance and Investment, Small Business Administration, 1441 "L" Street, NW., Washington, D.C. 20416.

A copy of this Notice will be published by Permian in a newspaper of general circulation in Midland, Texas.

[License No. 02/02-0315]

FIFTY-THIRD STREET VENTURES, INC.

Issuance of License To Operate Small Business Investment Company

On May 26, 1976, a Notice of Application for a license as a Small Business Investment Company was published in the FEDERAL REGISTER (41 FR 21532) stating that an Application had been filed with the Small Business Administration (SBA) pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1975)) for a license as a small business investment company by Fifty-Third Street Ventures, Inc., One East 53rd Street, New York, New York 10022.

Interested parties were given until the close of business June 10, 1976, to submit their comments to SBA. No comments were received.

Notice is hereby given that, pursuant to section 301(c) of the Small Business Investment Act of 1958, as amended, after having considered the application and all other pertinent information and the facts with regard thereto, SBA on July 29, 1976, issued License No. 02/02-0315 to Fifty-Third Street Ventures, Inc., to operate as a Small Business Investment Company.

DEPARTMENT OF LABOR

Employment and Training Administration

MIGRANT AND OTHER SEASONALLY EMPLOYED FARMWORKER PROGRAMS

Submission of Preapplication for Federal Assistance for Fiscal Year 1977

Pursuant to 20 CFR 97.211, the Employment and Training Administration announces the list of applicants intending to apply for Fiscal Year 1977 funds for Migrant and Other Seasonally Employed Farmworker Programs authorized

V 41 155 AUG 10 76 UMI

by Section 303 of the Comprehensive Employment and Training Act (CETA) of 1973. The list contains the names and addresses of all applicants which have submitted the Preapplication for Federal Assistance Form, Part I, OMB, No. 29–RO218 by August 1, 1976. No funding requests received for those areas to be renewed without competition as listed in the July 2, 1976, FEDERAL REGISTER, Volume 41, Number 129, page 27452 shall be considered for funding.

Organizations listed below may submit funding requests as described in 29 CFR 97.214. However, no determination has been made as to the legal eligibility of applicants listed to receive CETA Section 303 funds. The final determination of eligibility to receive funds will be made during the funding request review (29 CFR 97.215).

Applicants which have submitted a Preapplication for Federal Assistance Form Part I, by August 1, 1976, and are not listed below, should contact the U.S. Department of Labor at the address provided in 29 CFR 97.214(a) immediately. Pursuant to 29 CFR 97.211, applicants wishing to comment on the funding request of other applicants in the same State, must request a copy of the funding request from the applicant concerned.

Applicants eligible to submit a funding request should refer to another notice in today's FEDERAL REGISTER which alerts eligible applicants to regulation changes.

The following is the list of applicants exclusive of the non-competitive sponsors which have submitted Preapplications for Federal Assistance Forms, Part I, by State for areas open to competition this year:

PREAPPLICANTS FOR CETA SECTION 303 FUNDS

REGION I

Connecticut

New England Farmworkers Council, Inc., 3502 Main Street, Springfield, Massachusetts 01107.

Maine

Opportunities Industrialization Center of Maine, Inc., 167 High Street, Belfast, Maine 04915.

Cumberland County (CETA), Box 257 Cape Cottage Branch, Cape Elizabeth, Maine 04107.

Penobscot Consortium, Penobscot Co. Manpower Adm., 166 Union Street, Bangor, Maine 04401.

Massachusetts

New England Farmworkers Council, Inc., 3502 Main Street, Springfield, Massachusetts 01107.

Rhode Island

New England Farmworkers Council, Inc., 3502 Main Street, Springfield, Massachusetts.

No applications received for New Hampshire and Vermont.

REGION II

New Jersey

Farmworkers Corporation of New Jersey, 36 West Landis Avenue, Vineland, New Jersey 08360.

Mt. Carmel Guild Social Services, Straight and Narrow, Paterson, New Jersey 07501.

The Archway School, Program Development, Jackson Road, Atco, New Jersey 08004.

New York

Program Funding, Inc., Suite 730, Powers Building, Rochester, New York 14614.

Suffolk County, Veterans Memorial Highway, Hauppauge, New York 11787.

Robert Mallard Memorial Center, 1451 Jefferson Avenue, Buffalo, New York 14208.

New York State Dept. of Labor, Manpower Planning Secretariat, Bldg. 12, Room 563, State Campus, Albany, New York 12240.

Puerto Rico

Commonwealth of Puerto Rico, Department of Labor, 414 Barbosa Avenue, Hato Rey, Puerto Rico 00917.

REGION III

Delaware

Leadership Conference of Women Religious, East Coast Migrant Health Project, 1234 Massachusetts Avenue NW., No. 623, Washington, D.C. 20005.

Delmarva Ecumenical Agency, Rural Ministries Coalition, Blue Hen Mall, Dover, Delaware 19901.

Maryland

Migrant & Seasonal Farmworkers Association, Inc., 3929 Western Blvd., POB 33315, Raleigh, North Carolina 27606.

Leadership Conference of Women Religious, East Coast Migrant Health Project, 1234 Massachusetts Ave. NW., No. 623, Washington, D.C. 20005.

Delmarva Ecumenical Agency, Rural Ministries Coalition, Blue Hen Mall, Dover, Delaware 19901.

Pennsylvania

Farmworker Corp. of New Jersey, 36 West Landis Avenue, Vineland, New Jersey 08360.

Pennsylvania Council for Farmworkers, Inc., Full Agency, 1600 Lehigh Parkway East, Allentown, Pennsylvania 18103.

Farm Labor Services Center, Inc., 1202 North 5th Street, Philadelphia, Pennsylvania 19122.

Commonwealth of Pennsylvania, Dept. of Community Affairs, Box 155, Harrisburg, Pennsylvania 17120.

Program Funding, Inc., Suite 730, Powers Bldg., Rochester, New York 14614.

Virginia

Virginia Employment Commission, 703 East Main Street, Richmond, Virginia 23211.

Migrant & Seasonal Farmworker Association, Inc., 3929 Western Blvd., POB 33315, Raleigh, North Carolina 27606.

Leadership Conference of Women Religious, East Coast Migrant Health Project, 1234 Mass. Avenue NW., No. 623, Washington, D.C. 20005.

West Virginia

State of West Virginia, Governor's Manpower Office, 5790–A MacCorkle Avenue SE., Charleston, West Virginia 25304.

Leadership Conference of Women Religious, East Coast Migrant Health Project, 1234 Mass. Avenue NW., 3623, Washington, D.C. 20005.

REGION IV

Alabama

Alabama Migrant & Seasonal Farmworkers Council, Inc., 404 East South Boulevard, Montgomery, Alabama 36105.

Florida

Florida Dept. of Education/Vocatioal Division, Vocational Education, Capitol Building, Tallahassee, Florida 32304.

Community Action Migrant Program, 1975 East Sunrise Blvd., Suite 850, Fort Lauderdale, Florida 33304.

Georgia

Georgia Community Action Association, Inc., Statewide Network of CAA's, 75 Marietta Street Building, Atlanta, Georgia 30303.

Office of the Governor, Georgia Department of Labor, 501 Pulliam Street SW., Atlanta, Georgia 30012.

Kentucky

Commonwealth of Kentucky, Dept. of Human Resources, Capitol Annex Building, Frankfort, Kentucky 40601.

Mississippi

Mississippi Delta Council for Farm Workers Opportunities, Inc., 1933 Fourth Street, Clarksdale, Mississippi 38614.

South Carolina

South Carolina Resources Development Corporation, 3015 South Church Street, Spartanburg, South Carolina 29301.

Governor's Office, State of South Carolina, Columbia, South Carolina 29201.

South Carolina Commission for Farm Workers, Inc., 218 Rutledge Avenue, POB 861, Charleston, South Carolina 29402.

Tennessee

Tennessee Opportunity Programs for Seasonal Farmworkers, Inc., 2803 Foster Avenue, Nashville, Tennessee 37211.

State of Tennessee, Employment & Training Division, C1–114 Cordell Hull Bldg., Nashville, Tennessee 37219.

Tennessee Community Services Admin., 444 James Robertson Parkway, Nashville, Tennessee 37219.

REGION V

Indiana

Illinois Migrant Council, 202 South State Street, Chicago, Illinois 60604.

Migrant American Development, Research & Education Services—Human Advancement Training (MADRES), 41 Meadow Lane, Muncie, Indiana 47304.

City of South Bend, Bureau of Employment & Training, 227 W. Jefferson Blvd., 12th Floor, South Bend, Indiana 46601.

Indiana Office of Manpower Development, Planning Division, 150 West Market Street, 7th Floor, Indianapolis, Indiana 46204.

AMOS, INC., 3655 North Pennsylvania Street, Indianapolis, Indiana 46205.

Michigan

United Migrants for Opportunities, Inc., 111 South Lansing, Mt. Pleasant, Michigan 48858.

Michigan Migrant Legal Assistance Project, Inc., 102 South Mechanic Street, Berrien Spring, Michigan 49103.

Minnesota

Minnesota Migrant Council, POB 1231, St. Cloud, Minnesota 56301.

Ohio

La Raza Unida de Ohio, 1007 Revere Drive., Bowling Green, Ohio 43402.

Ohio Balance of State, Office of Manpower Development, 30 East Broad Street, 27th Floor, Columbus, Ohio 43215.

Wisconsin

United Migrant Opportunity Services, POB 04697, 809 Greenfield Avenue, Milwaukee, Wisconsin 53204.

La Raza Unida de Jefferson, 222 East Puerner Road, Jefferson, Wisconsin 53549.

REGION VI

Arkansas

Arkansas Council of Farmworkers, POB 4241—Asher Station, 1200 West Park Drive, Little Rock, Arkansas 72214.

ORO Development Corporation, 1100 North Classen Drive, POB 60126. Oklahoma City, Oklahoma 73106.

Louisiana

Southern Mutual Help Association, Inc., POB 365, Abbeville, Louisiana 70510.

Manpower Education & Training of Louisiana, 304 Broadway, POB 761, Jennings, Louisiana 70546.

New Mexico

Home Education Livelihood, 933 San Pedro SE., Albuquerque, New Mexico 87108.

Governor of New Mexico, Governor's Office of ETA, POB 4218, Santa Fe, New Mexico 87502.

Western Conference of Teamsters, Agricultural Workers Division, 1625 West Olympic Blvd., Suite 816, Los Angeles, California 90015.

Oklahoma

MIGRANT AND OTHER SEASONALLY EMPLOYED FARMWORKER PROGRAMS

Change of Regulations

Organizations which have submitted the Preapplication for Federal Assistance Form, Part I, to the Employment and Training Administration by August 1, 1976, and may, therefore, submit a funding request as described in 29 CFR 97.214 are hereby advised of publication of revised regulations governing the Comprehensive Employment and Training Act (CETA), 29 CFR Parts 94, 95, 96, and 98, dated June 25, 1976, 41 FR, 26334.

The Secretary of Labor intends to propose revised regulations, governing 29 CFR Part 97 Subpart C, for Migrant and Other Seasonally Employed Farmworker Programs on or about September 30, 1976. Prior to the publication date the Department will review all references to Parts 95 and 98 cited in Part 97 and will incorporate the changes in such references if they are considered appropriate for Section 303 programs. Until publication of the revised regulations, organizations submitting funding requests should refer to regulation changes published for CETA Titles I and II, dated June 25, 1976, 41 FR 26334, for planning purposes only. Particular attention should be paid to the changes in Section 98.12 Allowable Federal Costs and Section 98.13 Allocation of allowable costs among program activities.

Signed at Washington, D.C., this 6th day of August 1976.

WILLIAM H. KOLBERG,
Assistant Secretary for Employment and Training.

Office of the Secretary

[TA–W–890]

ATLAS BOLT AND SCREW CO.

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA–W–890; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 19, 1976 in response to a worker petition received on that date which was filed by the United Steelworkers of America on behalf of workers and former workers producing screws at the Atlas Bolt and Screw Company, Cleveland, Ohio.

The notice of investigation was published in the FEDERAL REGISTER on June 25, 1976 (41 FR 26298) and in corrected form July 6, 1976 (41 FR 27799). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Atlas Bolt and Screw Company the Illinois Tool Work, the U.S. Department of Commerce, the U.S. International Trade

V 41 155 AUG 10 76 UMI

Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (3) has not been met.

The evidence developed during the Department's investigation reveals that the Cleveland, Ohio plant of the Atlas Bolt and Screw Company produces screws exclusively. Approximately 90 percent of the screws produced are specialty products which are produced to customer specifications and/or are licensed or company proprietary products. Workers are used interchangeably in the production of standard and specialty screws. The sales of standard screws have not declined; whereas the sales of specialty product lines have declined because of reduced purchases from the metal building industry.

There are no import categories under the TSUSA classification system which relate to the imports of specialty fasteners exclusively. However, evidence indicates that imports of specialty fasteners are negligible. The few imports of specialty fasteners is totally consistent from both the domestic producer and user viewpoints. From the user viewpoint it is difficult to maintain on-sight quality control if the fasteners are produced outside of the United States. In addition, time lags for delivery would be too great if supply were dependent upon the importation of fasteners, and output scheduling flexibility would be lost by import dependence. From the producer point of view, low volume markets are of limited interest to foreign producers and single purpose product lines tend toward lower volume.

Furthermore, a major product line at Atlas is produced under license from a domestic firm. There are no imports of the licensed product.

The Atlas Bolt and Screw Company produces screws at the Cleveland, Ohio plant which are used in the automotive and metal buildings industries. The economic recession had prompted these industries to temporarily reduce orders from Atlas.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increased imports of specialty screws have not contributed importantly to the total or partial separation of workers at the Atlas Bolt and Screw Company, Cleveland, Ohio as required in Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 28th day of July 1976.

JAMES F. TAYLOR,
Director, Planning and Evaluation Staff.

[FR Doc.76-23254 Filed 8-9-76;8:45 am]

[TA-W-141T]

BROWN SHOE CO.

Notice of Investigation Regarding Termination of Certification of Eligibility To Apply for Worker Adjustment Assistance

Following a Department of Labor investigation under section 222 of the Trade Act of 1974 ("the Act") and in accordance with section 223 of the Act on November 12, 1975 the Department of Labor issued a certification of eligibility to apply for adjustment assistance applicable to workers and former workers of The Brown Shoe Company, Owensville, Missouri engaged in employment related to the production of women's leather shoes. The notice of certification was published in the FEDERAL REGISTER on November 26, 1975 (40 FR 54889).

On the basis of further showing, the Director of the Office of Trade Adjustment Assistance has instituted an investigation directed to the termination of the certification, as provided for in section 223(d) of the Act and 29 CFR 90.17 (a).

The purpose of the investigation is to determine whether the total or partial separations of the certified workers of The Brown Shoe Company are no longer attributable to the conditions specified in section 222 of the Act and 29 CFR 90.16 (b).

Pursuant to 29 CFR 90.17(b) the group of workers or any other persons showing a substantial interest in the proceedings may request a public hearing or may make written submissions to show why the certification should not be terminated. *Provided*, That such request or submission is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 20, 1976.

The record of the certification (TA-W-141) containing non-confidential information is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd Street and Constitution Ave., N.W., Washington, D.C. 20210.

Signed at Washington, D.C., this 28th day of July 1976.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[FR Doc.76-23244 Filed 8-9-76;8:45 am]

[TA-W-825]

BROWN SHOE CO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-825: investigation regarding certification of eligibility to apply for adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 30, 1976 in response to a worker petition received on that date which was filed by workers at the Fredericktown, Missouri plant of Brown Shoe Company on behalf of workers and former workers producing men's and children's leather shoes at the Fredericktown, Missouri plant of Brown Shoe Company.

The notice of investigation was published in the FEDERAL REGISTER on May 21, 1976 (41 FR 20942). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Brown Shoe Company, its customers, the Department of Commerce, the International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met.

Significant total or partial separations. The average number of production workers declined 3 percent in 1974 compared to 1973 and 17 percent in 1975 compared to 1974. Employment declined in all four quarters of 1975 compared to the like period in 1974 and in the first quarter of 1976 compared to the like period in 1975. Employment in the second quarter of 1976 was 2 percent higher than the second quarter of 1975, and 12 percent higher than the first quarter of 1976.

Sales or production, or both, have decreased absolutely. Annual sales in quantity of shoes at the Fredericktown plant of Brown Shoe Company decreased 27 percent in 1974 compared to 1973 and decreased 20 percent in 1975 compared to 1974. First quarter sales in 1976 were up 10 percent over sales in the first quarter of 1975. Men's shoes accounted for as much as 90 percent of total sales and production at the Fredericktown plant.

Production of shoes at the Fredericktown plant declined 28 percent in 1974 compared to 1973 and 19 percent in 1975 compared to 1974. First quarter 1976 production was 19 percent higher than for the same period in 1975.

Increased imports. Imports of men's leather shoes increased absolutely in 1972 and 1973 compared to the previous year and decreased in 1974. In 1975 imports increased 11.6 percent over 1974. Imports for the first quarter of 1976 were up 40 percent from first quarter 1975 imports. Relative to domestic production imports increased from 47.8 percent of domestic production in 1974 to 54.3 percent in 1975. First quarter 1976 imports were 77.8 percent of domestic production compared to 72.5 percent for the same period in 1975.

Imports of youths' and boys' non-rubber footwear increased absolutely in 1972 compared to 1971 and then decreased in 1973 and 1974. In 1975 imports increased 46 percent over 1974 imports. Imports for the first quarter of 1976 increased 114 percent over first quarter of 1975. Imports increased relative to domestic production from 43.3 percent of domestic production in 1974 to 64.8 percent in 1975 and continued to increase, relatively, in the first quarter of 1976 to 88.2 percent compared to 51.2 percent for first quarter 1975.

Imports of children's non-rubber footwear increased absolutely in 1972 compared to 1971 and then decreased in 1973 and 1974 and decreased by 9 percent in 1975 compared to 1974. Imports in the first quarter of 1976 were 44 percent higher than first quarter 1975. Imports increased relative to domestic production from 59.2 percent in 1974 to 64.5 percent in 1975. Imports were 61.7 percent of domestic production in the first quarter of 1976 compared with 82.9 percent in the first quarter of 1975.

Contributed importantly. The Department's investigation revealed that customers of Brown Shoe Company's Fredericktown, Missouri plant have increased their purchases of imported men's and children's shoes since 1974. These customers cited lower prices of imported shoes as the influencing factor in the switch from shoes produced by Brown Shoe Company's, Fredericktown plant to imports.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with shoes produced at the Fredericktown, Missouri plant of the Brown Shoe Company contributed importantly to the total or partial separation of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers engaged in employment related to the production of shoes at the Fredericktown, Missouri plant of the Brown Shoe Company who became totally or partially separated from employment on or after April 26, 1975, and before April 1, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974. All employees who became totally or partially separated from employment on or after April 1, 1976 are denied certification.

Signed at Washington, D.C. this 28th day of July 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary.

[FR Doc.76-23239 Filed 8-9-76;8:45 am]

[TA-W-88T]

CLAYTON SHOE CO.

Notice of Investigation Regarding Termination of Certification of Eligibility To Apply for Worker Adjustment Assistance

Following a Department of Labor investigation under section 222 of the Trade Act of 1974 ("the Act") and in accordance with section 223 of the Act, on September 12, 1975 the Department of Labor issued a certification of eligibility to apply for adjustment assistance applicable to workers and former workers of Clayton Shoe Company, Corning, Arkansas engaged in employment related to the production of women's footwear. The notice of certification was published in the FEDERAL REGISTER on September 23, 1975 (40 FR 43786).

On the basis of further showing, the Director of the Office of Trade Adjustment Assistance has instituted an investigation directed to the termination of the certification, as provided for in Section 223(d) of the Act and 29 CFR 90.17 (a).

The purpose of the investigation is to determine whether the total or partial separations of the certified workers of Clayton Shoe Company are no longer attributable to the conditions specified in section 222 of the Act and 29 CFR 90.16 (b).

Pursuant to 29 CFR 90.17(b) the group of workers or any other persons showing a substantial interest in the proceedings may request a public hearing or may make written submissions to show why the certification should not be terminated. *Provided*, That such request or submission is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 20, 1976.

The record of the certification (TA-W-88) containing non-confidential information is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd Street and Constitution Ave., NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 28th day of July 1976.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

GARLAND CORP.

Notice of Investigation Regarding Termination of Certification of Eligibility To Apply for Worker Adjustment Assistance

Following a Department of Labor investigation under section 222 of the Trade Act of 1974 ("the Act") and in accordance with section 223 of the Act, on August 27, 1975 the Department of Labor issued a certification of eligibility to apply for adjustment assistance applicable to workers and former workers of Garland Corporation, Brockton, Massachusetts engaged in employment related to the production of women's and misses' sweaters. The notice of certification was published in the FEDERAL REGISTER on September 8, 1975 (40 FR 41573).

On the basis of further showing, the Director of the Office of Trade Adjustment Assistance has instituted an investigation directed to the termination of the certification, as provided for in section 223(d) of the Act and 29 CFR 90.17 (a).

The purpose of the investigation is to determine whether the total or partial separations of the certified workers of Garland Corporation are no longer attributable to the conditions specified in section 222 of the Act and 29 CFR 90.16(b).

Pursuant to 29 CFR 90.17(b) the group of workers or any other persons showing a substantial interest in the proceedings may request a public hearing or may make written submissions to show why the certification should not be terminated. *Provided*, That such request or submission is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 20, 1976.

The record of the certification (TA-W-66) containing non-confidential information is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd Street and Constitution Ave., N.W., Washington, D.C. 20210.

Signed at Washington, D.C., this 28th day of July 1976.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

HARRISBURG MANUFACTURING CO.

Notice of Investigation Regarding Termination of Certification of Eligibility To Apply for Worker Adjustment Assistance

Following a Department of Labor investigation under section 222 of the Trade Act of 1974 ("the Act") and in accordance with section 223 of the Act, on October 29, 1975 the Department of Labor issued a certification of eligibility to apply for adjustment assistance applicable to workers and former workers of Harrisburg Manufacturing Company, Harrisburg, Arkansas engaged in employment related to the production of women's footwear. The notice of certification was published in the FEDERAL REGISTER on November 5, 1975 (40 FR 51520).

On the basis of further showing, the Director of the Office of Trade Adjustment Assistance has instituted an investigation directed to the termination of the certification, as provided for in section 223(d) of the Act and 29 CFR 90.17 (a).

The purpose of the investigation is to determine whether the total or partial separations of the certified workers of Harrisburg, Arkansas are no longer attributable to the conditions specified in section 222 of the Act and 29 CFR 90.16 (b).

Pursuant to 29 CFR 90.17(b) the group of workers or any other persons showing a substantial interest in the proceedings may request a public hearing or may make written submissions to show why the certification should not be terminated. *Provided*, That such request or submission is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 20, 1976.

The record of the certification (TA-W-155) containing non-confidential information is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd Street and Constitution Ave., NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 28th day of July 1976.

MARVIN M. FOOKS,
Director, Office of
Trade Adjustment Assistance.

[TA-W-82T]

INTERNATIONAL SHOE CO.

Notice of Investigation Regarding Termination of Certification of Eligibility To Apply for Worker Adjustment Assistance

Following a Department of Labor investigation under section 222 of the Trade Act of 1974 ("the Act") and in accordance with section 223 of the Act, on September 12, 1975 the Department of Labor issued a certification of eligibility to apply for adjustment assistance applicable to workers and former workers of Jackson, Missouri plant of the International Shoe Co., St. Louis, Missouri engaged in employment related to the production of footwear for women. The notice of certification was published in the FEDERAL REGISTER on September 19, 1975 (40 FR 43287).

On the basis of further showing, the Director of the Office of Trade Adjustment Assistance has instituted an investigation directed to the termination of the certification, as provided for in section 223(d) of the Act and 29 CFR 90.17(a).

The purpose of the investigation is to determine whether the total or parial separations of the certified workers of International Shoe Company are no longer attributable to the conditions specified in section 222 of the Act and 29 CFR 90.16(b).

Pursuant to 29 CFR 90.17(b) the group of workers or any other persons showing a substantial interest in the proceedings may request a public hearing or may make written submissions to show why the certification should not be terminated. *Provided*, That such request or submission is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 20, 1976.

The record of the certification (TA-W-82) containing non-confidential information is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor. Affairs, U.S. Department of Labor, 3rd Street and Constitution Ave., NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 28th day of July 1976.

MARVIN M. FOOKS,
Director, Office of
Trade Adjustment Assistance.

JOHANSEN BROTHERS SHOE CO.

Notice of Investigation Regarding Termination of Certification of Eligibility To Apply for Worker Adjustment Assistance

Following a Department of Labor investigation under section 222 of the Trade Act of 1974 ("the Act") and in accordance with section 223 of the Act, on October 29, 1975 the Department of Labor issued a certification of eligibility to apply for adjustment assistance applicable to workers and former workers of Johansen Brothers Shoe Co., St. Louis, Missouri engaged in employment related to the production of uppers for women's footwear. The notice of certification was published in the FEDERAL REGISTER on November 5, 1975 (40 FR 51521).

On the basis of further showing, the Director of the Office of Trade Adjustment Assistance has instituted an investigation directed to the termination of the certification, as provided for in section 223(d) of the Act and 29 CFR 90.17(a).

The purpose of the investigation is to determine whether the total or partial separations of the certified workers of Johansen Brothers Shoe Company are no longer attributable to the conditions specified in section 222 of the Act and 29 CFR 90.16(b).

Pursuant to 29 CFR 90.17(b) the group of workers or any other persons showing a substantial interest in the proceedings may request a public hearing or may make written submissions to show why the certification should not be terminated. *Provided*, That such request or submission is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 20, 1976.

The record of the certification (TA-W-124) containing non-confidential information is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd Street and Constitution Ave., NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 28th day of July 1976.

MARVIN M. FOOKS,
Director, Office of
Trade Adjustment Assistance.

[TA-W-901]

KNOXVILLE GLOVE CO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-901: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 27, 1976 in response to a worker petition received on May 27, 1976 which was filed by the Amalgamated Clothing Workers of America, on behalf of workers and former workers producing cotton and leather gloves at Knoxville. Glove Company, Knoxville, Tennessee.

The notice of investigation was published in the FEDERAL REGISTER on June 18, 1976 (41 FR 24801). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Knoxville Glove Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially

separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation revaled that all four of the above criteria have been met.

Significant total or partial separations. Employment of production workers at the Knoxville plant declined 29 percent from 1974 to 1975 and declined 19 percent in the first five months of 1976 compared to the same period in 1975. Declines in employment occurred throughout most of 1975.

Sales or production, or both, have decreased absolutely. Sales by the Knoxville Glove Company decreased 30 percent in 1975 from 1974 and declined 4 percent in the first five months of 1976 compared to the same period in 1975.

Increased imports. The quantity of imported work gloves increased relative to domestic production each year during the 1971–1975 period. From 1971 to 1975 the quantity of imported gloves increased from nearly 2.6 million dozen pairs to more than 5.2 million dozen pairs. In 1975 the quantity of imported work gloves amounted to more than 25 percent of the quantity of work gloves produced domestically.

Contributed importantly. From 1974 to 1975 customers of the Knoxville Glove Company decreased their purchases of gloves from the Knoxville firm while their purchases of imported gloves remained at the same level or increased. Reduced sales by the Knoxville Glove Company due to increased import competition resulted in employment and production declines at the Knoxville plant beginning early in 1975.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with cotton and leather work gloves produced at Knoxville Glove Company contributed importantly to the total of partial separation of the workers at that firm. In accordance with the provisions of the Trade Act of 1974, I make the following certification:

All workers of Knoxville Glove Company, Knoxville, Tennessee who became or will become totally or partially separated from employment on or after May 14, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 30th day of July 1976.

JAMES D. HOOVER,
Acting Executive Assistant to
the Deputy Under Secretary.

[FR Doc.76-23251 Filed 8-9-76;8:45 am]

[TA-W-833]

REPUBLIC STEEL CORP.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-833; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 30, 1976 in response to a worker petition received on April 30, 1976 which was filed by the United Steelworkers of America on behalf of workers and former workers producing stainless and specialty steel at the Republic Steel Corporation, Union Drawn Division, Massillon plant, Massillon, Ohio.

The notice of investigation was published in the FEDERAL REGISTER (41 FR 20962) on May 21, 1976. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Republic Steel Corporation, its customers, the International Trade Commission, the U.S. Department of Commerce, the American Iron and Steel Institute, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

Significant total or partial separations. Employment of production workers increased 33.3 percent in 1974 compared with 1973, decreased 36.0 percent in 1975 compared with 1974 and has fallen 31.1 percent through the first quarter of 1976 compared with the first quarter of 1975.

Sales or production, or both, have decreased absolutely. Annual shipments increased in quantity 56.0 percent in 1974 compared with 1973, decreased 56.7 percent in 1975 compared with 1974 and have fallen 39.1 percent through the first quarter of 1976 compared with the first quarter of 1975.

Increased imports. Imports of stainless steel bar in quanity increased 14.2 percent in 1972 compared with 1971, increased 8.7 percent in 1973 compared with 1972, increased 38.3 percent in 1974 compared with 1973 and increased 5.0 percent in 1975 compared with 1974. The ratios of imports to domestic shipments and consumption increased from 16.6 percent and 15.0 percent, respectively in 1974 to 29.5 percent and 23.9 percent, respectively, in 1975.

Contributed importantly. Customers indicated that they had shifted purchases from Republic Massillon plant to foreign sources. The existing price differentials between domestic and foreign producers, availability and quality were given as the major factors in the shift to imported stainless and specialty steel.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with stainless and specialty steel produced at the Union Drawn Division, Massillon plant contributed importantly to the total or partial separation of the workers at that firm. In accordance with the provisions of the Act, I make the following certification:

All workers at Union Drawn Division, Massillon plant Number Two of Republic Steel Corporation, Massillon, Ohio who became totally or partially separated from employment on or after April 21, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 27th day of July 1976.

JAMES F. TAYLOR,
Director, Planning and
Evaluation Staff.

RICHLINE KNITTING MILLS

Notice of Investigation Regarding Termination of Certification of Eligibility To Apply for Worker Adjustment Assistance

Following a Department of Labor investigation under section 222 of the Trade Act of 1974 ("the Act") and in accordance with section 223 of the Act, on November 22, 1975 the Department of Labor issued a certification of eligibility to apply for adjustment assistance

V 41 155 AUG 10 76 UMI

applicable to workers and former workers of Richline Knitting Mills, Philadelphia, Pennsylvania engaged in employment related to the production of men's and ladies' sweaters. The notice of certification was published in the FEDERAL REGISTER on December 3, 1975 (40 FR 56511).

On the basis of further showing, the Director of the Office of Trade Adjustment Assistance has instituted an investigation directed to the termination of the certification, as provided for in section 223(d) of the Act and 29 CFR 90.17(a).

The purpose of the investigation is to determine whether the total or partial separations of the certified workers of Richline Knitting Mills are no longer attributable to the conditions specified in section 222 of the Act and 29 CFR 90.16(b).

Pursuant to 29 CFR 90.17(b) the group of workers or any other persons showing a substantial interest in the proceedings may request a public hearing or may make written submissions to show why the certification should not be terminated. *Provided*, That such request or submission is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 20, 1976.

The record of the certification (TA-W-157) containing non-confidential information is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd Street and Constitution Ave., NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 28th day of July 1976.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[TA-W-792]

RUD-SHAW CLOTHING

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-792: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 8, 1976 in response to a worker petition received on April 8, 1976 which was filed by the Amalgamated Clothing Workers of America on behalf of workers and former workers producing men's suit coats and sportcoats at the Brooklyn, New York plant of Rud-Shaw Clothing.

The notice of investigation was published in the FEDERAL REGISTER on April 27, 1976 (41 FR 17646). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Rud-Shaw Clothing, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof; and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met.

Significant total or partial separations. The average number of workers at Rud-Shaw declined 9.3 percent from 1973 to 1974 and declined 3.4 percent from 1974 to 1975. In the second and third quarters of 1975, the average number of workers declined 46.3 percent and 15.8 percent, respectively, compared to the second and third quarters of 1974. In the fourth quarter of 1975, employment increased 65.2 percent compared to the fourth quarter of 1974.

Average weekly hours increased 3.4 percent from 1973 to 1974 and increased 9.6 percent from 1974 to 1975. In the fourth quarter of 1975, average weekly hours increased 14.9 percent compared to the fourth quarter of 1974.

Sales, production, or both, have decreased absolutely. Sales at Rud-Shaw are identical to production.

Unit production of men's suit coats and sportcoats declined 3.5 percent from 1973 to 1974 and then increased 14.1 percent from 1974 to 1975. In the second and third quarters of 1975, unit production declined 43.4 percent and 9.0 percent, respectively, compared to the second and third quarters of 1974. In the fourth quarter of 1975, unit production increased 128.3 percent compared to the fourth quarter of 1974.

Increased imports. Imports of men's and boys' dress coats and sportcoats increased absolutely and relatively in each year from 1971 through 1973. Imports increased relatively from 1973 to 1974 and then increased absolutely and relatively from 1974 to 1975. Imports increased absolutely, by 7.9 percent from 1974 to 1975. The ratios of imports to domestic production and consumption increased from 21.2 percent and 17.5 percent, respectively, in 1974 to 28.2 percent and 22.0 percent, respectively, in 1975.

Imports of men's and boys' tailored suits increased absolutely and relatively in each year from 1971 through 1975. Imports increased absolutely, by 26.9 percent from 1974 to 1975. The ratios of imports to domestic production and consumption increased from 12.2 percent and 10.9 percent, respectively, in 1974 to 17.2 percent and 14.6 percent, respectively, in 1975.

Contributed importantly. The Department's investigation indicated that manufacturers for whom Rud-Shaw did contract work reduced purchases of Rud-Shaw's suit coats and sportcoats because of competition from increased imports of less expensive men's clothing. Customers of these manufacturers reduced or discontinued purchases of domestically made suit coats and sportcoats and increased purchases of imports.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's suit coats and sportcoats produced at the Brooklyn, New York plant of Rud-Shaw Clothing contributed importantly to the total or partial separation of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers engaged in employment related to the production of men's suit coats and sportcoats at the Brooklyn, New York plant of Rud-Shaw Clothing who became totally or partially separated from employment on or after March 29, 1975 and before October 1, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974. All workers who became totally or partially separated on or after October 1, 1975 are denied certification.

Signed at Washington, D.C., this 2nd day of August 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary.

SURREY KNITTING MILLS

Notice of Investigation Regarding Termination of Certification of Eligibility To Apply for Worker Adjustment Assistance

Following a Department of Labor investigation under section 222 of the Trade Act of 1974 ("the Act") and in accordance with section 223 of the Act, on November 16, 1975 the Department of Labor issued a certification of eligibility to apply for adjustment assistance applicable to workers and former workers of Surrey Knitting Mills, Philadelphia, Pennsylvania engaged in employment related to the production of men's sweaters. The notice of certification was published in the FEDERAL REGISTER on November 28, 1975 (40 FR 55408).

On the basis of further showing, the Director of the Office of Trade Adjustment Assistance has instituted an investigation directed to the termination of the certification, as provided for in Section 223(d) of the Act and 29 CFR 90.17(a).

The purpose of the investigation is to determine whether the total or partial separations of the certified workers of Surrey Knitting Mills are no longer attributable to the conditions specified in section 222 of the Act and 29 CFR 90.16(b).

Pursuant to 29 CFR 90.17(b) the group of workers or any other persons showing a substantial interest in the proceedings may request a public hearing or may make written submissions to show why the certification should not be terminated. *Provided*, That such request or submission is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 20, 1976.

The record of the certification (TA-W-158) containing non-confidential information is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd Street and Constitution Ave., N.W., Washington, D.C. 20210.

Signed at Washington, D.C., this 28th day of July 1976.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[TA-W-798]

TELEDYNE EFFICIENT INDUSTRIES

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-798: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 16, 1976 in response to a worker petition received on April 16, 1976 which was filed by the United Automobile, Aerospace and Agricultural Implement Workers of America on behalf of workers and former workers producing tools, dies, jigs, and fixtures at Teledyne Efficient Industries, Independence, Ohio.

The notice of investigation was published in the FEDERAL REGISTER on May 14, 1976 (41 FR 20047). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Teledyne Efficient Industries, its customers, the United Automobile, Aerospace and Agricultural Implement Workers of America, the U.S. International Trade Commission, the U.S. Department of Commerce, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that although the first three criteria have been met, the fourth criterion has not been met.

Significant total or partial separations. The average number of production workers decreased 4 percent in 1974 compared to 1973 and decreased 37 percent in 1975 compared to 1974.

Sales or production, or both, have decreased absolutely. Sales at the Independence plant decreased 23 percent in 1974 compared to 1973 and decreased 8 percent in 1975 compared to 1974.

Increased imports. When compared with each preceding year, U.S. imports of tools, dies, jigs and fixtures increased, in terms of quantity, in 1972, 1973, and 1974 and then decreased in 1975. The ratio of imports to domestic production increased from 1.18 percent in 1974 to 1.69 percent in 1975, which was above the 1971–1974 average of .81 percent.

Contributed importantly. Auto manufacturers that purchased the majority of production at Teledyne's Independence plant in 1975 reduced purchases of tools and dies for their 1976 model year runs because of poor domestic sales conditions. This resulted in declining levels of employment at the Teledyne plant in each of the first three quarters of 1975 compared to the preceding quarters.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with tools, dies, jigs and fixtures produced by the Independence, Ohio plant of Teledyne Efficient Industries did not contribute importantly to the total or partial separation of workers of that plant.

Signed at Washington, D.C., this 23rd day of July 1976.

JAMES F. TAYLOR,
Director, Planning and Evaluation Staff.

[TA-W-980]

U.S. PIPE AND FOUNDRY CO.

Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on July 6, 1976 in response to a worker petition received on that date which was filed by the United Steelworkers of America on behalf of workers and former workers producing metal fasteners at Southeastern Bolt and Screw Division, U.S. Pipe and Foundry Company, Birmingham, Alabama.

Notice of the investigation was published in the FEDERAL REGISTER on July 23, 1976 (41 FR 30416). No public hearing was requested and none was held.

The Southeastern Bolt and Screw Division of the U.S. Pipe and Foundry Company is located in Birmingham, Alabama. Southeastern is primarily a distributor of standard and special metal fasteners. However, it also manufactures anchor bolts, U-bolts, I-bolts, and special threaded bars.

During the course of the investigation it was established that there have been no involuntary separations at Southeastern in 1975 or 1976 to date, nor are any expected. Section 223(b) of the Trade Act of 1974 provides, in substance, that a certification shall not apply to any worker whose last total or partial separation from the firm or an appropriate subdivision of the firm occurred more than one year before the date of the petition on which such certification is granted.

The date of the petition in this case is April 15, 1976 and, thus, only workers who have been laid off since April 15, 1975 could be eligible for program benefits under Title II, Chapter 2, Subchapter B of the Trade Act of 1974. There have been no layoffs at Southeastern Bolt and Screw from April 15, 1975 to date, nor are any expected. Therefore, this investigation has been terminated.

Signed at Washington, D.C., July 30, 1976.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

WESTMINSTER CORP.

Notice of Investigation Regarding Termination of Certification of Eligibility To Apply for Worker Adjustment Assistance

Following a Department of Labor investigation under section 222 of the Trade Act of 1974 ("the Act") and in accordance with section 223 of the Act, on August 18, 1975 the Department of Labor issued a certification of eligibility to apply for adjustment assistance applicable to workers and former workers of The Westminster Corporation, Westminster, Maryland engaged in employment related to the production of footwear for infants, children, and misses. The notice of certification was published in the FEDERAL REGISTER on August 27, 1975 (40 FR 38200).

On the basis of further showing, the Director of the Office of Trade Adjustment Assistance has instituted an investigation directed to the termination of the certification, as provided for in section 223(d) of the Act and 29 CFR 90.17(a).

V 41 155 AUG 10 76 UMI

The purpose of the investigation is to determine whether the total or partial separations of the certified workers of The Westminster Corporation are no longer attributable to the conditions specified in section 222 of the Act and 29 CFR 90.16(b).

Pursuant to 29 CFR 90.17(b) the group of workers or any other persons showing a substantial interest in the proceedings may request a public hearing or may make written submissions to show why the certification should not be terminated. *Provided*, That such request or submission is filed in writing to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 20, 1976.

The record of the cetrification (TA-W-59) containing non-confidential information is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd Street and Constitution Ave., NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 28th day of July 1976.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

WEXLER KNITTING MILLS

Notice of Investigation Regarding Termination of Certification of Eligibility To Apply for Worker Adjustment Assistance

Following a Department of Labor Investigation under section 222 of the Trade Act of 1974 ("the Act") and in accordance with section 223 of the Act, on November 16, 1975 the Department of Labor issued a certification of eligibility to apply for adjustment assistance applicable to workers and former workers of Wexler Knitting Mills, Philadelphia, Pennsylvania engaged in employment related to the production of men's sweaters. The notice of certification was published in the FEDERAL REGISTER on November 28, 1975 (40 FR 55409).

On the basis of further showing, the Director of the Office of Trade Adjustment Assistance has instituted an investigation directed to the termination of the certification, as provided for in section 223(d) of the Act and 29 CFR 90.17(a).

The purpose of the investigation is to determine whether the total or partial separations of the certified workers of Wexler Knitting Mills are no longer attributable to the conditions specified in section 222 of the Act and 29 CFR 90.16 (b).

Pursuant to 29 CFR 90.17(b) the group of workers or any other persons showing a substantial interest in the proceedings may request a public hearing or may make written submissions to show why the certification should not be terminated. *Provided*, That such request or submission is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 20, 1976.

The record of the certification (TA-W-159) containing non-confidential information is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd Street and Constitution Ave., N.W., Washington, D.C. 20210.

Signed at Washington, D.C., this 28th day of July 1976.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[Notice No. 5]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

AUGUST 10, 1976.

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to Sections 212(b), 206(a), 211, 312 (b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's Special Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before August 30, 1976. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-76313. By order entered August 4, 1976 the Motor Carrier Board approved the transfer to Jovan, Inc., Seattle, Wash., of a portion of the operating rights set forth in Certificate No. MC-117304 (Sub-No. 8), issued May 21, 1974, to Don Paffile, doing business as Paffile Truck Lines, Lewiston, Idaho, authorizing the transportation of machinery, mining equipment, mining supplies, mines ores except coal, and building materials, between points in Montana on and east of a line beginning at Monida Pass, Mont., and extending northerly to the United States-Canada Boundary line, near Babb, Mont., on the one hand, and, on the other, points in Montana, Idaho, Oregon, and Washington; and building materials, between points in Oregon, Washington, Idaho, and that part of Montana west of a line extending in a northerly direction from Monida Pass, Mont., to the United States-Canada Boundary line near Piegan, Mont., subject to a restriction. George R. Labissoniere, 1100 North Bldg., Seattle, Wash., attorney for applicants.

ROBERT L. OSWALD,
Secretary.

[Notice No. 101]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 5, 1976.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR § 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the I.C.C. Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 16550 (Sub-No. 8TA), filed July 30, 1976. Applicant: WALTER POTTER, Route 4, Goodlettsville, Tenn. 37072. Applicant's representative: Robert L. Baker, 618 United American Bank Bldg., Nashville, Tenn. 37219. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Movie films and theatre supplies*, between Atlanta, Ga., and Nashville, Tenn., serving the intermediate point of Chattanooga, Tenn., from Atlanta, Ga., over Interstate Highway 75 and U.S. Highway 41 to Chattanooga, Tenn., thence over Interstate Highway 24 to Nashville, Tenn., and return over the same route. Applicant intends to tack its existing authority with MC 16550, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Martin Theatres of Georgia, Inc., 715 Sudekum Bldg., Nashville, Tenn. 37219. Send protests to: Joe J. Tate, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Suite A-422, U.S. Courthouse, 801 Broadway, Nashville, Tenn. 37203.

No. MC 22195 (Sub-No. 167TA), filed July 30, 1976. Applicant: DAN DUGAN TRANSPORT COMPANY, 41st & Grange Ave., P.O. Box 946, Sioux Falls, S. Dak. 57101. Applicant's representative: F. Fred Fischer (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia*, in bulk, in tank vehicles, from the storage facilities of Farmland Industries, Inc., at or near Barnesville and Benson, Minn., to points in North Dakota, South Dakota, Wisconsin, Montana and Minnesota, for 180 days. Supporting shipper: Farmland Industries, Inc., 3315 North Oak Trafficway, Kansas City, Mo. 64116. Send protests to: J. L. Hammond, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 369, Federal Bldg., Pierre, S. Dak. 57501.

No. MC 35082 (Sub-No. 32TA), filed July 27, 1976. Applicant: BURSCH TRUCKING, INC., doing business as ROADRUNNER TRUCKING, INC., P.O. Box 26748, Albuquerque, N. Mex. 87125. Applicant's representative: D. F. Jones (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Brick and tile and commodities* incidental to the installation thereof (except commodities in bulk moving in tank vehicles and restricted against the transportation of ceramic, vinyl, and asphalt tile), from Bastrop County, Tex., to points in Arizona, Colorado, New Mexico and Utah, for 180 days. Supporting shipper: Elgin-Butler Brick Company, P.O. Box 1947, Austin, Tex. 87867. Send protests to: John H. Kirkemo, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 1106 Federal Office Bldg., 517 Gold Ave. SW., Albuquerque, N. Mex. 87101.

No. MC 35628 (Sub-No. 383TA), filed July 29, 1976. Applicant: INTERSTATE MOTOR FREIGHT SYSTEM, 134 Grandville Ave. SW., Grand Rapids, Mich. 49502. Applicant's representative: Michael P. Zell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except Classes A and B explosives, household goods as defined by the Commission, commodities in bulk and those requiring special equipment), serving the site and facilities of the Hartsville Nuclear Plant site near Hartsville, Tenn., as an off-route point in connection with applicant's existing regular route authority. Applicant intends to tack the authority applied for with its MC 35628 and interline at numerous points within its authority, for 180 days. Supporting shipper: Tennessee Valley Authority, 620 Commerce Union Bank Bldg., Chattanooga, Tenn. 37401. Send protests to: C. R. Flemming, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 225 Federal Bldg., Lansing, Mich. 48933.

No. MC 52460 (Sub-No. 183TA), filed July 29, 1976. Applicant: ELLEX TRANSPORTATION, INC., 1420 West 35th St., Tulsa, Okla. 74107. Applicant's representative: Albert E. Romain (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Canned goods (unfrozen)*, from Belledeau and St. Francisville, La., to points in Nebraska, Kansas, Oklahoma, Texas, Missouri, Arkansas, Kentucky, Tennessee, North Carolina, South Carolina, Mississippi, Alabama, and Georgia, for 180 days. Supporting shipper: Joan of Arc Company, 2231 West Altorfer Drive, Peoria, Ill. 61614. Send protests to: Joe Green, District Supervisor, Room 240, Old Post Office Bldg., 215 Northwest Third St., Oklahoma City, Okla. 73102.

No. MC 52704 (Sub-No. 130TA), filed July 30, 1976. Applicant: GLENN McCLENDON TRUCKING COMPANY, INC., P.O. Drawer H, Opelika Highway, Lafayette, Ala. 36862. Applicant's representative: Archie B. Culbreth, Suite 246, 1252 W. Peachtree St. NW., Atlanta, Ga. 30309. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass containers and their equipment of caps, covers, and tops*, from the warehouse facilities utilized by Laurens Glass Company, at or near Greenville and Mauldin, S.C., to points in Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Indiana, Louisiana, Maryland, North Carolina, Mississippi, Tennessee, Texas, Virginia, and West Virginia, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Laurens Glass Company, P.O. Box 9, Laurens, S.C. 29360. Send protests to: Clifford W. White, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Room 1616, 2121 Bldg., Birmingham, Ala. 35203.

No. MC 56409 (Sub-No. 10TA), filed July 29, 1976. Applicant: MAJOR TRANSPORT, INC., Box 204, Highway 135 & Airport Road, Palmyra, Wis. 53156. Applicant's representative: David V. Purcell, 111 E. Wisconsin Ave., Milwaukee, Wis. 53202. Authority sought to op-

V 41 155 AUG 10 76 UMI

erate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Generators, parts, and accessories*, from the plantsite and facility of Generac Corporation, in Waukesha County, Wis., to points in the United States (except Alaska and Hawaii), for 180 days. Supporting shipper: Generac Corporation, P.O. Box 8, Waukesha, Wis. 53186. Send protests to: Gail Daugherty, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, 135 West Wells St., Room 807, Milwaukee, Wis. 53203.

No. MC 59117 (Sub-No. 50TA), filed July 29, 1976. Applicant: ELLIOTT TRUCK LINE, INC., 101 E. Excelsior, P.O. Box 1, Vinita, Okla. 74301. Applicant's representative: Dean Williamson, 280 National Foundation Life Bldg., 3535 NW. 58th St., Oklahoma City, Okla. 73112. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Minerals, mineral mixtures, feed and fertilizer materials and ingredients thereof* (except in bulk), from Galena, Kans., to points in Arkansas, Colorado, Illinois, Iowa, Louisiana, Minnesota, Missouri, Nebraska, New Mexico, Oklahoma, South Dakota, Tennessee, Texas, and Wisconsin, for 180 days. Supporting shipper: Eagle-Picher Industries, Inc., Chemical & Fibers Division, P.O. Box 1328, Joplin, Mo. 64801. Send protests to: Joe Green, District Supervisor, Room 240, Old Post Office Bldg., 215 Northwest Third St., Oklahoma City, Okla. 73102.

No. MC 77061 (Sub-No. 9TA), filed July 28, 1976. Applicant: LARMER TRANSFER CO., 4310 22nd Ave. NE., Salem, Oreg. 97303. Applicant's representative: Russell M. Allen, 1200 Jackson Tower Bldg., Portland, Oreg. 97205. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Steel plate, angle iron, bars, pipe, and channel*, from Portland docks at Portland, Oreg., to the Farwest Steel Plant at Eugene, Oreg., under a continuing contract with Farwest Steel Corporation, for 180 days. Supporting shipper: Minnesota Distiller, Inc., Long Prairie, Minn. 56347. Send protests to: Raymond T. Jones, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 414 Federal Bldg., & U.S. Courthouse, 110 S. 4th St., Minneapolis, Minn. 55401.

No. MC 133689 (Sub-No. 78TA), filed July 29, 1976. Applicant: OVERLAND EXPRESS, INC., 717 SW. First St., New Brighton, Minn. 55112. Applicant's representative: Robert P. Sack, P.O. Box 6010, West St. Paul, Minn. 55118. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foundry core compounds, adhesives, and chemicals*, from Bainbridge, N.Y., to New Castle, Ind.; Bridgeman, Mich.; Troy Grove, Ill.; Marinette, Wis.; Sheboygan, Wis., and Grand Rapids, Minn., for 180 days. Supporting shipper: Borden Chemical, Div. of Borden, Inc., 180 East Broad St., Columbus, Ohio 43215. Send protests to: Raymond T. Jones, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 414 Federal Bldg., & U.S. Courthouse, 110 S. 4th St., Minneapolis, Minn. 55401.

No. MC 135684 (Sub-No. 25TA), filed July 30, 1976. Applicant: BASS TRANSPORTATION CO., INC., Old Croton Road, P.O. Box 391, Flemington, N.J. 08822. Applicant's representative: James P. O'Donnell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fresh and frozen horsemeat*, from the plantsite of Country Pride, Inc., and/or National Horse Products, at or near Creston, Ohio, to the United States/Canada Ports of Entry at Buffalo and Niagara Falls, N.Y., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: National Horse Products, P.O. Box 397, Creston, Ohio 44217. Send protests to: Dieter H. Harper, District Supervisor, Interstate Commerce Commission, 428 East State St., Room 204, Trenton, N.J. 08608.

No. MC 135874 (Sub-No. 58TA), filed filed July 24, 1976. Applicant: LTL PERISHABLES, INC., 550 E. 5th St. South, South St. Paul, Minn. 55075. Applicant's representative: Paul Nelson (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen pizza* (except commodities in bulk), from the plantsite and storage facilities of Saluto Foods, Inc., at Benton Harbor, Mich., to points in North Dakota and South Dakota for 180 days. Supporting shipper: Saluto Foods, Inc., P.O. Box 966, Benton Harbor, Mich. 49022. Send protests to: A. N. Spath, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 414 Federal Bldg., & U.S. Courthouse, 110 S. 4th St., Minneapolis, Minn. 55401.

No. MC 138054 (Sub-No. 15TA), filed July 29, 1976. Applicant: CONDOR CONTRACT CARRIERS, INC., P.O. Box 1354, Garden Grove, Calif. 92642. Applicant's representative: Patrick E. Quinn, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Materials, equipment, and supplies* used in the installation of floor coverings, from Compton and Azusa, Calif., to points in Florida, Ohio, Kentucky, Louisiana, Georgia, Iowa, and Nebraska, under a continuing contract with Adhesive Industries Mfg. Co., for 180 days. Supporting shipper: Adhesive Industries Mfg. Co., 1441 West El Segundo Blvd., Compton, Calif. 90222. Send protests to: Mary A. Francy, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, Room 1321 Federal Bldg., 300 North Los Angeles St., Los Angeles, Calif. 90012.

No. MC 138274 (Sub-No. 32TA), filed July 28, 1976. Applicant: SHIPPERS BEST EXPRESS, INC., 2151 North Redwood Road, Salt Lake City, Utah 84116. Applicant's representative: Chester Zyblut, 360 Executive Bldg., Suite 202, 1330 15th St. NW., Washington, D.C. 20005. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, from the plantsite of Columbia Foods Inc., at or near Wallula, Wash., to points in Maine, Vermont, Massachusetts, New Hampshire, Connecticut, New York, Pennsylvania, Delaware, Virginia, Washington, D.C., Arizona, Ohio, Rhode Island, New Jersey, and West Virginia, for 180 days. Supporting shipper: Columbia Foods, Inc., P.O. Box 926, Pasco, Wash. 99301. Send protests to: Lyle D. Helfer, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 5301 Federal Bldg., 125 South State St., Salt Lake City, Utah 84138.

No. MC 138527 (Sub-No. 13TA), filed July 30, 1976. Applicant: SMITHWAY MOTOR XPRESS, INC., P.O. Box 404, Fort Dodge, Iowa 50501. Applicant's representative: Arlyn L. Westergren, 530 Univac Bldg., Omaha, Nebr. 68106. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Metal articles*, from Fort Scott and Oswego, Kans., to points in Nebraska, Oklahoma, Arkansas, Missouri, Iowa, Minnesota, Wisconsin, Illinois, Michigan, Indiana, Ohio, Pennsylvania Kentucky, Tennessee, and Mississippi, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Tower Metal Products, Fort Scott, Kans., a Division of Southeast Specialalties, Inc., Oswego, Kans. R.R. No. 1, Ft. Scott, Kans. Send protests to: Herbert W. Allen, District Supervisor, Bureau of Operations, 518 Federal Bldg., Interstate Commerce Commission, Des Moines, Iowa 50309.

No. MC 139836 (Sub-No. 3TA), filed July 30, 1976. Applicant: LINT TRANSFER, INC., 4549 Delaware Ave., Des Moines, Iowa 50313. Applicant's representative: Donald H. Lint (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting:

V 41 1155 AUG 10 76 UMI

General commodities, restricted to traffic having an immediate or subsequent movement by rail TOFC Service, between Des Moines, Iowa, on the one hand, and, on the other, points in that part of Iowa bounded by Highway 20 on the North, No. 63 on the East, No. 34 on the South, and No. 71 on the West, for 180 days. Supporting shippers: Norfolk and Western Railway Company, 5th & Cherry St., Des Moines, Iowa 50309; Chicago North Western Transp. Co., 1800 SW. 9th, Des Moines, Iowa 50312; 3M Company, 900 Dayton Ave., Des Moines, Iowa. Send protests to: Herbert W. Allen, District Supervisor, Bureau of Operations, 518 Federal Bldg., Des Moines, Iowa 50309.

No. MC 140166 (Sub-No. 4TA), filed July 29, 1976. Applicant: JOHN L. SMITH, P.O. Box 186, Moreland, Idaho 83256. Applicant's representative: Dennis M. Olsen, 485 E St., Idaho Falls, Idaho 83401. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Animal feeds*, bagged and bulk, for on farm and other delivery, from Pocatello, Idaho, to points in Maricopa County, Ariz., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Ralston Purina Company, P.O. Box 2025, Pocatello, Idaho 83201. Send protests to: Varney L. Hardin, 550 W. Fort St., Box 07, Boise, Idaho 83724.

No. MC 140421 (Sub-No. 6TA), filed July 30, 1976. Applicant: ACTION MOTOR EXPRESS, INC., P.O. Box 29102, New Orleans, La. 70189. Applicant's representative: Harold R. Ainsworth, 2307 American Bank Bldg., New Orleans, La. 70130. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Lumber and lumber products*, from Joyce, La., to points in Alabama, Arkansas, Florida, Illinois, Indiana, Kentucky, Missouri, Mississippi, Ohio, Oklahoma, Tennessee, and Texas, under a continuing contract with Crown Zellerbach Corporation, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Crown Zellerbach Corporation, P.O. Box 1060, Bogalusa, La. 70427. Send protests to: Ray C. Armstrong, District Supervisor, 701 Loyola Ave., 9038 U.S. Federal Bldg., New Orleans, La. 70113.

No. MC 140883 (Sub-No. 8TA), filed July 29, 1976. Applicant: DOWNS TRANSPORTATION CO., INC., 2705 Canna Ridge Circle NE., Atlanta, Ga. 30345. Applicant's representative: K. Edward Wolcott, 1600 First Federal Bldg., Atlanta, Ga. 30303. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Expanded polystyrene and insulated panels with metal, wood, and plastic skins*, from Florence, Ky., to points in the United States (except Alaska and Hawaii), under a continuing contract with Kysor/Isowall, Division of Kysor Industrial Corporation, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Kysor/Isowall, Division of Kysor Industrial Corporation, 8055 Production Ave., 120 Industrial Park, P.O. Box 478, Florence, Ky. 41042. Send protests to: Sara K. Davis, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, 1252 W. Peachtree St. NW., Room 546, Atlanta, Ga. 30309.

No. MC 141033 (Sub-No. 14TA), filed July 28, 1976. Applicant: CONTINENTAL CONTRACT CARRIER CORP., 15045 E. Salt Lake Ave., P.O. Box 1257, City of Industry, Calif. 91749. Applicant's representative: James I. Mendenhall (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Materials, equipment, and supplies* utilized in the installation of floor coverings and floors; floor mats and runners; adhesives; cove base; carpet binding accessories; maintenance equipment and products; and *materials, equipment, and supplies* utilized in the manufacture, sale, and distribution of the commodities described above, from Piqua, Ohio, and Kalamazoo, Mich., to (1) points in the United States in and east of South Dakota, South Dakota, Nebraska, Kansas, Oklahoma, and Texas (except Ohio); and (2) City of Industry, Calif., and Vancouver, Wash., restricted against the transportation of commodities in bulk and those which, by reason of size or weight, require the use of special equipment and further restricted to the transportation of traffic originating at the plantsites of Roberts Consolidated Industries, Inc., for 180 days. Supporting shipper: Roberts Consolidated Industries, 600 North Baldwin Park Blvd., City of Industry, Calif. 91749. Send protests to: Mary A. Francy, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, Room 1321 Federal Bldg., 300 North Los Angeles St., Los Angeles, Calif. 90012.

No. MC 142304TA, filed July 30, 1976. Applicant: O'HARE TRUCK SERVICE, INC., 2200 N. Mannheim Road, Melrose Park, Ill. 60160. Applicant's representative: Daniel C. Sullivan, 327 South La Salle St., Chicago, Ill. 60604. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wrecked, damaged, or disabled trucks and truck tractors, replacement trucks and truck tractors, and parts* dispatched to relieve wrecked, damaged, or disabled trucks and truck tractors, by use of wrecker equipment, between points in New York, Massachusetts, Connecticut, Rhode Island, Pennsylvania, New Jersey, Delaware, Maryland, West Virginia, Ohio, Indiana, Iowa, Michigan, Wisconsin, Minnesota, Louisiana, Kentucky, Missouri, Virginia, Arkansas, Tennessee, North Carolina, South Carolina, Mississippi, Alabama, Georgia, and Texas, on the one hand, and, on the other, Franklin Park, Lyons, Melrose Park, Elk Grove Village, and Chicago, Ill., for 180 days. Supporting shippers: There are approximately 28 statements of support attached to the application, which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: Ronald Morken, District Supervisor, Interstate Commerce Commission, Everett McKinley Dirksen Bldg., 219 S. Dearborn St., Room 1386, Chicago, Ill. 60604.

No. MC 142305TA, filed July 28, 1976. Applicant: WISCONSIN EXPRESS LINES, INC., Route 2, Green Bay, Wis. 54301. Applicant's representative: Thomas O. Schultz, 836 Spence St., Green Bay, Wis. 54304. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Frozen boxed meat*, from Kewaunee, Wis., to Brooklyn, N.Y., under a continuing contract with Kewaunee Cold Storage Company, for 180 days. Supporting shipper: Kewaunee Cold Storage Company, 401 Harrison St., Kewaunee, Wis. 54216. Send protests to: Gail Daugherty, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, 135 West Wells St., Room 807, Milwaukee, Wis. 53203.

No. MC 142306TA, filed July 29, 1976. Applicant: ANGELO CARTAGE COMPANY, INC., 1951 East Ferry, Detroit, Mich. 48211. Applicant's representative: John Graham, 12878 Farmington Road, Livonia, Mich. 48151. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission and commodities in bulk), between Detroit, Mich., and Melvindale, Mich., on the one hand, and the plantsite of Monsanto Company, at Trenton, Mich., via I–75 to West Road, West Road to Fort Street, Fort Street to Van Horn Road, Van Horn Road to Jefferson, Jefferson to the plantsite; and return over the same route. Applicant intends to interline at Detroit, Mich., for 180 days. Supporting shipper: Monsanto Company, Plant Traffic Supervisor, Michael J. Berry, 5045 W. Jefferson, Trenton, Mich. 48138. Send protests to: Melvin F. Kirsch, District Supervisor, Interstate Commerce Commission, 1110 Broderick Tower, 10 Witherell Ave., Detroit, Mich. 48226.

By the Commission.

ROBERT L. OSWALD,
Secretary.

FEDERAL ELECTION COMMISSION

[Notice 1976–39, AOR 1976–56 through 1976–58]

ADVISORY OPINION REQUESTS

Availability

Pursuant to 2 U.S.C. § 437f(c) and the procedures reflected in Part 112 of the Commission's Notice of Proposed Rulemaking, published on May 26, 1976 (41 FR 21590), advisory opinion requests 1976–56 through 1976–58 have been made public at the Commission. Copies of AOR 1976–56 and AOR 1976–57 were made available on July 29, 1976, for public inspection and purchase at the Federal Election Commission, Public Records Division, at 1325 K Street, N.W., Washington, D.C. 20463. A copy of AOR 1976–58 was made similarly available on July 30, 1976.

Interested persons may submit written comments on any advisory opinion request within ten days after the date the request was made public at the Commission. These comments should be directed to the Office of the General Counsel, Advisory Opinion Section, at the Commission. Persons requiring additional time in which to respond to any advisory opinion requests will normally be granted such time upon written request to the Commission. All timely comments received by the Commission will be considered before the Commission issues an advisory opinion. Comments on pending requests should refer to the specific AOR number of the requests and statutory references should be to the United States Code citations rather than to the Public Law citations.

A descriptive listing of each of the requests recently made public as well as the identification of the requesting party follows hereafter:

AOR 1976–56: Whether the receipt of complimentary services or goods provided by a hotel to a candidate should be reported as an in-kind contribution or should not be accepted; corporate versus non-corporate hotels; government corporations; effect upon candidate, non-candidate status—Requested by Congressman James D. Santini, U.S. House of Representatives.

AOR 1976–57: Whether excess campaign funds may be used by a Member to pay for computer services in connection with his official business—Requested by Congressman Harold Ford, U.S. House of Representatives.

AOR 1976–58: Whether the Connecticut district party convention is an election separate from a possible primary election—Requested by Jeff Peterson, Peterson for Congress, Westport, Connecticut.

Dated: August 4, 1976.

VERNON W. THOMSON,
Chairman for the
Federal Election Commission.

PART III:

CONSUMER PRODUCT SAFETY COMMISSION

LEAD-BASED PAINT

Hearing: Safe Level Determination

Consumer Products; Proposed Promulgation and Revocation of Regulations

V41/155 AUG 10 76 UMI

CONSUMER PRODUCT SAFETY COMMISSION

LEAD-BASED PAINT

Hearing To Determine Safe Level

The purpose of this notice is to commence a proceeding under the 1976 amendments to the Lead-Based Paint Poisoning Prevention Act whereby the Consumer Product Safety Commission will determine a "safe level" of lead in paint. The Commission determination of a safe level of lead in paint will be based on all available data and information after providing an opportunity for an oral hearing and after considering recommendations of the Secretary of Health, Education, and Welfare (including those of the Center for Disease Control) and of the National Academy of Sciences. The proceedings will involve a determination of whether a level of lead in paint which is greater than 0.06 percent but not in excess of 0.5 percent is safe.

BACKGROUND

On June 23, 1976, the Lead-Based Paint Poisoning Prevention Act (LBPPPA), (42 U.S.C. 4801 et seq.), was extended and revised by enactment of the National Consumer Health Information and Health Promotion Act of 1976, Pub. L. 94-317 (90 Stat. 705-706). The LBPPPA, as amended, among other things, directs the Department of Health, Education, and Welfare to take action with respect to lead-based paint on cooking, eating, and drinking utensils; the Department of Housing and Urban Development to take action with respect to lead-based paint in residential structures constructed or rehabilitated by the Federal Government or with Federal assistance; and the Consumer Product Safety Commission (Commission or CPSC) to "take such steps and impose such conditions as may be necessary or appropriate to prohibit the application of lead-based paint to any toy or furniture article" (sec. 401, 90 Stat. 705).

The term "lead-based paint" is defined in section 501 of the LBPPPA, as amended by Pub. L. 94-317 (90 Stat. 706), as paint containing more than 0.5 percent lead by weight (calculated as lead metal) in the total nonvolatile content of the paint, or the equivalent measure of lead in the dried film of paint already applied, or both.

Section 501(3) provides that if the CPSC determines that another level of lead is safe which is greater than 0.06 percent, but not over 0.5 percent, the term "lead-based paint," with respect to paint manufactured after the expiration of the 6-month period beginning on the date of the Commission's determination, means paint containing by weight (calculated as lead mteal) in the total nonvolatile content of the paint, more than the level of lead determined by the Commission to be safe, or the equivalent measure of lead in the dried film of paint already applied, or both.

Section 501(3)(B)(ii) also provides that if the definition of the term "lead-based paint" has not been established by a Commission determination, the term means, with respect to paint which is manufactured after the expiration of the 12-month period beginning on June 23, 1976, paint containing more than 0.06 percent lead by weight (calculated as lead metal) in the total nonvolatile content of the paint, or the equivalent measure of lead in the dried film of paint already applied, or both.

Procedurally, the amended LBPPPA provides that the Commission shall make its determination of a safe level of lead in paint during a 6-month period beginning on the date of enactment of the amendments (June 23, 1976.) The determination is to be made on the basis of available data and information, after providing opportunity for an oral hearing, and after considering recommendations of the Secretary of Health, Education, and Welfare (including those of the Center for Disease Control) and of the National Academy of Sciences. Letters requesting these recommendations will soon be transmitted.

PUBLIC HEARING

The oral hearing in this matter is open to all interested members of the public and is scheduled to be conducted on September 13, 1976, from 9:30 a.m. to 5:00 p.m., and on September 14, 1976, from 9:00 a.m. to 5:00 p.m. Any change in these dates will be announced in the FEDERAL REGISTER. The hearing will be held in the General Services Administration Auditorium, 18th and F Streets, NW, Washington, D.C.

Persons wishing to make oral presentations should contact the Office of the Secretary by telephone (202-634-7700) or in writing (Consumer Product Safety Commission, Washington, D.C. 20207) at least 10 days before the proceeding so that scheduling arrangements can be made.

Presentations will be limited to matters relevant to a determination of a safe level of lead in paint, and any potential technological, economic and environmental effects of lowering the level. In addition, presentations may be made relevant to the proposal to declare "lead-based paint," as determined by this proceeding or by operation of law, as well as certain other articles bearing such paint, as "banded hazardous products" under the Consumer Product Safety Act (15 U.S.C. 2051 et seq.), and the proposal to revoke a regulation (16 CFR 1500.17(a)(6)) under the Federal Hazardous Substances Act (15 U.S.C. 1261 et seq.), as discussed in separate notices also in this issue of the FEDERAL REGISTER. (See FR Docs. 76-23112 and 76-23113, *infra*.)

The regulations for oral presentations regarding proposed consumer product safety rules, 16 CFR Part 1109, issued by the Commission on October 14, 1975 (40 FR 48122), shall govern this proceeding. Copies of these regulations may be obtained from the Office of the Secretary. Oral testimony will be presented to the Commission with Chairman S. John Byington acting as presiding officer. The presiding officer and the Commission may direct questions to persons testifying. In addition, the presiding officer will, to the extent practicable, permit questions from interested persons and Commission staff members to be presented to persons testifying.

In addition to making oral presentations, interested persons may also submit relevant written material, including data, views, and arguments. Such material should be submitted, preferably in five copies, addressed to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207, before the close of business, September 24, 1976. Received submissions may be inspected in the Office of the Secretary, 8th Floor, 1750 K Street NW., Washington, D.C., during working hours Monday through Friday.

The determination of a safe level of lead in paint shall be announced as soon as practicable by notice published in the FEDERAL REGISTER upon completion on these proceedings.

Dated: August 4, 1976.

SADYE E. DUNN, *Secretary, Consumer Product Safety Commission.*

[FR Doc.76-23111 Filed 8-9-76;8:45 am]

CONSUMER PRODUCT SAFETY COMMISSION

[16 CFR Parts 1145, 1150]

LEAD-BASED PAINT AND CERTAIN CONSUMER PRODUCTS BEARING LEAD BASED PAINT

Proposed Regulation Under the Consumer Product Safety Act as Banned Hazardous Products

The purpose of this document is to propose regulating lead-based paint and certain other consumer products bearing such paint under the Consumer Product Safety Act (CPSA), 15 U.S.C. 2051 et seq., rather than the Federal Hazardous Substances Act (FHSA), 15 U.S.C. 1261 et seq., and to propose a regulation under the CPSA declaring as banned hazardous products (1) lead-containing paint and similar surface-coating materials containing more than a safe level of lead, (2) toys and other articles intended for use by children bearing lead-containing paint or other similar surface-coating materials containing more than a safe level of lead, and (3) articles of furniture bearing lead-containing paint or other similar surface-coating materials containing more than a safe level of lead.

BACKGROUND

As discussed in more detail in a separate document in this issue of the FEDERAL REGISTER, (See FR Doc. 76-23111, supra) the Consumer Product Safety Commission (Commission or CPSC), pursuant to the Lead-Based Paint Poisoning Prevention Act (LBPPPA), 42 U.S.C. 4801 et seq., as amended by the National Consumer Health Information and Health Promotion Act of 1976 (Pub. L. 94-317, 90 Stat. 705-706) has commenced a proceeding to determine whether a level of lead greater than 0.06 percent but not more than 0.5 percent is safe. If the Commission makes a determination within this range, then under the amended LBPPPA, paint with lead above that level will be considered "lead-based paint" for purposes of administration of the LBPPPA, effective 6 months after the date of such determination. If the Commission makes no determination within that range, the present limit of lead in paint of 0.5 percent will be lowered automatically by statute to 0.06 percent as applied to paint manufactured after the expiration of the 12-month period commencing June 23, 1976, the date of enactment of Public Law 94-317 amending the LBPPPA. The Commission is also directed by the amended LBPPPA to "take such steps and impose such conditions as may be necessary or appropriate to prohibit the application of lead-based paint to any toy or furniture article" (sec. 401(c), 90 Stat. 705).

In addition to its responsibilities under under the LBPPPA, the Commission also regulates lead paint and certain articles bearing such paint under the FHSA. Issued under the authority of the FHSA, 16 CFR 1500.17(a)(6)(i) declares as banned hazardous substances, "any paint or other similar surface-coating material intended, or packaged in a form suitable for use in or around the household that:

(A) Is shipped in interstate commerce after December 31, 1973, and contains lead compounds of which the lead content (calculated as the metal) is in excess of 0.06 percent of the total weight of the contained solids or dried paint film; or

(B) Is shipped in interstate commerce after December 31, 1972, and contains lead compounds of which the lead content (calculated as the metal) is in excess of 0.5 percent of the total weight of the contained solids or dried paint film.

Except that:

(D) The provisions of paragraph (a)(6)(i) of this section do not apply to artists' paints and related materials.

In addition to the ban on paint and other similar surface coatings in paragraph (a)(6)(i), paragraph (a)(6)(ii) declares as banned hazardous substances the following:

(ii) Any toy or other article intended for use by children that:

(A) Is shipped in interstate commerce after December 31, 1973, and bears any paint or other similar surface-coating material containing lead compounds of which the lead content (calculated as the metal) is in excess of 0.06 percent of the total weight of the contained solids or dried paint film; or

(B) Is shipped in interstate commerce after December 31, 1972, and bears any paint or other similar surface-coating material containing lead compounds of which the lead content (calculated as the metal) is in excess of 0.5 percent of the total weight of the contained solids or dried paint film.

Because of objections filed to the provision lowering the level to 0.06 percent, the Food and Drug Administration (FDA) on August 10, 1972 (37 FR 16078), pursuant to section 701(e) of the Federal Food, Drug, and Cosmetic Act (FDCA), 21 U.S.C. 371(e), stayed the portions of the regulation lowering the level to 0.06 percent. The 0.5 percent level was unaffected.

On May 14, 1973, functions under the FHSA were transferred from FDA to CPSC and on December 27, 1973 (38 FR 35302), the Commission amended § 1500.17(a)(6) to continue the 0.5 percent level pending completion of animal studies underway regarding the toxicity of paint containing lead. The Commission, on December 9, 1974 (39 FR 42902), again amended the regulation to continue the 0.5 percent level pending the results of ongoing research, which included a report being prepared by the National Academy of Sciences (NAS). Thus, at the present time, under § 1500.17(a)(6), the 0.5 percent level remains in effect, and the 0.06 percent provisions are stayed.

In addition to the ongoing FHSA regulatory activity in this matter, Consumers Union filed a petition on February 24, 1975, requesting the Commission to issue a regulation under the FHSA banning household paint and toys or other children's articles bearing paint containing more than 0.06 percent of lead. The petition also requests the Commission to take action under the CPSA to achieve a similar result. To date no action has been taken by the Commission on the petition because the Commission has been awaiting the final NAS report on lead-containing paint.

Thus, the Commission has responsibilities under the amended LBPPPA to determine a safe level of lead in paint and to prohibit application of lead-based paint to toys and furniture. This determination under the LBPPPA will affect the regulation of lead-containing paint used in residential structures constructed or rehabilitated by the Federal Government or with Fedreal assistance and lead paint on cooking, eating, and drinking utensils. Moreover, the Commission is responsible under the FHSA for regulating lead-containing paint for use in or around households and certain other articles bearing such paint and has before it a petition under both the FHSA and the CPSA to lower the permissible level from 0.5 to 0.06 percent.

As mentioned previously, the provisions of § 1500.17(a)(6) regarding lead-containing paint above the 0.06 percent level have been stayed because of objections. The rulemaking procedures involved (21 U.S.C. 371(e)) require the conduct of evidentiary hearings once objections have been filed to a regulation. Under the CPSA, an opportunity for an oral hearing is required before issuance of a consumer product safety rule. Also, as noted above, under the LBPPPA, an oral hearing is required to be conducted before the Commission's determination of a safe level of lead. Thus, if the Commission were to proceed independently under more than one of these acts, it would be required to hold public hearings on essentially the same subject matter. Accordingly, the Commission has decided to consolidate the proceedings under the various acts.

Section 30(d) of the CPSA (15 U.S.C. 2079(d)), as amended by the Consumer Product Safety Commission Improvements Act of 1976 (Pub. L. 94-284; 90 Stat. 510), provides for certain regulatory actions to proceed under the CPSA rather than the FHSA and reads as follows:

(d) A risk of injury which is associated with a consumer product and which could be eliminated or reduced to a sufficient extent by action under the Federal Hazardous Substances Act, the Poison Prevention Packaging Act of 1970, or the Flammable Fabrics Act may be regulated under this Act only if the Commission by rule finds that it is in the public interest to regulate such risk of injury under this Act. Such a rule shall identify the risk of injury proposed to be regulated under this Act and shall be promulgated in accordance with section 553 of the title 5, United States Code, except that the period to be provided by the Commission pursuant to subsection (c) of such section for submission of data, views, and arguments respecting the rule shall not exceed thirty days from the date of publication pursuant to subsection (b) of such section of a notice respecting the rule.

Pursuant to section 30(d) of the CPSA, the Commission believes that the public interest requires the regulation of lead-containing paint, and certain other consumer products bearing such paint, under provisions of the CPSA rather than the FHSA. Because the Commission is obligated under the amended LBPPPA

V 41 155 AUG 10 76 UMI

to make its determination of a safe level of lead in paint within 6 months after June 23, 1976, proceeding under the FHSA at the same time is unfeasible because of the time-consuming nature of hearings that would be conducted under section 701(e) of the FDCA. (See 21 U.S.C. 371(e) and 21 CFR 2.48 et seq.) Moreover, the complex nature of the FHSA proceedings might tend to deter interested parties from participating to the extent possible under the LBPPPA and the CPSA.

On the other hand, section 9 of the CPSA (15 U.S.C. 2058), which governs the issuance of consumer product safety rules, requires notice of proposal with opportunity for submitting written comments in accordance with 5 U.S.C. 553, with the added requirement that interested persons be given an opportunity for the oral presentations of data, views, or arguments. The requirements for oral presentation of views under the CPSA and the requirements for an oral hearing under the LBPPPA are compatible and may be consolidated procedurally because both hearings are informal.

Therefore, since the risk of injury addressed in both proceedings involves determination of a level of lead which would be permitted in paint, the Commission concludes that the public interest would be served by resolving all related questions in one proceeding whereby all interested members of the public would be able to present their information and views at one time. A regulation (16 CFR Part 1145) is proposed below, pursuant to section 30(d) of the CPSA, to provide for regulating lead-based paint and certain other consumer products bearing such paint under the CPSA, rather than the FHSA.

Under the CPSA the Commission is authorized to, among other things, issue consumer product safety standards pursuant to sections 7 and 9 of the act and to issue rules under sections 8 and 9 of the act declaring products to be banned hazardous products. A product may be declared a banned hazardous product if the Commission finds that it presents an unreasonable risk of injury and that no feasible consumer product safety standard under the CPSA would adequately protect the public from the risk of injury presented. The scope of product coverage under the CPSA is defined and limited by the definition of "consumer product" in section 3(a)(1) of the act (15 U.S.C. 2052(a)(1)). Except for certain specific exclusions, a "consumer product" includes any article, or component part thereof, produced or distributed for sale to, or for the personal use, consumption, or enjoyment of, a consumer in or around a permanent or temporary household or residence, a school, in recreation, or otherwise. Thus, coverage under the CPSA is similar to, but somwhat broader than, coverage under the FHSA, which includes articles intended or packaged for use in or around the household plus toys or other articles intended for use by children.

As specified above, the currently effective provisions of § 1500.16(a)(6) under the FHSA already ban paint and other similar surface-coating material for household use containing more than 0.5 percent of lead and toys or other articles for children bearing such paint or similar surface-coating material. Thus, regulating such products under the CPSA amounts to simply a transfer of the regulations from the authority of the FHSA to the CPSA. A notice proposing revocation of § 1500.17(a)(6) is therefore published elsewhere in this issue of the FEDERAL REGISTER. (See FR Doc. 76-23113, *infra*.)

Regarding lead-containing paint and certain other consumer products bearing such paint not currently subject to § 1500.17(a)(6), the Commission believes that the Congressional intent expressed in the amended LBPPPA is for all paint for consumer use containing lead in excess of what is determined to be a safe level under the LBPPPA proceedings, and certain other consumer products bearing lead-containing paint, to be considered as presenting an "unreasonable risk of injury" as that term is used in sections 8 and 9 of the CPSA. This intent is manifested in the LBPPPA by the provisions directing this and other Federal agencies to take certain regulatory actions with respect to lead-based paint, including the specific provision directing the CPSC to prohibit the application of lead-based paint to any toy or furniture article.

With respect to the directions to the Department of Housing and Urban Development, "lead-based paint" as defined in the LBPPPA has already been found to be unsafe for use in housing constructed or rehabilitated by the Federal Government, or with Federal assistance in any form. The Department of Health, Education, and Welfare has been mandated to prohibit the application of "lead-based paint" as defined in the LBPPPA to any cooking utensil, drinking utensil, or eating utensil. Therefore, since paint containing lead above certain levels has been deemed unsafe by Congress for these certain uses, the Commission concludes that it is also unsafe for other similar consumer and nonfederally-assisted housing uses and that it presents an unreasonable risk of injury.

FINDINGS

Accordingly, the Commission preliminarily finds the following to present an unreasonable risk of injury:

1. Paint and other similar surface-coating materials that contain lead compounds of which the lead content (calculated as the metal) is in excess of the percent of lead found under the LBPPPA proceeding to be safe.

2. Toys and other articles intended for use by children that bear any paint or similar surface-coating materials in excess of the percent of lead found under to LBPPPA proceeding to be safe.

3. Articles of furniture that bear any paint or similar surface-coating materials in excess of the percent of lead found under the LBPPPA proceeding to be safe.

In addition to the finding of unreasonable risk of injury required to initiate rulemaking under sections 8 and 9 of the CPSA, the Commission, to propose a consumer product safety rule declaring a consumer product a banned hazardous product, must find that no feasible consumer product safety standard under the CPSA would adequately protect the public from the unreasonable risk of injury associated with such product. With respect to declaring as banned hazardous products certain consumer products containing or bearing paint containing lead in excess of a specific level, the Commission also finds preliminarily that known technology cannot make such paint safe. Accordingly, the Commission finds that a consumer product safety standard for paint containing more than a safe level of lead is unfeasible and unlikely to serve as adequate protection of the public.

PROPOSAL

The Commission therefore proposes below to declare that certain lead-containing paints and similar lead-containing surface-coating materials, and toys and articles of furniture bearing such paints or coating materials, are banned hazardous products.

Accordingly, pursuant to provisions of the Consumer Product Safety Act (secs. 8, 9, 30(d), 86 Stat. 1215-17, 1231, as amended 90 Stat. 506, 510; 15 U.S.C. 2057, 2058, 2079(d)), the Commission proposes that Title 16, Chapter II, be amended by adding to Subchapter B the following new Parts 1145 and 1150:

PART 1145—REGULATION OF PRODUCTS SUBJECT TO OTHER ACTS UNDER THE CONSUMER PRODUCT SAFETY ACT

Sec.
1145.1 Scope.
1145.2 Paint (and other similar surface-coating materials) containing lead; toys, children's articles, and articles of furniture bearing such paint (or similar surface-coating materials); risk of lead poisoning.

AUTHORITY: Sec. 30(d), 86 Stat. 1231, as amended, 90 Stat. 510; 15 U.S.C. 2079(d).

§ 1145.1 Scope.

This Part 1145 sets forth risks of injury associated with consumer products that could be eliminated or reduced to a sufficient extent by action under the Federal Hazardous Substances Act (15 U.S.C. 1261-1274), the Poison Prevention Packaging Act of 1970 (15 U.S.C. 1471-1476), or the Flammable Fabrics Act (15 U.S.C. 1191-1204), but for which, pursuant to section 30(d) of the Consumer Product Safety Act, the Consumer Product Safety Commission has, by rule, found that it is in the public interest to institute a regulatory action under the Consumer Product Safety Act.

§ 1145.2 Paint (and other similar surface-coating materials) containing lead; toys, children's articles, and articles of furniture bearing such paint (or similar surface-coating materials); risk of lead poisoning.

(a) The Commission finds that it is in the public interest to regulate the risk of lead poisoning to young children from the ingestion of paint and other similar surface-coating materials under the Consumer Product Safety Act rather than under the Federal Hazardous Substances Act because of the desirability of consolidating the public procedures related to such regulation with the procedure under the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. 4801 et seq.), as amended by the National Consumer Health Information and Health Promotion Act of 1976 (Pub. L. 94-317; 90 Stat. 705-706), for the determination of a safe level of lead. Consolidation of these proceedings will facilitate greater public participation and a more expeditious resolution of the issues.

(b) Paint and other similar surface-coating materials containing lead and toys, children's articles, and articles of furniture bearing such paint or other similar surface-coating materials that present a risk of lead poisoning to young children by ingestion shall therefore be regulated under the Consumer Product Safety Act. Such regulation shall include all directly related pending and future rulemaking, as well as all directly related pending and future action on petitions.

PART 1150—BANNED HAZARDOUS PRODUCTS

Sec.
1150.1 Scope.
1150.5 Lead-containing paint and other similar surface-coating materials.
1150.6 Toys and other articles intended for use by children bearing lead-containing paint or other similar surface-coating materials.
1150.7 Articles of furniture bearing lead-containing paint or other similar surface-coating materials.

AUTHORITY: Secs. 8, 9, 86 Stat. 1215-1217, as amended, 90 Stat. 506; 15 U.S.C. 2057, 2058.

§ 1150.1 Scope.

This Part 1150 sets forth the regulations whereby the Consumer Product Safety Commission declares certain consumer products to be banned hazardous products under section 8 of the Consumer Product Safety Act (15 U.S.C. 2057) on the basis that (a) the consumer product is being, or will be, distributed in commerce; (b) such consumer product presents an unreasonable risk of injury; and (c) no feasible consumer product safety standard under said act would adequately protect the public from the unreasonable risk of injury associated with such product.

§ 1150.5 Lead-containing paint and other similar surface-coating materials.

On the basis that the dried film of such consumer products presents the hazard to young children of lead poisoning upon ingestion, paint, and other similar surface-coating materials that contain lead compounds of which the lead content (calculated as the metal) is in excess of (the level, expressed as a percentage, to be determined "safe" by CPSC under proceedings conducted in accordance with the provisions of the Lead-Based Paint Poisoning Prevention Act, as amended by the National Consumer Health Information and Health Promotion Act of 1976 (Pub. L. 94-317; 90 Stat. 705-706)) of the total weight of the contained solids or dried paint film are banned hazardous products, except for the following:

(a) Artists paint and related materials.

§ 1150.6 Toys and other articles intended for use by children bearing lead-containing paint or other similar surface-coating materials.

On the basis that the dried film from paint or other similar surface-coating materials on such consumer products presents the hazard to young children of lead poisoning upon ingestion, toys and other articles intended for use by children that bear any paint or other similar surface-coating material containing lead compounds of which the lead content (calculated as the metal) is in excess of (the level, expressed as a percentage, to be determined "safe" by CPSC under proceedings conducted in accordance with the provisions of the Lead-Based Paint Poisoning Prevention Act, amended as stated in § 1150.6 above) of the total weight of the contained solids or dried paint film are banned hazardous products.

§ 1150.7 Articles of furniture bearing lead-containing paint or other similar surface-coating materials.

On the basis that the dried film from paint or other similar surface-coating materials on such consumer products presents the hazard to young children of lead poisoning upon ingestion, articles of furniture that bear any paint or other similar surface-coating material containing lead compounds of which the lead content (calculated as the metal) is in excess of (the level, expressed as a percentage, to be determined "safe" by CPSC under proceedings conducted in accordance with the provisions of the Lead-Based Paint Poisoning Prevention Act, amended as stated in § 1150.6 above) of the total weight of the contained solid or dried paint film are banned hazardous products.

Regarding proposed Part 1145, interested persons are invited to submit written comments on or before September 9, 1976. Comments may be accompanied by written data, views, and arguments and should be submitted, preferably in five copies, addressed to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. Received comments and other related material may be seen in the Office of the Secretary, 8th Floor, 1750 K Street NW., Washington, D.C., during working hours Monday through Friday.

Regarding proposed Part 1150, interested persons are invited to submit written comments before the close of business, September 24, 1976. Comments may be accompanied by written data, views, and arguments and should be submitted, preferably in five copies, addressed to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. Received comments and other related material may be seen in the Office of the Secretary, 8th floor, 1750 K Street NW., Washington, D.C., during working hours Monday through Friday.

In the matter of proposed Part 1150, an oral hearing open to all interested members of the public is scheduled to be conducted on September 13, 1976, from 9:30 a.m. to 5 p.m. and on September 14, 1976, from 9 a.m. to 5 p.m. Any change in these dates will be announced in the FEDERAL REGISTER. The hearing will be held in the General Services Administration Auditorium, 18th & F Streets NW., Washington, D.C. The hearing in this matter is to be consolidated with the hearing on the determination under the Lead-Based Paint Poisoning Prevention Act of a safe level of lead announced separately in this issue of the FEDERAL REGISTER. A written transcript of the proceedings will be prepared. The regulations for oral presentations, 16 CFR Part 1109, issued by CPSC on October 14, 1975 (40 FR 48122), shall govern this proceeding. Copies of these regulations may be obtained from the Office of the Secretary. Oral testimony will be presented to the Commission with Chairman S. John Byington acting as presiding officer. The presiding officer and the Commission may direct questions to persons testifying. In addition, the presiding officer will, to the extent practicable, permit questions from interested persons and Commission staff members to be presented to persons testifying.

Persons wishing to make oral presentations should contact the Office of the Secretary by telephone (202-634-7700) or in writing (Consumer Product Safety Commission, Washington, D.C. 20207) at least 10 days before the proceeding so that scheduling arrangements can be made. Oral presentations as well as written comments will be limited to matters relevant to a determination of a safe level of lead in paint and any technological, economic, and environmental effects of lowering the level. In addition, written comments and oral presentations may be made relevant to the instant proposal under the Consumer Product Safety Act and the revocation of regulations (16 CFR 1500.17(a)(6)) under the Federal Hazardous Substances Act, also proposed in this issue of the FEDERAL REGISTER.

In particular, with respect to proposed Part 1150, the Commission solicits data, information, views, and arguments as to the following:

1. The degree and nature of the risk of injury the rule is designed to eliminate or reduce.

2. The approximate number of consumer products, or types or classes thereof, subject to such rule.

3. The need of the public for the consumer product subject to such rule and the probable effect of such rule upon the utility, cost, or availability of such products to meet such need.

4. Any means of achieving the objective of the rule while minimizing adverse

V 41 155 AUG 10 76 UMI

effects on competition or disruption or dislocation of manufacturing and other commercial practices consistent with the public health and safety.

5. The necessity of the rule to eliminate or reduce the unreasonable risk of injury associated with the consumer products subject to the rule.

6. Whether the rule is in the public interest.

7. The feasibility of a consumer product safety standard under the CPSA to protect the public adequately from the unreasonable risk of injury associated with lead in paint above the safe level.

8. The potential environmental effects of the rule.

In making its final decision on the rules proposed herein, the record shall consist of all information available to the Commission, whether obtained during the course of this proceeding or outside of this proceeding.

Dated: August 4, 1976.

SADYE E. DUNN,
Secretary, Consumer Product Safety Commission.

[FR Doc.76-23112 Filed 8-9-76;8:45 am]

[16 CFR Part 1500]

CERTAIN LEAD-CONTAINING PAINT; TOYS AND OTHER ARTICLES BEARING SUCH PAINT INTENDED FOR USE BY CHILDREN

Proposed Revocation of Regulation

The purpose of this document is to propose revoking a regulation (16 CFR 1500.17(a)(6)) under the Federal Hazardous Substances Act (FHSA), (15 U.S.C. 1261 et seq.), declaring certain lead-containing paint, and toys or other articles intended for use by children bearing such paint, to be banned hazardous substances.

BACKGROUND

Elsewhere in this issue of the FEDERAL REGISTER, (See FR Doc. 76-23112, *supra*) regulations (16 CFR Part 1150) are proposed under the Consumer Product Safety Act (CPSA), (15 U.S.C. 2051 et seq.), declaring as banned hazardous products: (1) Lead-containing paint and similar surface-coating materials containing more than a safe level of lead, (2) Toys and other articles intended for use by children bearing lead-containing paint or other similar surface-coating materials containing more than a safe level of lead, and (3) Articles of furniture bearing lead-containing paint or other similar surface-coating materials containing more than a safe level of lead.

A determination of a "safe level of lead" will be made by the Consumer Product Safety Commission under the Lead-Based Paint Poisoning Prevention Act (LBPPPA), (42 U.S.C. 4801 et seq.), as amended by the National Consumer Health Information and Health Promotion Act of 1976 (Pub. L. 94-317, 90 Stat. 705-706). This determination, based on proceedings announced in a separate notice in this issue of the FEDERAL REGISTER, involve consideration of whether a level of lead in paint which is greater than 0.06 percent but not in excess of 0.5 percent is safe. (See FR Doc. 76-23111, supra)

Currently, 16 CFR 1500.17(a)(6) under the FHSA declares as banned hazardous substances any paint or other similar surface-coating material that contains lead compounds of which the lead content (calculated as the metal) is in excess of 0.5 percent of the total weight of the contained solids or dried paint film. Section 1500.17(a)(6) also declares as banned hazardous substances any toy or other article intended for use by children that bears such paint or coating material.

Section 1500.17(a)(6) also contains certain provisions (subdivisions (i)(A) and (ii)(A)) that were stayed as a result of objections filed pursuant to section 701(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 371(e)). The stayed provisions would have lowered the 0.5 percent permitted level of lead to 0.06 percent. Thus, only the 0.5 percent level prescribed by § 1500.17(a)(6) is in effect. (See FEDERAL REGISTER documents of August 10, 1972 (37 FR 16078), December 27, 1973 (38 FR 35302), and December 9, 1974 (39 FR 42902)).

As the two asociated CPSC documents also in this FEDERAL REGISTER indicate, the Commission is presently commencing action to determine a "safe level of lead" under the LBPPPA and proposing ing paint under the CPSA. These CPSA to establish regulations for lead-containregulations, when issued, would render the FHSA regulation (§ 1500.17(a)(6)) obsolete and unnecessary.

PROPOSAL

§ 1500.17 [Amended]

Accordingly, pursuant to provisions of the Federal Hazardous Substances Act (sec. 2(f)(1)(A), (q), 74 Stat. 372, 374, as amended by 80 Stat. 1304-05; (15 U.S.C. 1261(f)(1)(A), (q))) and the Federal Food, Drug, and Cosmetic Act (section 701(e), (f), (g), 52 Stat. 1055-56, as amended 70 Stat. 919, 72 Stat. 948; (21 U.S.C. 371(e), (f), (g)) and under authority vested in the Commission by the Consumer Product Safety Act (sec. 30(a), 86 Stat. 1231; (15 U.S.C. 2079(a))), the Commission proposes to amend 16 CFR Part 1500 by revoking § 1500.17(a)(6).

In its proposal to replace § 1500.17(a)(6) by regulations promulgated under the CPSA, the Commission has included in the proposed CPSA regulations amendments and exemptions presently contained in § 1500.17(a)(6). Any outstanding proposals under the FHSA to amend § 1500.17(a)(6) shall, upon promulgation of the CPSA regulations,(be transferred to the authority of, and acted upon under, the CPSA. Any outstanding petitions to amend § 1500.17(a)(6) shall also, upon promulgation of the CPSA regulations, be transferred and considered under that act.

The effective date of the proposed revocation of § 1500.17(a)(6), if promulgated, will be the same as the effective date of the CPSA regulations replacing it.

Interested persons are invited to submit, on or before September 24, 1976, written comments regarding this proposal. Written comments and any accompanying data or material should be submitted, preferably in five copies, addressed to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the Office of the Secretary, 8th floor, 1750 K Street NW., Washington, D.C., during working hours Monday through Friday.

Dated: August 4, 1976.

SADYE E. DUNN,
Secretary, Consumer Product Safety Commission.

federal register

TUESDAY, AUGUST 10, 1976

PART IV:

FEDERAL POWER COMMISSION

GAS SUPPLY AND OPERATIONS DATA

CERTAIN CORPORATE AND FINANCIAL REPORTS

Proposed New Forms 153 and 155

V 41 155 AUG 10 76 UMI

FEDERAL POWER COMMISSION

[18 CFR Part 260]

[Docket No. RM76-27]

GAS SUPPLY AND OPERATIONS DATA

Proposed New Form No. 153

JULY 28, 1976.

Notice is hereby given pursuant to the Administrative Procedure Act, 5 U.S.C. 553, and sections 8, 10, 14, 15, and 16 of the Natural Gas Act,[1] that the Commission proposes to add § 260.26 to Part 260 of the Approved Forms under the Natural Gas Act to provide that new FPC Form No. 153 be required for reporting. The proposed new form would be entitled, "Gas Supply and Operations Data."

During a period of critical natural gas shortages, such as the nation is experiencing today, the public interest requires that the Commission have available to it current and continuing information on the operations of companies producing gas for sale in interstate commerce. The interests of those companies regulated by the Commission also require an efficient and progressive means of regulation.

On September 26, 1973, in Docket No. R-438, the Commission issued Order No. 494, amending Part 2, Chapter I, Title 18 of the Code of Federal Regulations and setting forth Commission policy for the development of a fully automated computer regulatory system to provide such information. When developed and fully operative, the system will provide prompt and ready access to data contained in a central electronic data bank, eliminating the duplication of information now collected and reducing the quantity of existing manual files. This system will not only facilitate the evaluation and analysis of all data, but it will also accommodate the development of new regulatory techniques.

In Order No. 494, the Commission stated that all existing "hard copy" public use forms would be redesigned and consolidated to eliminate redundancies and that instructions for reporting would be clarified by use of Electronic Data Processing (EDP) Technology. Public use form in formation, as it is presently submitted, will be replaced by the submission of individual data elements within a general data element and code scheme. It is anticipated that this major system revision will result in the reduction of the total number of data items currently transmitted to the Commission by the respondents.

In Order No. 494, the Commission further stated that the development of the automated computer information system would be effected through the use of phased rulemaking proceedings in which various Commission reporting procedures and report forms would be restructured. To this end, Form No. 153 is designed to incorporate into a readily retrievable data processing system the information elicited by FPC Form Nos. 2,[2] 2A,[3] 8,[4] 11,[5] 14,[6] 15,[7] 16,[8] 17, and System Flow [9] currently used.

It is anticipated that a one-year period of parallel reporting will be required for system evaluation. Assuming successful operation of the new system within such time period, the related schedules within the current FPC Form Nos. 2 and 2A and the FPC Form Nos. 8, 11, 14, 15, 16, 17, and System Flow Diagrams for these respondents would then be eliminated.

Proposed Form No. 153 would consist of 55 schedules, numbered 401-442, 840-851, and 853. No new significant data would be required. This form will provide detailed data on system natural gas supply, system requirements, curtailments actual and projected, importers and exporters of natural gas, and gas stored underground.

All data and information submitted pursuant to the proposed form would be required to be subscribed and verified by a duly authorized executive officer of the respondent as being factually accurate and complete to the best of his or her knowledge in accordance with the Commission's Rules of Practice and Procedure, 18 CFR Part 1.

It had been contemplated by the Commission that all respondents, in using EDP media, would be required to submit their data on magnetic tape. The Commission now proposes that magnetic tape, in addition to a hard copy of the forms used to create the tape, would be required only from those respondents having over $10 million annual gas operating revenues. The manner of the preparation of the tapes would be left to the discretion of the respondents. For all other respondents, an original and four conformed copies of each completed Form No. 153 would be required to be filed with the Commission.

Any interested person may submit to the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, not later than September 27, 1976, data, views, and comments or suggestions in writing concerning all or part of the proposed form. Written submittals will be placed in the Commission's public files and will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, NE., Washington, D.C. 20426, during regular business hours. The Commission will consider all such written submittals before acting on the matters herein proposed. An original and 14 conformed copies should be filed with the Secretary of this Commission. Submittals to the Commission should indicate the name, title, mailing address and telephone number of the person to whom communications concerning the proposal should be addressed and whether the person filing them requests a conference with the staff of the Federal Power Commission to discuss the proposed forms. The staff, in its discretion, may grant or deny written requests for conference prior or subsequent to the filing of formal submittals.

The proposed amendments to Part 250 of the Commission's Approved Forms under the Natural Gas Act would be issued pursuant to the authority granted the Commission by the Natural Gas Act, as amended, particularly sections 8, 10, 14, 15, and 16 (52 Stat. 825, 826, 828, 829, 830; 15 U.S.C. 717g, 717i, 717m, 717n, 717o).

Effective for the reporting year 1976, the Commission proposes to amend Part 260, Statement and Reports (Schedules), in Subchapter G—Approved Forms, Natural Gas Act, Chapter I, Title 18 of the Code of Federal Regulations by adding a new § 260.26 prescribing new FPC Form No. 153, Gas supply and operations data. New § 260.26 will read as follows:

§ 260.26 Form No. 153, Gas supply and operations data.

This form will provide detailed data on system natural gas supply, system requirements, curtailments actual and projected, importers and exporters of natural gas, and gas stored underground.

The filing of this data, as defined in the detailed instructions of this form, is annually on or before April 30 for the previous calendar year; semi-annually on or before April 30 and September 30; monthly on or before the 15th of the month following the report month; or semi-monthly during December-March 5 days after the 15th and last day of these months, and monthly during April-November on the 5th day following the reporting month for Schedule 0411.

The Secretary shall cause prompt publication of this notice to be made in the FEDERAL REGISTER.

By direction of the Commission.

KENNETH F. PLUMB,
Secretary.

RIS | FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM | 1 of 22

I. ADMINISTRATIVE BACKGROUND

The Federal Power Commission (FPC) has established an information system designed to improve the decision-making capabilities of the Commission. This program, the Regulatory Information System (RIS), was authorized by Commission Order 494, September 26, 1973, and features the following characteristics and capabilities:

- A consolidated data collection system designed to eliminate unnecessary or redundant reporting and to provide standardized data collection schedules.
- A comprehensive system for transmitting, processing, and accessing data requested of respondents by the Commission.
- Establishment of a modern computer facility at Commission headquarters featuring consolidated regulatory data bases and the associated automatic data processing (ADP) equipment and programming software necessary to store, validate, and access that data.

These instructions are intended to aid each respondent to understand the scope and objectives of the RIS system regarding source data collection and to provide clear and concise guidance for the completion of the revised public use schedules.

A. DATA COLLECTION CONCEPTS

The FPC public use schedules are designed to be vehicles for data collection, rather than for data display, by the Commission. This objective has guided the design of the layouts and instructions so as to achieve maximum efficiency in both data collection and subsequent processing. Within this basic design philosophy, the public use schedule data collection concept embodies the following design characteristics, some of which are described in greater detail in the subsequent chapters.

FPC Form 151 (3-76)

RIS | FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM | 2 of 22

1. Optical Character Recognition (OCR) - All schedules have been designed with OCR requirements as one of the design constraints. This will allow for transition to optical scanning as a future alternative for data entry.

2. Separation of Instructions - All instructions are separated from the schedules to which they apply, in order to make efficient use of form space. Instructions consist of three separate levels, as follows:

- Level I - General (applicable to all schedules).
- Level II - General subject (applicable to natural gas operations, electric operations, or financial data)
- Level III - Detailed (applicable to individual schedules).

3. Separation of Footnotes - Footnotes or other extraneous marks or comments intended to qualify or modify data must not be entered directly on any schedule. The public use schedules have been designed to eliminate the need for footnotes through the establishment of distinct data elements which represent some data previously reported as footnotes. However where necessary to make the related data more meaningful, footnotes may be entered on a special footnote schedule designed for this purpose. On the primary data schedules, the respondent must enter only a unique footnote reference number to provide a link to the footnote schedule.

4. Reporting Requirements - Reporting frequencies of the new schedules vary from semi-monthly to biennially. For certain schedules, all data must be supplied with each submission. For the other schedules, all data must be supplied with an initial submission, and on subsequent submission of these schedules respondents need report only changes, additions and deletions. These requirements are specifically stated in the Detailed Instructions for each schedule in paragraph 8 under the heading "II. General Information".

FPC Form 151 (3-76)

RIS | FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM | 3 of 22

5. Consolidated Schedules - Many of the public use schedules have been designed to consolidate data previously collected on more than one schedule. The consequence of such consolidation is a reduction in the total number of schedules. Furthermore, portions of some schedules may be inapplicable to certain respondents, as specified in the detailed instructions.

B. APPLICABILITY OF INSTRUCTIONS

The Commission will provide to each respondent all three levels of instructions, appropriate to the type of operation. For example, an electric utility will receive:

- Level I - General Instructions
- Level II - General Subject Instructions (Electric Operating Data)
  - General Subject Instructions (Corporate and Financial Data)
- Level III - Detailed Instructions (Electric Operating Schedules)
  - Detailed Instructions (Corporate and Financial Schedules)

Each respondent will also receive footnote schedules (with instructions) and free form (blank) schedules for the submission of narrative or graphic support data that will not be loaded into the Commission's data bases.

As the public use schedules undergo change in future reporting periods through the rulemaking process, modified layouts and instructions will be prepared by the Commission and mailed to the respondents, together with appropriate documentation that describes the authorization and the details of all such changes, additions, or deletions. The Commission will prepare the instructions in a manner suitable for looseleaf binders, so that they can be easily maintained by the respondents.

FPC Form 151 (3-76)

RIS | FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM | 4 of 22

II. STANDARD DEFINITIONS

The following standard definitions are provided to aid the respondent in understanding the data collection concepts contained in these instructions.

A. RESPONDENT - Each corporation, person, agency, authority, or other legal entity or instrumentality, whether public or private, which is required, under the provisions of the Federal Power Act, the Natural Gas Act, or Commission Order, to submit information to the Federal Power Commission via public use forms. Respondents also include those organizations that voluntarily or upon request, provide data to the Commission.

B. PUBLIC USE SCHEDULE - A collection of functionally related data elements organized and formatted into an arrangement suitable for the collection of data; the instructions for preparation of a schedule are included in this definition.

C. DATA FIELD - Within a record or schedule, a specific area used for representing a particular data value, i.e., the spaces provided for data entry on a schedule.

D. DATA ELEMENT - A basic unit of identifiable and definable information. Data elements identify the data fields within a schedule.

E. DATA ITEM - The expression of a particular value of a data element. In cases where a data element identifies a column or row on a schedule, a data item is a specific entry within the column or row.

F. LOGICAL ENTRY - A collection of related characteristics, defined by data elements, associated with a specific "key" item of information. For example, "name", "address", "date of incorporation", and "total assets" are all attributes of the key item "company", which is identified by a company code. This entire collection of data elements is called a logical entry. Within the public use schedules, logical entries are blocks of data that may be repeated several times on a page.

FPC Form 151 (3-76)

UMI

G. KEY ITEM IDENTIFICATION - A data element that provides a unique reference point for purposes of accessing or retrieving data. Within the public use schedules, the key item(s) uniquely identify groups of related data elements which by definition are logical entries. Normally, key items appear first within a logical entry and must always be completed by the respondent. The Detailed Instructions for each schedule explicitly identify those data elements that are "key".

Other, more specific, definitions of technical and financial data elements are contained in the Level II - General Subject Instructions.

FPC Form 151 (3-76)

III. GENERAL PROCEDURES FOR SCHEDULE PREPARATION

Many of the public use schedules have been designed so that different types of respondents can use the same basic schedules and instructions for the collection of identical data. For such schedules, the Detailed Instructions explain the unique data preparation requirements applicable to each type of respondent.

A. SCHEDULE SUBMISSION

The Commission will forward annually an appropriate number of copies of each schedule required of the respondent for the given reporting period.

All respondents shall forward the number of copies ordered by the Commission of each public use schedule to the Commission. Respondents submitting schedules on magnetic tape must also submit an attested working copy, appropriately completed, of the supplied schedules from which the tapes were prepared.

The specific report period for each schedule is listed in the General Subject Instructions (Level II) for the natural gas operations, electric operations, or financial data. The reporting period must be entered by the respondent on each schedule. Care must be exercised to ensure that the report period on each schedule (month, day, year) represents the ending date of the period to which the data applies, not the date the schedule was completed.

Prior to forwarding the schedules to the Commission, the respondent must complete Schedule 0100, Index of Public Use Schedules Submitted. A data field-by-data field instruction for Schedule 0100 shall be found in the Level III, Detailed Instructions for this schedule. All schedules should be carefully assembled, packaged, and forwarded to the following address:

Federal Power Commission
825 North Capitol Street, N.E.
Washington, D. C. 20426
Attn: Office of the Secretary

FPC Form 151 (3-76)

FEDERAL POWER COMMISSION
825 North Capitol Street, N.E.
Washington, D.C. 20426

ATTESTATION UNDER OATH

This report must be attested to under oath by an officer of the company. _____ (Insert here the name of the attester)

being first duly sworn according to law, certifies that he is _____ (Insert here the official legal title of attester)

of _____ (Insert here the exact legal title or name of respondent); that he has full power and authority to make the attestation; that he has read this report and is familiar with the contents therein; that to the best of his knowledge, information and belief, all estimates and matters therein set forth are true and correct and the said report is a correct statement of the business and affairs of the above-named respondent in respect to each and every matter set forth therein during the period from and including _____, 19__, to and including _____, 19__.

_____ (Signature of attester)

Subscribed and sworn to before me this _____ day of _____, 19__.

_____ NOTARY PUBLIC

(SEAL)

FIGURE III-1. NOTIFICATION OF ATTESTATION

B. REPORTING MEDIA

The acceptable media for reporting public use data are magnetic tape with a working copy of the schedules or typed schedules.

Many respondents are capable of preparing the data via magnetic tape and have been directed by the Commission to do so. In addition, the respondent must attach associated attested working copy of the FPC supplied schedules from which the tapes were prepared.

C. SUPPORTING DOCUMENTATION

Additional statements, maps, diagrams, charts or other documentation supportive to the data schedules not otherwise specifically required or provided for should be inserted directly behind the schedules to which they apply. Respondents shall utilize FPC Schedule Number 1000 in all cases except those requiring oversize documents such as large maps. In all cases, the schedule number and page number of the schedule to which the supporting documentation applies must be entered, as well as the reporting period. Supporting documentation must not be stapled to the corresponding schedules.

D. ATTESTATION

The complete set of schedules filed for a given reporting period must be subscribed and verified by the duly authorized executive officer of the respondent, or of one of the respondents where a consolidated schedule is filed, who is qualified and authorized to prepare or supervise the preparation of the schedules and to certify their accuracy, completeness, and truthfulness. Such attestation will be submitted in the format specified in the Attestation Under Oath, displayed in Figure III-1.

Information submitted on magnetic tape must be accompanied by a working copy of each schedule used to create the magnetic tape. A single Attestation Under Oath will apply to all information, regardless of filing medium, submitted in the reporting period.

FPC Form 151 (3-76)

UMI 67 10 GCA 5511-4V

E. RESPONDENT COMMENTS AND SUGGESTIONS

The Regulatory Information System represents a significant departure from the previous methods of gathering and using information by the Commission. Like all new systems, areas for improvement will undoubtedly be discovered during actual operation. All respondents are encouraged to supply comments and suggestions to the Commission of specific data collection or schedule design problems.

All questions concerning schedule design, data entry rules, filing requirements, or administrative matters, should be directed to the Office of Regulatory Information Systems at Commission headquarters. The telephone number for inquiries at the Commission is (202) 275-4138.

This telephone number and the schedule mailing address will be the main contact points between the Commission and the respondents for matters relating to the data collection. Questions that cannot be handled directly will be routed to the appropriate bureau or office personnel for resolution.

IV. RULES FOR DATA PREPARATION

The respondent is instructed to rigorously conform to the following general rules for data entry when preparing the schedules prior to the time that the schedules are forwarded for typing.

A. DATA FIELD LENGTH

Do not exceed the data field lengths allocated for each data element. When the data field size is inadequate, leave the data field blank and enter the true value in a footnote.

B. JUSTIFICATION (DATA POSITIONING)

Right justify every numeric data field; that is, place the data in the right portion of the data field so that no blank spaces follow the last character. Unfilled leading characters should be left blank. All alphabetic data fields must be left justified; that is, they begin at the left boundary of the data field.

C. ALPHABETIC AND NUMERIC

The Detailed Instructions for each schedule define each data field as either alphabetic (A) or numeric (N). The instructions also specify the data field length, including implied decimal positions for fractional numbers. For example, (N7.3) means a numeric field with seven characters to the left and three characters to the right of the implied decimal position. (N6) implies a six digit integer number and (A22) defines a twenty-two character alphabetic data field.

Do not enter alphabetic or special characters in a data field defined to be numeric by the instructions. The only exceptions to this rule are a minus sign or an asterisk, as described later. Numeric data fields must be right-justified and can be preceded by blank spaces. A data field defined as alphabetic may include any

combination of numeric and alphabetic characters. If necessary, words should be abbreviated to fit an alphabetic data field within the allocated space.

D. NEGATIVE ENTRIES

To indicate a negative numeric value, type over the preprinted minus sign in the right-most character of the data field immediately after the last significant digit; for example, 4917- . Positive numbers require no sign within the data fields; simply right-justify the number. Only certain data fields may legitimately contain negative numbers. Those data elements that may be expected to generate negative numbers are identified in the Detailed Instructions and in the schedules, where a character position is reserved for the minus sign, which is printed.

E. NULL ENTRIES

Data fields that are not applicable to a given respondent's situation must be left blank. Do not write in "N/A", or "NONE", or "NO DATA", or any other null response. Numeric data fields that do apply to the respondent but for which the respondent has a legitimate value of zero must be so entered with zero, including all decimal positions. Numeric, alphabetic, or alpha-numeric data fields that do not apply must be left blank.

F. PERCENTAGES AND FRACTIONS

Numeric data fields expressed in percentages may contain a variable number of decimal positions. In the schedules, all decimal points are implied by a preprinted character (▲) that does not occupy a character position within the data field. For example: NN▲NNN

The factional portion to the right of the decimal point should always be rounded to the last significant digit. For example, 11 2/3 should be entered as 11▲667 . Under no circumstances must a portion of a whole number be expressed in fractional notation for any numeric data field. Rather, use the decimal representation, as

illustrated by the preceding example of a percentage. For example, never enter 12 1/3 in a schedule; instead enter 12▲333 , assuming three decimal positions are requested.

G. SPECIAL CHARACTERS

As illustrated in the preceding section, all of the public use schedules have been designed with preprinted decimal point locators, where applicable. The respondent is specifically requested not to enter dollar signs, decimal points (.), commas (,), parentheses, technical symbols, or any other special characters on the schedules unless called for by the Detailed Instructions. For example, the number $53,429.48 would be entered as 53429▲48 and the number $45,237 would be entered as 45237▲00 .

H. MULTIPLE PAGES

Multiple pages may often be necessary for the respondent to provide all of the data for a particular schedule. Additional pages may be requested of the Commission at any time. To minimize such requests, the Commission will analyze historical submission patterns and volumes for each schedule and attempt to tailor the number of pages mailed out with the number of pages submitted in the past. Each page of a schedule must be numbered in the upper right hand corner.

I. LISTS OF LEGITIMATE VALUES

A copy of the Register of Data Standards will be made available to each respondent. The Register must be a standard reference tool for personnel completing the schedules to assure valid data entries. Respondent-entered data that is inconsistent with values contained in the Register will be rejected, since validation procedures are also based on the Register.

Normally, the Detailed Instructions will not contain the lists of legitimate values, but will refer to the Register of Data Standards. However, certain data item lists were incorporated directly in the Detailed Instructions for the convenience of the respondent. In these cases the data item list mnemonic appears in parenthesis.

The respondent must use the approved values and is also cautioned not to alter the units of measure (e.g., MMcf or KW) defined in the Detailed Instructions.

V. DATA MAINTENANCE ACTIVITIES

When preparing the public use schedules, the respondent must be familiar with the procedures necessary to modify data on the Commission's data bases and to prepare footnotes, where necessary. These topics are covered in this chapter.

A. MODIFICATION OF DATA

New data may be entered directly on any of the public use schedules by the respondent. The respondent must be certain that all data fields identified as key by the instructions are properly completed. For each new entry all data must be completed for the initial submission. For subsequent submissions of this data, the following general rules apply.

Changes to existing data residing in Commission's data bases can be entered directly on any public use schedule. To determine whether a data element has changed, the respondent is to refer to the data reported for the last submission.

For data identified by the Detailed Instructions as periodically required to be submitted, the respondent must completely resubmit all requested data regardless of whether or not the data have actually changed. In other Detailed Instructions subsequent submissions require the respondent to submit only appropriate identification (key data fields) and changed data fields. For this type of data, the Commission maintains only the latest current values in the data base, and the last reported data will continue to be propagated as the current data. To delete the current value of a data element, the respondent must enter an asterisk (*) in the left-most position of the data field, regardless of the numeric or alphabetic nature of the data. The following example illustrates how to delete any single occurrence of a data element:

Data Field Title
*

To delete a data element in more than one logical entry, an asterisk must be entered by the respondent for each occurrence of the data element.

To delete an entire logical entry, a retired generator for instance, the respondent must type a "D" over the preprinted "D" contained to the right of each logical entry and must specify all key items necessary to uniquely identify the logical entry. The Detailed Instructions indicate which data elements are key items. When processed, all of the data for the entire logical entry will be deleted from the data base. No facility is provided for deleting, in a single action, all of the data for an entire respondent or for any major grouping of data above the logical entry level, such as the data for an entire plant. To accomplish major delete actions, the respondent must delete each logical entry separately. If such step-by-step action proves cumbersome for the respondent in view of a major delete action (a plant closure, for example), the respondent should notify the Commission in writing of the delete action and request appropriate steps to update the data bases.

B. FOOTNOTES

Footnotes cannot be placed directly on any public use data schedule. Instead, a single, separate schedule (FPC Schedule Number 0000) is used for footnote entry. The preparation of a respondent supplied footnote requires entry on both the source schedule and the footnote schedule.

All data schedules contain two blocks to signify the presence of a footnote. These footnote indicator data fields are called the General Footnote and the Specific Footnote. The General Footnote data field enables the respondent to supply additional information that pertains to either the entire schedule and/or to a particular column (all occurrences of a data element) within the schedule. The Specific Footnote may be for either a complete logical entry and/or a specific data element within any logical entry.

The footnote number must be assigned uniquely and cannot be repeated across schedules. For example, if Schedule 0102 has footnote numbers 014 and 015 assigned, the footnotes for schedule 0103 should begin at 016. The respondent must not number the footnotes starting from 001 for each schedule. All footnote reference numbers throughout all schedules submitted in a single reporting period must have unique numbers.

VI. DATA KEYING AND VERIFICATION INSTRUCTIONS

Data keying may be utilized by respondents who submit data via magnetic tape. The following keying (and, therefore, verification) instructions apply to all redesigned public use schedules, regardless of actual data content. Keying will produce 80-character records (refer to magnetic tape submission requirements).

Each record must always contain the same control data fields in columns 1-11. These data fields are:

- Data Field A - Schedule Number (Record Position 1-4)
- Data Field B - Page Number (Record Position 5-8)
- Data Field C - Line Number (Record Position 9-10)
- Data Field D - Record Type (Record Position 11)

Data Keying and Verification Instructions are described in Figure VI-1.

When keying from the Public Use Schedules, follow the general rules given below.

- Data Field A, Schedule Number, (Record Position 1-4) and Data Field B, Page Number, (Record Position 5-8) are obtained from the header area of the schedule. The schedule number is obtained from the upper left corner of the schedule and the page number from the upper right corner of the schedule.
- Data Field C, Line Number (Record Position 9-10) is preprinted to the left of each line in the margin of the schedule (even numbers such as 2, 4, 6, etc. are the only valid entries).
- In Data Field D, (Record Type) an "A" should be keyed in Position 11 of the first record keyed for a line.
- In record positions 12-80 of the record, key all data field separators (|) and all data that has been filled in by the respondent.

FPC Form 151 (5-76)

DATA KEYING AND VERIFICATION INSTRUCTIONS

DATA FIELD	DATA FIELD NAME	COLUMNS FROM	COLUMNS TO	NUMBER OF COLUMNS	*	SPECIAL INSTRUCTIONS
	Common Data					
A	Schedule Number	1	4	4	N	Preprinted at the top left of all schedules
B	Page Number	5	8	4	N	Printed at top right of all schedules
C	Line Number	9	10	2	N	Preprinted on left margin of all schedules (even numbers)
D	Record Type (A = first record, B = second record)	11	11	1	A	A = First record for line B = Second record for line
E	Line Data	12	80	69		Key all data fields and their data field separators. Compress data as described in keying instructions.

* A - Alpha
N - Numeric

FIGURE VI-1. DATA KEYING AND VERIFICATION INSTRUCTIONS

FPC Form 151 (5-76)

- At the end of each line on the schedule, key a line terminator symbol (@). Note: In some instances, a second record (Record Type B) will be required solely for the line terminator symbol (@).
- Normally, only one record will be required for a line. Should a second record be required for a line, duplicate positions 1-10 from the "A" record, and key a "B" Position 11 of the second record.
- Do not key data fields which are preprinted, including data field separators.
- Do not key odd numbered lines (i.e., 3, 5, 7, 9, etc.).
- Do not key lines in which the resondent has entered no data.

In the examples shown, a lower case b represents a blank.

A. DATA FIELD CONTENTS

The data keyed into Positions 1-11 of the keyed records is keyed according to the fixed format specified above. But the data keyed in the remainder of the positions of the records (12-80) are keyed in a variable format. That is, leading and trailing blanks in data fields are not keyed. For example, if a ten-position alpha-numeric data field on the schedule contains a single letter, only that letter is keyed:

"Abbb" is keyed "A|"

B. DATA FIELD SEPARATOR (|)

The variable format explained in A above, requires that the sum of each data field (in Positions 12-80) be indicated by following the data field contents with a data field separator symbol (|).

The data field separator is the vertical bar symbol, which is to be represented by a 12-7-8 punch, and a hexadecimal 4F in EBCDIC.

See the example in A above, or those that follow, for illustrations of the use of the data field separator.

FPC Form 151 (5-76)

C. LINE TERMINATOR (@)

The end of a schedule line must be represented in the keyed record. The vertical bar (data field separator) following the last data field is to be followed with a line terminator symbol. This can require that a "B" record be keyed to provide the line terminator symbol (@).

The line terminator is the "@" symbol, which is to be represented by a 4-8 punch, and a hexadecimal 7C in EBCDIC.

D. CONTINUATION RECORD

In most cases, one line on a schedule will be represented by one 80-character record, but in some cases two records will be necessary to represent a single schedule line. In the first (or only) record, an "A" is keyed into Position 11. In the continuation record (there will not be more than one per line), after duplicating Positions 1-10 from the "A" record, key a "B" in Position 11 then continue keying from the schedule line. (Note that for two-record lines, Position 80 of the "A" record may occur in the middle of a data field on the schedule.)

E. BLANK LINES

Every data field in a schedule line, including blank data fields, must be represented in the keyed records. For a blank data field, key only a data field separator symbol (|). For example, if the first three data fields on a schedule line were blank they would be represented in the keyed record by three consecutive data field separators (in Positions 12-14).

F. DECIMAL POINTS IN NUMERIC DATA FIELDS

Many numeric data fields contain decimal points, indicated on the schedules by a preprinted △. (The only valid indication of a decimal point is the preprinted △. Use of a period is an error on the part of the individual filling in the data.) Because it is preprinted, it is not keyed. In order that the data field contents be

FPC Form 151 (5-76)

UMI

properly entered in the RIS data base, all positions to the right of a preprinted decimal in a data field on a schedule must be keyed.

G. CONSOLIDATED EXAMPLE

This example illustrates the rules given above, as applied to an entry on line 16 of page 2 of a hypothetical Schedule 99.

Data Field Type:

a	n	n	n	n	n	n	n	n	n	n

Data Field Length:

35	10	10	8.2	3.3	10	10	10	10	10	10

Data Field Contents:

MIDWESTERN INTERNATIONAL 350 * 673▲21 24▲2bb 750000 b b 550000 622490 3575829400

Keyed Records: A Record -

0099000216MIDWESTERN▷INTERNATIONAL|350|*|67321|24200|750000|||550000|622490|

B Record -

0099000216B3575829400 @

H. CHARACTER SET

Keying should be accomplished using the standard EBCDIC alphabetic and numeric character set. The following are the only valid special characters which can be used:

EBCDIC SPECIAL CHARACTER

CHARACTER	EBCDIC HEX REP	CARD PUNCH	CHARACTER	EBCDIC HEX REP	CARD PUNCH
.	4B	12-3-8	-	60	11
(	4D	12-5-8	/	61	0-1
+	4E	12-6-8	,	6B	0-3-8
&	50	12	%	6C	0-4-8
$	5B	11-3-8	?	6F	0-7-8
*	5C	11-4-8	:	7A	2-8
)	5D	11-5-8	'	7D	5-8
;	5E	11-6-8	=	7E	6-8
			"	7F	7-8

Data Field Separator:

|	4F	12-7-8

Data Line Terminator:

@	7C	4-8

I. MAGNETIC TAPE SUBMISSION

The magnetic tape to be submitted shall be compatible with IBM 370/OS using 9-track standard IBM OS labels or using 9-track non-labelled tapes in EBCDIC code format at 800 or 1600 bpi. The logical record length shall be 80 characters. The blocking factor should be compatible with IBM OS tape blocking conventions.

All respondents submitting magnetic tape(s) must enclose with the tape the following information: name of company, name of contact about the magnetic tape and telephone number. Additionally the following information must be specified for labelled and non-labelled tapes:

LABELLED AND NON-LABELLED TAPES

- whether 800 or 1600 bpi
- whether labelled or non-labelled

LABELLED TAPES

- internal volume/serial number of tape
- data set name

NON-LABELLED TAPES

- block size in characters (length of physical record)
- external volume/serial number of tape

APPENDIX 1. List of Natural Gas Pipeline and Producer Schedules

Schedule Number	Schedule Name
0401	Pipeline Gas Supply Synopsis
0402	Pipeline System Deliverability Summary
0403	Pipeline Deliverability Forecast
0404	Supply Source Identification and Five Year Volume Scheduling
0405	Pipeline Reservoir Data
0406	Gas Supply Source Deliverability Estimate
0407	Other Supply Sources - Committed Reserves and Deliverability Estimates
0408	Importer/Exporter Gaseous Phase Natural Gas
0409	Importer/Exporter Liquified Natural Gas
0410	Annual Underground Storage Summary
0411	Underground Storage Data - Monthly and Semimonthly
0412	Products Extracted from Natural Gas
0413	Manufactured Gas Production
0414	Liquefied Petroleum Gas Operations
0415	Number of Gas and Oil Wells
0416	Ownership of Gas and Oil Wells
0417	Gas Line Mileage by Pipe Diameter
0418	Transmission System Peak Deliveries
0419	Pipeline Service Interruptions
0420	Transmission Line Interconnections
0421	Transmission Line Take-Off Points and Customers
0422	Transmission Line Storage Field Withdrawal Data
0423	Compressor Station Annual Data
0424	New Transmission Compressor Units Installed
0425	Annual Pipeline Customer Profile
0426	Monthly Customer Profile
0427	Summary of Gas Supply Requirements and Curtailments
0428	Gas Supply and Requirements - Contingency
0429	Gas Supply and Requirements - Deliveries - Curtailments
0430	Gas Supply and Requirements - Major Producing Areas
0431	Gas Supply and Requirements - Pipeline Suppliers
0432	Gas Supply and Requirements - Other Sources
0433	Gas Supply and Requirements - Firm Requirements
0434	Gas Supply and Requirements by Pipeline Customers
0435	Gas Supply and Requirements - Adjustments to Supply
0436	Gas Supply and Requirements - Storage Service
0437	Gas Supply and Requirements - Other Firm Services
0438	Gas Supply and Requirements - Other Adjustments
0439	Gas Supply and Requirements - Storage by Field
0440	Gas Supply and Requirements - Storage Operations Adjustments
0441	Monthly Interstate Pipeline Curtailments
0442	Annual Underground Storage Totals
0501	Independant Producers Natural Gas Sales Summary

FPC Form 151 (5-76)

Schedule Number	Schedule Name
0502	Independent Producers Rate Schedule Identification and Contract Data
0503	Independant Producers Rate Schedule Pricing Provisions and Actual Quality Data
0504	Independant Producers Rate Schedule Filed Rates Data
0505	Independant Producers Rate Schedule Sales of ET AL. Parties
0507	Independent Producers Rate Schedule Rate Change Filing
0508	Application for Small Producer Certificate - Part I
0509	Application for Small Producer Certificate - Part II
0510	Application for Small Producer Certificate - Part III
0511	Application for Small Producer Certificate - Part IV
0512	Application for Small Producer Certificate - Part V
0513	Application for Small Producer Certificate - Part VI
0514	Small Independent Producer Sales Data
0840	Sales of Natural Gas By Communities
0841	Field and Main Line Industrial Sales of Natural Gas
0842	Natural Gas Sales for Resale
0843	Sales for Resale - Multiple Points of Delivery
0844	Gas Stored for Others
0845	Take-Off-Points - Small Group and Conjunctive Sales
0846	Unauthorized Overruns - Penalties and Waivers
0847	Capacity of Underground Storage Reservoirs
0848	Natural Gas Pipeline System Map
0849	Gas Procurement Activity Statement
0850	Gas Supply Producing Areas - Maps
0851	Ownership of Underground Storage Reservoirs
0853	Disclosure of Other Gas Supply Filings with Federal Agencies

FPC Form 151 (5-76)

I. GENERAL INFORMATION

These instructions apply to those schedules:

- o Containing Pipeline operational, reserve, and import/export data
- o Providing details of Producer sales, rate and quality data
- o Data required for Application for Small Producer Certificates.

The groups of Pipeline and Producer schedules represent a comprehensive selection of data covering pertinent operational and technical information of the respondent.

The classification of respondents are:

Class A - Natural Gas Companies having annual gas operating revenues of $2,500,000 or more.

Class B - Natural Gas Companies having annual gas operating revenues of $1,000,000 or more but less than $2,500,000.

Class C - Natural Gas Companies having annual gas operating revenues of $150,000 or more but less than $1,000,000.

Class D - Natural Gas Companies having annual gas operating revenues of $25,000 or more but less than $150,000.

The schedules are organized into two major categories and then divided into four subgroups based upon respondent reporting requirements: (1) annual, (2) semi-annual, (3) monthly and semi-monthly, (4) event and one time submissions. The groupings of schedules into their respective submission subgroups together with a reference to the old FPC form relationships is shown below:

FPC Form 151 (5-76)

NATURAL GAS PIPELINE AND PRODUCER COMPANIES

Subgroup	Respondent Category	Schedule Numbers	Old FPC Form	Submission Date
Annual Submission				
1	All Natural Gas Pipeline companies and unclassified corporations, as specified on each specific set of detailed schedule instructions. (Companies which act as transporters and do not buy or sell gas shall file only a statement giving names and addresses of company(s) for which it transports.)	0401-0407,0849, 0853	15	Annually (on or before April 30th)
2	Class A & Class B	0410,0412-0416, 0418,0840-0843, 0846,(0417,0423 part),0425,0442	2	Annually (on or before April 30th)
3	Class A only	0417,0420-0424, 0845	SYSFLO	Annually (on or before April 30th)
4	Class C & Class D	0842,0425	2A	Annually (on or before April 30th)
5	Importers/Exporters	0408-0409	14	Annually (on or before April 30th)
Semi-Annual Submission				
1	All natural gas pipeline companies that make sales of natural gas for resale in interstate commerce (except those granted waivers).	0427-0440	16	Semi-annually (on or before April 30th & September 30th)

FPC Form 151 (5-76)

NATURAL GAS PIPELINE AND PRODUCER COMPANIES (Cont'd)

Subgroup	Respondent Category	Schedule Numbers	Old FPC Form	Submission Date
Monthly Only				
1	Class A, B, C & D Major Pipeline Companies	0	11	Monthly (on or before the 15th of the month following the reporting month)
2	All Natural Gas Pipeline companies that curtail natural gas service	0441	17	Monthly (on or before the 15th of the month following the reporting month)
Monthly & Semi-Monthly				
1	All Natural Gas Companies subject to FPC jurisdiction, that operate underground natural gas storage fields	0411	8 Rev.	Semi-monthly for Dec-Mar, 5 days after the 15th and last day of these months. Monthly Apr-Nov on the 5th day following the reporting month
One Time or Event Submissions				
1	Class A & Class B	0419	2	Annually (on or before April 30th only if an interruption has occurred during the report year)
2	Class C & Class D	0419	2A	Annually (on or before April 30th if an interruption has occurred during the report year)
3	Class A & Class B	0844,0848	2	On the initial submission and only annually when changes occur on April 30th
4	All Natural Gas Companies subject to FPC jurisdiction, that operate underground natural gas storage fields	0847,0851	8 Rev.	On the initial submission and only annually when changes occur on on April 30th

FPC Form 151 (5-76)

NATURAL GAS PIPELINE AND PRODUCER COMPANIES (Cont'd)

Subgroup	Respondent Category	Schedule Numbers	Old FPC Form	Submission Date
5	All Natural Gas Companies as specified in the detailed schedule instructions	0850	15	On the initial submission (on or before April 30th for the preceding calendar year and annually only if changes occur
Annual Submission				
1	Producers with Filed FPC Rate Schedules	0501	301A	Annually (on or before March 31st)
2	Small Producers that have Small Producer Certificates	0514	316B	Annually (on or before April 1st)
3	Producers with Filed FPC Rate Schedules	0505	459	Annually (on or before March 31st)
One Time or Event Submissions				
1	Producers with Filed FPC Rate Schedules	0502-0504	459	On the initial submission (on or before March 31st) for all rate schedules on file and within 30 days if changes occur
2	All Producers with Filed FPC Rate Schedules	0507	280	Due when filing for a rate change
3	Producers applying for a Small Producer Certificate	0508-0513	314A	Due when filing for a Small Producer Certificate

Each schedule is identified by a schedule number and title (See Appendix 1, List of Natural Gas Pipeline and Producer Schedules).

FPC Form 151 (5-76)

II. STANDARD DEFINITIONS AND CODES

A. UNIFORM SYSTEMS OF ACCOUNTS

The required submissions will be prepared in conformity with the Uniform Systems of Accounts for Natural Gas Companies prescribed by the Federal Power Commission, and all accounting words and phrases are to be interpreted in accordance with said classification. If the respondent is not under the jurisdiction of the Commission and does not keep its books in accordance with the above-mentioned Uniform Systems of Accounts, the schedule shall be completed with the actual accounts maintained being substituted, where necessary, for the accounts listed.

B. GAS VOLUMES

All gas volumes will be reported in MMCF rounded to three decimal places, at a uniform pressure base of 14.73 psia at 60° Fahrenheit, pursuant to Exhibit H of Circular No. A-46, of the Bureau of the Budget issued February 15, 1966.

C. SELECTED DEFINITIONS

The following definitions pertain to the natural gas pipeline and producer schedules:

1. Annual Requirements are the pipeline company's certificated total system annual gas requirements, and company used and unaccounted for gas.

2. Associated - Solution Gas (Covers either or both)

a. Associated Gas: Natural gas, commonly known as gas cap gas, which overlies and is in contact with crude oil in the reservoir. Associated gas may be reported as non-associated gas in cases where this classification is the result of regulatory ruling or company operating practice when the production of associated gas has no significant effect on crude oil production.

FPC Form 151 (5-76)

b. Solution Gas: Natural gas which is in solution with crude oil in the reservoir.

3. Average Day - monthly volume divided by the number of days in the month.

4. Base (Cushion) Gas: The volume of gas needed as a permanent inventory to maintain adequate reservoir pressures and deliverability rates throughout the withdrawal season. All native gas is to be included in the base gas volume.[1]

5. BTU per Cubic Foot: The total heating value expressed in BTU, produced by the combustion, at a constant pressure, of the amount of the gas which would occupy a volume of one cubic foot at a temperature of 60° Fahrenheit if saturated with water vapor and under a pressure equivalent to that of 30 inches of mercury at 32° Fahrenheit and under standard gravitational force (980.66 cm. per second^2) with air of the same temperature and pressure as the gas, when the products of combustion are cooled to the initial temperature of gas and air when the water formed by combustion is condensed to the liquid state. Sometimes called gross heating value or total heating value.

6. Coincidental Delivery - a delivery to more than one customer at the same time of day.

7. Commission Authorization (abbreviation Comm. Auth.) as used in these schedules means the authorization of the Federal Power Commission, or any other Commission.

8. Conjunctive Billing - a single bill rendered to a customer for deliveries made from more than one takeoff point.

9. Contract Area covers the area encompassed by one or more fields under a single gas purchase contract but not larger than the area covered by a single Supply Source (see definition). When reporting such supply sources, follow the procedures under Group Name (see definition).

[1] Definition was taken in part from the American Gas Association Committee on Underground Storage Annual Report.

FPC Form 151 (5-76)

10. Cost of Importation - all expenses incurred by the importer up to the U.S. point of delivery for the reported quantity imported.

11. Curtailments of firm service by pipelines are reductions of deliveries from the firm base period gas entitlements. Curtailments of interruptible customer should be based on reduction in normal deliveries to such customers; i.e., curtailments over and above normal curtailments of interruptible load.

12. Dedicated Reserves are defined as the volume of recoverable salable gas reserves committed to, controlled by, or possessed by the reporting pipeline company and which are used for acts and services for which both the seller and the company have received certificate authorization from the Federal Power Commission.

13. Deliverability Life is the number of future years during which a pipeline company can meet its annual requirements for its presently certificated delivery capacity from presently committed supply sources. The availability of gas from these sources to deliver gas, by the terms of existing gas purchase contracts and the limitation presently imposed by state or federal regulatory agencies.

14. Exports are gas deliveries out of the United States of America to a foreign country.

15. Field: A field is an area consisting of a single reservoir or multiple reservoirs all grouped on, or related to, the same individual geological structural feature and/or stratigraphic condition. There may be two or more reservoirs in a field which are separated vertically by intervening impervious strata, or laterally by local geologic barriers, or by both. A new field is a new area of oil or gas production with accumulation being controlled by a separate geological structural feature and/or stratigraphic condition to the extent that the new discovery is not considered a new reservoir, or an extension of a reservoir in a pre-existing field.

FPC Form 131 (3-76)

a. Field Code - the FPC assigned Code Number for the Field Name from the Register of Data Standards, IDGPFL.*

b. Field Name - the FPC assigned Field Name (must be used) from the Register of Data Standards, IDGPFL.* Also enter the Offshore Area Name when applicable (See paragraph 3380.2 (b), Chapter II, Title 43, "Code for Federal Regulations".) See Offshore Area Name definition.

c. Texas Fields - the Annual Report of the Oil and Gas Division of the Railroad Commission of Texas, lists Field Names as George West/7990/; Hope NW/Wilcox 10,000/: Franks/Schenck, Upper/,etc. No mention is made of the producing reservoir. Texas gas producing fields, the Field Name is defined as the word or words preceding the first slash (/) mark. For the purpose of reporting Texas Reservoirs, the Reservoir Name is defined as the word or words which occur between the two slash (/) marks.

Railroad Commission Listings	-	Field Name	Reservoir Name
George West, West/7900/	-	George West West	7900
Hope, NW/Wilcox 10,000/	-	Hope NW	Wilcox 10,000
Franks/Schenck, Upper/	-	Franks	Schenck, Upper

The Register of Data Standards will show the proper field names. Special or unnecessary punctuation is purposely discouraged. If it is clearly an integral part of the name, show it; i.e., T.D.P.; A-B-R East; etc.

(*) If the Field Name and Code are not in the Register of Data Standards, contact the Head, Supply and Production Section, BNG, Federal Power Commission. This section will furnish a code number promptly and incorporate it into the Register of Data Standards.

16. Field Area applies generally to the Appalachian Region and is defined as a geographic area encompassing two or more Pools (see definition) that have a common

FPC Form 131 (3-76)

gathering and metering system, the reserves of which are reported as a single unit. When reporting such supply sources, follow the procedures under Group Name (see definition).

17. Firm Gas Sales to industrial customers are those made under schedules or contracts which anticipate no interruption.

18. Gas Supply is the dedicated proven reserves of recoverable salable natural gas, including Liquified Natural Gas (LNG) and Substitute Natural Gas (SNG) available to the reporting company from:

(1) Company Owned Reserves (see Recoverable-Proved Reserves definition)
(2) Independent Producer Contracts
(3) LNG Contracts
(4) SNG Contracts
(5) Gas Purchase Contracts with other Interstate Pipeline Companies subject to the jurisdiction of the Federal Power Commission
(6) Commitments with foreign suppliers

19. Group Name - the name identifying a composite supply source, i.e., commonly metered gas streams from more than one reservoir or field, which is often the case in Contract Areas, Field Areas, and Plants.*

a. Group Code - the code identifying a composite supply source.*

(*) If respondent requires a Group Name and Group Code that are not in the Register of Data Standards, the respondent shall assign a new Group Name uniquely identifying the group. Contact the Head, Supply and Production Section, BNG, Federal Power Commission for a Group Code number. If appropriate, the new Group Name and Group Code shall be promptly entered into the Register of Data Standards for subsequent use.

20. Heating Value for the salable gas reported is expressed in British Thermal Units (BTU) per cubic foot of gas on a saturated basis.

FPC Form 131 (3-76)

21. Import Contract - gas supply contracted from and volumes of gas purchases from a foreign supplier.

22. Imports are gas receipts into the United States of America from a foreign country.

23. Injection: The volumes of gas injected during the applicable reporting period.[1]

24. Interconnection Point - a point where two or more pipelines, each under different ownership, intersect or are connected.

25. Interruptible Customers are those to whom service may be interrupted under terms of the customer's gas contract, or to whom service is required to be interrupted, regardless of contractual arrangements in emergency periods, by law, ordinance, directive, or other requirement of governmental authority.

26. Interruptible Gas Sales to industrial customers are those made under schedules or contracts which provide for curtailment by the seller in order to protect service to firm customers.

27. LNG is natural gas which has undergone a phase change to a liquid state and which, before entry into the pipeline gas stream, must undergo phase change reversal to the gaseous state.

28. Maximum Daily Quantity (Mcf/d) is the maximum daily quantity the pipeline can reasonably rely upon from a given supply source.

29. Miscellaneous Reserves is a supply source having not more than fifty billion cubic feet of dedicated recoverable salable reserves and must fall within the definition of Supply Source (see definition).

[1] Definition was taken in part from the American Gas Association Committee on Underground Storage Annual Report.

FPC Form 131 (3-76)

UMI 67 of GCA 55114

30. Native Gas: Gas in place at the time that the reservoir was converted to storage as contrasted to injected gas.[1]

31. Natural Gas means either natural gas unmixed, or any mixture of natural and manufactured gas.

32. Non-Associated Gas - natural gas which is in reservoirs that do not contain significant quantities of crude oil.

33. Non-Coincidental Deliveries - deliveries to two, or more, customers on a time-staggered basis.

34. Normal or Normally refers to the volumes that the company has delivered to the customer during periods that reasonably reflect the load the customer has actually placed on the company.

35. Off Peak Gas Sales to industrial customers are those made under schedules or contracts on a firm basis for periods specified for other than times of seller's peak requirements.

36. Offshore Area Name is the assigned name listed in the Register of Data Standards. Enter the entire name as listed. Example: Ship Shoal Block 28, not just Block 28. Compass points and descriptive phrases must follow the names.

Caution: Proper names are not to be confused with actual compass points, i.e., West Delta, East Cameron, South Pelto, South Timbalier, South Marsh Island. The underline is part of the name and not compass points, such as South Addition, East Addition, North Hester, Southwest Hester, etc.

Offshore names may have to be abbreviated. The following examples should be used:

[1] Definition was taken in part from the American Gas Association Committee on Underground Storage Annual Report.

East Addition - EA	South Extention - SX	North - N
West Addition - WA	East Extension - EX	South - S
South Addition - SA	Block - BLK	East - E
North Addition - NA	Island - IS	West - W

South Marsh Island South Addition Block 108 would be abbreviated as follows: South Marsh IS SA BLK 108. The cardinal points of the compass - North, South, East and West may be abbreviated to shorten Offshore names only, in all other instances the cardinal points will be spelled out. Also, always use all 26 positions of the Field Name and every other permissable abbreviation before abbreviating a cardinal compass point.

37. Pipeline Purchase is a gas supply contracted from and volumes purchased from other Natural Gas Companies as defined by the Natural Gas Act, as amended (52 Stat. 821), excluding Independent Producers, as defined in Section 154.91 (a), Chapter 1, Title 18 of the Code of Federal Regulations. Gas volumes under contract from other pipeline (natural gas) companies are not included as reserves but may constitute part or all of the company's gas supply.

38. Plant or Gas Processing Plant - a gas processing plant is a facility designed:

a. to achieve the recovery of natural gas liquids from the stream of natural gas which may or may not have been processed through lease separators and field facilites.

b. to control the quality of the natural gas to be marketed. Cycling plants are classified as gas processing plants. When reporting such supply sources, follow the procedures under Group Name (see definition).

39. Pool - In general, the term "pool" is synonymous with the term "reservoir" however, in certain situations, a pool may consist of more than one reservoir. Generally, this latter situation occurs in the Appalachian Region where completion,

production, gathering and metering practices peculiar to that area require that a pool with more than one reservoir be reported as a single reservoir.

40. Productive Capacity for non-associated natural gas reservoirs is defined on page 109 and 110 of Volume 23 of "Reserves of Crude Oil, Natural Gas Liquids, and Natural Gas in the United States and Canada as of December 31, 1968", published jointly by the American Gas Association, Inc., the American Petroleum Institute and the Canadian Petroleum Association. For productive capacity of associated and solution gas, report the maximum daily quantity that the pipeline can reasonably rely upon from a given supply source.

41. Projection of Curtailments should be based on the priority categories set forth in Commission Order No. 467B issued 2 March 1973, in Docket No. R-469, as defined in Order No. 493A issued 29 October 1973, in Docket No. R-474. When the Commission has approved for any company a permanent plan of curtailment other than Order No. 467B, then the curtailments reported on Schedules 0427-0440 shall conform to that plan.

42. Purchases and/or Produced is the annual volume of gas purchased under contracts with Independent Producers as defined in Section 154.91 (a), Chapter 1, Title 18 of the "Code of Federal Regulations:, or produced under leaseholds, gas rights, and reserves held in fee by the reporting company.

43. Receipts from Exportation - all revenues received by the exporter for the reported quantity exported.

44. Recoverable - Proved Reserves - the proved reserves of natural gas as of December 31st of any given year are the estimated quantities of natural gas which geological and engineering data demonstrates with reasonable certainty to be recoverable in the future from known natural oil and gas reservoirs under existing economic and operating conditions.

Reservoirs are considered proved if economic producibility is supported by either actual production or conclusive formation tests. The area of a reservoir considered proved includes: (1) that portion delineated by drilling and defined by gas-oil, gas-water, or oil-water contacts or limited by structural deformation or lenticularity of the reservoir, and (2) the adjoining portions not yet drilled but which can be reasonably judged as economically productive on the basis of available geological and engineering data. In the absence of fluid contents, the lowest known structural occurrence of hydrocarbons controls the lower proved limit of the reservoir.

Reserve estimates are prepared for total recoverable natural gas, non-associated gas, and associated-dissolved gas. Estimates do not include (1) gaseous equivalents of natural gas liquids expected to be recovered from reservoir natural gas as it is produced; (2) natural gas being held in underground storage; or (3) non-hydrocarbon gases.

45. Report Period - the end of the calendar year, December 31st or designated report cycle.

46. Requirements are base period gas entitlements as that term is used in FPC curtailment proceedings.

47. Reserve Life Index is determined by dividing the company's total system gas supply at the end of the report year by the average annual requirement computed from a twenty year projection beginning with the first day of the next year. This figure is only a rough index and in no way reflects deliverability life (the number of years that a company will actually be able to meet its total system requirements). Deliverability life will always be less then and will have a varying relationship with reserve life index from company to company, due to the variations extant in determining future requirements from gas purchase contracts expiring during the twenty year period of projection.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
		15 of 17

48. Reservoir - a porous and permeable underground formation containing an individual and separate accumulation of producible hydrocarbons (oil and/or gas) which is confined by impermeable rock or water barriers and is characterized by a single natural pressure system. In most situations, reservoirs are classified as oil reservoirs or gas reservoirs by a regulatory agency. In the absence of regulatory authority, classification is based on natural occurrence of the hydrocarbons in the reservoir and classification and names may be determined by the respondent. (For Texas Reservoirs, refer to definition). This definition shall apply for reporting reserves on Schedules 0401-0407.

50. Residential Space Heating Customer is such a customer whose major fuel for heating is gas.

50. Salable - Natural Gas means natural gas which is marketed under controlled quality conditions.

51. Short Term Contract is any short term purchase agreement covering a time period of one year or less. So-called "Spot Purchases" are included in this category.

52. SNG is Substitute Natural Gas produced synthetically from organic raw material at an SNG plant.

53. Storage Reservoir Capacity: The storage capacity of the reservoir as certificated by FPC. For any reservoir not having a certificated capacity, report the present developed capacity excluding contemplated future development.[1]

54. Supply Source may be a single completion, a single well, a single field with one or more reservoirs, several fields under a single gas purchase contract and classified as a Contract Area for the purpose of this report, miscellaneous fields, a processing plant, or a field area, providing, however, that the geographic area encompassed

[1] Definition was taken in part from the American Gas Association Committee on Underground Storage Annual Report.

FPC Form 151
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
		16 of 17

by a single supply source may not be larger than the smallest of the following: a state, an FPC area or that portion of an FPC area lying within a single state when the boundaries of that FPC Area cross a state line or lines. When reporting composite supply sources, be sure to follow the procedures under Group Name.

NOTE: Other Supply Sources as reported on Schedule 0407 are defined under the heading "General Information" in the Detailed Instructions for Schedule 0407.

55. Takeoff Point - any point from which gas is taken off a line for sale purposes.

56. Total Gas in Storage: The sum of the base gas and the working gas.[1]

57. Transporter - the party or parties, other than buyer or seller, owning the facilities by which gas or LNG is physically transferred between buyer and seller.

58. Unauthorized Overrun Gas refers to that gas taken without permission of the supplier company by a customer on any day in excess of its contractual entitlement under any applicable rate schedule under which service was being rendered.

59. Warranty Contracts are gas purchase agreements for the sale of natural gas by a producer to a pipeline company wherein the producer warrants it will have available sufficient gas supplies to meet its committments over the life of the contract. Generally, the producer does not dedicate gas reserves underlying any spacific acreage, lease or fields to the agreement. Substitution of various sources of gas supply may be permitted according to the terms of the contract. Warranty Contracts by their terms, may vary from the above. If so, respondents should so verify any variance from the definitions by footnote entry. Warranty Contract reserves are always reported on Schedule 0407.

60. Withdrawals: Total volume of gas withdrawn during the applicable reporting period.[1]

[1] Definition was taken in part from the American Gas Association Committee on Underground Storage Annual Report.

FPC Form 151
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
		17 of 17

61. Working (Top Storage) Gas: The volume of gas in the reservoir above the designed level of the base gas. It may or may not be completely withdrawn during any particular withdrawal season. Conditions permitting, the total working capacity could be used more than once during any season.[1]

[1] Definition was taken in part from the American Gas Association Committee on Underground Storage Annual Report.

DETAILED INSTRUCTIONS: SCHEDULE 0100 INDEX OF FPC PUBLIC USE SCHEDULES SUBMITTED		1 of 2

I. DESCRIPTION

This schedule shall be used to identify the schedules which were submitted by each respondent.

II. GENERAL INFORMATION

A. This schedule shall be submitted by all Federal Power Commission respondents.

B. This schedule shall be completed for each submission of schedules to the Federal Power Commission.

C. The report period date required on line two of this schedule shall be the final date of the period covered by the submission i.e., if data is reported on a calendar year basis, the date to be reported is December 31, 1976, in the format MMDDYY
123176.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1	Date Received in Mail Room (N6): This data field is for Federal Power Commission internal processing only. (TMDATE)
2	Date Received in DBCC (N6): This data field is for Federal Power Commission internal processing only. (TMDATE)
3 (Key)	Schedule Number (N4): Enter the schedule number of each schedule being submitted in this submission.
4	Schedule Contact Name (A35): Enter the name of the individual to contact about the schedule number reported in data field 3 above. The format for the name is: Last Name, First Name or Initial, Middle Initial. (IDNAME)
5	Schedule Contact Telephone Number (A12): Enter the area code and telephone number, in the format NNN-NNN-NNNN. Be certain to over strike the preprinted hyphens (-).
6	Number of Pages (N4) NO: Enter the number of pages submitted for the schedule reported in data field 3 above.
7	Indicate Primary Reporting Media, Hardcopy or Tape (N1): Enter "1" if hardcopy is being submitted; or enter "2" if tape is being submitted. (IDMETOR)

(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0401 PIPELINE GAS SUPPLY SYNOPSIS		1 of 4

I. DESCRIPTION

This schedule is used to collect the synopsis of pipeline company's gas supply.

II. GENERAL INFORMATION

A. This schedule shall be submitted by all Natural Gas Pipeline companies.

B. Respondents shall complete all data fields on this schedule annually.

C. This schedule is in three sections:

1. Summary of Data Reported on Certificate Issued containing last complete gas supply (Data Fields 1-7).
2. Summary End of Report Year (Data Fields 8-10).
3. Summary of Gas Reserve Changes (Data Fields 11-14) plus Indicators (Data Fields 15-16).

D. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

E. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Identification Last Docket Total System Supply (A9): Enter the docket number for the last certificate of public convenience and necessity under Section 7(c) of Natural Gas Act, in which the total system supply was submitted. (IDDCKT)

FPC Form 151
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0401 PIPELINE GAS SUPPLY SYNOPSIS		2 of 4

Data Field Number	Instructions
2 (Key)	Date Certificate Issued (N6): Enter the date of the last certificate when total system supply was submitted, in the format MMDDYY. (TMDATE)
3	Quantity Total Dedicated Gas Supply as of Last Certificate (N10.3) MMCF: Enter the gas supply approved under Docket reported in Data Field 1 above.
4	Date of Company Reserve Estimate (N6): Enter the date on which estimated was made in Data Field 3 above, in the format MMDDYY. (TMDATE)
5	Years Deliverability Life (N2) YR: Enter the number of years of deliverability life for the reserves authorized by certificate reported in Data Field 1 above.
6	Quantity Average Annual System Requirements (N8.3) MMCF: Enter the requirements reported in certificate in Date Field 1 above.
7	Years Reserve Life Index (N2.1) YR: Calculate the reserve life index by dividing Data Field 3, "Quantity Total Dedicated Gas Supply as of Last Certificate" by Data Field 6, "Quantity Average Annual System Requirements".
8	Quantity Dedicated Reserve Estimate (N10.3) MMCF: Enter the estimated total Volume of Salable dedicated gas reserves. Note: DO NOT INCLUDE Pipeline Purchases in this entry.
9	Quantity Reserves Pending Certification (N10.3) MMCF: Note: DO NOT INCLUDE Pipeline Purchases in this entry.
10	Quantity Sales Requirements Pending Certification (N10.3) MMCF: Enter the annual requirements placed upon your pipeline system in pending applications for sales to new markets and to expand sales to old ones.

NOTE: In the Data Fields 11-14, do not include reserves pending in certificate applications that were reported in Data Field 9, since this would apparently double those existing amount of reserves. Also, do not include pipeline purchases, because pipeline purchases are not reserves. See Level II Instructions, Recoverable-Proved Reserves definition.

11	Quantity Revisions to Previous Estimate (N8.3) MMCF: The intent is to obtain a report of any changes that revise the previous reserve estimate. In the sense of the AGA-API Reserve Committee's definitions, this will include both "extensions" to reserves and "revisions" to reserves, where changes in reserve estimates are brought about by changes in

FPC Form 151
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0401	PIPELINE GAS SUPPLY SYNOPSIS	3 of 4

Data Field Number	Instructions
11 (cont'd)	the proved area of reservoirs, new information leading to more accurate estimates, improved recovery techniques, and the correction for the effect of the difference between estimated production and actual production for the previous year. (The changes in proved area and new information may be due to new contracts in existing fields or amendments to existing contracts.) Important: DO NOT INCLUDE LAST YEAR'S PRODUCTION, since production does not alter the accuracy of the original reserve estimate. Also, handled as revisions are any changes in LNG or SNG contracts occurring in years subsequent to the year that the contract had first been reported and the source identified. See Data Field 12 below for more information about LNG and SNG reserves. Another expression for revisions follows: (+) Previous year-end reserves - Present production (=) = Anticipated present reserves - Actual present reserves (corrected for "additions") (=) = ± Revisions
12	Quantity Additions to Previous Estimates (N8.3) MMCF: The word "estimate" here means "reserve estimate." The value desired is the amount of additions from proved reserves credited to either new fields, new reservoirs in old fields or new plants not previously reported. On Schedule 0405, be sure to identify once again all additions from proved reserves credited to new fields or new reservoirs in old fields. Enter the "year first reported" on Schedule 0405, Data Field 11 above. Additions include new reserves gained through the acquisition of LNG (if from a foreign country) and/or SNG (if this is the first time the facility is being reported). Do not include domestic LNG unless it is actually a new reserve that has undergone a phase change. If LNG is identified on Schedule 0405, do not report it again on Schedule 0407, because Sched-0407 does not purport to tally all LNG, but only to record supply sources not reported in Schedules 0405 and 0406 and note their class.
13	Quantity Total New Reserves Supporting Certificates Issued During Year (N8.3) MMCF: Enter all proved reserves from Exhibit H supporting certificates issued during calendar year. Include here any gas reserves acquired under the authority of

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0401	PIPELINE GAS SUPPLY SYNOPSIS	4 of 4

Data Field Number	Instructions
13 (cont'd)	Order No. 418 or Order No. 431. NOTE: New Reserves = Additions + New Contracts and Amendments to Contracts + Emergency Purchases. SO: Data Field 14 - Data Field 12 - Emergency Purchases = New Contracts and Amendments to Contracts where the figure for emergency purchases is taken from Schedule 0405 or 0407. There is no way to corroborate the reserves acquired by new contracts and amendments to existing contracts on these schedules.
14	Quantity Reserves Added Under Budget Certificate (N8.3) MMCF: Enter the amount of reserves included in Data Field 13 that were attached under budget-type authorization. (NOTE: Data Field 13 - Data Field 14 = Reserves not attached under budget-type authorization.)
15	Gas Procurement Activity Statement Indicator (N1): Enter "1" if a gas activity statement (Schedule 0849) was submitted for this report year; if not, enter "0". (INYONO)
16	Gas Supply Statement Filed With Other Federal Agency Indicator (N1): Enter "1" if Gas Supply Statement has been filed with other agency(ies); if not, enter "0". (INYONO)

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0402	PIPELINE SYSTEM DELIVERABILITY SUMMARY	1 of 4

I. DESCRIPTION

This schedule is used to collect the details of the current system deliverability.

II. GENERAL INFORMATION

A. This schedule shall be submitted by all Natural Gas Pipeline companies, unless the company has (1) year end recoverable reserves consisting of 50 billion cubic feet or less of company owned and independent producer contract reserves at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit, or (2) purchased its entire supply of natural gas from another pipeline company subject to the Commission's jurisdiction and/or purchased from foreign suppliers. Respondents meeting conditions (1) and/or (2) above shall submit Schedule 0407, in lieu of this schedule.

B. Respondents shall complete all data fields on this schedule annually.

C. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

D. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number.

Data Field Number	Instructions
1	Quantity Current Recoverable Gas Reserves Owned (N10.3) MMCF: Enter the total remaining recoverable salable gas reserves dedicated to the reporting company's system through leaseholds, gas rights and reserves held in fee at the end of the report period.

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0402	PIPELINE SYSTEM DELIVERABILITY SUMMARY	2 of 4

Data Field Number	Instructions
2	Quantity Current Recoverable Gas Reserves Contracted (N10.3) MMCF: Enter the remaining recoverable salable gas reserves dedicated to the reporting company's system under gas purchase contracts with "Independent Producers" as defined in Paragraph 154.91 (a), Chapter I, Title 18 of the "Code of Federal Regulations" at the end of report period.
3	Quantity Current Recoverable Gas Reserves under Warranty Contract (N10.3) MMCF: Enter the total remaining recoverable salable volume of gas available under warranty type gas purchase agreements with Independent Producers or other suppliers.
4	Quantity Current Dedicated Pipeline Purchases (N10.3) MMCF: Enter the supply dedicated by gas purchase contracts with other "Natural Gas Companies" as defined by the "Natural Gas Act: as amended (52 Stat. 821) but excluding "Independent Producers: as defined in Paragraph 154.91 (a), Chapter I, Title 18 of the "Code of Federal Regulations" including gas returnable under existing exchange agreements.
5	Quantity Current Pipeline System (N10.3) MMCF: Enter total of Data Fields 1 through 4 listed above.
6	Quantity Total Purchased and/or Produced-Owned Gas (N10.3) MMCF: Enter the total volume of salable gas purchased and/or produced during report year from owned gas supplies as defined in Data Field 1 above.
7	Quantity Total Purchased and/or Produced Contracted Gas (N10.3) MMCF: Enter the total volume of salable gas purchases and/or produced during report year from contracted gas as defined in Data Field 2 above.
8	Quantity Total Purchased and/or Produced Warranty Contract (N10.3) MMCF: Enter the total volume of salable gas purchased and/or produced during report year from Warranty contract as defined in Data Field 3 above.
9	Quantity Total Purchased and/or Produced Dedicated Pipeline Purchases (N10.3) MMCF: Enter the total volume of salable gas purchased and/or produced during report year from dedicated pipeline purchases as defined in Data Field 4 above.
10	Quantity Total Purchased and/or Produced Pipeline System (N10.3) MMCF: Enter the total volume of salable gas purchased and/or produced during report year from Data Fields 6 through 9 above.

FPC Form 131
(3-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0402	PIPELINE SYSTEM DELIVERABILITY SUMMARY	3 of 4

Data Field Number	Instructions
11	Quantity Total Short Term Contract (N10.3) MMCF: Enter the sum of all volumes purchased under "Short Term Contracts" as reported on Schedule 0407. See Level II, General Subject Instructions for a definition of Short Term Contract.
12	Quantity Total Scheduled Owned/Contracted (N10.3) MMCF: Enter the sum of all items in Data Field 2 (Quantity Forecast Owned/Contracted) from Schedule 0403.
13	Quantity Total Scheduled Pipeline Purchases (N10.3) MMCF: Enter the sum of all items in Data Field 3 (Quantity Forecast Pipeline Purchases) from Schedule 0403.
14	Quantity Total Scheduled Total Pipeline System (N10.3) MMCF: Enter the sum of all items in Data Field 4 (Quantity Forecast Pipeline System) from Schedule 0403.
15	Percent Firm Sales (N3.1) PCT: Enter the estimated percent of the report year Purchased and/or Produced volume, Data Field 10, for those sales made under schedules or contracts which anticipate no interruption. Round to the nearest tenth of a percent.
16	Percent Interruptible Sales (N3.1) PCT: Enter the estimated percent of the report year Purchased and/or Produced volume, Data Field 10, for those sales made under schedules or contracts which provide for curtailment by the seller in order to protect service of firm customers. Round to the nearest tenth of a percent.
17	Percent Other Use of Gas (N3.1) PCT: Enter the estimated percent of report year Purchased and/or Produced volume, Data Field 10, for that volume of gas classified as "Company Use and Unaccounted for Gas". Round to the nearest tenth of a percent.
18	Quantity Total Scheduled Annual Requirements (N10.3) MMCF: Enter the sum of all items in Data Field 5 (Quantity Forecast Annual Requirements) from Schedule 0403.
19	Quantity Remaining Reserves Owned and Contracted (N10.3) MMCF: Enter the difference between the sum of Data Fields (1+2+3) minus Data Field 12. (Data Fields 1+2+3 - Data Field 12 = Data Field 19).
20	Quantity Remaining Reserves Pipeline Purchases (N10.3) MMCF: Enter the difference between Data Field 4 (Quantity Current Dedicated Pipeline Purchases) and Data Field 13 (Quantity Total Scheduled Pipeline Purchases). (Data Field 4 - Data Field 13 = Data Field 20).

FPC Form 131

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0402	PIPELINE SYSTEM DELIVERABILITY SUMMARY	4 of 4

Data Field Number	Instructions
21	Quantity Remaining Reserves Total Pipeline System (N10.3) MMCF: Enter the difference between Data Field 5 (Quantity Current Pipeline System) and Data Field 14 (Quantity Scheduled Total Pipeline System). (Data Field 5 - Data Field 14 = Data Field 21).
22	Quantity Curtailments (N10.3) MMCF: Enter the total volume of gas you were curtailed by your suppliers under Commission authorization for the current report year. Note that this applies only to pipeline purchases (see definition). For the purpose of this data element, failure of producers to deliver is not considered curtailment.
23	Reserve Life Index Years (N3.1) PCT: Enter the number of years of reserve life. Data Field 5 (Quantity Current Pipeline System) divided by the pipeline system average annual requirements determined from the total annual requirements volume shown in Data Field 18 (Quantity Total Scheduled Annual Requirements). The Reserve Life Index figure will be rounded off to the nearest tenth. See Level II Instructions, definition for Reserve Life Index.

FPC Form 131
(3-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0403	PIPELINE DELIVERABILITY FORECAST	1 of 2

I. DESCRIPTION

This schedule is used to collect deliverability forecast showing, for each of twenty years, the annual volumes of dedicated salable gas estimated to be deliverable from the various supply sources to meet the total annual requirements of the pipeline system.

II. GENERAL INFORMATION

A. This schedule shall be submitted by all Natural Gas Pipeline companies except those which have year end remaining recoverable reserves consisting of 50 billion cubic feet or less of company owned and independant producer contract reserves at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit, or by a Natural Gas company which purchases its entire supply of natural gas from another pipeline company which is subject to the Commission's jurisdiction. Future contract additions can be shown on Schedule 0849, "Gas Procurement Activity Statement" but such volumes must not be included on this schedule.

B. Respondents shall complete all data fields on this schedule annually.

C. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

D. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Forecast Year (N2): Enter the last two digits of each calendar year for which a deliverability projection is made starting with the year following the report year, in the format YY. (TMYEAR).

FPC Form 131

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0403	PIPELINE DELIVERABILITY FORECAST	2 of 2

Data Field Number	Instructions
2	Quantity Forecast Owned and Contracted (N10.3) MMCF: Enter the the average annual volumes of gas scheduled each year for twenty years, including warranty contract gas supply.
3	Quantity Forecast Pipeline Purchases (N10.3) MMCF: Enter the average annual volumes of gas scheduled each year for twenty years.
4	Quantity Forecast Total Pipeline System (N10.3) MMCF: Enter the sum of the average annual volumes of gas scheduled each year for twenty years.
5	Quantity Forecast Annual Requirement (N10.3) MMCF: Enter the estimated total pipeline system annual gas requirement scheduled for each year for twenty years, including company use and unaccounted for gas.

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0404	SUPPLY SOURCE IDENTIFICATION AND FIVE YEAR SCHEDULING	1 of 4

I. DESCRIPTION

This schedule is used to collect identification data for each major supply source and a five year volume scheduling for each source.

II. GENERAL INFORMATION

A. This schedule shall be submitted by all Natural Gas Pipeline companies, unless the company has (1) year end recoverable reserves consisting of 50 billion cubic feet or less of company owned and independent producer contract reserves at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit, or (2) purchased its entire supply of natural gas from another pipeline company subject to the Commission's jurisdiction and/or purchased from foreign suppliers. Respondents meeting conditions (1) and/or (2) above shall submit Schedule 0407, in lieu of this schedule.

B. Respondents shall complete all data fields on this schedule in their first submission. On subsequent submissions, respondents shall submit only appropriate identification (key data fields) and changed values, additions and deletions for Data Fields 2, 4-6, and 8-13. Data Fields 1, 3, 7, and 14-19, must be submitted annually.

C. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

D. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Group Code (A6): Identify the composite supply source by entering the group code, from the Register of Data Standards. IDGSPC.

FPC Form 131
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0404	SUPPLY SOURCE IDENTIFICATION AND FIVE YEAR SCHEDULING	2 of 4

2	Group Name (A26): Identify the composite supply source by entering the group name, from the Register of Data Standards, IDGSPC.
3 (Key)	Field Code (A6): Enter the assigned field code number, from the Register of Data Standards, IDGPFL. If the field code is not listed in the Register of Data Standards, contact the Head, Supply & Production Section, BNG, Federal Power Commission, and a code will be assigned.
4	Field Name (A26): Enter the name of the field for which dedicated reserves are reported, from the Register of Data Standards, IDGPFL.
5	Field Domain, State - Federal Indicator (N1): Enter either 1=State, or 2=Federal. (INETOR)
6	Indicator Field Producing/Non-Producing (N1): Enter either 1=producing, or 2=nonproducing. (INETOR)
7 (Key)	State Abbreviation (A2): Enter the abbreviation for the state, from the Register of Data Standards, IDSTAT, where field is located. If the field extends over more than one State, enter state code of state with the greatest dedicated acreage or the largest amount of reserves.
8	County Code (N3): Enter the three digit county/parish code, from the Register of Data Standards, IDCNTY, that corresponds with the county/parish named in Data Field 9 below. If field extends over one county, enter county code of county with the greatest dedicated acreage or the largest amount of reserves. In the case of offshore areas, enter the applicable code in Data Field 8 and name in Data Field 10 described below.

FOR ALL OFFSHORE AREAS ENTER: (See Additional Codes for the State of Louisiana)

CODE	NAME	DESCRIPTION
990	OFFSHORE-STATE	that area subject to State jurisdiction only.
995	OFFSHORE-FEDERAL	that area subject to Federal jurisdiction.
999	OFFSHORE-GENERAL	that area where the above distinctions are either unknown or not applicable.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0404	SUPPLY SOURCE IDENTIFICATION AND FIVE YEAR SCHEDULING	3 of 4

ADDITIONAL CODES FOR THE STATE OF LOUISIANA

NOTICE: Settlement between State and Federal Governments will render the following coding obsolete. In that case use coding described above.

CODE	NAME	DESCRIPTION
991	OFFSHORE-ZONE 1	the area lying seaward of and within three geographical miles of the so-called "Chapman-Line".
992	OFFSHORE-ZONE 2	the area which is bounded landward by the seaward boundary of Zone 1 and which is bounded seaward by a line three Marine Leagues from the so-called "Chapman-Line".
993	OFFSHORE-ZONE 3	the area bounded landward by the boundary of Zone 2 and bounded seaward by the seaward boundary line of the State of Louisiana as fixed and redefined by Act 33 of the Louisiana Legislature of 1954.
994	OFFSHORE-ZONE 4	that portion of the Continental Shelf lying seaward from the seaward line of Zone 3.

Data Field Number	Instructions
9	County/Parish Name (A16): Enter the name of the county/parish in which the field or field area is located, from the Register of Data Standards, IDCNTY. When a field covers parts of more than one county/parish enter the name for the county/parish which contains the most dedicated acreage or the largest amount of reserves.
10	Offshore Area Name (A16): Enter the name of the offshore area as described in Data Field 8 above. (IDCNTY)
11	Natural Gas Area Code (N2): Enter the natural gas area code, from the Register of Data Standards, IDNGAR.
12	Natural Gas Area Name (A16): Enter the name of the appropriate natural gas area, from the Register of Data Standards, IDNGAR.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0404	SUPPLY SOURCE IDENTIFICATION AND FIVE YEAR SCHEDULING	4 of 4

Data Field Number	Instructions
13	Type Deliverability Code (N1): Enter the gas deliverability code from the following: (TYGSDL) 1 = Completion 2 = Reservoir 3 = Field 4 = Group (including plants)
14	Quantity Total Five Year Scheduled (N8.3) MMCF: Enter the total volume scheduled for the next five years.
15	Quantity Total Non-Scheduled (N8.3) MMCF: Enter the total volume non-scheduled for the next five years.
16	Year of Volume Scheduling (N4): Enter, chronologically, the calendar year corresponding to the volume scheduled, in the format YYYY. (TMYEAR)
17	Number of Net Completions Scheduled (N4.1) NO: Enter, chronologically, the projected number of the net total completions to one decimal used in calculating the volumes scheduled for five years.
18	Gathering Line Pressure (N6.3) PSIA: Enter, chronologically, the estimated gathering pipeline pressure for five years corresponding to the volumes scheduled. Gathering pipeline pressure is the particular pressure that the completion(s) flow against. It is the pipeline pressure used in calculating the deliverability.
19	Quantity Scheduled Annually (N8.3) MMCF: Enter, chronologically, the estimated annual volumes of salable gas from the source of supply for the next five years.

FPC Form 131
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0405	PIPELINE RESERVOIR DATA	1 of 10

I. DESCRIPTION

This schedule is used to provide reservoir data and dedicated remaining recoverable salable reserves.

II. GENERAL INFORMATION

A. This schedule shall be submitted by all Natural Gas Pipeline companies, unless the company has (1) year end recoverable reserves consisting of 50 billion cubic feet or less of company owned and independent producer contract reserves at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit, or (2) purchased its entire supply of natural gas from another pipeline company subject to the Commission's jurisdiction and/or purchased from foreign suppliers.

B. Respondents shall complete all applicable data fields on this schedule in their first submission. On subsequent submissions, respondents shall submit only appropriate identification (key data fields) and changed values, additions, and deletions for Data Fields 6-14. Data Fields 1, 2, 4 and 5, shall be submitted annually.

C. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

D. There is no provision for negative numbers on this schedule.

E. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components (or groups of components) which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

F. Field Totals: Respondents shall submit field totals as the last entry for each field. These totals should be the sum of the individual reservoirs in the field, weighted where appropriate. Field totals shall be indicated by entering "999999" in data field 3, Reservoir ID, and the words "Field Totals" in data field 4, Reservoir Name. Respondents who cannot provide individual reservoir totals shall complete data fields 1 through 14 and data field 63, as a minimum, for each reservoir.

FPC Form 151
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0405	PIPELINE RESERVOIR DATA	2 of 10

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Group Code (A6): Enter the six digit gas source code, from the Register of Data Standards, IDGSPD.
2 (Key)	Field Code (A6): Enter the assigned field code number, from the Register of Data Standards, IDGPFL. If the field code is not listed in the Register of Data Standards, contact the Head, Supply & Production Section, BNG, Federal Power Commission, and a code will be assigned.
3 (Key)	Reservoir ID (A6): Enter a unique, sequential (respondent assigned) identification code, as specified in the Register of Data Standards, NRCADL. Enter "999999" for field totals.
4	Reservoir Name (A26): Enter the reservoir name for which reserves are being reported. Reservoir is the definitive term of an individual hydrocarbon accumulation and its name usually corresponds to the U.S. Geological Survey recognized name of the rock formation in which the accumulation occurs. The colloquial name used by local inhabitants is acceptable. Once the name is submitted do not change it. If the formation produces from several different zones, each zone is usually given an individual name. In a field consisting of a single reservoir, the reservoir is the field. However, except for the Appalachian Region (see Level II Instructions, definitions for Field and Pool) it is only rarely that the names are identical. In most cases the reservoir name should be distinctly different from the field name. Enter "Field Totals" for field totals.
5	Reservoir Geologic Age Code (N3): Enter a three digit numeric code to identify the units of Geologic Age of the rocks, from the Register of Data Standards, TYGRGA.
6	Type Gas Code (A1): Indicate by code letter the type of gas accumulation (TYGRGS). A = Associated C = Combined Associated & Solution T = Combined Non-Associated N = Non-Associated S = Solution M = Mixed (non-associated, associated and/or solution)
7	Depth of Reservoir (N5) FT: Report to the nearest foot the depth of the reservoir as carried on company records.

FPC Form 151
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0405	PIPELINE RESERVOIR DATA	3 of 10

Data Field Number	Instructions
8	Indicator Classification of Reservoir Depth: Average or Top of Pay (N1): Enter one of the following codes: (INETOR) 1 = Average 2 = Top of Pay
9	Classification of Reservoir (N2): Enter the two digit numeric code for classification of reservoir by type of geologic trap: (TYGRCL) 10 = Structural Traps 11 = Structural Traps - by folding 12 = Structural Traps - faulting 13 = Structural Traps - fracturing 14 = Structural Traps - combination of 11-13 20 = Stratigraphic Traps 21 = Stratigraphic Traps - Primary - Lenses and Facies of Clastic or Igneous Rock 22 = Stratigraphic Traps - Primary - Lenses and Facies of Chemical Rocks, Reefs, etc. 23 = Stratigraphic Traps - Secondary - Disconformity 24 = Stratigraphic Traps - Secondary - Non-conformity 30 = Piercement Dome Combination Traps 31 = Piercement Dome Combination Traps - Structural Traps produced by piercement 32 = Piercement Dome Combination Traps - Stratigraphic Traps produced by piercement 00 = Unspecified 99 = Other
10	Basic Lithology (N2): Enter the code for basic lithology from the Register of Data Standards, TYGRLT. If unable to classify the reservoir rock as being primarily one of the three types listed, leave this data field blank.
11	Year First Reported (N2): Enter the last two digits of the year in which the reported gas reserves were first reported to the FPC, in the format YY. (TMYEAR)
12	ID Reservoir Seller or Operator (A35): Enter the name of either a principal signatory seller or operator who has filed a Rate Schedule with the FPC, covering the gas sale(s) to your pipeline from the subject reservoir. In those instances where there are two or more principal signatory sellers or operators enter the name of your choice. (IDRESP)
13	ID Reservoir First Jurisdictional Purchaser (A35): Enter the name of one other jurisdictional pipeline purchaser which to your knowledge has dedicated reserves in the reservoir being reported. Use Data Field 14 below, for reporting a second such pipeline purchaser. If there are more than two

FPC Form 151
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0405	PIPELINE RESERVOIR DATA	4 of 10

Data Field Number	Instructions
13 (cont'd)	such pipeline purchasers report the names of the two which to your knowledge or belief are the largest purchasers. (IDNAME)
14	ID Reservoir Second Jurisdictional Purchaser (A35): Enter the name of a second other jurisdictional pipeline purchaser which to your knowledge has dedicated reserves in the reservoir being reported. (IDNAME)
15	Type Calculation Used in Estimating Reserves (N1): Enter the appropriate numeric code below to report the method in making the reserve estimate for the reservoir. (TYGRSE) 1 = Volumetric 2 = Pressure Decline 3 = Material Balance 4 = Nominal 5 = Time Decline
16	Total Producing Completions (N4.1) NO: Enter the total currently producing completions in the reservoir as of the filing date. Report all completions which produced during the report period even though they were shut-in for workover before the report period ended. Do not include wells which produced but were plugged and abandoned before the report period ended. The desired data here is the total number of completions producing in the total reservoir from which you are reporting dedicated reserves. If unable to furnish the total number of producing completions as defined, the alternate method of reporting is to report the total number of completions producing from the reservoir that are located on the acreage dedicated to or controlled by your company as of the filing date. Report all such completions which, produced during the report period even though they were shut-in for workover before the report period ended. Unless "1" is entered in Data Field 17 below, all values for this item will be recorded as Gross Total Producing Completions in the entire reservoir.
17	Indicator for Reservoir Alternate Method (N1): Enter "1" in this data field if the alternate method is used for reporting the data in Data Field 16 as described above; if not, enter "0". (INYONO)
18	Net Producing Completions (N4.1) NO: Enter the present number of producing completions (including fractional interest to the nearest tenth) that are dedicated to or controlled by the pipeline company.
19	Dedicated Percent of Sellers Reserves (N3.3) PCT: The net dedicated percent of sellers reserves to the nearest thou-

FPC Form 151
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0405	PIPELINE RESERVOIR DATA	5 of 10

Data Field Number	Instructions
19 (cont'd)	sandth of a percent. "Sellers" means everyone who is selling gas to you from the reported reservoir under a gas purchase contract. Be sure to exclude pipeline company ownership in this value (Alternate method: Report the net Dedicated Percent of the Total Reservoir, enter the number "1" in Data Field 20 below. Be sure to include pipeline company ownership in this value.)
20	Indicator Alternate Method Calculation of Sellers Reserves (N1): Enter "1" in this data field if alternate method was used in reporting Data Field 19 above; if not, enter "0". (INYONO)
21	Production Decline Factor (N6.3) MMCF: Enter the volume of gas in MMCF rounded to 3 decimal places at 14.73 PSIA at 60° Fahrenheit that is projected to be produced when the reservoir pressure divided by the gas deviation factor is reduced by one PSI. NOTE: For 100 percent water drive reservoirs, this item is not applicable. In case of partial water drive, if desired, indicate by footnote.
22	Quantity Cumulative Wet Gas at Current Pressure (N7.3) PSIG: If type of calculation (Data Field 15) is coded "2", i.e., Pressure Decline, report the Cumulative Wet Gas Production corresponding to the Current Pressure reported in Data Field 23 immediately following. For all other type of reserves calculations, this data field shall be left blank.
23	Current Pressure Used in Reserve Calculations (N2.3) PSIA: If type of calculation, Data Field 15 is coded "2", i.e., Pressure Decline, report the latest pressure used in the reserve calculation. Indicate by footnote if the value was NOT obtained during the report year. For all other type of reserves calculations, this item is not required and should be left blank.
24	Terminal Pressure of Reserve (N2.3) PSIA: This is a judgment factor and since economic forces affect this, periodic updating can be expected. What is desired is your current judgment after evaluation of existing economic circumstances. NOTE: If the reserve estimate is a volumetric calculation and the Recovery Factor (Data Field 40) is reported, then this item need not be reported.
25	Type of Pressure Measurement (N1): This item relates to both Current Pressure and Terminal Pressure. Enter one of the following codes: (TYGPRM) 1 = Bottom Hole Shut-in PSIA 2 = Wellhead Shut-in PSIA 3 = Wellhead Flowing PSIA 4 = Bottom Hole Flowing PSIA

FPC Form 131
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0405	PIPELINE RESERVOIR DATA	6 of 10

Data Field Number	Instructions
26	Current Z (N1.4) PSIA: If Type of Calculation (Data Field 15) is coded "2", i.e., Pressure Decline, report to the nearest ten thousandth, the Z value determined for the Current Pressure reported in Data Field 23 above. For all other types of reserves calculations, this item is not required and should be left blank.
27	Terminal Z (N1.2) PSIA: Enter Terminal Z to nearest hundredth. This item is recognized as being a judgment factor and that it has a direct bearing on the recoverable reserves. What is desired is the estimated terminal Z if such was used in determining the recoverable reserves reported in Data Field 30 below. NOTE: If the Reserve Estimate is a volumetric calculation and the Recovery Factor (Data Field 40) is reported then this item need not be reported.
28	Quantity Initial Wet Gas (N7.3) MMCF: Enter in MMCF, your most recently determined Initial Wet Gas-In-Place for the total reservoir. Where it is not possible to report total reservoir reserves, the following alternate method will be used. Report, in MMCF, the total volume of your most recently determined Initial Wet Gas-In-Place in that portion of the reservoir which underlies the acreage dedicated to or controlled by your company. If this alternate method is used, enter "1" in Data Field 29 above, identifying Initial Wet Gas-In-Place as Dedicated Initial Wet Gas-In-Place. Unless "1" is entered in Data Field 29 above, all values for this item will be recorded as Gross Total Initial Wet-In-Place in the entire reservoir. NOTE: For Volumetric Estimates, this Item must agree with the Productive Area-Acres reported in Data Field 41 below. For all types of reserve estimates, all subsequent gas volumes reported for this same reservoir will be on the same reporting basis as you have chosen for reporting Initial Wet Gas-In-Place.
29	Indicator Alternate Method of Calculation of Wet Gas (N1): Enter letter "1" in this data field if alternate method is used in calculating Wet Gas; if not, enter "0". (See Data Field 28 above). (INYONO)
30	Quantity Recoverable Wet Gas (N7.3) MMCF: Enter in MMCF, your most recently determined Original Recoverable Wet Gas. For a Volumetric Estimate the value to be entered is the product of Initial Gas-In-Place, Data Field 28 above, and the Recovery Factor, Data Field 40 below. (See Note, Data Field 28 above.) For a pressure decline, the value will be derived from the decline curve used to report the Decline Factor on Data Field 21 above.

FPC Form 131
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0405	PIPELINE RESERVOIR DATA	7 of 10

Data Field Number	Instructions
31	Quantity Cumulative Wet Gas Production (N7.3) MMCF: Enter in MMCF, the Cumulative Wet Gas Production through December 31 of the report year. This item must agree with Initial Wet Gas-In-Place reported in Data Field 28 above.
32	Quantity Remaining Recoverable Wet Gas (N7.3) MMCF: Enter in MMCF, the remaining recoverable Wet Gas as of December 31 of the report year. The value desired here is the difference between total original recoverable Wet Gas, Data Field 30, and the cumulative Wet Gas Production, Data Field 31 above.
33	Percent Fuel and Shrinkage Factor (N1.2) PCT: Enter the average Fuel and Shrinkage as a decimal fraction. The value desired is that computed from the difference between the gas produced at the wellhead and the gas that enters the pipeline. It may include separator losses, field uses, flare gas, and plant losses. However, if plant losses are included in requirements, they must be omitted here.
34	Quantity of Total Remaining Recoverable Dry Gas Reserves (N7.3) MMCF: Enter, in MMCF, the total remaining recoverable dry gas as of December 31 of the report year. The intent is to report the gas available to the pipeline after deductions for Fuel and Shrinkage.
35	Quantity of Dedicated Remaining Recoverable Dry Gas Reserves (N7.3) MMCF: Enter, in MMCF, Net Dedicated Recoverable Dry Gas Reserves as of December 31 of the report year. The value desired is the net dedicated portion of the Total Remaining Recoverable Dry Gas reported in Data Field 34 above.
36	Total Quantity of Annual Dry Gas Production (N6.3) MMCF: Enter the volume of gas in MMCF produced from the reservoir during the report year. This value includes company owned annual dry gas production.
37	Quantity of Company Owned Annual Dry Gas Production (N6.3) MMCF: Enter the total of salable gas in MMCF produced from a company owned source of supply during report year and which was included in the total production entered in data field 36 above.
38	Quantity of Remaining Company Owned Dry Gas Reserves (N7.3) MMCF: Enter the volume of company owned reserves in MMCF included in the Total Remaining Recoverable Dry Gas Volumes reported in Data Field 34 above.
39	Quantity Dedicated Annual Dry Gas Production (N6.3) MMCF: Enter the Annual Dry Gas Production in MMCF from that portion of the reservoir which underlies the acreage dedicated to or controlled by your company in whole or in part.

FPC Form 131
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0405	PIPELINE RESERVOIR DATA	8 of 10

Data Field Number	Instructions
GENERAL:	Unless the Type Calculation (Data Field 15) is coded "1", i.e., Volumetric, the following data requested in Data Fields 40-62 are not required.
40	Recovery Factor (N1.2) NO: Enter the recovery factor in decimal fractions, not percents. Since this is the average recovery factor it must agree with the data reported in Data Field 28 above. That is, it will either be the average for the total reservoir, or the average of that portion of the reservoir which underlies the acreage dedicated to or controlled by your company in whole or in part.
41	Productive Area Acres (N6.1) ACRE: The decimal value (10th of acres) was provided because the computations involving the use of a planimeter usually call for averaging two or more readings which almost always results in a decimal fraction. It should not be interpreted as implying extreme accuracy in determing productive areas. Rounding to the nearest acre is acceptable; in which case the space to the right of the decimal will be left blank to indicate rounding.
42	Indicate Acres Area Rounding (N1): Enter "1" in this data field if rounding was used in Data Field 41 above; if not, enter "0". (INYONO)
43	Average Net Thickness Feet (N4.1) FT: The decimal value (10th of feet) was provided because the effective pay section of a reservoir is usually determined from averaging the values of several well logs and core samples. Consequently the net thickness has usually been reported to the FPC to the nearest tenth of a foot but this fact has never been and should not be interpreted as implying extreme accuracy in determining the net thickness (effective pay) of a natural gas reservoir. Rounding to the nearest foot is acceptable; in which case the space to the right of the decimal will be left blank to indicate rounding.
44	Indicator Net Thickness Rounding (N1): Enter "1" in this data field if rounding was used in Data Field 43 above; if not, enter "0". (INYONO)
45	Reservoir Volume (N8.1) ACFT: The decimal value (10th of Acre/Ft) is provided for the reasons given previously herein. The data desired is the product of the values contained in Data Fields 41 and 43 above. If rounding was employed in Data Fields 41 and 43 above, it will also be employed here.
46	Percent Reservoir Porosity (N2.1) PCT: The decimal value (10ths of a percent) is provided to allow the inclusion of

FPC Form 131
(5-76)

UMI

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0405	PIPELINE RESERVOIR DATA	9 of 10

Data Field Number	Instructions
46 (cont'd)	fractional values usually encountered when making a porosity determination from several different data sources. Rounding to the nearest percent is acceptable; in which case the space to the right of the decimal will be left blank to indicate rounding. The value desired is your best estimate of the average porosity of the reservoir which you have derived from the basic data available to your company. It is specifically to be the value used in deriving the gas reserves entered on Data Field 28 above.
47	Indicator Porosity Rounding (N1): Enter "1" in this data field if rounding was used in Data Field 46 above; if not, enter "0". (INYONO)
48	Type Reservoir Porosity Calculation Code (N1): One space is provided for numerically coding how porosity was determined. Code "4" (Combination) refers to the use of both core samples and well logs in making your determination. Code "3" (Estimated) includes any other method used to derive porosity not covered by Codes "1" (Cores), "2" (Logs), and "4" (Combination). Enter one of the following: (TYPORS) 1 = Cores 2 = Logs 3 = Estimated 4 = Combination
49	Percent Connate Water (N2.1) PCT: The decimal value (10ths of a percent) is provided to allow inclusion of fractional values usually encountered when making a connate water determination from several different data sources. Rounding to the nearest percent is acceptable, in which case the space to the right of the decimal will be left blank to indicate rounding. The value desired is your best estimate of the average connate water of the reservoir which you have derived from the basic data available to your company. It is specifically to be the value used in deriving the gas reserves reported on Data Field 28 above.
50	Indicator Connate Water Rounding (N1): Enter "1" in this data field if rounding was used in Data Field 49 above; if not, enter "0". (INYONO)
51	Type Connate Water Calculation (N1): Enter the same code scheme used in Data Field 48 above. (TYPORS)
52	Temperature of Reservoir Rankine Degrees (N4) DEGR: The value entered must be the Exact Rankine Equivalent of the value used in deriving the gas reserves reported in Data Field 28 above.

FPC Form 131
(5-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0405	PIPELINE RESERVOIR DATA	10 of 10

Data Field Number	Instructions
53	Initial Reservoir Pressure (N5) PSIA: The value entered must be the value used in deriving the gas reserves reported in Data Field 28 above. Data Field 54 below, will identify the type pressure reported.
54	Type Initial Pressure Code (N1): This item relates to Initial Pressure. Enter one of the following numeric codes which describe the pressure reported. (TYGPRM) 1 = Bottomhole Shut-In PSIA 2 = Wellhead Shut-In PSIA 3 = Wellhead Flowing PSIA 4 = Bottomhole Flowing PSIA
55	Initial Z (N1.4) PSIA: Enter Initial Z to nearest ten thousandth.
56	Specific Gravity Reservoir Gas (N1.3) SGG: Enter the specific gravity of the reservoir gas to three decimal places.
57	Quantity Reservoir Initial Yield (N3) BBL/MCF: Enter the initial condensate yield in barrels per MCF to the nearest BBL.
58	Mole Percent Hydrogen Sulfide (N2.2) PCT: Enter the mole percent hydrogen sulfide rounded to two decimal places.
59	Mole Percent Nitrogen (N2.2) PCT: Enter the mole percent nitrogen rounded to two decimal places.
60	Mole Percent Carbon Dioxide (N2.2) PCT: Enter the mole percent carbon dioxide rounded to two decimal places.
61	Gas/Oil Ratio or Gas/Liquid Ratio (N6) NO: Enter the Gas/Oil Ratio (GOR) or Gas/Liquid Ratio (GLR) at original reservoir conditions in cubic feet of natural gas per barrel oil or condensate liquid.
62	Initial Formation Volume Factor (FVF) (N1.2) NO: Enter the Initial Formation Volume Factor at original reservoir conditions to the nearest hundredth. Where the reported reserves are from a Solution Gas Reservoir, this item need not be entered.
63 (Key)	State Abbreviation (A2): Enter the abbreviation to identify the location of the gas producing field whose FPC Field Code was reported in Data Field 2 above, from the Register of Data Standards, IDSTAT.

FPC Form 131
(5-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0406	GAS SUPPLY SOURCE DELIVERABILITY ESTIMATE	1 of 5

I. DESCRIPTION

This schedule is used to collect gas deliversbility estimates.

II. GENERAL INFORMATION

A. This schedule shall be submitted by all Natural Gas Pipeline companies, unless the company has (1) year end recoverable reserves consisting of 50 billion cubic feet or less of company owned and independent producer contract reserves at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit, or (2) purchased its entire supply of natural gas from another pipeline company subject to the Commission's jurisdiction and/or purchased from foreign suppliers. Respondents meeting conditions (1) and/or (2) above shall submit Schedule 0407, in lieu of this schedule.

B. Respondents shall complete all applicable data fields on this schedule annually.

C. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

D. There is no provision on this schedule for reporting negative volumes.

E. Report the back-pressure or flow test data that was used in calculating the deliverebility. If the deliverability is calculated on a reservoir basis, test information representative of the average well in the reservoir may be reported. If the deliverability is calculated on a field basis, test information representative of the average well in the field may be reported. If certain factors were not used, not applicable, or not available, leave data field(s) blank.

F. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INFORMATION

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

FPC Form 131
(5-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0406	GAS SUPPLY SOURCE DELIVERABILITY ESTIMATE	2 of 5

Data Field Number	Instructions
1 (Key)	Group Code (A6): Identify the composite supply source by entering the group code, from the Register of Data Standards, IDGSPG.
2 (Key)	Field Code (A6): Enter the assigned field code number, from the Register of Data Standards, IDGFFL. If the field code is not listed in the Register of Data Standards, contact the Head, Supply & Production Section, BNG, Federal Power Commission, and a code will be assigned.
3 (Key)	Reservoir ID (A6): Enter a unique, sequential (respondent assigned) identification code, as specified in the Register of Data Standards, NRCADL.
4	Well Lease Name (A16): Enter the well lease name, from the Register of Data Standards, IDDESC.
5 (Key)	Well Lease Number (N4): Enter the well completion number, as specified in the Register of Data Standards, IDEQPI.
6	API Well Number (N14): Enter the API number, from the Register of Data Standards, IDWELL.
7	Percent of Respondent Interest in Well (N3.4) PCT: Enter the ownership interest of your company in the well to four decimal places.
8	Date Well Back Pressure Test (N6): Enter the date of the back pressure test for a completion or the date that the average back pressure curve or equation was computed for a reservoir or field, in the format MMDDYY. (TMDATE)
9	Type Well Test Code (N1): Enter the numeric code for the test being reported. Use one of the following codes: (TYGWTM) 1 = Multi-point back pressure test 2 = 24-hour flow test (DT-1, C-2, etc.) 3 = Drill Stem test in cased hole 4 = Drill Stem test in uncased hole 5 = Shut-In pressure test 9 = Other
10	Type Deliverability Code (N1): Enter the gas delivsrability code from the following: (TYGSDL) 1 = Completion 2 = Reservoir 3 = Data Field 4 = Group (including plants)

FPC Form 131
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0406	GAS SUPPLY SOURCE DELIVERABILITY ESTIMATE	3 of 5

Data Field Number	Instructions
11	Diameter of Flow String (N2.3) IN: Enter the internal diameter of the flow string in inches to three decimal places. If annular flow or tapered string, use equivalent flow string diameter.
12	Vertical Well Depth (N5) FT: Enter the vertical depth of the well in feet.
13	Length of Flow Strieg (N5) FT: Enter the length of flow string in feet.
14	Specific Gravity of Full Well Gas (N1.3) SGG: Enter the specific gravity of the full well stream gas (air = 1.000) to three decimal places.
15	Specific Gravity Separator Gas (N1.3) SGG: Enter the specific gravity of the separator gas (air = 1.000) to three decimals. Report only if the specific gravity of the full well stream gas is NOT available.
16	Ratio Gas Oil or Gas Liquid (N6) NO: Enter the gas oil ratio or gas liquid ratio in cubic feet per barrel. Report only if the specific gravity of the full well stream gas is not available.
17	Specific Gravity of Condensate (N2.1) DEGA: Enter the specific gravity of the condensate in ° API to one decimal place. Report only if the spacific gravity of the full well stream is not available.
18	Mole Percent of Carbon Dioxide (N2.2) PCT: Enter the mole percent of carbon dioxide to two decimal places.
19	Mole Percent of Nitrogen (N2.2) PCT: Enter the mole percent of nitrogen to two decimal places.
20	Mole Percent of Hydrogen Sulfide (N2.2) PCT: Enter the mole percent of hydrogen sulfide to two decimal places.
21	Shut-In Wellhead Temperature (N3) DEGR: Enter the shut-in wellhead temperature in degrees, Rankine.
22	Flowing Wellhead Temperature (N3) DEGR: Enter the flowing wellhead temperature of the full well stream gas in degrees, Rankine.
23	Temperature at Reservoir Sandface (N3) DEGR: Enter the temperature at the reservoir sandface in degrees, Rankine.

FPC Form 131
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0406	GAS SUPPLY SOURCE DELIVERABILITY ESTIMATE	4 of 5

Data Field Number	Instructions
24	Shut-In Wellhead Pressure (N2.3) PSIA: Enter the shut-in wellhead pressure, in PSIA, which is the pressure at the wellhead when the completion is shut-in.
25	Flowing Wellhead Pressure (N2.3) PSIA: Enter the flowing wellhead pressure, in PSIA, which is the pressure at the wellhead when the completion is flowing in.
26	Formation Pressure (N2.3) PSIA: Enter formation pressure, in PSIA, which is the bottom hole pressure when the completion is shut-in.
27	Sandface Pressure (N2.3) PSIA: Enter the sandface pressure, in PSIA, which is the bottom hole pressure when the completion is flowing.
28	Coefficient C Back Pressure Equation (N4.3) PCT: The coefficient C in the particular bottom hole back pressure equation namely, $Q=C\ (P_f^2 - P_s^2)^n$ Mcf/day/(thousands of $PSIA^2)^n$. Seven digits are permitted, four integers and rounded to three decimal places.
29	Value Slope Back Pressure Curve (N1.3) PCT: Enter the value of the slope n to three decimal places which should fall between the limits of 0.500 and 1.000. If the points defining back pressure curve yield a slope greater than 1.000 then a curve with a slope of 1.000 will be drawn through the point of the highest rate of flow. If the points yield a slope less than 0.500 a curve with a slope of 0.500 will be drawn through the points of the highest rate of flow. Four digits are permitted including three digits to the right of the decimal.
30	Indicator Flow Rate Modifier (N1): Enter "1" if the separator gas rate is entered in Data Field 31; enter "0" if rate is reported for full well stream flow. (INTONO)
31	Rate of Flow Per Day (N6.3) MMCF/DY: The rate of flow, in MMCF (to three decimal places) per day, to be reported is the full well stream gas rate rather than residue gas rate. However the separator gas rate may be reported by entering "1" in Data Field 30 above. All rates of flow not indicated by "1" in Data Field 30 above, will be treated as full well stream flow. In the case of a reservoir or a field, enter MMCF/day for the average completion.
32	Duration of Flow Stream (N4.1) HR: The duration of flow is to be entered in hours to one decimal place for the case of a completion test. This item is to be left blank for the case of a reservoir or field back-pressure curve or equation.

FPC Form 131
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0406	GAS SUPPLY SOURCE DELIVERABILITY ESTIMATE	5 of 5

Data Field Number	Instructions
33	Volume Wellhead Open Flow (N6.3) MMCF: Enter the volume of gas, in MMCF per day, that would be produced by a completion if the flowing wellhead pressure Pt in the wellhead performance back-pressure equation $Q=C\ (P_c^2 - P_t^2)^n$ were atmospheric. In the case of a reservoir or a field, enter the volume computed for the average completion. NOTE: Absolute Open Flow (Data Field 34 below) may be reported in lieu of this data item. If so, leave this item blank. Report either Data Field 33 or 34.
34	Volume Wellhead Absolute Open Flow (N6.3) MMCF: Enter the volume of gas, in MMCF per day, that would be produced by a completion (the average completion in the case of a reservoir or field) if the only pressure against the face of the producing sand in the well bore were atmospheric pressure. NOTE: Wellhead Open Flow (Data Field 33 above) may be reported in lieu of this data item. If so, leave this item blank. Report either Data Field 33 or 34.
35	Daily Productive Capacity - Non-Associated (N8.3) MMCF: Enter the Productive Capacity, in MMCF per day, at 14.73 PSIA at 60° Fahrenheit for non-associated natural gas reservoirs as defined on pages 109 and 110 of Volume 23 of "Reserves of Crude Oil, Natural Gas Liquids, and Natural Gas in the United States and Canada as of December 31, 1968," published jointly by the American Gas Association, Inc., the American Petroleum Association, and the Canadian Petroleum Association. Estimates should be as of the end of the calendar year.
36	Daily Productive Capacity-Associated and Solution (N8.3) MMCF: Enter the productive capacity, in MMCF per day, of all associated and solution gas reserves included in the gas supply source. For these supplies, report the maximum daily quantity that the pipeline can reasonably rely on. The estimates should be as of the end of the calendar year.
37	Maximum Daily Quantity (N8.3) MMCF: Enter, in MMCF per day, the maximum daily quantity, which is the maximum volume of gas per day at 14.73 PSIA at 60° Fahrenheit, the pipeline can reasonably rely upon from a given supply source.
38	BTU Per Cubic Foot Saturated (N4.2) BTU/CF: Enter the gross heating value of the salable gas expressed in British Thermal Units (BTU) per cubic foot on a saturated basis.
39 (Key)	State Abbreviation (A2): Enter the state abbreviation to identify the location of the field reported in Data Field 2 above, from the Register of Data Standards, IDSTAT.

FPC Form 131
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: OTHER SUPPLY SOURCES - COMMITTED RESERVES & SCHEDULE 0407	DELIVERABILITY ESTIMATES	1 of 6

I. DESCRIPTION

This schedule is used to collect data on the committed reserves and deliverability estimates for other supply sources.

II. GENERAL INFORMATION

A. This schedule shall be submitted by all Natural Gas Pipeline companies which are subject to the requirements of §260.7a of the Commission's regulations (18 CFR 260.7a) prescribed by Order No. 308, in Docket No. R-308, (1) whose remaining recoverable salable natural gas reserves, company owned independent producer contract at the end of the report year are 50 billion cubic feet or less at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit, (2) Natural Gas Pipeline companies which purchased their entire supply of natural gas from another pipeline company which is subject to the Commission's juriadiction and/or which purchased from foreign suppliers, or (3) Natural Gas Pipeline companies reporting miscellaneous supplies. Report committed reserves and deliverability estimates for all such other supply sources which are primarily from reporting pipeline company's point of view, supported by the terms of gas purchase contracts covering such diverse gas sources as LNG, SNG, pipeline purchases, warranty contracts and purchases from some plants which primarily specify gas volumes without identifying reservoirs and fields from which the gas is produced. All other plant purchases as well as miscellaneous supplies, are to be reported on Schedules 0405 and 0406 using the procedures described under the Instructions for those schedules.

B. Respondents shall complete all applicable data fields on this schedule annually.

C. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

D. There is no provision on this schedule for reporting negative numbers.

E. Due to the diversity of supply sources reported on this schedule, all data fields will not be filled in. No particular importance should be read into the number of blank data fields per se.

F. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

FPC Form 131 (3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: OTHER SUPPLY SOURCES - COMMITTED RESERVES & SCHEDULE 0407	DELIVERABILITY ESTIMATES	2 of 6

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Supply Class Code (A1): Enter only one of the following alphabetic codes: (TYGSPY) A = LNG B = SNG C = Pipeline D = Warranty Contract E = PLANT (Code E is to be used for reporting PLANT data only when fields and/or reservoirs cannot be identified and only the gas volumes committed under gas purchase contract are known. All other plants are to be reported on Schedules 0405 and 0406). F = Field O = Other (code O is to be used only if the gas purchase does not qualify as any other supply class listed.
2 (Key)	Group Code (A6): Enter the group code identifying the group name (Data Field 3 below), from the Register of Data Standards, IDGSPG.
3	Group Name (A26): Enter the name by which the gas supply source is known, from the Register of Data Standards, IDGSPG. If the name is unspecified, enter "unspecified". However, in most cases at least the name of the Area is known from which the gas is obtained and this name should be used; i.e. Continental U.S., Alaska, Mexico, Canada, Algeria, Venezuela, etc. In cases of SNG source, enter the name of the plant or facility which converts the raw material into gas; i.e. BALTIMORE NAPTHA GASIF FAC - W VA GASIF PLANT. NOTE: Under no circumstances will the name of the pipeline company or other seller be an acceptable entry here. That information is to be entered in Data Field 10, "Pipeline or Other Seller Name".
4 (Key)	Other Source Indicator (N1): A preprinted "1" has been entered in this data field. No other entry is acceptable. (INYONO)
5 (Key)	State Abbreviation (A2): Enter the state abbreviation for state in which the gas supply source is located, from the Register of Data Standards, IDSTAT. When such a source

FPC Form 131 (3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: OTHER SUPPLY SOURCES - COMMITTED RESERVES & SCHEDULE 0407	DELIVERABILITY ESTIMATES	3 of 6

Data Field Number	Instructions
5 (cont'd)	covers parts of more than one state, enter the state abbreviation of that state which contains the most dedicated acreage or the largest volume of gas.
6 (Key)	County/Parish Code (N3): Enter the county/parish code, from the Register of Data Standards, IDCNTY, in which the field or offshore area is located. When a field covers parts of more than one county/parish enter the code for the county/parish which contains the most dedicated acreage or the largest amount of reserves. In the case of offshore areas, enter the code corresponding to the offshore area described below. Enter the offshore area name in Data Field 8 below.

FOR ALL OFFSHORE AREAS ENTER: (See Additional Codes for the State of Louisiana)

CODE	NAME	DESCRIPTION
990	OFFSHORE-STATE	that area subject to State jurisdiction only.
995	OFFSHORE-FEDERAL	that area subject to Federal jurisdiction.
999	OFFSHORE-GENERAL	that area where the above distinctions are either unknown or not applicable.

ADDITIONAL CODES FOR THE STATE OF LOUISIANA

NOTICE: Settlement between State and Federal Government will render the following coding obsolete. In that case use coding described above.

CODE	NAME	DESCRIPTION
991	OFFSHORE-ZONE 1	the area lying seaward of and within three geographical miles of the so-called "Chapman-Line".
992	OFFSHORE-ZONE 2	the area which is bounded landward by the seaward boundary of Zone 1 and which is bounded seaward by a line three Marine Leagues from the so-called "Chapman-Line".
993	OFFSHORE-ZONE 3	the area bounded landward by the boundary of Zone 2 and bounded seaward by the seaward boundary

FPC Form 131 (3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: OTHER SUPPLY SOURCES - COMMITTED RESERVES & SCHEDULE 0407	DELIVERABILITY ESTIMATES	4 of 6

Data Field Number	Instructions
6 (cont'd)	line of the State of Louisiana as fixed and redefined by Act 33 of the Louisiana Legislature of 1954.
994 OFFSHORE-ZONE 4	that portion of the Continental Shelf lying seaward from the seaward line of Zone 3.
7	Natural Gas Area Code (N2): Enter the designated natural gas area code, from the Register of Data Standards, IDNGAR.
8	Offshore Area Name (A16): Enter the associated offshore area name for the code listed in Data Field 7 above. (IDCNTY)
9 (Key)	Pipeline or Other Seller Code (N6): Enter the appropriate code, from the Register of Data Standards, IDRESP.
10	Pipeline or Other Seller Name (A35): If the reported gas supply is obtained from a pipeline, enter the name of the pipeline, from the Register of Data Standards, IDRESP. If the supply is LNG or SNG, enter the name of the seller. In all other cases, enter the name of either a principal signatory Seller or Operator who has filed a Rate Schedule with the FPC, covering the gas sale(s) to your pipeline from the subject gas source. In those instances where two or more principal signatory sellers or operators furnish you with approximately equal amounts of reserves, enter the name of your choice.
11 (Key)	Type Supply Source (A1): Enter one of the following codes: (TYGSPY) A = LNG B = SNG C = PIPELINE D = WARRANTY CONTRACT E = PLANT F = FIELD O = OTHER
12	Import Indicator (N1): If the gas supply source is an import, enter "1"; if not, enter "0". (INYONO)
13	Short Term Indicator (N1): If the gas supply source is committed under a short term contract (any short term purchase agreement covering a time period of one year or less including "spot purchases"), enter "1"; if not, enter "0". (INYONO)

FPC Form 131 (3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: OTHER SUPPLY SOURCES - COMMITTED RESERVES & SCHEDULE 0407 DELIVERABILITY ESTIMATES		5 of 6

Data Field Number	Instructions
14	Daily Productive Capacity - Undesignated (N8.3) MMCF: Use this data field for entering the productive capacity of all LNG and SNG, as well as for all other sources where the type of gas purchased is not identified. For such supplies enter, in MMCF per day, the maximum daily quantity that the pipeline can reasonably rely on. The estimate should be as of the end of the calendar year.
15	Daily Productive Capacity - Non-Associated (N8.3) MMCF: Enter the productive capacity, in MMCF per day at 14.73 PSIA at 60° Fahrenheit, for non-associated natural gas reservoirs is defined on pages 109 and 110 of Volume 23 of "Reserves of Crude Oil, Natural Gas Liquids, and Natural Gas in the United States and Canada as of December 31, 1968," published jointly by the American Gas Association, Inc., the American Petroleum Institute and the Canadian Petroleum Association. Estimates should be as of the end of the calendar year. NOTE: LNG and SNG volumes are not acceptable entries for this data field. Use Data Field 14 above, for that purpose.
16	Daily Productive Capacity - Associated and Solution (N8.3) MMCF: Enter the productive capacity, in MMCF per day, of all associated and solution gas reserves included in the gas supply source. For these suppliers, enter the maximum daily quantity that the pipeline can rely on. Estimates should be as of the end of the calendar year.
17	Maximum Daily Quantity (N8.3) MMCF: Enter, in MMCF per day, the maximum daily quantity, which is the maximum volume of gas per day at 14.73 PSIA at 60° Fahrenheit, the pipeline can reasonably rely upon from a given supply source.
18	Heating Value BTU Per Cubic Foot (N4.2) BTU/CF: Enter the gross heating value of the salable gas expressed in British Thermal Units (BTU) per cubic foot of gas on a saturated basis.
19	Quantity Pipeline Source Curtailed (N8.3) MMCF: If the supply class code (Data Field 1 above) is coded "C" (Pipeline), enter, in MMCF rounded to three decimal places, the volume of gas curtailed during the report year; if not, leave blank.
20	Total Curtailment Indicator (N1): Enter "1" in this data field if the volume reported in Data Field 19 is included in the total curtailment volume entered on Schedule 0402, Data Field 22; if not, enter "0". (INTGNO)
21	Quantity Company Owned (N8.3) MMCF: Enter that quantity of Data Field 22 below, that is company owned, in MMCF rounded to three decimal places.

FPC Form 151 (3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: OTHER SUPPLY SOURCES - COMMITTED RESERVES & SCHEDULE 0407 DELIVERABILITY ESTIMATES		6 of 6

Data Field Number	Instructions
22	Committed Reserves Owned and Contracted (N8.3) MMCF: Enter the quantity of remaining recoverable salable gas reserves, in MMCF rounded to three decimal places, for the supply source at the end of the report period.
23	Committed Reserves Gas Purchased and/or Produced (N8.3) MMCF: Enter the volume of salable gas, in MMCF rounded to three decimal places, purchased and/or produced from the supply source during the report year.
24	Committed Reserves - Total Gas Volume Scheduled (N8.3) MMCF: Enter the sum of the annual volumes scheduled in Data Fields 26-30 below, in MMCF rounded to three decimal places.
25	Committed Reserves - Gas Volume Not Scheduled (N8.3) MMCF: Enter the difference between Data Field 22 above, Owned and Contracted, less Data Field 24 above, Total Gas Volume Scheduled, in MMCF rounded to three decimal places.
26	Quantity Scheduled First Year (N8.3) MMCF: Enter, in MMCF rounded to three decimal places, the estimated annual volumes of gas scheduled from the supply source for the first year.
27	Quantity Scheduled Second Year (N8.3) MMCF: Enter, in MMCF rounded to three decimal places, the estimated annual volumes of gas scheduled from the supply source for the second year.
28	Quantity Scheduled Third Year (N8.3) MMCF: Enter, in MMCF rounded to three decimal places, the estimated annual volumes of gas scheduled from the supply source for the third year.
29	Quantity Scheduled Fourth Year (N8.3) MMCF: Enter, in MMCF rounded to three decimal places, the estimated annual volumes of gas scheduled from the supply source for the fourth year.
30	Quantity Scheduled Fifth Year (N8.3) MMCF: Enter, in MMCF rounded to three decimal places, the estimated annual volumes of gas scheduled from the supply source for the fifth year.

FPC Form 151 (3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0408 IMPORTER/EXPORTER GASEOUS PHASE NATURAL GAS		1 of 3

I. DESCRIPTION

This schedule is used to collect detailed information on the import or export of natural gas.

II. GENERAL INFORMATION

A. This schedule shall be submitted by each respondent having authorization to import or export gas.

B. Respondents shall complete all data fields on this schedule annually.

C. This schedule shall be completed by each respondent having authorization to import or export natural gas. Use a separate schedule for each authorization (Docket Number). If one authorization involves more than one import or export point, a separate schedule shall be completed for each point. If authorization granted is increased, decreased or extended under a succession of Docket Numbers and all related gas moved through the same border facilities and authorized expansions thereof, moved to or from the same purchaser or supplier, and was subject to the same rate, such transactions shall be combined for reporting purposes and appropriate Docket Numbers shown in Data Field 15. Where transactions are based on volumetric measurement, weighted BTU data shall be used to estimate total monthly BTU's. Amounts paid or received and costs or receipts shall be reported in U.S. dollars.

D. Definitions

1. Transporter: The party or parties, other than buyer or seller, owning the facilities by which gas or LNG is physically transferred between buyer and seller.

2. Costs: All expenses incurred by import up to the U.S. point of delivery for the reported quantity imported.

3. Receipts: All revenues received by exporter for the reported quantity exported.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Indicator Import/Export (N1): Enter "1" for import or "2" for export (INETOR)
2	Foreign Buyer/Seller Name (A35): Enter the name of the foreign buyer or seller using approved standard abbreviations when needed. (IDNAME)

FPC Form 151 (3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0408 INFORTER/EXPORTER GASEOUS PHASE NATURAL GAS		2 of 3

Data Field Number	Instructions
3 (Key)	Docket Number (A9): Enter the docket number having an alphabetic character in the first position, a hypen in the next position and followed by numerics. If authorization granted is increased, decreased or extended under a succession of Docket Numbers and all related gas moved through the same border facilities and authorized expansions thereof, moved to or from the same purchaser or supplier, and was subject to the same rate, such transactions shall be combined for reporting purposes and appropriate Docket Numbers, entered in Data Field 15 below. (IDDCKT)
4	Type Gas (N1): This data field is preprinted for FPC internal processing only. (INETOR)
5	Name of Transporter (A35): Enter the name of the transporter, other than the buyer or seller, owning the facilities by which gas is physically transferred between the buyer or seller. (IDNAME)
6	U.S. Point of Entry/Exit (A26): Enter the abbreviation for the state at the point of entry or exit. Following the state, enter the U.S. point of entry or exit separated by a comma. (IDDESC)
7	Annual Weighted Average BTU per Cubic Foot (W4.3) BTU/CF: Divide the total MMM BTU of the quantity of natural gas received or shipped at the U.S. entry or exit point by the total MMCF received or shipped, giving the annual weighted average BTU per cubic foot.
8	Annual Weighted Average Price in Cents per MM BTU (N3.3) CT/MMBT: Divide the total cost of receipts by the total MM BTU of the quantity of natural gas received or shipped at the U.S. entry or exit point. Multiply the results by 100 giving the annual weighted average price in cents per MM BTU.
9	Month of Transaction (N2): This is preprinted data field for FPC internal processing only. (TMMOYR)
10	Peak Day Date of Quantity Received or Shipped at Entry or Exit Point (N6): Enter the date, in the format MMDDYY. (TMDATE)
11	Peak Day of Quantity Received or Shipped at Entry or Exit Point (N5.3) MMCF: Enter volumes in MMCF rounded to three decimal places at 14.73 PSIA at 60° Fahrenheit.

FPC Form 151 (3-76)

12	Quantity Received or Shipped at Entry or Exit Point (N7.3) MMCF: Report volumes in MMCF rounded to three decimal places at 14.73 PSIA at 60° Fahrenheit.
13	Quantity MM BTU (N7.3) BTU: Where transactions are based primarily on volumetric measurement, weighted average BTU data should be used to estimate total monthly BTU's.
14	Amount Paid or Received at Entry or Exit Point (N9) DOL: Amounts paid or received shall be reported in U.S. dollars. Costs are all expenses incurred by the importer up to the U.S. point of delivery for the reported quantity of natural gas imported. Receipts are all revenues received by the exporter for the reported quantity exported.
15 (Key)	Additional Docket Number(s) (A9): Enter additional Docket Numbers, as specified in Data Field 4 above. (IDDCKT)

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0409	IMPORTER/EXPORTER LIQUIFIED NATURAL GAS	1 of 3

I. DESCRIPTION

This schedule is used to collect detailed information on the import or export of liquified natural gas.

II. GENERAL INFORMATION

A. This schedule shall be submitted by each respondent having authorization to import or export liquified natural gas.

B. Respondents shall complete all data fields on this schedule annually.

C. These schedules shall be completed by each respondent having authorization to import or export natural gas. Use a separate schedule for each authorization (Docket Number). If one authorization involves more than one import or export point, a separate schedule shall be completed for each point. If authorization granted is increased, decreased or extended under a succession of Docket Numbers and all related gas moved through the same border facilities and authorized expansions thereof, moved to or from the same purchaser or supplier, and was subject to the same rate, such transactions shall be combined for reporting purposes and appropriate Docket Numbers shown in Data Field 16. Where transactions are based on volumetric measurement, weighted BTU data shall be used to estimate total monthly BTU's. Amounts paid or received and cost or receipts shall be reported in U.S. dollars.

D. Definitions

1. Transporter: The party or parties, other than buyer or seller, owning the facilities by which gas or LNG is physically transferred between buyer and seller.

2. Costs: All expenses incurred by import up to the U.S. point of delivery for reported quantity imported.

3. Receipts: All revenues received by exporter for the reported quantity exported.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Indicator Import/Export (N1): Enter "1" for import, or "2" for export. (INETOR)
2	Foreign Buyer/Seller Name (A35): Enter the name of the foreign buyer or seller using approved standard abbreviations when needed. (IDNAME)
3	Origin/Destination (A20): Enter origin point, if import; destination point, if export. (IDDESC)

FPC Form 131

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0410	ANNUAL UNDERGROUND STORAGE SUMMARY	1 of 5

I. DESCRIPTION

This schedule is used to collect information on underground storage operations.

II. GENERAL INSTRUCTIONS

A. This schedule shall be submitted by all Natural Gas Pipeline companies, Class A and Class B, who own, operate, or lease underground storage facilities.

B. Respondents shall complete all data fields on this schedule in their first submission. On subsequent submissions, respondents shall submit only appropriate identification (key data fields) and changed values, additions and deletions for Data Fields 2, 4, and 7-14B. Data Fields 1, 3, 5, 6, and 15-29, shall be submitted annually.

C. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

D. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Field Code (A6): Enter the code identifying the storage field, from the Register of Data Standards, IDGPFL.
2	Field Name (A26): Enter the storage field name, from the Register of Data Standards, IDGPFL.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0410	ANNUAL UNDERGROUND STORAGE SUMMARY	2 of 5

Data Field Number	Instructions
3 (Key)	Reservoir ID (A6): Enter the unique, sequential (respondent assigned) code, as specified in the Register of Data Standards, NRCADL.
4	Reservoir Name (A26): Enter the storage reservoir name, from the Register of Data Standards, IDDESC.
5 (Key)	Project Location Designation (A1): Enter the geographic location within the USA, using one of the following codes: (IDMJAR) M = Midwest S = South E = East W = West
6 (Key)	State Abbreviation (A2): Enter the state abbreviation for the state with largest amount of acreage, from the Register of Data Standards, IDSTAT.
7	County Code (N3): Enter the county code for the county with largest amount of acreage, from the Register of Data Standards, IDCNTY.
8	Type of Storage Reservoir (A3): Enter one of the following alphebetic abbreviations: (TYGSST) UE = Underground Expansion UW = Underground Waterdive UA = Underground Aquifier LNG = Liquified Natural Gas OTH = All Other Storage
9	Reservoir Status Code (A1): Enter one of the following alphabetic abbreviations: (TYGRST) A = Active D = Developmental Stage P = Proposed F = Future Abandonment R = Reinstated
10	Year Operations Began (N4): Enter the four digit year in which storage operation was begun, in the format YYYY. (TMYEAR)
11	Type Respondent Interest (N1): Enter the one digit code identifying the respondents interest in the field, as follows: (TYRSIN) 1 = Field owned by respondent 2 = Joint ownership

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0410	ANNUAL UNDERGROUND STORAGE SUMMARY	3 of 5

Data Field Number	Instructions
11 (cont'd)	3 = Field leased by respondent 4 = Field operated by respondent 5 = Field operated by others 9 = Other interest
12	Associated Company Indicator (N1): Enter "1" if the co-owner is an associated company; if not, enter "0". Give particulars in a footnote of any gas stored for the benefit of another company under a gas exchange arrangement or basis of purchase and sale for resale to other company. (INYONO)
13	Percent Respondent Interest (N3.2) PCT: Enter the percentage of respondent ownership, rounded to two decimal places.
14	Total Base Gas (N6.3) MMCF: Report the total base gas for each storage field, in MMCF rounded to three decimal places. Base gas is the volume of gas needed as a permanent inventory to maintain adequate reservoir pressure and deliverability rates throughout the withdrawal season. All native gas is to be included in the base gas volume.
15	Working (Top Storage) Gas (N6.3) MMCF: Report the working gas for each storage field, in MMCF rounded to three decimal places. Working gas is the volume of gas in the reservoir above the designed level of the base gas. It may or may not be completely withdrawn during only particular withdrawal seasons. Conditions permitting, the total working capacity could be used more than once during any season.
16	Total Gas in Storage (N7.3) MMCF: Report the total gas in storage for each storage field, in MMCF rounded to three decimal places. Total gas in storage is the sum of the base gas (Data Field 14 above) and working (top storage) gas (Data Field 15 above).
17A	Percent Co-owner Interest (N3.2) PCT: Enter the percent of principal co-owner interest if respondent ownership is less than 100%, or operator, if field is not operated by respondent. If more than one principal co-owner, enter the percent and corresponding name (Data Field 17B below) in subsequent occurrances of Data Field 17A.
17B	Name of Co-owner/Operator (A35): Enter the name of principal co-owner if respondent ownership is less than 100%, or operator, if field is not operated by respondent. If more than one principal co-owner, enter the corresponding percent and names in subsequent occurrences of Data Fields 17A and 17B. (IDNAME)

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0410	ANNUAL UNDERGROUND STORAGE SUMMARY	4 of 5

Data Field Number	Instructions
18	Cost of Storage Operation (N8) DOL: Enter the cost of storage operation including land, equipment, etc.
19	Expenses for Storage Operations (N8) DOL: Enter the operating expenses excluding depreciation and taxes.
20	Storage Reservoir Pressure (N2.2) PSIG: Enter the pressure at which gas is stored.
21	Quantity Certificated Storage Capacity (N9.3) MMCF: Enter the certificated storage capacity of the reservoir, in MMCF rounded to three decimal places.
22	Number of Injection/Withdrawal Wells (N3) NO: Enter the number of injection and withdrawal wells in the storage field.
23	Number of Storage Observation Wells (N3) NO: Enter the number of observation wells in the storage field.
24	Quantity Maximum Day's Withdrawal (N5.3) MMCF: Enter the volume of gas withdrawn on maximum one-day withdrawal, in MMCF rounded to three decimal places.
25	Date of Maximum Day's Withdrawal (N6): Enter the date on which the maximum withdrawal from storage was made, in the format MMDDYY. (YMDATE)
26	Capacity Auxiliary Peaking Facility (N7.3) MMCF: Enter the maximum daily capacity, in MMCF rounded to three decimal places, on February 1 of heating season overlapping year-end for this report.
27	Indicator Auxiliary Peaking Operational on High Peak Day (N1): Enter "1" if the auxiliary peaking facility was in operation on high peak day; if not, enter "0". (INYONO)
28	Quantity Total Annual Storage Injections (N9.3) MMCF: Enter the total quantity of gas injected for the year, in MMCF rounded to three decimal places. This figure should equal the sum of Data Field 31 below (January-December Injections).
29	Quantity Total Annual Storage Withdrawals (N9.3) MMCF: Enter the total volume of gas withdrawn from storage during the year. This figure should equal the sum of Data Field 32 below (January-December Withdrawals).
30	Indicator Gas Stored for Others (N1): Enter "1" if gas is being stored for others; if not, enter "0". If gas is stored for others, Schedule 0844, "Gas Stored for Others" is to be completed. (INYONO)

DETAILED INSTRUCTIONS: SCHEDULE 0410	ANNUAL UNDERGROUND STORAGE SUMMARY	5 of 5

Data Field Number	Instructions
31	Quantity of Injections, January through December (N9.3) MMCF: Enter for each month the quantity of gas injected into storage, in MMCF rounded to three decimal places.
32	Quantity of Withdrawals, January through December (N9.3) MMCF: Enter for each month the volume of gas withdrawn from storage, in MMCF rounded to three decimal places.

FPC Form 131
(3-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0411	UNDERGROUND STORAGE DATA - MONTHLY AND SEMI-MONTHLY	1 of 3

I. DESCRIPTION

This schedule is used to collect the monthly and semi-monthly underground storage data.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Natural Gas Pipeline companies, Class A and Class B, subject to FPC jurisdiction, that operate underground natural gas storage fields in the United States.

B. Respondents shall complete all data fields on this schedule monthly, April-November and semimonthly, December-March.

C. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

D. When entering estimated volumes on this schedule, enter a "1" on the schedule in Data Field 2, "ID Report Period/Estimate Indicator", if an estimated volume is being supplied in Date Fields 3-8. If the value supplied is the actual volume, enter a "0" in Data Field 2.

E. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Gas Storage Category (A1): This is a preprinted coded data field for FPC internal processing only. (TYGSTC)

FPC Form 131 (3-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0411	UNDERGROUND STORAGE DATA - MONTHLY AND SEMI-MONTHLY	2 of 3

Data Field Number	Instructions
1 (cont'd)	A. Respondent's Gas in Reservoirs Operated by Respondent. Applies to all gas owned by respondent in storage reservoirs which he operates. B. Customers' Gas in Reservoirs Operated by Respondent. Applies to all gas belonging to, stored for, and delivered for the account of a customer or others under storage service or similar contracts including customers or others that are subject to FPC jurisdiction. When the co-owner is also the operator, he shall report the respective portion of the gas storage data for the non-operating co-owners under category B. C. Total of A & B. D. Respondent's Gas in Reservoirs Operated by Others. Applies to any Respondent gas in reservoirs operated by others. (Respondent's total stored gas should equal A & D. Respondent to this schedule who are co-owners of storage reservoirs which they do not operate shall report their respective portions of this gas under category D. E. Reservoirs in the Development Stage. Applies to operators of gas storage reservoirs that are in the development stage.
2 (Key)	ID Report Period/Estimate Indicator (N2): The first position is a preprinted coded data field for FPC internal processing only. Use the second position to indicate estimate by entering "1" for yes, or "2" for no./(INETOR) First Position Values for ID Report Period are as follows: (TYRPTF) 1 = Balance as of Nov. 1 which are the balances on hand at the beginning of the storage withdrawal year commencing Nov. 1. This code applies to only Data Fields 3, 4, 5, and 6. 2 = Nov. 1 to date which applies to Data Fields 7 and 8 are the accumulated injections and withdrawals for the current storage period from Nov. 1 to end of the report period 3 = Current Report Period applies to all Data Fields 3, 4, 5, 6, 7, and 8.
3 (Key)	Total Base Gas (N6.3) MMCF: Report for each category (a) the base gas on hand as of Nov. 1 and (b) for the current report period. Base gas is the volume of gas needed as a permanent inventory to maintain adequate reservoir pressure and deliverability rates throughout the withdrawal season. All native gas is to be included in the base gas volume.

FPC Form 131 (3-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0411	UNDERGROUND STORAGE DATA - MONTHLY AND SEMI-MONTHLY	3 of 3

Data Field Number	Instructions
4	Working (Top Storage) Gas (N6.3) MMCF: Report for each category the (a) working gas on hand as of Nov. 1 and (b) the current report period. Working gas is the volume of gas in the reservoir above the designed level of the base gas. It may or may not be completely withdrawn during only particular withdrawal season. Conditions permitting; the total working capacity could be used more than once during any season.
5	Total Gas in Storage (N7.3) MMCF: Report for each category the (a) total gas in storage as of Nov. 1 and (b) the current report period. Total Gas in Storage is the sum of the base gas and the working gas.
6	Native Gas (N6.3) MMCF: Report for each category (a) the native gas on hand as of Nov. 1 and (b) the current report period. Native Gas is gas in place at the time that the reservoir was converted to storage as contrasted to injected gas. The volume reported in this data field is to be included in Data Field 3 above.
7	Injections (N6.3) MMCF: Report for each category (a) the accumulated injections to storage from Nov. 1 to the end of the current report period and (b) the injections during the current report period. Injections are the volume of gas injected during the applicable reporting period.
8	Withdrawals (N6.3) MMCF: Report for each category (a) the accumulated withdrawals from storage from Nov. 1 to the end of the current report period and (b) the withdrawals during the current report period. Withdrawals are the total volume of gas withdrawn during the applicable reporting period.

FPC Form 131 (3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0412	PRODUCTS EXTRACTED FROM NATURAL GAS	1 of 4

I. DESCRIPTION

This schedule is used to collect information on the recovery and use of products from natural gas.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Natural Gas Pipeline companies, Class A and Class B, with operations for recovery of gasoline, butane, propane, etc., from natural gas.

B. Respondents shall complete all data fields on this schedule annually.

C. This schedule is to be filed on or before the 15th of May following the close of the calendar year reported.

D. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

E. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Plant Code (A6): Enter the plant code, from the Register of Data Standards, IDGPFL.
2	Plant Name (A26): Enter the plant name, from the Register of Data Standards, IDGPFL.

DETAILED INSTRUCTIONS: SCHEDULE 0412	PRODUCTS EXTRACTED FROM NATURAL GAS	3 of 4

Data Field Number	Instructions
12	Annual Plant Cost (N8) DOL: Report plant cost, including land and land rights, structures and equipment.
13	Annual Operating Expenses (N8) DOL: Report expenses relating to operation and maintenance of products extraction facilities, except for fuel, to be reported in Data Field 4 below.
14	Annual Fuel Cost (N7) DOL: Report annual fuel costs, including gas used from company's own supply.
15	Pressure Base (N2.3) PSIA: Enter pressure base, if other than 14.73 PSIA at 60° Fahrenheit.
16	Gas Treating Capacity (N5.3) MMCF: Enter the quantity of gas which may be processed per day, in MMCF rounded to three decimal places.
17	Gas Output Capacity (N6) GAL: Report output capacity per day of gasoline, in gallons.
18	Gas Storage Capacity (N7) GAL: Report amount of gasoline which may be stored, in gallons.
19	Average MCF/GAL (N1.4) MCF/GAL: Report average MCF required per gallon of gasoline, rounded to four decimal places.
20	Respondent Gas Processed (N7.3) MMCF: Report quantity of respondents own gas processed, in MMCF rounded to three decimal places.
21	Gas Processed for Others (N7.3) MMCF: Report the gas processed for others, in MMCF rounded to three decimal places.
22	Shrinkage (N7.3) MMCF: Report shrinkage of gas processed, in MMCF rounded to three decimal places.
23	Gas in Storage End of Year (N7) GAL: Enter, in gallons, the amount of gasoline in storage at end of report year.
24	Gas Used for Fuel (N7.3) MMCF: Enter the gas used for fuel, in MMCF rounded to three decimal places.
NOTE: The following four data fields (25-28) are to be repeated, as needed, for any extracted products used by respondent.	
25	Extracted Product Used (A8): Butane, propane, gasoline, etc. (IDDESC)
26	Quantity Used (N7) NO: Report the quantity of gas used by respondent.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0412	PRODUCTS EXTRACTED FROM NATURAL GAS	4 of 4

Data Field Number	Instructions
27	Unit of Measure (A3): Enter the unit of measure which applies to quantity reported in Data Field 26 above. (TYUNMS)
28	Nature of Use (A40): Describe, very briefly, how extracted product is used. (IDDESC)
29	Products Extracted (A8): Enter the name of each product extracted. (IDDESC)
30	Quantity of Extracted Products (N7) NO: Enter the volume for each each extracted product.
31	Unit of Measure (A3): Enter the unit of measure which applies to the quantity reported in Data Field 30 above. (TYUNMS)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0413	MANUFACTURED GAS PRODUCTION	1 of 3

I. DESCRIPTION

This schedule is used to collect information on gas manufacturing plants and manufactured gas.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Natural Gas Pipeline companies, Class A and Class B, with manufactured gas operations, excluding LPG plants.

B. Respondents shall complete all data fields on this schedule annually.

C. This schedule is to be filed on or before the 15th of May following the close of the calendar year reported.

D. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

E. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "0000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is refetenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -
- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Plant Code (A6): Enter the plant code, from the Register of Data Standards, IDGPPL.
2	Name of Plant (A26): Enter the plant name, from the Register of Data Standards, IDGPPL.

DETAILED INSTRUCTIONS: SCHEDULE 0413	MANUFACTURED GAS PRODUCTION	3 of 3

Data Field Number	Instructions
16	Quantity Mixed with Natural Gas (N7.3) MMCF: Enter quantity of manufactured gas mixed with natural gas, in MMCF rounded to three decimal places.
17	BTU/MCF (N4.2) BTU/MCF: Enter the BTU content of manufactured gas, per MCF, rounded to two decimal places.

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0414	LIQUEFIED PETROLEUM GAS OPERATIONS	1 of 2

I. DESCRIPTION

This schedule is used to collect information on liquefied petroleum gas operations.

II. GENERAL INFORMATION

A. The schedule shall be submitted by all Natural Gas Pipeline companies, Class A and Class B, who own or operate a plant which produces gas from liquefied petroleum gas (LPG).

B. Respondents shall complete all data fields on this schedule annually.

C. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

D. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

14	LPG Storage Capacity (N7) GAL: Enter the storage capacity, for LPG, in gallons.
15	Gallons of LPG Used (N7) GAL: Enter the amount of LPG used, in gallons.
16	Quantity of Gas Produced (N7.3) MMCF: Enter the quantity of gas produced, in MMCF rounded to three decimal places.
17	MMCF Mixed with Natural Gas (N7.3) MMCF: Enter the quantity of produced gas mixed with natural gas or which is substituted for deliveries normally made from natural gas, in MMCF rounded to three decimal places.
18	BTU/MCF (N4.2) BTU/MCF: Enter the BTU content, per MCF rounded to two decimal places.

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0415	NUMBER OF GAS AND OIL WELLS	1 of 2

I. DESCRIPTION

This schedule is used to collect particulars on gas and oil wells owned by the respondent.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Natural Gas Pipeline companies, Class A and Class B, owning gas and oil wells which are producing, or are capable of producing. Gas wells, oil wells, and combination wells should be listed separately, as should offshore wells, of each type, by state.

B. Respondents shall complete all data fields on this schedule annually.

C. This schedule is to be filed on or before the 15th of May following the close of the calendar year reported.

D. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

Data Field Number	Instructions
1 (cont'd)	(A combination well is producing from, or capable of production from, one or more oil reservoirs and also from one or more gas reservoirs.)
2 (Key)	State Abbreviation (A2): Enter the state abbreviation, from the Register of Data Standards, IDSTAT.
3 (Key)	Indicator/Offshore (N1): If well if offshore, enter "1"; if not, enter "0". (INYONO)
4	Number of Wells Beginning of Year (N5) NO: Enter number of wells beginning of year.
5	Number of Successful Wells Drilled (N4) NO: Enter number of successful wells drilled during year.
6	Number of Wells Purchased (N4) NO: Enter number of wells purchased during year.
7	Number of Wells Abandoned (N3) NO: Enter number of wells abandoned during year.
8	Number of Wells Sold (N4) NO: Enter number of wells sold during year.
9	Number of Wells Reclassified (N4) NO: Enter number of wells reclassified during year, as between oil wells, gas wells or combination wells.
10	Number of Wells at End of Year (N5) NO: Enter number of wells at end of year.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0416	OWNERSHIP OF GAS AND OIL WELLS	1 of 2

I. DESCRIPTION

This schedule is used to collect information on respondent interest in gas, oil, or combination wells.

II. GENERAL INFORMATION

A. This schedule serves as a supplement to Schedule 0415, "Number of Gas and Oil Wells" and must be completed by Natural Gas Pipeline companies, Class A and Class B, owning any interest in gas, oil or combination wells which are producing or are capable of producing.

B. Respondents shall complete all data fields on this schedule in their first submission. On subsequent submissions, respondents shall submit only appropriate identification (key data fields) and changed values, additions, and deletions.

C. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Data Field Number	Instructions
3	Total Miles (N5.2) MI: Enter the total miles of this line type, rounded to two decimal places.
4-15	Mileage by Pipe Diameter (N4.2) MI: Enter for each category of inside diameter of pipe specified, the combined mileage of the line, rounded to two decimal places.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0418	TRANSMISSION SYSTEM PEAK DELIVERIES	1 of 2

I. DESCRIPTION

This schedule is used to collect information on season peak deliveries of gas.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Natural Gas Pipeline companies, Class A and Class B, reporting total transmission system deliveries, excluding deliveries to storage, for the periods of system peak deliveries indicated below, during the twelve months embracing the heating season overlapping the year's end for which schedule is submitted, classified as to sales subject to FPC rate schedules and other sales.

B. Respondents shall complete all data fields on this schedule annually.

C. This schedule is to be filed on or before 15 May, which will permit inclusion of the season's peak data.

D. The delivery periods are preprinted in the first column of the schedule coded as follows:

1 = Highest day's delivery
2 = Second highest day's delivery
3 = Third highest day's delivery
4 = Highest month's delivery
5 = Highest consecutive three-day deliveries

E. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes –

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0418	TRANSMISSION SYSTEM PEAK DELIVERIES	2 of 2

Data Field Number	Instructions
1 (Key)	System Peak Period Code (N1): This data field is preprinted as described above. (TYPKPM)
2 (Key)	Date System Peak Delivery (N6): Enter the date of peak deliveries, in the format MMDDYY. Enter month and year only for highest month, i.e., 010075, for highest consecutive three-day period, enter date of first day, i.e., 010175. (TMDATE)
3	Quantity System Peak Subject to Rate Schedule (N7.3) MMCF: Report total deliveries subject to FPC rate schedules, in MMCF, rounded to three decimal places.
4	Quantity System Peak Non-Rate Schedule (N7.3) MMCF: Report total deliveries not subject to FPC rate schedules, in MMCF rounded to three decimal places.
5	Quantity System Peak Curtailments Subject to Rate Schedule (N5.3) MMCF: Report total curtailments to FPC rate schedule customers on day indicated, in MMCF rounded to three decimal places. Do not report for highest month.
6	Quantity System Peak Curtailments Non-Rate Schedule (N5.3) MMCF: Report total curtailments to non-rate schedule customers, as above.
NOTE: Data Fields 7 through 11 report quantities drawn during highest consecutive three days. Enter quantities only where applicable, in MMCF rounded to three decimal places.	
7	Quantity System Peak - Line Pack (N7.3) MMCF: Report gas drawn from line pack.
8	Quantity System Peak-Underground Storage (N7.3) MMCF: Report gas drawn from underground storage.
9	Quantity System Peak - Peak Shaving (N7.3) MMCF: Report gas drawn from peak shaving.
10	Quantity System Peak - Deliveries from Other System (N7.3) MMCF: Report gas delivered from other systems.
11	Quantity System Peak from Other Facilities (N7.3) MMCF: Report total gas drawn from other sources than above.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0419	PIPELINE SERVICE INTERRUPTIONS	1 of 2

I. DESCRIPTION

This schedule is used to collect details of service interruptions occurring on the pipeline system.

II. GENERAL INFORMATION

A. This schedule shall be submitted by any Natural Gas Pipeline companies, Class A, B, C or D, which experienced a service interruption on their pipeline system during the year.

B. This schedule shall be reported on an exception basis only. If no interruptions have occurred during the reporting year, this schedule is not to be completed.

C. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

D. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes –

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Date of Service Interruption (N6): Report the date that the service interruption occurred, in the format, MMDDYY. (TMDATE)
2	Date Interruption Reported (N6): Enter the date that the service interruption was reported to the Commission, in the format MMDDYY. (TMDATE)
3 (Key)	State Abbreviation (A2): Enter the state abbreviation, from the Register of Data Standards, IDSTAT.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0419	PIPELINE SERVICE INTERRUPTIONS	2 of 2

Data Field Number	Instructions
4	County Code (N3): Enter the county code, from the Register of Data Standards, IDCNTY.
5	City Name (A20): Enter the name of the city. (IDCITY)
6	Name of Facility Affected (A26). (IDDESC)
7	Description of System Interruption and Effect (A216): Enter a narrative description not to exceed 72 characters per line. (IDDESC)
8	Class of Customers Effected (A10). (IDDESC)
9	Hours of Service Interruption (N3) HR: Report number of whole hour(s).
10	Minutes of Service Interruption (N2) MIN: Report number of minutes.
11	Number of Customers Affected (N6) NO: Report the number of customers affected by customer class.
12	Quantity of System Interruption Gas (N5.3) MMCF: Enter the volume by customer class, in MMCF rounded to three decimal places.

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0420	TRANSMISSION LINE INTERCONNECTIONS	1 of 2

I. DESCRIPTION

This schedule is used to collect information on interconnection points on the respondents main trasmission line.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Natural Gas Pipeline companies, Class A, having a system delivery capacity in excess of 100 MMCF per day (at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit), and shall be filed by 15 May of each year reflecting operating conditions on the main transmission system during the previous twelve months ended 31 December.

B. Respondents shall complete all data fields on this schedule in their first submission. On subsequent submissions, respondents shall submit only appropriate identification (key data fields) and changed values, additions, and deletions.

C. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Transmission Line Code (N6): Enter a unique (respondent assigned) code, as specified in the Register of Data Standards, NRCADL.
2	Transmission Line Name (A16): Enter the name of transmission line. (IDDESC)
3	Year Placed in Service (N4): Enter the year the line was placed in service, in the format YYYY. (TMYEAR)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0420	TRANSMISSION LINE INTERCONNECTIONS	2 of 2

Data Field Number	Instructions
4	Additional Owner Indicator (A1): If additional owners have interest in the transmission line, enter "1"; if not, enter "0". (INYONO)
5 (Key)	Company ID of Interconnect (N6): Enter the code identifying interconnecting company, from the Register of Data Standards, IDRESP.
6	Name of Interconnect Company (A35): Enter the name of the interconnecting company, from the Register of Data Standards, IDRESP.
7	State Abbreviation (A2): Enter the state abbreviation identifying state where interconnection is located, from the Register of Data Standards, IDSTAT.
8	County Code (N3): Enter the county code identifying county where interconnection is located, from the Register of Data Standards, IDCNTY.
9	Data Year (N4): Enter the year for which data is reported, in the format YYYY. (TMYEAR)
10	Pressure at Interconnection Point (N2.3) PSIA: Report pressure in pipeline at interconnection point.
11	Quantity Receivable at This Pressure (N7.3) MMCF: In MMCF, rounded to three decimal places.
12	Quantity Deliverable at This Pressure (N7.3) MMCF: In MMCF, rounded to three decimal places.
13	Indicator Associated Company (N1): If interconnecting company is associated with respondent, enter "1"; if not, enter "0". (INYONO)
14	Map Reference (A16): Enter the map reference for the point of interconnection, as specified in the Register of Data Standards, LCCOOR.

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0421	TRANSMISSION LINE TAKE-OFF POINTS AND CUSTOMERS	1 of 2

I. DESCRIPTION

This schedule is used to collect data on transmission line take-off points and customers.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Natural Gas Pipeline companies, Class A, with a system delivery capacity of 100 MMCF or greater per day and who deliver gas directly to customers from transmission line take-off points.

B. Respondents shall complete all data fields on this schedule annually.

C. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

D. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Transmission Line Code (N6): Enter a unique (respondent assigned) code identifying the transmission line, as specified in the Register of Data Standards, NRCADL.
2	Transmission Line Name (A16): Enter the name of transmission line. (IDDESC)
3	Map Reference (A16): Enter the map reference for each take-off point, as specified in the Register of Data Standards, LCCOOR.

7	Quantity Seasonal Dependable Withdrawal (N7.3) MMCF: Enter the volume of gas, in MMCF rounded to three decimal places, for the seasonal dependable withdrawal.

RAS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0423	COMPRESSOR STATIONS - ANNUAL DATA	1 of 4

I. DESCRIPTION

This schedule is used to collect data on compressor station operations.

II. GENERAL INFORMATION

A. This schedule shall be submitted by the following categories of respondents:

RESPONDENT CATEGORY	DATA FIELD
Natural Gas Pipeline companies, Class A and Class B	1-20
Natural Gas Pipeline companies, Class A, with a system delivery capacity of 100 MCF or greater per day.*	All Data Fields (1-33)

*Class A companies reporting on compressor stations other than transmission compressor stations should omit data fields 21-28, inclusive.

B. Respondents shall complete all data fields on this schedule in their first submission. On subsequent submissions, respondents shall submit only appropriate identification (key data fields) and changed values, additions, and deletions.

C. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Transmission Line Code (N6): Enter the unique (respondent assigned) code identifying the transmission line, as specified in the Register of Data Standards, NRCADL.

Data Field Number	Instructions
2 (cont'd)	B. Sales for Resale Codes 07 = respondents own distribution 08 = Class A and B companies filing monthly reports 09 = special pipelines 10 = other interstate pipelines 13 = other utilities
3	Type Customer Code (N2): Enter the two digit numeric code to further identify type of customer, as follows: (TYSLCS) A. Direct Sale Codes 1. For Residential 01 = space heat 02 = other 2. For Commercial 03 = space heat 04 = other 3. For Industrial 05 = firm 06 = off-peak 07 = interruptible B. Sales for Resale Codes 1. For Respondents Own Distribution 09 = firm 10 = off-peak 11 = interruptible.
4	Quantity Gas Sold by Customer Type (N8.3) MMCF: Enter amount of gas sold to customer type reported, in MMCF rounded to three decimal places.
5	Quantity of Gas Increase or Decrease by Customer Type for Month (N7.3) MMCF: Report increase or decrease in quantity sold, in MMCF rounded to three decimal places.
6	Number Customer Type Total for Month (N6) NO: Report number of customers of this type during report period.
7	Number Customer Type Average Increase/Decrease (N6) NO: Report the increase or decrease of this customer type during report period.
8	Number Customer Type Added for Month (N5) NO: Report number of this customer type added during report period.
9	Number Customer Type Unfilled Applications for Month (N5) NO: Report number of unfilled applications for this customer type during report period.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0427	SUMMARY OF GAS SUPPLY REQUIREMENTS AND CURTAILMENTS	1 of 2

I. DESCRIPTION

This schedule is used to collect detailed information of the anticipated new gas supply, the authorized emergency gas supply and exempted gas purchases.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Natural Gas Pipeline companies, Class A and Class B.

B. Respondents shall complete all data fields on this schedule semi-annually.

C. This schedule is to be filed on or before April 30 and September 30 of each year. Report in April 30th filing actual volumes for the past year, April through March, and projected data for one year April through March. Report in September 30th filing actual volumes for the past year, September through August, and projected data for one year September through August.

D. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

E. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes –

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Report Year (N4): Enter the calendar year for which data is reported, in the format YYYY. (TMYEAR)
2 (Key)	Indicator Actual/Projected (N1): Enter "1" for actual, or "2" for projected. (INETOR)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0427	SUMMARY OF GAS SUPPLY REQUIREMENTS AND CURTAILMENTS	2 of 2

Data Field Number	Instructions
3 (Key)	Period From (N6): Enter the date, in the format MMDDYY. (TMDATE)
4 (Key)	Period To (N6): Enter the date, in the format MMDDYY. (TMDATE)
5	Date Actual/Projected Peak Average Day (N6): Enter the date of actual project peak average day, in the format MMDDYY. (TMDATE)
6 (Key)	Type Supplier Service (N2): Enter one of the following codes: (TYGSDP) 05 = Anticipated New Supply 06 = Authorized Emergency Purchases 07 = Exempted Purchases
7	Total All Suppliers (N3) NO: Give the total of all suppliers of each type of supply. Complete this data field only once for each type of supplier.
8	Supplier Name (A35): Provide the name of the supplier of the anticipated new gas supply, authorized emergency gas purchases or the exempted gas purchases, from the Register of Data Standards, IDRESP.
9	Supplier Code (N6): Enter the six digit code from the Register of Data Standards, IDRESP.
10	Docket Number (A9): Enter the nine character alphanumeric Docket Number. (IDDCKT)
11-22	Total Gas Monthly Supply (N9.3) MMCF: Report the monthly gas supply for the anticipated new gas supply, the authorized emergency gas purchases or the exempted gas purchases, in MMCF rounded to three decimal places.
23	Annual Total Volume (N9.3) MMCF: Add all the total monthly gas supplies for the anticipated new gas supply, the authorized emergency gas purchases or the exempted gas purchases, in MMCF rounded to three decimal places.
24	Peak Day Delivery (N9.3) MMCF: Enter the peak day delivery for the anticipated new gas supply, the authorized emergency gas purchases or the exempted gas purchases, in MMCF rounded to three decimal places.

FPC Form 131
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0428	GAS SUPPLY AND REQUIREMENTS - CONTINGENCY	1 of 2

I. DESCRIPTION

This schedule is used to collect detailed information for the normally anticipated loss of supply (contingency), company use and skrinkage, and exhange gas owed.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Natural Gas Pipeline companies, Class A and Class B.

B. Respondents shall complete all data fields on this schedule semi-annually.

C. This schedule is to be filed on or before April 30 and September 30 of each year. Report in April 30th filing actual volume for the past year, April through March, and projected data for one year April through March. Report in September 30th filing actual volumes for the past year, September through August, and projected data for one year September through March.

D. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

E. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes –

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Report Year (N4): Enter the calendar year for which data is reported, in the format YYYY. (TMYEAR)
2 (Key)	Indicator Actual/Projected (N1): Enter "1" for actual, or "2" for projected. (INETOR)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0428	GAS SUPPLY AND REQUIREMENTS - CONTINGENCY	2 of 2

Data Field Number	Instructions
3 (Key)	Period From (N6): Enter the date, in the format MMDDYY. (TMDATE)
4 (Key)	Period To (N6): Enter the date, in the format MMDDYY. (TMDATE)
5 (Key)	Type of Service (N2): Enter one of the following codes: (TYGSDP) 13 = Contingency 09 = Company Use and Shrinkage 10 = Exchange Gas Owed
6-17	Volume-Monthly (N9.3) MMCF: Report the monthly volume of normally anticipated loss of supply (contingency) or company use and shrinkage or exchange gas used, in MMCF rounded to three decimal places.
18	Annual Total Volume (N9.3) MMCF: Report the annual total of normally anticipated loss of supply (contingency) or company use and shrinkage or exchange gas used, in MMCF rounded to three decimal places.
19	Peak Day Volume (N9.3) MMCF: Report the peak day of normally anticipated loss of supply (contingency) or company use and skrinkage or exchange gas used, in MMCF rounded to three decimal places.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0429	GAS SUPPLY AND REQUIREMENTS- DELIVERIES-CURTAILMENTS	1 of 2

I. DESCRIPTION

This schedule is used to collect detailed information for gas deliveries, gas curtailments, and the curtailment of pipeline to pipeline.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Natural Gas Pipeline companies, Class A and Class B.

B. Respondents shall complete all data fields on this schedule semiannually.

C. This schedule shall be filed on or before April 30th and September 30th of each year. Report in April 30th filing acutal volumes for the past year, April through March, and projected data for one year April through March. Report in September 30th filing actual volumes for the past year September through August, and projected data for one year September through August.

D. Report all gas volumes in MMCF rounded to three decimal places at at uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

E. "Type volume", data field number 7, will contain a 1 character preprinted code "A", "M" and "C". In data field numbers 8 to 21 report average day volumes against preprinted "A", Monthly volumes against preprinted "M" and cumulative volumes against preprinted "C".

F. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

4 (Key)	Period To (N6): Enter the date, in the format MMDDYY. (TMDATE)
5 (Key)	Indicator Distribution Direct/Resale (N1): Enter "1" for direct, or "2" for resale. (INETOR)
6	Indicator Deliveries/Curtailment (N1): If the actual average MMCF volume is deliveries, enter "1"; if the actual average volume is curtailment, enter "2". (INETOR)
7	Indicator Firm/Interruptible Delivery (N1): Enter "1" for firm, or "2" for interruptible. (INETOR)
8	State Abbreviation (A2): Enter the state abbreviation for the state in which customer is located, from the Register of Data Standards, IDSTAT.
9	County Code (N3): Enter the county code for the county in which customer is located, from the Register of Data Standards, IDCNTY.
10	Customer Code (N6): Enter the customer code, from the Register of Data Standards. IDRESP.
11	Customer Name (A35): Enter the name of pipeline customer, from the Register of Data Standards, IDRESP.
12	Indicator Jurisdictional/Non-Jurisdictional Company (N1): Enter "1" for jurisdictional, or "2" for non-jurisdictional. (INETOR)
13-24	Pipeline Customer Monthly Volume (N9.3) MMCF: Report the volume of the pipeline customer's monthly volume, either deliveries, curtailment or total requirements, in MMCF rounded to three decimal places.
25	Annual Total Volume (N9.3) MMCF: Enter the total of the twelve months of the year of either deliveries, curtailments or total requirements, in MMCF rounded to three decimal places.
26	Peak Day Volume (N9.3) MMCF: Enter the volume on the peak day, in MMCF rounded to three decimal places.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0435	GAS SUPPLY AND REQUIREMENTS ADJUSTMENTS TO SUPPLY	1 of 2

I. DESCRIPTION

This schedule provides detailed information of sources of present supply adjusted for losses for adjustment to supply (such as seasonal losses, curtailment, scheduled outages, etc.).

II. GENERAL INFORMATION

A. This schedule shall be submitted by Natural Gas Pipeline companies, Class A and Class B.

B. Respondents shall complete all data fields on this schedule semi-annually.

C. This schedule is to be filed on or before April 30th and September 30th of each year. Report in April 30th filing actual volumes for the past year, April through March, and projected data for one year April through March. Report in September 30th filing actual volumes for the past year, September through August, and projectad data for one year September through August.

D. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

E. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes –

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Report Year (N4): Enter the year for which the data is reported, in the format YYYY. (THYEAR)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0435	GAS SUPPLY AND REQUIREMENTS ADJUSTMENTS TO SUPPLY	2 of 2

Data Field Number	Instructions
2 (Key)	Indicator Actual/Projected (N1): Enter "1" for actual, or "2" for projected. (INETOR)
3 (Key)	Period From (N6): Enter the date, in the format MMDDYY. (TMDATE)
4 (Key)	Period To (N6): Enter the date, in the format MMDDYY. (TMDATE)
5 (Key)	Type of Adjustment to Supply (A16): Report the type of present supply adjusted to losses. (TYGSPA)
6 (Key)	Type of Adjustment to Supply Code (A4): Enter the code for the type of adjustment to supply, from the Register of Data Standards, TYGSPA.
7-18	Adjustment to Supply Volume-Monthly (N9.3) MMCF: Report the monthly volume of adjustment to supply, in MMCF rounded to three decimal places.
19	Annual Total Volume (N9.3) MMCF: Enter the total volume of the twelve months of the year, in MMCF rounded to three decimal places.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0436	GAS SUPPLY AND REQUIREMENTS STORAGE SERVICE	1 of 2

I. DESCRIPTION

This schedule is used to collect detailed information for the firm requirements of storage services.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Natural Gas Pipeline companies, Class A and Class B.

B. Respondents shall complete all data fields on this schedule semi-annually.

C. This schedule is to be filed on or before April 30th and September 30th of each year. Report in April 30th filing actual volumes for the past year, April through March, and projected data for one year April through March. Report in September 30th filing actual volumes for the past year, September through August, and projected data for one year September through March.

D. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

E. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes –

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Report Year (N4): Enter the year for which the data is reported, in the format YYYY. (THYEAR)
2 (Key)	Indicator Actual/Projected (N1): Enter "1" for actual, or "2" for projected. (INETOR)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0436	GAS SUPPLY AND REQUIREMENTS STORAGE SERVICE	2 of 2

Data Field Number	Instructions
3 (Key)	Period From (N6): Enter the date, in the format MMDDYY. (TMDATE)
4 (Key)	Period To (N6): Enter the date, in the format MMDDYY. (TMDATE)
5 (Key)	Firm Storage Service (A26): Report the firm requirements of the specific storage service. (IDDESC)
6-17	Storage Service Volume-Monthly (N9.3) MMCF: Report the monthly volume of storage service, in MMCF rounded to three decimal places.
18	Annual Total Volume (N9.3) MMCF: Report the total volume of the twelve months of the year, in MMCF rounded to three decimal places.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0437	GAS SUPPLY AND REQUIREMENTS OTHER FIRM SERVICES	1 of 2

I. DESCRIPTION

This schedule is used to collect detailed information for the firm requirements of other services.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Natural Gas Pipeline companies, Class A and Class B.

B. Respondents shall complete all data fields on this schedule semi-annually.

C. This schedule is to be filed on or before April 30th and September 30th of each year. Report in April 30th filing actual volumes for the past year, April through March, and projected data for one year April through March. Report in September 30th filing actual volumes for the past year, September through August, and projected data for one year September through March.

D. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure basis of 14.73 PSIA at 60° Fahrenheit.

E. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Report Year (N4): Enter the year for which data is reported, in the format YYYY (TMYEAR)
2 (Key)	Indicator Actual/Projected (N1): Enter "1" for actual, or "2" for projected. (INETOR)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0437	GAS SUPPLY AND REQUIREMENTS OTHER FIRM SERVICES	2 of 2

Data Field Number	Instructions
3 (Key)	Period From (M6): Enter the date, in the format MMDDYY. (TMDATE)
4 (Key)	Period To (M6): Enter the date, in the format MMDDYY. (TMDATE)
5 (Key)	Other Firm Services (A26): Report the requirements of the specific other firm service. (IDDESC)
6-17	Other Firm Services Volume-Monthly (N9.3) MMCF: Report the monthly volume of other firm services, in MMCF rounded to three decimal places.
18	Annual Total Volume (N9.3) MMCF: Report the total volume of the twelve months of the year, in MMCF rounded to three decimal places.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0438	GAS SUPPLY AND REQUIREMENTS OTHER ADJUSTMENTS	1 of 2

I. DESCRIPTION

This schedule is used to collect detailed information for other requirement adjustment.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Natural Gas Pipeline companies, Class A and Class B.

B. Respondents shall complete all data fields on this schedule semi-annually.

C. This schedule is to be filed on or before April 30th and September 30th of each year. Report in April 30th filing actual volumes for the past year, April through March, and projected data for one year April through March. Report in September 30th filing actual volumes for the past year, September through August, and projected data for one year September through August.

D. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

E. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Report Year (N4): Enter the year for which the data is reported, in the format YYYY. (TMYEAR)
2 (Key)	Indicator Actual/Projected (N1): Enter "1" for actual, or "2" for projected. (INETOR)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0438	GAS SUPPLY AND REQUIREMENTS OTHER ADJUSTMENTS	2 of 2

Data Field Number	Instructions
3 (Key)	Period From (N6): Enter the date, in the format MMDDYY. (TMDATE)
4 (Key)	Period To (N6): Enter the date, in the format MMDDYY. (TMDATE)
5 (Key)	Other Adjustment Name (A26): Report the specific firm adjustment name. (IDDESC)
6-17	Other Adjustment Monthly Volume (N9.3) MMCF: Report the monthly volume of firm adjustment requirement, in MMCF rounded to three decimal places.
18	Annual Total Volume (N9.3) MMCF: Report the total volume of the twelve months of the year, in MMCF rounded to three decimal places.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0439	GAS SUPPLY AND REQUIREMENTS STORAGE BY FIELD	1 of 2

I. DESCRIPTION

This schedule is used to collect detailed information for the actual and projected storage operations injections (withdrawals) by fields.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Natural Gas Pipeline companies, Class A and Class B.

B. Respondents shall complete all data fields on this schedule semi-annually.

C. The schedule is to be filed on or before April 30th and September 30th of each year. Report in April 30th filing actual volumes for the past year, April through March, and projected data for one year April through March. Report in September 30th filing actual volumes for the past year, September through August, and projected data for one year September through March.

D. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

E. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistant from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. GENERAL INFORMATION

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Report Year (N4): Enter the year for which the data is reported, in the format YYYY. (TMYEAR)
2 (Key)	Indicator Actual/Projected (N1): Enter "1" for actual, or "2" for projected. (INETOR)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0439	GAS SUPPLY AND REQUIREMENTS STORAGE BY FIELD	2 of 2

Data Field Number	Instructions
3 (Key)	Period From (N6): Enter the date, in the format MMDDYY. (TMDATE)
4 (Key)	Period To (N6): Enter the date, in the format MMDDYY. (TMDATE)
5 (Key)	Storage Operation Field Name (A26): Report the specific field name of storage operations, from the Register of Data Standards, IDGPFL.
6 (Key)	Storage Operation Field Code (A6): Enter the field code, from the Register of Data Standards, IDGPFL.
7-18	Storage Operations Field Volume-Monthly (N9.3) MMCF: Report the monthly volume of the storage operation's field, in MMCF rounded to three decimal places.
19	Annual Total Volume (N9.3) MMCF: Report the total volume of the twelve months of the year, in MMCF rounded to three decimal places.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0440	GAS SUPPLY AND REQUIREMENTS STORAGE OPERATIONS ADJUSTMENTS	1 of 2

I. DESCRIPTION

This schedule is used to collect detailed information for storage operations adjustments such as changes in base storage, development of new zones, etc.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Natural Gas Pipeline companies, Class A and Class B.

B. Respondents shall complete all data fields on this schedule semi-annually.

C. This schedule is to be filed on or before April 30th and September 30th of each year. Report in April 30th filing actual volumes for the past year, April through March, and projected data for one year April through March. Report in September 30th filing actual volumes for the past year, September through August, and projected data for one year September through March.

D. Report all gas volumes in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

E. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INFORMATION

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Report Year (N4): Enter the year for which the data is reported, in the format YYYY. (TMYEAR)
2 (Key)	Indicator Actual/Projected (N1): Enter "1" for actual, or "2" for projected. (INETOR)

4 (Key)	Period To (N6): Enter the date, in the format MMDDYY. (TMDATE)
5 (Key)	Storage Operations Adjustment Name (A26): Report the specific storage operations adjustment, such as changes in base storage, development of new zones. (IDDESC)
6-17	Storage Operations Adjustment Volume-Monthly (N9.3) MMCF: Report the monthly volume of adjustments of storage operations, in MMCF rounded to three decimal places.
18	Annual Total Volume (N9.3) MMCF: Report the total volume of the twelve months of the year, in MMCF rounded to three decimal places.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0441	MONTHLY INTERSTATE PIPELINE CURTAILMENTS	1 of 2

I. DESCRIPTION

This schedule is used to collect detailed information about customers of respondents and their curtailed volumes.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Natural Gas Pipeline companies, Class A and Class B.

B. Respondents shall complete all data fields on this schedule monthly.

C. Report all gas volumes in MMCF roundad to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

D. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Report Month (N2): Report the numeric month of submission of report, in the format MM. (TMMOYR)
2 (Key)	Date Curtailment Commenced (N6): Enter the date curtailment commenced, in the format MMDDYY. (TMDATE)
3	Duration of Curtailment in Days (N2) DY: Report no more than thirty-one days for each month's curtailment.
4	Base Terminal Volume Curtailment (N2): Enter the base from which the volumes curtailed were determined, from the Register of Data Standards, TYCTBS.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0441	MONTHLY INTERSTATE PIPELINE CURTAILMENTS	2 of 2

Data Field Number	Instructions
5 (Key)	Jurisdictional Companies Curtailing Respondents (A35): State the name of the jurisdictional company who has curtailed the respondent during the reporting month, from the Register of Data Standards, IDRESP.
6	Duration Respondent Was Curtailed in Days (N3) DY: Report the number of days of curtailment duration for the jurisdictional companies curtailing respondents.
7 (Key)	Rate Schedule Tariff (A5): Enter a single rate schedule tariff for each customer combined with volume curtailed. (IDRATE)
8	Customer Name (A35): Report the name of each curtailed customer of the respondent. (IDNAME)
9	State Abbreviation (A2): Enter the state abbreviation, from the Register of Data Standards, IDSTAT.
10	Indicator Firm/Interruptible (N1): Enter "1" for firm customer, or "2" for interruptible customer. (INETOR)
11	Indicator Jurisdictional/Non-Jurisdictional (N1): Enter "1" for jurisdictional customer, or "2" for non-jurisdictional customer. (INETOR)
12	Volume Curtailed (N5.3) MMCF: Report the volume curtailed, in MMCF rounded to three decimal places.
13	Indicator Intercompany Curtailment (N1): Enter "1" for intercompany curtailment by customer, or "2" when intercompany has not been curtailed by customer. (INYONO)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0442	ANNUAL UNDERGROUND STORAGE TOTALS	1 of 2

I. DESCRIPTION

This schedule is used to collect information on total underground storage operations by respondent.

II. GENERAL INFORMATION

A. This schedule shall be submitted by all Class A and Class B Natural Gas pipeline companies who own, operate, or lease underground storage facilities.

B. Respondents shall complete all data fields on this schedule annually.

C. Report all gas volumes in MMCF, rounded to three decimal places, at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

D. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

E. The totals reported on this schedule shall equal the sum of the field quantities reported on Schedule 0410.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1	Quantity Total Base Gas (N9.3) MMCF: Enter the total volume of base (cushion) gas in all storage fields at the end of the year.
2	Quantity Total Working Gas (N9.3) MMCF: Enter the total volume of working gas (top storage) in all storage fields at the end of the year.

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0840	SALES OF NATURAL GAS BY COMMUNITIES	1 of 3

I. DESCRIPTION

This schedule is used to collect the details of sales of natural gas in communities of 10,000 population or more.

II. GENERAL INFORMATION

A. This schedule shall be submitted by all Class A and Class B Natural Gas Pipeline companies.

B. Respondents shall complete all data fields on this schedule annually.

C. Complete the information called for below for sales of gas in each community of 10,000 population or more, or according to operating districts constituting distinct economic areas if the respondent's records do not readily permit reporting by communities. Except for state boundaries, community areas need not hold rigidly to political boundaries and may embrace a metropolitan area and immediate environs. The information called for by this schedule, however, may be reported by individual communities of such size as required by a state regulatory commission concerned. Report in total for each state, sales by classes of service in other communities of smaller size. Main line sales to residential and commercial consumers, are to be reported in total by states. DO NOT include on this schedule Field and Main Line Sales to Industrial Customers. This data is to be reported on Schedule 0862, Field and Main Line Industrial Sales of Natural Gas.

D. Natural gas is defined for this schedule as either natural gas unmixed, or any mixture of natural or manufactured gas.

E. All volumes shall be reported in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

F. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

DETAILED INSTRUCTIONS: SCHEDULE 0840	SALES OF NATURAL GAS BY COMMUNITIES	3 of 3

Data Field Number	Instructions
14	Average Number of Industrial Customers (N5) NO: Enter the average number of industrial customers served within the community.
15	Total Operating Revenue (N8) DOL: Enter the total operating revenue received from residential, commercial and industrial sales in the community.
16	Total Quantity of Gas Sold (N7.3) MMCF: Enter the total volume of gas sold to residential, commercial and industrial customers served in the community, in MMCF rounded to three decimal places.
17	Average Number of Total Customers (N5) NO: Enter the average number of total residential, commercial and industrial customers served within the community.
18	Indicator Mixed Gas (N1): Enter "1" in this data field if the gas sold to the community is mixed; if not, enter "0". (INYONO)
19	Percentage of Natural Gas in Mixture (N2.1) PCT: Enter the percentage of natural gas in the mixture, rounded to one decimal place. If gas is unmixed, leave this data field blank.
20	Description of Components of Mixed Gas to the Community (A70): Describe the components of mixed gas sold to the community; i.e., whether natural and oil refinery gases, natural and coke oven gases, etc. (IDDESC)

FPC Form 151
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0841	FIELD AND MAIN LINE INDUSTRIAL SALES OF NATURAL GAS	1 of 3

I. DESCRIPTION

This schedule is used to collect the details of natural gas sales to industrial customers served other than from local distribution systems operated by the respondent classifying between field sales and main line transmission sales.

II. GENERAL INFORMATION

A. This schedule shall be submitted by all Class A and Class B Natural Gas Pipeline respondents.

B. Respondents shall complete all data fields on this schedule annually.

C. Field sales are defined as sales made from wells, from points along gathering lines in gas fields or production areas or from points along transmission lines within field or production areas.

D. Transmission sales are defined as sales made from points along transmission lines not within gas fields or production areas.

E. Natural gas is defined as either natural gas unmixed or any mixture of natural or manufactured gas.

F. Report separately sales to each field and main line industrial customer to which sales of 50 MMCF or more were made during the year. Other sales should be reported in total for each state, showing number of sales so grouped.

G. All volumes shall be reported in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

H. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

DETAILED INSTRUCTIONS: SCHEDULE 0841	FIELD AND MAIN LINE INDUSTRIAL SALES OF NATURAL GAS	2 of 3

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1	Indicator Field/Main Line (A1): Enter either "1" for field sale or "2" for main line sale. (INETOR)
2	Indicator Mixed Gas (N1): Enter "1" in this data field if the gas sold was mixed gas; if not, enter "0". (INTGMO)
3	Percentage of Natural Gas in Mixture (N2.1) PCT: Enter the percentage of natural gas in the mixture, rounded to one decimal place. If gas is unmixed, leave this data field blank.
4	Indicator Small/Large Certificate Sale (N1): Enter the type of certificate under which sale was made. Enter "1" for small or "2" for large. (INSLGM)
5	Docket Number (A9): Enter the latest effective docket number in which the delivery was authorized, including hyphen. (IDDCKT)
6	Field or Main Line Customer Name (A35): Enter the name of the field or main line customer who purchases 50 MMCF or more of gas during the reporting period. (IDNAME)
7	Indicator Associated Company (N1): Enter "1" if the customer is an associated company; if not, enter "0". (INTGMO)
8	Point of Delivery, State Abbreviation (N2): Enter the state abbreviation for delivery point, from the Register of Data Standards, IDSTAT.
9	Point of Delivery, County Code (N3): Enter the county code for delivery point, from the Register of Data Standards, IDCNTY.
10	Type of Sale (N1): Enter one of the following codes indicating type of sale: (TYPLPR) 6 = Firm 7 = Off peak 5 = Interruptible 4 = Other
11	BTU Per Cubic Foot of Gas (N4.2) BTU/CF: Enter the British Thermal Units (BTU) per cubic foot of gas.

FPC Form 151
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0841	FIELD AND MAIN LINE INDUSTRIAL SALES OF NATURAL GAS	3 of 3

Data Field Number	Instructions
12	Quantity of Gas Sold (N7.3) MMCF: Enter the volume of gas sold, in MMCF rounded to three decimal places.
13	Total Revenue (N9) DOL: Enter the total dollar revenue for gas sold.
14	Revenue Portion Due to Adjustments (N7) DOL: Enter the adjustment portion due to adjustment provisions such as purchased gas, tax, BTU or other rate adjustments. The difference between data field 13 and data field 14 should be the revenues resulting from the base contract rate named in the docket entered in data field 5 above, Docket Number. The effect of purchased gas, tax, BTU, or other rate adjustment provision shall be shown as the quotient of the total annual revenues received for the year from the application of each rate adjustment provision divided by the annual volume of gas delivered.
15	Cents Per MCF - Total Revenue (N3.2) CTS/MCF: Enter the amount of cents per MCF for the total revenue, rounded to two decimal places.
16	Cents Per MCF - Adjustments (N3.2) CTS/MCF: Enter the cents per MCF for the portion due to adjustments, rounded to two decimal places.
17	Date Noncoincidental Peak Day Delivery (N6): Enter the date of the noncoincidental peak day delivery, in the format MMDDYY. (TMDATE)
18	Quantity Noncoincidental Peak Day Delivery (N7.3) MMCF: Enter the volume of the noncoincidental peak day delivery, in MMCF rounded to three decimal places. Indicate estimate by entering an "E" in the last character position of the data field.
19	Quantity Coincidental Peak Day Delivery (N7.3) MMCF: Enter the volume of coincidental peak day delivery, in MMCF rounded to three decimal places. Indicate estimate by entering an "E" in the last character position of the data field.
20	Date Coincidental Peak Day Delivery (N6): Enter the date of the coincidental peak day delivery, in the format MMDDYY. (TMDATE)
21	Standard Industrial Code (SIC) (N4): Enter the code, from the Register of Data Standards, TYSICL.
22	Description of Components of Mixed Gas (A72): Describe the components of mixed gas sold to customer, i.e., whether natural and oil refinery gases, natural and coke oven gases, etc. (IDDESC)

FPC Form 151

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0842	NATURAL GAS SALES FOR RESALE	1 of 4

I. DESCRIPTION

This schedule is used to collect the details of natural gas sales to other gas utilities and to pipeline companies for resale.

II. GENERAL INFORMATION

A. This schedule shall be submitted by the following categories of Natural Gas Pipeline respondents:

Respondent Category	Data Field
(1) Class A and Class B Natural Gas Pipeline	All
(2) Class C and Class D Natural Gas Pipeline	1-12,16,19

B. Respondents shall complete all specified data fields on this schedule annually.

C. Report the particulars concerning sales of natural gas to other utilities and to pipeline companies for resale.

D. Natural gas means either natural gas unmixed, or any mixture of natural and manufactured gas.

E. Field sales are defined as sales made from wells, from points along gathering lines in gas fields or production areas or from points along transmission lines within fields or production areas.

F. Main lines (transmission) sales are defined as sales made from points along transmission lines not within gas fields or production areas.

G. Where consolidated bills for more than one point of delivery are rendered under an FPC rate schedule, the first point of delivery shall be entered on this schedule in data fields 6 and 7 and the additional points of delivery shall be entered on Schedule 0843. The remainder of the data reported on a consolidated basis corresponds to the billing. However, when consolidated bills for more than one point of delivery are not rendered under an FPC rate schedule, a logical entry will be completed for each point of delivery.

H. If deliveries are made to one customer at more than one delivery point, the peak day deliveries for the first delivery point shall be entered in data fields 14-15, and 17-18. Subsequent entries for peak day deliveries shall be entered in the logical entries for each point of delivery if the billing is on a non-conjunctive basis. The peak day deliveries should be shown in total for each customer if the billing is on a conjunctive basis.

I. All volumes shall be reported in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit.

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0842	NATURAL GAS SALES FOR RESALE	2 of 4

J. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent-assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Field or Main Line Sale Indicator (N1): Enter one of the following codes: (INETOR) 1 = Field sale 2 = Main line
2 (Key)	Type of Sale (N1): Enter one of the following codes: (TYFLPR) 6 = Firm 7 = Off peak 5 = Interruptible 4 = Other
3 (Key)	Type Customer (N1): Enter one of the following codes: (TYCSSA) 1 = Interstate pipeline company 2 = Intrastate pipeline companies for resale under FPC schedules 3 = Gas utilities for resale under FPC rate schedules 4 = Other Note: For field sales only, codes 1 or 4 are valid entries.

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0842	NATURAL GAS SALES FOR RESALE	3 of 4

Data Field Number	Instructions
4 (Key)	Customer Name (A35): Enter the name of company to whom the delivery was made. (IDNAME)
5	Associated Company Indicator (N1): Enter "1" if the company is an associated company; if not, enter "0". (INYONO)
6 (Key)	Point of Delivery, State Abbreviation (A2): Enter the state abbreviation for delivery point, from the Register of Data Standards, IDSTAT. For multiple location entries, see General Information, II-G.
7 (Key)	Point of Delivery, County Code (N3): Enter the county code for delivery point, from the Register of Data Standards, IDCNTY. For multiple location entries, see General Information II-G.
8	Tariff Rate Schedule (A6): Enter the rate schedule under which gas was sold. (IDDESC)
9	BTU Per Cubic Foot of Gas (N4.2) BTU/CF: Enter the British Thermal Units (BTU) per cubic foot of gas.
10	Quantity of Gas Sold (N7.3) MMCF: Enter the volume of gas sold, in MMCF rounded to three decimal places.
11	Total Revenue (N8) DOL: Enter the total dollar revenue for gas sold.
12	Average Cents Per MCF (N3.2) CTS/MCF: Enter the average cents per MCF for the total revenue, rounded to two decimal places.
13	Quantity Sum of Monthly Billing Demand (N7.3) MMCF: Monthly billing demands, as used in this data field are the number of MMCF in the respective months actually used in computing the demand portion of the customer's bills whereby such number of MMCF is multiplied by the demand portion of the tariff rate. Report in this data field the sum of the monthly billing demands for the number of months the customer received service or was subject to demand charges.
14	Quantity Noncoincidental Peak Day Delivery (N5.3) MMCF: Enter the volume of the noncoincidental peak day delivery, in MMCF rounded to three decimal places, for firm sales of 25,000 MMCF or more only. Indicate estimated volume by entering an "E" in the last character position of the data field. For multiple deliveries and non-conjunctive billings, see General Instruction, II-H.

FPC Form 131

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0843	MULTIPLE POINTS OF DELIVERIES FOR SALES FOR RESALE	1 of 2

I. DESCRIPTION

This schedule details the multiple points of deliveries from Schedule 0855, when the billing is on a consolidated basis.

II. GENERAL INFORMATION

A. This schedule shall be submitted by all Class A and Class B Natural Gas Pipeline respondents.

B. Respondents shall complete all data fields on this schedule annually.

C. This schedule is a supplement to Schedule 0842 and is to be used only when there are multiple delivery points and consolidated bills are rendered under an FPC rate schedule.

D. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Indicator Field/Main Line Sale (N1): Enter one of the following codes: (INETOR) 1 = Field sale 2 = Main line

DETAILED INSTRUCTIONS: SCHEDULE 0844	GAS STORED FOR OTHERS	1 of 1

I. DESCRIPTION

This schedule is used to collect information on gas stored for others by respondent, in underground storage.

II. GENERAL INFORMATION

A. This schedule is a supplement to Schedule 0410, Annual Underground Storage Summary, and shall be submitted by Class A and Class B Natural Gas pipeline companies who have indicated that gas is stored for others.

B. Respondents shall complete all data fields on this schedule in their first submission. On subsequent submissions, respondents shall submit only appropriate identification (key data fields) and changed values, additions and deletions.

C. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1	Field Code (N6): Enter the code identifying storage field, from the Register of Data Standards, IDGFFL.
2	Reservoir ID (N6): Enter the unique, sequential (respondent assigned) code identifying the reservoir, from the Register of Data Standards, NRCADL. See General Information, II-C.
3	Customer Name (A26): Enter the name of the customer for whom gas is stored. (IDNAME)
4	Quantity of Gas Stored (N6.3) MMCF: Enter the quantity of gas stored for customer, in MMCF rounded to three decimal places.

FPC Form 131

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0845	TAKE-OFF-POINTS, SMALL GROUP AND CONJUNCTIVE SALES	1 of 2

I. DESCRIPTION

This schedule is used to collect information on small group deliveries and conjunctive billing.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A Natural Gas Pipeline companies having a system delivery capacity in excess of 100,000 MCF per day; where deliveries to a single customer are made at two or more points and conjunctive billing is used to determine charges, the volumes delivered shall be reported on the conjunctive basis; small deliveries (less than 200 MCF per day) which have little or no effect upon the operation of the pipeline may be grouped in an appropriate manner, i.e., between compressor stations or the last main line compressor station and the end of the pipeline.

B. Respondents shall complete all data fields on this schedule annually.

C. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes –

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Transmission Line Code (A6): Enter the unique (respondent assigned) code identifying transmission line. (IDEQPT)
2,4 (Key)	Compressor Station Code (A6): Enter the unique (respondent assigned) code identifying compressor stations between which deliveries were made. If deliveries were made between last compressor station and end of line, report in data field 2 only, leaving data field 4 blank. (IDEQPT)

DETAILED INSTRUCTIONS: SCHEDULE 0846	UNAUTHORIZED OVERRUNS - PENALTIES AND WAIVERS	1 of 2

I. DESCRIPTION

This schedule is used to collect information on unauthorized overrun gas, penalties and waivers of penalties.

II. GENERAL INFORMATION

A. This schedule shall be completed by Class A and Class B Natural Gas Pipeline respondents from who resale customers took unauthorized overrun gas.

B. Respondents shall complete all data fields on this schedule annually.

C. Respondent Assigned Codes: All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes –

- Reservoir I.D.
- Transmission Line Code

DETAILED INSTRUCTIONS: SCHEDULE 0847	CAPACITY OF UNDERGROUND STORAGE RESERVOIRS	1 of 2

I. DESCRIPTION

This schedule is used to collect data pertaining to the location and capacity of each underground storage reservoir operated by the respondent and used in compiling underground gas storage data.

II. GENERAL INFORMATION

A. This schedule shall be submitted by all Class A and Class B Natural Gas companies subject to Federal Power Commission jurisdiction that operate underground natural gas storage fields in the United States.

B. Respondents shall complete all data fields on this schedule in their first submission. On subsequent submissions, respondents shall submit only appropriate identification (key data fields) and changed values, additions and deletions.

C. All capacities will be reported in MMCF rounded to three decimal places.

D. Respondent Assigned Codes. All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Field Code (A6): Enter the FPC assigned code number, from the Register of Data Standards, IDCPFL. If the field code is not listed, contact the Head, Supply and Production Section, BNG, Federal Power Commission, and a code will be assigned.
2 (Key)	Reservoir ID (N6): Enter a unique, sequential (respondent assigned) identification code, as specified in the Register of Data Standards, NRCADL.

FPC Form 131 (3-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0847	CAPACITY OF UNDERGROUND STORAGE RESERVOIRS	2 of 2

Data Field Number	Instructions
3	Field Name (A20): Enter the corresponding field name identifying each underground storage reservoir. (IDGPFL)
4 (Key)	State Abbreviation (A2): Enter the two character state abbreviation, from the Register of Data Standards, IDSTAT.
5 (Key)	County Code (N3): Enter the three digit county code, from the Register of Data Standards, IDCNTY.
6	Reservoir Storage Capacity (N10.3) MMCF: Report the certificated storage capacity of each reservoir, in MMCF rounded to three decimal places.
7	Field Status Code (A1): Enter one of the following codes: (TYGRST) A = Active P = Proposed R = Reinstated D = Development Stage F = Future Abandonment
8	Joint Ownership Indicator (N1): Enter a "1" if joint ownership; if not, enter "0". If joint ownership exists, respondent must complete Schedule 0851. (INYONO)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0848	NATURAL GAS PIPELINE SYSTEM MAPS	1 of 2

I. DESCRIPTION

A system map(s) shall depict the facilities operated by the respondent for the production, gathering, transportation and sale of natural gas.

II. GENERAL INFORMATION

A. A system map(s) shall be submitted by all Class A and Class B Natural Gas pipeline companies subject to the jurisdiction of the Federal Power Commission.

B. The respondent shall submit the map(s) with the initial submission. Subsequent filings need not include the system map if no change has occurred in the facilities operated by the rapondent since the previous year's annual submission. However, if maps are not furnished for this reason, a written statement shall be submitted in lieu of the maps, stating the date of the raport period in which the maps were submitted.

C. Each map shall indicate the following:

(1) Graphic scale to which map is drawn.

(2) Date as of which the map represents the facts it purports to show.

(3) A legend giving all symbols and abbreviations used.

(4) Designation of facilities leased to or from another company, giving name of such other company.

D. Maps not larger than 24 inches square are desired. Larger maps may be submitted, however, if necessary to show essential information; the maps should be folded to 8 1/2" x 11" size.

III. DETAILED INSTRUCTIONS

The following information is to be indicated on the map(s):

(a) Transmission lines (colored in red), if they are not otherwise clearly indicated.

(b) Principal pipeline arteries of gathering systems.

(c) Sizes of pipe in principal pipelines shown on map.

(d) Normal directions of gas flow, indicated by arrows.

(e) Location of natural gas fields or pools in which the respondent produces or purchases natural gas.

(f) Location of compressor stations, products extraction plants, underground storage areas, recycling areas, stabilization plants, important purification plants, etc.

FPC Form 131 (3-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0848	NATURAL GAS PIPELINE SYSTEM MAPS	2 of 2

(g) Important main line interconnections with other natural gas companies, indicating in each case whether gas is received or delivered and name of connecting company.

(h) Principal communities in which respondent renders local distribution service.

FPC Form 131 (3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0849	GAS PROCUREMENT ACTIVITY STATEMENT	1 of 1

I. DESCRIPTION

This schedule is used to collect details of gas procurement activity during the report year.

II. GENERAL INFORMATION

A. This schedule shall be completed by all Natural Gas pipeline companies subject to the jurisdiction of the Federal Power Commission.

B. Respondents shall complete all data fields on this schedule annually.

C. This schedule is narrative in format. Each line entry will contain a paragraph number, a line sequence number, and the narrative description of the activity. The descriptive information will be limited to 70 character positions per line entry. The description will include a general statement on, but not limited to:

(1) The company's gas procurement activity including future supply additions.

(2) The status of exploration and development activity in, or near, the general producing areas traversed by or available to the pipeline system to provide information which may be relied upon by the respondent with respect to applications for certificates under Section 7(c) of the Natural Gas Act (Statement of Policy, Docket Number P-239, 18 CFR 260.7).

(3) Future contract additions.

D. This schedule should be used to support and provide additional data for Schedule 0402, Pipeline System Deliverability Summary.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1	Paragraph Number (N2): Enter a two-digit paragraph sequence number. (NRCADL)
2	Line Sequence Number (N3): Enter a three-digit line sequence number within each paragraph. (NRCADL)
3	Activity Statement (A70): Enter the narrative description. (IDDESC)

FPC Form 131

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0850	GAS SUPPLY PRODUCING AREAS - MAPS	1 of 2

I. DESCRIPTION

The map(s) to be provided with this schedule shall cover the producing areas traversed by the pipeline system as supporting documentation of Schedules 0404 through 0407.

II. GENERAL INFORMATION

A. The map(s) shall be submitted by all Class A and Class B Natural Gas pipeline companies subject to the jurisdiction of the Federal Power Commission.

B. The respondent shall submit the map(s) with the initial submission. Subsequent filings need not include the system map if no change has occurred in the facilities operated by the respondent since the previous year's submission. However, an alphabetical listing by fields of such reservoirs and the report year in which they were filed will be included as the first page, or pages, of this map schedule.

III. DETAILED INSTRUCTIONS

Each company shall submit:

1. A general map or maps covering the producing areas traversed by the pipeline system showing the location of the following:

(a) The principal facilities operated by the company including all principal pipeline facilities and processing plants used to deliver gas to its main pipeline system, indicating plant operator if other than company.

(b) River crossings and principal political divisions.

(c) The location of each gas supply source including production and storage fields, together with a clearly outlined reference to the field maps required by item 2 below.

2. A map shall be submitted for each field, except where more than one field can be shown without confusion on a single map. These maps shall be at a scale no smaller than one inch equals one mile, 1/5,280 (the denominator of this fraction shall be no larger than 5,280), clearly lettered and legible. All field maps shall be inserted following the general pipeline map or maps, item 1, alphabetically by field and shall include the following:

(a) The name of the field(s), the field code(s), the field location (state, county or parish) and if applicable, the group name and group code, from the Register of Data Standards, IDGPFL and IDGSPG.

(b) Every reservoir on each map - identified by name.

(c) Date of reporting year in which map is submitted, in the format MMDDYY.

(d) All survey and section lines - clearly identified.

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0850	GAS SUPPLY PRODUCING AREAS - MAPS	2 of 2

(e) Acreage committed to the company for each reservoir.

(f) The proven productive limits of each reservoir, where known - outlined and identified.

(g) All oil wells, gas wells and dry holes, including wells outside the reservoir limits, which were considered in making the gas reserve estimates for the reservoir.

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS. SCHEDULE 0851	OWNERSHIP OF UNDERGROUND STORAGE RESERVOIRS	1 of 2

I. DESCRIPTION

This schedule is used to collect the percent of ownership of each underground storage reservoir held in joint ownership.

II. GENERAL INFORMATION

A. This schedule shall be submitted by all Class A and Class B Natural Gas companies subject to Federal Power Commission jurisdiction who operate underground storage reservoirs under joint ownership.

B. Respondents shall complete all data fields on this schedule in their first submission. On subsequent submissions, respondents shall submit only appropriate identification (key data fields) and changed values, additions and deletions.

C. Respondent Assigned Codes. All of the codes designated as "respondent assigned" must be numerical, beginning with "000001" and continuing in a numerical sequence until all components (or groups of components) of a similar type have been assigned a unique code. If a component (or group of components) is referenced in more than one schedule, it is essential that the same code be used to identify each component (or group of components). Therefore, each respondent must identify each component (or group of components) by a unique, sequential code. These codes must be consistent from schedule to schedule and from year to year.

Note: If a respondent has previously assigned UNIQUE codes to components (or groups of components) these codes may be used instead of sequential codes. These codes must be consistent from schedule to schedule and from year to year.

Examples of components or groups of components which require respondent assigned codes -

- Reservoir I.D.
- Transmission Line Code
- Compressor Station Code

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Field Code (A6): Enter the FPC assigned code number, from the Register of Data Standards, IDGPFL. If the field code is not listed, contact the Head, Supply and Production Section, BNG, Federal Power Commission, and a code will be assigned.
2 (Key)	Reservoir ID (N6): Enter a unique, sequential (respondent assigned) identification code, as specified in the Register of Data Standards, NRCADL.

FPC Form 131

DETAILED INSTRUCTIONS: SCHEDULE 0851	OWNERSHIP OF UNDERGROUND STORAGE RESERVOIRS	2 of 2

Data Field Number	Instructions
3	Percent of Respondent Ownership in Reservoir (N3.2) PCT: Enter the percent of respondent ownership in the underground storage reservoir, rounded to two decimal places.
4	Name of Co-Owners (A26): Indicate the name of each co-owner. (IDNAME)
5	Percent of Co-Owner Interest (N3.2) PCT: Enter the percent of co-owner interest in the underground storage reservoir, rounded to two decimal places.
6	State Abbreviation (A2): Enter the state abbreviation in which the field (data field 1 above) is located, from the Register of Data Standards, IDSTAT.

FPC Form 131
(3-76)

DETAILED INSTRUCTIONS: SCHEDULE 0853	DISCLOSURE OF OTHER GAS SUPPLY FILINGS WITH FEDERAL AGENCIES	1 of 1

I. DESCRIPTION

This schedule is used to collect information on disclosure of other gas supply filings with Federal agencies.

II. GENERAL INFORMATION

A. This schedule is a supplement to Schedule 0401, Pipeline Gas Supply Synopsis, and shall be submitted by Natural Gas pipeline companies who have indicated a gas supply statement filed with other agency(ies).

B. Respondents shall complete all data fields on this schedule annually, subject to II-A above.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1	Filing Party (A35): Enter the name of the filing party: the respondent, its parent company, or an affiliate. (IDNAME)
2	Name of Report (A25): Enter the name of the report filed. (IDDESC)
3	Date of Report (N6): Enter the date the report was submitted, in the format MMDDYY. (TMDATE)
4	Recipient Government Agency (A35): Enter the name of the other Federal Government agency the report was filed with. (IDNAME)
5	Reconciliation of Any Gas Reserve Differences (A249): Describe that portion of the gas supply included in each filing belonging to the respondent which is different from that reported in the respondent's current report year filing. (IDDESC)

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0000	FOOTNOTES TO FPC PUBLIC USE SCHEDULES	1 of 2

I. DESCRIPTION

This schedule is used to collect the text for all footnote references for a respondent submission.

II. GENERAL INFORMATION

A. This schedule shall be submitted when applicable by all respondents for reporting footnotes to FPC Public Use Schedules.

B. The footnote reference numbers must be unique within a particular submission.

C. The respondent has to indicate two major types of footnotes.

1. General Footnote - The General Footnote can refer to either the entire schedule or one data field on the schedule, i.e. all data which is reported for data field 5 on the schedule not just one specific value for data field 5.

2. Specific Footnote - The Specific Footnote can refer either to an entire logical entry, i.e. group of related data which separates as an entity on a schedule or a data item within the logical entry.

The following entries are provided as an example:

Type Footnote	Data Field 2 (Footnote No.)	Data Field 3 (Ref. ID)
1. General Footnote		
a. Entire schedule	001	GEN
b. All data values for data field 5 entries on this schedule	001	005
All data values for data field 6 entries on this schedule	001	006
2. Specific Footnote		
a. Entire logical entry	002	GEN
b. Data item entry	002	004
	002	006
	002	008

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number.

FPC Form 151
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0000	FOOTNOTES TO FPC PUBLIC USE SCHEDULES	2 of 2

Data Field Number	Instructions
1 (Key)	Schedule Number (N4): Enter the number of the schedule on which the footnote reference number was assigned, e.g., 0501 or 0505.
2 (Key)	Footnote Number (N3): Enter the unique footnote reference number from 001-999 for each particular submission.
3 (Key)	Reference Identification (A3): Enter "GEN" for Type 1a and 2a footnotes, i.e., footnotes that apply to the entire schedule (or to an entire logical entry) or enter the appropriate data field number for the specific data field value being footnoted (Type 1b or 2b).
4 (Key)	Line Sequence Number (N2): Enter 01, 02 etc., for each successive line of text.
5 (Key)	System Code (N6): This data field applies only to Electric respondents reporting data by syatem. Enter the six digit number code for the system, from the Register of Data Standards, IDSYST.
6 (Key)	Plant ID (N5): This data field applies only to Electric reapondents reporting data by plant. Enter the five digit numeric code for the plant, from the Register of Data Standards, IDPLNT.
7 (Key)	Project Development Code (A5): This data field applies only to Electric respondents reporting data by license projects. Enter the five digit numeric code for the license project, from the Register of Data Standards, IDLPRJ.
8	Text (A72): Enter the text of the footnote. Use successive lines as required for text. Repeat Data Fields 1-3, 5 or 6 as applicable, and increment Data Field 4 (Line Sequence Number) by 1.

FPC Form 151

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 1000	SUPPORTING DOCUMENTATION	1 of 1

I. DESCRIPTION

This schedule is used to collect schedule related supporting documentation not required by the Public Use Schedules.

II. GENERAL INFORMATION

A. This schedule shall be submitted by any Federal Power Commission respondent who desires to provide supportive documentation or any additional information relating to the Public Use Schedules.

B. This schedule shall be completed only as deemed necessary by the respondent or where specifically requested by detailed instructions for other schedules.

[Docket No. RM76-28]

CORPORATE AND FINANCIAL REPORT FOR CLASS C AND CLASS D NATURAL GAS COMPANIES

Proposed New FPC Form No. 155

JULY 30, 1976.

Notice is hereby given pursuant to the Administrative Procedure Act, 5 U.S.C. 553 and sections 8, 9, 10(a), 14, 15, and 16 of the Natural Gas Act, (52 Stat. 825, 826, 828, 829, 830, 15 U.S.C. 717g, 717h, 717i, 717m, 717n, 717o), that the Commission gives notice it proposes to add § 260.24 to Part 260 of the Approved Forms under the Natural Gas Act to provide that new FPC Form No. 155 be required for reporting. The proposed new form would be entitled "Corporate and Financial Report for Class C and Class D Natural Gas Companies."

During a period of critical natural gas shortages, such as the nation is currently experiencing, the public interest requires that the Commission have available to its current and continuing information on the operations of companies which transport natural gas in interstate commerce. The interests of those companies regulated by the Commission also require an efficient and progressive means of regulation.

On September 26, 1973, in Docket No. R-438, the Commission issued Order No. 494, amending Part 2, Chapter I, Title 18 of the Code of Federal Regulations and setting forth Commission policy for the development of a fully automated computer regulatory system to provide such information. When developed and fully operative, the system will provide prompt and ready access to data contained in a central electronic data bank, eliminating the duplication of information now collected and reducing the quantity of existing manual files. This system will not only facilitate the evaluation and analysis of all data, but it will also accommodate the development of new regulatory techniques.

In Order No. 494, the Commission stated that all existing "hard copy" public use forms would be redesigned and consolidated to eliminate redundancies and that instructions for reporting would be clarified by use of Electronic Data Processing (EDP) Technology. Public use form information, as it is presently submitted, will be replaced by the submission of individual data elements within a general data element and code scheme. It is anticipated that this major system revision will result in the reduction of the total number of data items currently transmitted to the Commission by the respondents.

In Order No. 494, the Commission further stated that the development of the automated computer information system would be effected through the use of phased rulemaking proceedings in which various Commission reporting procedures and report forms would be restructured. To this end, Form No. 155 is designed to incorporate into a readily retrievable data processing system the corporate information and financial data currently submitted on FPC Form No. 2A.[1]

It is proposed that the present Annual Report Form No. 2A would be subdivided into two separate and distinct reporting portions. The corporate information and financial data portion would be embodied in a new report Form No. 155 under a new reporting system, which is discussed further in this rulemaking. The operation data portion would be incorporated under a separate report system and will be the subject of a separate rulemaking.

The general changes which are being proposed to the Commission's reporting requirements for the new report Form No. 155 are as follows:

1. For the most part, the requirements for all beginning of year figures (or end of previous year figures) and all comparison figures (increases/decreases and previous year/month figures) have been eliminated.

2. Duplicative data elements (data elements appearing on more than one schedule) have been eliminated to the extent feasible.

3. The filing requirement for certain information that experiences little change from year to year (often referred to as fixed data) is proposed to be reported completely in the initial submission, with only changed values being reported in subsequent submissions.

In addition to the changes described above, the Commission's filing requirements contained in the proposed Form No. 155 have been arranged, for the purpose of achieving more efficiency in the collection process. Respondents would be asked to utilize newly established account numbers as a supplement to the accounts contained in the Uniform Systems of Accounts for reporting purposes. Respondents would not be required to maintain these new accounts in their books of accounts or in their record-keeping system.

Specific details of the proposed reporting scheme and related procedures are included as separate attachments to this rulemaking as follows:

Attachment A contains general information about the preparation and submission of public use schedules. Specifically, the attachment covers the administrative background, standard definitions, general procedures for schedule preparation, rules for data preparation, data maintenance activities, and data keying and verification instructions, all known as Level I instructions.

Attachment B contains general subject instructions for corporate and financial schedules. Specifically, the attachment covers general information surrounding corporate and financial schedules, respondent coverage, standard definitions and codes, and general instructions, all known as Level II instructions.

Attachment C contains detailed instructions for each specific schedule to be submitted by the respondent, all known as Level III instructions.

Attachment D is a comparison and cross reference list. This list cross references current reporting requirements with that proposed, at the same time describing additions, deletions, and other pecularities related to the changeover.

Attachments E are data standards.

Attachment F contains a sample of schedules to be submitted by the respondent.

It is anticipated that a one-year period of parallel reporting will be required for system evaluation. Assuming successful operation of the new system within such time period, the present Form No. 2A for these respondents would then be eliminated.

All data and information submitted pursuant to this proposed form would be required to be subscribed and verified by a duly authorized executive officer of the respondent as being factually accurate and complete to the best of his or her knowledge according to the Commission's Rules of Practice and Procedures (18 CFR, Part 1). An original and four copies of each completed Form No. 155 would be required to be sent to the Federal Power Commission.

The Commission is considering the possibility of making available, through the Office of Public Information, copies of the input schedules as received, copies of verified hard copy printouts of the input schedules, and hard copy printouts of certain financial statements in a format similar to pages of the current public use forms.

Any interested person may submit to the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, to be received no later than September 29, 1976, data, views, comments or suggestions in writing concerning all or part of the proposed forms. Written submittals will be placed in the Commission's public files and will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, NE., Washington, D.C. 20426, during regular business hours. The Commission will consider all such written submittals before acting on the matters herein proposed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Submittals to the Commission should indicate the name, title, mailing address and telephone number of the person to whom communications concerning the proposal should be addressed, and whether the person filing them requests a conference with the staff of the Federal Power Commission to discuss the proposed form. The staff, in its discretion, may grant or deny written requests for conference prior or subsequent to the filing of formal submittals.

In order to expedite and assist the Commission in its review and analysis of the comments it receives, all such submittals are to be presented according to response codes. Each segment of a respondent's comments is to be headed by one of the following response code numbers.

[1] 18 CFR 3.170(a)(13) and 260.2 (1975).

Response Code:

A. Compliance burden:
- 01 1. Costs of implementing proposed program.
- 02 2. Time frame expected.
- 03 3. Cost—manhours aspect.

B. Comments with respect to the following considerations:
- 04 1. Hardware.
- 05 2. Software.
- 06 3. Schedule design or layouts.
- 07 4. Media.
- 08 5. Preparation difficulties.
- 09 6. Certification.
- 10 7. Other.

C. Specific schedule comments:
- 11 1. Field size.
- 12 2. Field title.
- 13 3. Addition of a field.
- 14 4. Deletion of a field.
- 15 5. Addition of data elements.
- 16 6 Data standards.
- 17 7. Deletion of data elements.
- 18 8. Clarity of presentation.
- 19 9. Instruction narrative.
- 20 10. Combine schedules with other(s).
- 21 11. Add or delete schedule.

- 22 D. Duplicate reporting plan.
- 23 E. Acceptability for Federal and State use.
- 24 F. Acceptability for general public use.

G. General reaction:
- 25 1. Support the principles and purposes of the proposal.
- 26 2. No objections to principles and purposes of the proposals, but offering suggestions regarding implementation.
- 27 3. Oppose and disagree with the principle and purposes.
- 28 H. Other.

The proposed amendments to Part 260 of the Commission's Approved Forms under the Natural Gas Act would be issued pursuant to the authority granted the Federal Power Commission by the Natural Gas Act, as amended, particularly sections 8, 9, 10(a), 14, 15, and 16 (52 Stat. 825, 826, 828, 829, 830; 15 U.S.C. 717g, 717h, 717i, 717m, 717n, 717o).

Effective for the reporting year 1976, the Commission proposes to amend Part 260, Statements and Reports (Schedules), in Subchapter G—Approved Forms, Natural Gas Act, Chapter I, Title 18 of the Code of Federal Regulations by adding a new Section 260.24 prescribing new FPC Form No. 155, Corporate and Financial Report for Class C and Class D Natural Gas Companies, in the form set out in Attachment D hereto. New § 260.24 will read as follows:

§ 260.24 Form No. 155, Corporate and financial report for Class C and Class D natural gas companies.

(a) The form of the report for Class C and Class D natural gas companies, designated herein as FPC Form No. 155, is prescribed for the year 1976 and thereafter.

(b) Each natural gas company, as defined in the Natural Gas Act (52 Stat. 821) which is included in Class A or Class B as defined in the Commission's Uniform System of Accounts Prescribed for Natural Gas Companies Subject to the Provisions of the Natural Gas Act, shall prepare and file with the Commission for the year beginning January 1, 1976, or subsequently during the calendar year 1976 if its established fiscal year is other than the calendar year, and for each year thereafter, on or before the last day of the third month following the close of the calendar year or other established fiscal year, an original and such number of conformed copies of the above-designated FPC Form No. 155 as are indicated in the General Instruction set out in that form, all properly filled out and verified. The report shall be submitted in the original with four copies. An additional copy of said report will be retained by the respondent in its files.

(c) The report contains the following schedules:

General Corporate Information
Control Over Respondent
Corporations Controlled by Respondent
Corporate Officers/Directors
Security Holders and Voting Powers—Total
Security Holders and Voting Power
Notes to Security Holders and Voting Power
Annual Notes to Financial Data
Lists of Accounts
Capital Stock
Long Term Debt
Investment Tax Credits
Plant in Service or All Utility Plants
Operating Revenues
Detailed Account Data—Parts I through III
Gas Purchases
Gas Account Natural Gas
Accumulated Provisions for Depreciations, Depletion and Amortization of Utility Plant

The Secretary shall cause prompt publication of this notice to be made in the FEDERAL REGISTER.

By direction of the Commission.

KENNETH F. PLUMB,
Secretary.

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
		1 of 22

I. ADMINISTRATIVE BACKGROUND

The Federal Power Commission (FPC) has established an information system designed to improve the decision-making capabilities of the Commission. This program, the Regulatory Information System (RIS), was authorized by Commission Order 494, September 26, 1973, and features the following characteristics and capabilities:

- A consolidated data collection system designed to eliminate unnecessary or redundant reporting and to provide standardized data collection schedules.
- A comprehensive system for transmitting, processing, and accessing data requested of respondents by the Commission.
- Establishment of a modern computer facility at Commission headquarters featuring consolidated regulatory data bases and the associated automatic data processing (ADP) equipment and programming software necessary to store, validate, and access that data.

These instructions are intended to aid each respondent to understand the scope and objectives of the RIS system regarding source data collection and to provide clear and concise guidance for the completion of the revised public use schedules.

A. DATA COLLECTION CONCEPTS

The FPC public use schedules are designed to be vehicles for data collection, rather than for data display, by the Commission. This objective has guided the design of the layouts and instructions so as to achieve maximum efficiency in both data collection and subsequent processing. Within this basic design philosophy, the public use schedule data collection concept embodies the following design characteristics, some of which are described in greater detail in the subsequent chapters.

FPC Form 151
(3-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
		2 of 22

1. Optical Character Recognition (OCR) - All schedules have been designed with OCR requirements as one of the design constraints. This will allow for transition to optical scanning as a future alternative for data entry.

2. Seperation of Instructions - All instructions are separated from the schedules to which they apply, in order to make efficient use of form space. Instructions consist of three seperate levels, as follows:

- Level I - General (applicable to all schedules).
- Level II - General subject (applicable to natural gas operations, electric operations, or financial data).
- Level III - Detailed (applicable to individual schedules).

3. Seperation of Footnotes - Footnotes or other extraneous marks or comments intended to qualify or modify data must not be entered directly on any schedule. The public use schedules have been designed to minimize the need for footnotes through the establishment of distinct data elements which represent some data previously reported as footnotes. However where necessary to make the related data more meaningful, footnotes may be entered on a special footnote schedule designed for this purpose. On the primary data schedules, the respondent must enter only a unique footnote reference number to provide a link to the footnote schedule.

4. Reporting Requirements - Reporting frequencies of the new schedules vary from semi-monthly to biennially. For certain schedules, all data must be supplied with each submission. For the other schedules, all data must be supplied with an initial submission, and on subsequent submission of these schedules respondents need report only changes, additions and deletions. These requirements are specifically stated in the Detailed Instructions for each schedule in paragraph B under the heading "II. General Information".

FPC Form 151
(3-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
		3 of 22

5. Consolidated Schedules - Many of the public use schedules have been designed to consolidate data previously collected on more than one schedule. The consequence of such consolidation is a reduction in the total number of schedules. Furthermore, portions of some schedules may be inapplicable to certain respondents, as specified in the detailed instructions.

B. APPLICABILITY OF INSTRUCTIONS

The Commission will provide to each respondent all three levels of instructions, appropriate to the type of operation. For example, an electric utility will receive:

- Level I - General Instructions
- Level II - General Subject Instructions (Electric Operating Data)
  - General Subject Instructions (Corporate and Financial Data)
- Level III - Detailed Instructions (Electric Operating Schedules)
  - Detailed Instructions (Corporate and Financial Schedules)

Each respondent will also receive footnote schedules (with instructions) and free form (blank) schedules for the submission of narrative or graphic support data that will not be loaded into the Commission's data bases.

As the public use schedules undergo change in future reporting periods through the rulemaking process, modified layouts and instructions will be prepared by the Commission and mailed to the respondents, together with appropriate documentation that describes the authorization and the details of all such changes, additions, or deletions. The Commission will prepare the instructions in a manner suitable for looseleaf binders, so that they can be easily maintained by the respondents.

FPC Form 151
(3-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
		4 of 22

II. STANDARD DEFINITIONS

The following standard definitions are provided to aid the respondent in understanding the data collection concepts contained in these instructions.

A. RESPONDENT - Each corporation, person, agency, authority, or other legal entity or instrumentality, whether public or private, which is required, under the provisions of the Federal Power Act, the Natural Gas Act, or Commission Order, to submit information to the Federal Power Commission via public use forms. Respondents also include those organizations that voluntarily or upon request, provide data to the Commission.

B. PUBLIC USE SCHEDULE - A collection of functionally related data elements organized and formatted into an arrangement suitable for the collection of data; the instructions for preparation of a schedule are included in this definition.

C. DATA FIELD - Within a record or schedule, a specific area used for representing a particular data value, i.e., the spaces provided for data entry on a schedule.

D. DATA ELEMENT - A basic unit of identifiable and definable information. Data elements identify the data fields within a schedule.

E. DATA ITEM - The expression of a particular value of a data element. In cases where a data element identifies a column or row on a schedule, a data item is a specific entry within the column or row.

F. LOGICAL ENTRY - A collection of related characteristics, defined by data elements, associated with a specific "key" item of information. For example, "name", "address", "date of incorporation", and "total assets" are all attributes of the key item "company", which is identified by a company code. This entire collection of data elements is called a logical entry. Within the public use schedules, logical entries are blocks of data that may be repeated several times on a page.

FPC Form 151
(3-76)

G. KEY ITEM IDENTIFICATION - A data element that provides a unique reference point for purposes of accessing or retrieving data. Within the public use schedules, the key item(s) uniquely identify groups of related data elements which by definition are logical entries. Normally, key items appear first within a logical entry and must always be completed by the respondent. The Detailed Instructions for each schedule explicitly identify those data elements that are "key".

Other, more specific, definitions of technical and financial date elements are contained in the Level II - General Subject Instructions.

III. GENERAL PROCEDURES FOR SCHEDULE PREPARATION

Many of the public use schedules have been designed so that different types of respondents can use the same basic schedules and instructions for the collection of identical data. For such schedules, the Detailed Instructions explain the unique data preparation requirements applicable to each type of respondent.

A. SCHEDULE SUBMISSION

The Commission will forward annually an appropriate number of copies of each schedule required of the respondent for the given reporting period.

All respondents shall forward the number of copies ordered by the Commission of each public use schedule to the Commission. Respondents submitting schedules on magnetic tape must also submit an attested working copy, appropriately completed, of the supplied schedules from which the tapes were prepared.

The specific report period for each schedule is listed in the General Subject Instructions (Level II) for the natural gas operations, electric operations, or financial data. The reporting period must be entered by the respondent on each schedule. Care must be exercised to ensure that the report period on each schedule (month, day, year) represents the ending date of the period to which the data applies, not the date the schedule was completed.

Prior to forwarding the schedules to the Commission, the respondent must complete Schedule 0100, Index of Public Use Schedules Submitted. A data field-by-data field instruction for Schedule 0100 shall be found in the Level III, Detailed Instructions for this schedule. All schedules should be carefully assembled, packaged, and forwarded to the following address:

Federal Power Commission
825 North Capitol Street, N.E.
Washington, D. C. 20426
Attn: Office of the Secretary

FEDERAL POWER COMMISSION

ATTESTATION UNDER OATH

This report must be attested to under oath by an officer of the company. _____ (Insert here the name of the attester)

being first duly sworn according to law, certifies that he is _____ (Insert here the official legal title of attester)

of _____ (Insert here the exact legal title or name of respondent); that he has full power and authority to make the attestation; that he has read this report and is familiar with the contents therein; that to the best of his knowledge, information and belief, all estimates and matters therein set forth are true and correct and the said report is a correct statement of the business and affairs of the above-named respondent in respect to each and every matter set forth therein during the period from and including _____, 19___, to and including _____, 19___.

_____ (Signature of attester)

Subscribed and sworn to before me
this _____ day of _____, 19___.

_____ NOTARY PUBLIC

(SEAL)

FIGURE III-1. NOTIFICATION OF ATTESTATION

B. REPORTING MEDIA

The acceptable media for reporting public use data are magnetic tape with a working copy of the schedules or typed schedules.

Many respondents are capable of preparing the data via magnetic tape and have been directed by the Commission to do so. In addition, the respondent must attach associated attested working copy of the FPC supplied schedules from which the tapes were prepared.

C. SUPPORTING DOCUMENTATION

Additional statements, maps, diagrams, charts or other documentation supportive to the data schedules not otherwise specifically required or provided for should be inserted directly behind the schedules to which they apply. Respondents shall utilize FPC Schedule Number 1000 in all cases except those requiring oversize documents such as large maps. In all cases, the schedule number and page number of the schedule to which the supporting documentation applies must be entered, as well as the reporting period. Supporting documentation must not be stapled to the corresponding schedules.

D. ATTESTATION

The complete set of schedules filed for a given reporting period must be subscribed and verified by the duly authorized executive officer of the respondent, or of one of the respondents where a consolidated schedule is filed, who is qualified and authorized to prepare or supervise the preparation of the schedules and to certify their accuracy, completeness, and truthfulness. Such attestation will be submitted in the format specified in the Attestation Under Oath, displayed in Figure III-1.

Information submitted on magnetic tape must be accompanied by a working copy of each schedule used to create the magnetic tape. A single Attestation Under Oath will apply to all information, regardless of filing medium, submitted in the reporting period.

E. RESPONDENT COMMENTS AND SUGGESTIONS

The Regulatory Information System represents a significant departure from the previous methods of gathering and using information by the Commission. Like all new systems, areas for improvement will undoubtedly be discovered during actual operation. All respondents are encouraged to supply comments and suggestions to the Commission of specific data collection or schedule design problems.

All questions concerning schedule design, data entry rules, filing requirements, or administrative matters, should be directed to the Office of Regulatory Information Systems at Commission headquarters. The telephone number for inquiries at the Commission is (202) 275-4138.

This telephone number and the schedule mailing address will be the main contact points between the Commission and the respondents for matters relating to the data collection. Questions that cannot be handled directly will be routed to the appropriate bureau or office personnel for resolution.

IV. RULES FOR DATA PREPARATION

The respondent is instructed to rigorously conform to the following general rules for data entry when preparing the schedules prior to the time that the schedules are forwarded for typing.

A. DATA FIELD LENGTH

Do not exceed the data field lengths allocated for each data element. When the data field size is inadequate, leave the data field blank and enter the true value in a footnote.

B. JUSTIFICATION (DATA POSITIONING)

Right justify every numeric data field; that is, place the data in the right portion of the data field so that no blank spaces follow the last character. Unfilled leading characters should be left blank. All alphabetic data fields must be left justified; that is, they begin at the left boundary of the data field.

C. ALPHABETIC AND NUMERIC

The Detailed Instructions for each schedule define each data field as either alphabetic (A) or numeric (N). The instructions also specify the data field length, including implied decimal positions for fractional numbers. For example, (N7.3) means a numeric field with seven characters to the left and three characters to the right of the implied decimal position. (N6) implies a six digit integer number and (A22) defines a twenty-two character alphabetic data field.

Do not enter alphabetic or special characters in a data field defined to be numeric by the instructions. The only exceptions to this rule are a minus sign or an asterisk, as described later. Numeric data fields must be right-justified and can be preceded by blank spaces. A data field defined as alphabetic may include any

combination of numeric and alphabetic characters. If necessary, words should be abbreviated to fit an alphabetic data field within the allocated space.

D. NEGATIVE ENTRIES

To indicate a negative numeric value, type over the preprinted minus sign in the right-most character of the data field immediately after the last significant digit; for example, | 4917- | . Positive numbers require no sign within the data fields; simply right-justify the number. Only certain data fields may legitimately contain negative numbers. Those data elements that may be expected to generate negative numbers are identified in the Detailed Instructions and in the schedules, where a character position is reserved for the minus sign, which is printed.

E. NULL ENTRIES

Data fields that are not applicable to a given respondent's situation must be left blank. Do not write in "N/A", or "NONE", or "NO DATA", or any other null response. Numeric data fields that do apply to the respondent but for which the respondent has a legitimate value of zero must be so entered with zero, including all decimal positions. Numeric, alphabetic, or alpha-numeric data fields that do not apply must be left blank.

F. PERCENTAGES AND FRACTIONS

Numeric data fields expressed in percentages may contain a variable number of decimal positions. In the schedules, all decimal points are implied by a preprinted character (▲) that does not occupy a character position within the data field. For example: NN ▲ NNN

The fractional portion to the right of the decimal point should always be rounded to the last significant digit. For example, 11 2/3 should be entered as | 11 ▲ 667 | . Under no circumstances must a portion of a whole number be expressed in fractional notation for any numeric data field. Rather, use the decimal representation, as

illustrated by the preceding example of a percentage. For example, never enter 12 1/3 in a schedule; instead enter | 12 ▲ 333 | , assuming three decimal positions are requested.

G. SPECIAL CHARACTERS

As illustrated in the preceding section, all of the public use schedules have been designed with preprinted decimal point locators, where appliceble. The respondent is specifically requested not to enter doller signs, decimal points (.), commas (,), parentheses, technical symbols, or any other special characters on the schedules unless called for by the Detailed Instructions. For example, the number $53,429.48 would be entered as | 53429 ▲ 48 | and the number $45,237 would be entered as | 45237 ▲ 00 |

H. MULTIPLE PAGES

Multiple pages may often be necessary for the respondent to provide all of the data for a particular schedule. Additional pages may be requested of the Commission at any time. To minimize such requests, the Commission will analyze historical submission patterns and volumes for each schedule and attempt to tailor the number of pages mailed out with the number of pages submitted in the past. Each page of a schedule must be numbered in the upper right hand corner.

I. LISTS OF LEGITIMATE VALUES

A copy of the Register of Data Standards will be made available to each respondent. The Register must be a standard reference tool for personnel completing the schedules to assure valid data entries. Respondent-entered data that is inconsistent with values contained in the Register will be rejected, since validation procedures are also based on the Register.

Normally, the Detailed Instructions will not contain the lists of legitimate values, but will refer to the Register of Data Standards. However, certain data item lists were incorporated directly in the Detailed Instructions for the convenience of the respondent. In these cases the data item list mnemonic appears in parenthesis.

The respondent must use the approved values and is also cautioned not to alter the units of measure (i.e., MMcf or KW) defined in the Detailed Instructions.

V. DATA MAINTENANCE ACTIVITIES

When preparing the public use schedules, the respondent must be familiar with the procedures necessary to modify data on the Commission's data bases and to prepare footnotes, where necessary. These topics are covered in this chapter.

A. MODIFICATION OF DATA

New data may be entered directly on any of the public use schedules by the respondent. The respondent must be certain that all data fields identified as key by the instructions are properly completed. For each new entry all data must be completed for the initial submission. For subsequent submissions of this data, the following general rules apply.

Changes to existing data residing in Commission's data bases can be entered directly on any public use schedule. To determine whether a data element has changed, the respondent is to refer to the data reported for the last submission.

For data identified by the Detailed Instructions as periodically required to be submitted, the respondent must completely resubmit all requested data regardless of whether or not the data have actually changed. In other Detailed Instructions subsequent submissions require the respondent to submit only appropriate identification (key data fields) and changed data fields. For this type of data, the Commission maintains only the latest current values in the data base, and the last reported data will continue to be propagated as the current data. To delete the current value of a data element, the respondent must enter an asterisk (*) in the left-most position of the data field, regardless of the numeric or alphabetic nature of the data. The following example illustrates how to delete any single occurrence of a data element:

Data Field Title
*

To delete a data element in more than one logical entry, an asterisk must be entered by the respondent for each occurrence of the data element.

To delete an entire logical entry, a retired generator for instance, the respondent must type a "D" over the preprinted "D" contained to the right of each logical entry and must specify all key items necessary to uniquely identify the logical entry. The Detailed Instructions indicate which data elements are key items. When processed, all of the data for the entire logical entry will be deleted from the data base. No facility is provided for deleting, in a single action, all of the data for an entire respondent or for any major grouping of data above the logical entry level, such as the data for an entire plant. To accomplish major delete actions, the respondent must delete each logical entry separately. If such step-by-step action proves cumbersome for the respondent in view of a major delete action (a plant closure, for example), the respondent should notify the Commission in writing of the delete action and request appropriate steps to update the data bases.

B. FOOTNOTES

Footnotes cannot be placed directly on any public use data schedule. Instead, a single, separate schedule (FPC Schedule Number 0000) is used for footnote entry. The preparation of a respondent supplied footnote requires entry on both the source schedule and the footnote schedule.

All data schedules contain two blocks to signify the presence of a footnote. These footnote indicator data fields are called the General Footnote and the Specific Footnote. The General Footnote data field enables the respondent to supply additional information that pertains to either the entire schedule and/or to a particular column (all occurrences of a data element) within the schedule. The Specific Footnote may be for either a complete logical entry and/or a specific data element within any logical entry.

The footnote number must be assigned uniquely and cannot be repeated across schedules. For example, if Schedule 0102 has footnote numbers 014 and 015 assigned, the footnotes for schedule 0103 should begin at 016. The respondent must not number the footnotes starting from 001 for each schedule. All footnote reference numbers throughout all schedules submitted in a single reporting period must have unique numbers.

VI. DATA KEYING AND VERIFICATION INSTRUCTIONS

Data keying may be utilized by respondents who submit data via magnetic tape. The following keying (and, therefore, verification) instructions apply to all redesigned public use schedules, regardless of actual data content. Keying will produce 80-character records (refer to magnetic tape submission requirements).

Each record must always contain the same control data fields in columns 1-11. These data fields are:

- Data Field A - Schedule Number (Record Position 1-4)
- Data Field B - Page Number (Record Position 5-8)
- Data Field C - Line Number (Record Position 9-10)
- Data Field D - Record Type (Record Position 11)

Data Keying and Verification Instructions are described in Figure VI-1.

When keying from the Public Use Schedules, follow the general rules given below.

- Data Field A, Schedule Number, (Record Position 1-4) and Data Field B, Page Number, (Record Position 5-8) are obtained from the header area of the schedule. The schedule number is obtained from the upper left corner of the schedule and the page number from the upper right corner of the schedule.
- Data Field C, Line Number (Record Position 9-10) is preprinted to the left of each line in the margin of the schedule (even numbers such as 2, 4, 6, etc. are the only valid entries).
- In Data Field D, (Record Type) an "A" should be keyed in Position 11 of the first record keyed for a line.
- In record positions 12-80 of the record, key all data field separators (|) and all data that has been filled in by the respondent.

FPC Form 131 (5-76)

DATA KEYING AND VERIFICATION INSTRUCTIONS

DATA FIELD	DATA FIELD NAME	COLUMNS FROM	COLUMNS TO	NUMBER OF COLUMNS	*	SPECIAL INSTRUCTIONS
	Common Data					
A	Schedule Number	1	4	4	N	Preprinted at the top left of all schedules
B	Page Number	5	8	4	N	Printed at top right of all schedules
C	Line Number	9	10	2	N	Preprinted on left margin of all schedules (even numbers)
D	Record Type (A = first record, B = second record)	11	11	1	A	A = First record for line B = Second record for line
E	Line Data	12	80	69		Key all data fields and their data field separators. Compress data as described in keying instructions.

* A - Alpha
N - Numeric

FIGURE VI-1. DATA KEYING AND VERIFICATION INSTRUCTIONS

FPC Form 131 (5-76)

- o At the end of each line on the schedule, key a line terminator symbol (@). Note: In some instances, a second record (Record Type B) will be required solely for the line terminator symbol (@).
- o Normally, only one record will be required for a line. Should a second record be required for a line, duplicate Positions 1-10 from the "A" record, and key a "B" Position 11 of the second record.
- o Do not key data fields which are preprinted, including data field separators.
- o Do not key odd numbered lines (i.e., 3, 5, 7, 9, etc.).
- o Do not key lines in which the resondent has entered no data.

In the examples shown, a lower case b represents a blank.

A. DATA FIELD CONTENTS

The data keyed into Positions 1-11 of the keyed records is keyed according to the fixed format specified above. But the data keyed in the remainder of the positions of the records (12-80) are keyed in a variable format. That is, leading and trailing blanks in data fields are not keyed. For example, if a ten-position alpha-numeric data field on the schedule contains a single letter, only that letter is keyed:

"Abbb" is keyed "A | "

B. DATA FIELD SEPARATOR (|)

The variable format explained in A above, requires that the sum of each data field (in Positions 12-80) be indicated by following the data field contents with a data field separator symbol (|).

The data field separator is the vertical bar symbol, which is to be represented by a 12-7-8 punch, and a hexadecimal 4F in EBCDIC.

See the example in A above, or those that follow, for illustrations of the use of the data field separator.

FPC Form 131 (5-76)

C. LINE TERMINATOR (@)

The end of a schedule line must be represented in the keyed record. The vertical bar (data field separator) following the last data field is to be followed with a line terminator symbol. This can require that a "B" record be keyed to provide the line terminator symbol (@).

The line terminator is the "@" symbol, which is to be represented by a 4-8 punch, and a hexadecimal 7C in EBCDIC.

D. CONTINUATION RECORD

In most cases, one line on a schedule will be represented by one 80-character record, but in some cases two records will be necessary to represent a single schedule line. In the first (or only) record, an "A" is keyed into Position 11. In the continuation record (there will not be more than one per line), after duplicating Positions 1-10 from the "A" record, key a "B" in Position 11 then continue keying from the schedule line. (Note that for two-record lines, Position 80 of the "A" record may occur in the middle of a data field on the schedule.)

E. BLANK LINES

Every data field in a schedule line, including blank data fields, must be represented in the keyed records. For a blank data field, key only a data field separator symbol (|). For example, if the first three data fields on a schedule line were blank they would be represented in the keyed record by three consecutive data field separators (in Positions 12-14).

F. DECIMAL POINTS IN NUMERIC DATA FIELDS

Many numeric data fields contain decimal points, indicated on the schedules by a preprinted ▲. (The only valid indication of a decimal point is the preprinted ▲. Use of a period is an error on the part of the individual filling in the data.) Because it is preprinted, it is not keyed. In order that the data field contents be

FPC Form 131 (5-76)

properly entered in the RIS data base, all positions to the right of a preprinted decimal in a data field on a schedule must be keyed.

G. CONSOLIDATED EXAMPLE

This example illustrates the rules given above, as applied to an entry on line 16 of page 2 of a hypothetical Schedule 99.

Data Field Type:
a n n n n n n n n n n

Data Field Length:
35 10 10 8.2 3.3 10 10 10 10 10 10

Data Field Contents:
MIDWESTERN INTERNATIONAL 350 * 673␣21 24␣2bb 750000 b b 550000 622490 3575829400

Keyed Records: A Record –
0099000216AMIDWESTERNbINTERNATIONAL|350|*|67321|24200|750000||550000|622490|

B Record –
0099000216B3575829400@

H. CHARACTER SET

Keying should be accomplished using the standard EBCDIC alphebetic and numeric character set. The following are the only valid special characters which can be used:

EBCDIC SPECIAL CHARACTER

CHARACTER	EBCDIC HEX REP	CARD PUNCH	CHARACTER	EBCDIC HEX REP	CARD PUNCH
.	4B	12-3-8	-	60	11
(	4D	12-5-8	/	61	0-1
+	4E	12-6-8	,	6B	0-3-8
&	50	12	%	6C	0-4-8
$	5B	11-3-8	?	6F	0-7-8
*	5C	11-4-8	:	7A	2-8
)	5D	11-5-8	'	7D	5-8
;	5E	11-6-8	=	7E	6-8
			"	7F	7-8

Data Field Separator:
| 4F 12-7-8

Data Line Terminator:
@ 7C 4-8

FPC Form 151 (5-76)

I. MAGNETIC TAPE SUBMISSION

The magnetic tape to be submitted shall be compatible with IBM 370/OS using 9-track standard IBM OS labels or using 9-track non-labelled tapes in EBCDIC code format at 800 or 1600 bpi. The logical record length shall be 80 characters. The blocking factor should be compatible with IBM OS tape blocking conventions.

All respondents submitting magnetic tape(s) must enclose with the tape the following information: name of company, name of contact about the magnetic tape and telephone number. Additionally the following information must be specified for labelled and non-labelled tapes:

LABELLED AND NON-LABELLED TAPES

- whether 800 or 1600 bpi
- whether labelled or non-labelled

LABELLED TAPES

- internal volume/serial number of tape
- data set name

NON-LABELLED TAPES

- block size in characters (length of physical record)
- external volume/serial number of tape

APPENDIX 1. List of Corporate and Financial Schedules

Schedule Number	Schedule Name
0101	General Corporate Information
0102	Control Over Respondent
0104	Corporations Controlled by Respondent
0105	Corporate Officers/Directors
0106	Other Corporate Employees
0107	Security Holders and Voting Powers - Total
0108	Security Holders and Voting Powers
0110	Other Stockholder Information
0111	Notes to Security Holders and Voting Powers
0112	Annual Notes to Financial Data
0113	Descriptions of Construction Overhead Procedures
0114	Important Changes During the Year - Transmission or Distribution System
0115	Important Changes During the Year - Respondent Rate Proceedings
0116	Important Changes During the Year - Supplier Rate Proceedings
0117	Important Changes During the Year - New Sources of Gas
0118	Important Changes During the Year - New Generating Plants/Units
0120	Important Changes During the Year - Utility Plant Not Operated
0121	Company Employee Data
0122	Securities Issued During Year
0123	Securities Assumed, Refunded or Retired During Year
0124	List of Accounts - Part I (Electric Class A and Class B)
0124	List of Accounts - Part II (Natural Gas Class A and Class B)
0124	List of Accounts - Part III (Electric Class C and Class D)
0124	List of Accounts - Part IV (Natural Gas Class C and Class D)
0125	Investment in Subsidiary Companies - Equity Accounting
0126	Gas Stored Underground - Part II
0127	Gas Stored Underground - Part I
0128	Production Fuel Stocks
0129	Production Fuel Cost Data
0130	Gas Prepayments and Undelivered Gas Obligations
0132	Capital Stock
0133	Long-Term Debt
0134	Notes Payable
0135	Taxes Accrued, Prepaid and Charged During the Year
0136	Computation of Federal Income Tax Accruals for the Year
0137	Consolidated Federal Income Tax Return Information
0138	Accumulated Deferred Income Taxes
0139	Accelerated Amortization of Facilities
0140	Tax Deferrals Related to Other Property

Schedule Number	Schedule Name
0141	Investment Tax Credits
0142	Advances for Gas Prior to Initial Deliveries or Commission Certification
0143	Particulars for Estimating Depreciation, Depletion and Amortization of Utility Plant
0144	Plant in Service or all Utility Plants
0145	Completed Construction Not Classified
0146	Plant Purchased or Sold
0147	Experimental Plant Unclassified
0148	Utility Plant Leased to Others
0149	Plant and Production Properties Held for Future Use
0150	Construction Work in Progress
0151	Accumulated Provision for Depreciation of Utility Plant - Part I
0152	Accumulated Provision for Depreciation of Utility Plant - Part II (Electric and Gas)
0153	Accumulated Provision for Depletion and Amortization of Utility Plant (Account 111.00)
0154	Common Plant and Expense Data - Part II
0155	Common Plant and Expense Data - Part I
0156	Construction Overhead
0157	Natural Gas Reserves and Land Acreage
0158	Net Realizable Value of Estimated Hydrocarbon Reserves
0159	Operating Revenues
0160	Extraordinary Items
0161	Detailed Account Data - Part I
0162	Detailed Account Data - Part II
0163	Detailed Account Data - Part III
0164	Detailed Account Data - Part IV
0165	Monthly Statement of Electric Operating Revenue and Income - Part I
0166	Monthly Statement of Electric Operating Revenue and Income - Part II
0167	Revenue From Transportation of Gas of Others - Natural Gas
0168	Gas Purchases
0169	Professional and Other Consultative Services
0170	Lease Rental Charges - General Data
0171	Lease Rentals Charged
0172	Exploration and Development Expenses
0173	Regulatory Commission Expense
0174	Particulars Concerning Certain Income Accounts
0175	Exchange Gas Accounting - Part I
0176	Exchange Gas Accounting - Part II
0177	Research and Development Activities
0178	Natural Gas Production and Gathering Statistics
0179	Franchise Requirements
0180	Gas Used in Utility Operations - Credit
0181	Gas Account - Natural Gas

Schedule Number	Schedule Name
0182	Natural Gas Pipeline Company Monthly Statement - Revenues and Expenses - Part I
0183	Natural Gas Pipeline Company Monthly Statement - Revenues and Expenses - Part II
0184	Natural Gas Pipeline Company Monthly Statement - Operation and Maintenance Expenses
0185	Natural Gas Pipeline Company Monthly Statement - Supplemental Gas Supplies and Selected Data
0186	Natural Gas Pipeline Company Monthly Statement - Gas Revenues and Purchases
0187	Reconciliation of Reported Net Income With Taxable Income
0188	Accumulated Provision for Depreciation, Depletion, and Amortization of Utility Plant
0189	Changes in Estimated Natural Gas and Other Hydrocarbon Reserves
0190	Balance Sheet Accounts - Part I
0191	Balance Sheet Accounts - Part II
0192	Balance Sheet Accounts - Part III
0194	Income Statement Accounts
0195	Retained Earnings and Operating Revenues Accounts
0196	Operation and Maintenance Expenses Accounts
0197	Utility Plant - Municipal
0198	Long-Term Debt - Municipal
0199	Information Concerning Licenses and Location of Records
0200	Licensed Project Plant
0201	Licensed Project Plant - Classified by Developments
0202	Additions, Retirements and Adjustments - Licensed Project Plant
0205	Accumulated Provision for Depreciation of Licensed Project Plant - Balances and Changed During the Year
0206	Accumulated Provision for Depreciation of Licensed Project Plant According to Functional Classification
0207	Accumulated Provision for Amortization of Licensed Project Plant
0208	Accumulated Provision for Amortization of Licensed Project Plant According to Functionel Classification
0209	Depreciation Expense for Licensed Projects
0210	Amortization Expense for Licensed Project
0211	Amortization Reserve - Federal
0212	Operation of Licensed Projects and the Sale or Use of Energy Produced
0213	Environmental Facilities and Expenses
0214	Notes to Environmental Facilities and Expenses
0215	Monthly Notes to Financial Data
0639	Monthly Net Generation by Licensed Project
0640	Licensed Projects Annual Energy Deductions

		1 of 11

I. GENERAL INFORMATION

These instructions apply to those schedules:

- Containing basic information on the respondent's corporate profile
- Providing detailed financial data about the Corporation's business activities.

The group of corporate and financial schedules represent a comprehensive selection of data covering the respondent's entire financial accounting operation.

The classification of respondents are:

a. Class A: Natural gas companies, public utilities, and licensees having operating revenues of $2,500,000 or more.

b. Class B: Natural gas companies, public utilities, and licensees having operating revenues of $1,000,000 or more but less than $2,500,000.

c. Class C: Natural gas companies, public utilities, and licensees having operating revenues of $150,000 or more but less than $1,000,000.

d. Class D: Natural gas companies, public utilities, and licensees having operating revenues of $25,000 or more but less than $150,000.

The schedules are organized into two subgroups based upon respondent reporting requirements: (1) annual or (2) monthly submissions. The grouping of schedules into their respective submission subgroups together with a reference to the old FPC form relationships is shown below:

FPC Form 151
(3-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
		2 of 11

Subgroup	Respondent Category	Schedule Number(s)	Old FPC Form	Submission Date
Annual Submissions				
1	Class A & Class B (Electric Utilities and Licensees)	0101-0187, 0213-0214, 0695-0698, 0704 (less 0103, 0109, 0115, 0117, 0119, 0126, 0127, 0130, 0131, 0142, 0153, 0157, 0158, 0165, 0166, 0172, 0175, 0176, 0178, 0180-0186)	1	Annually (on or before March 31st
2	Class A & Class B (Natural Gas Companies)	0101-0181, 0187, 0189 (less 0103, 0109, 0118, 0119, 0131, 0165, 0166)	2	Annually (on or before March 31st)
3	Class C & Class D (Electric Utilities and Licensees)	0101, 0102, 0104 0105, 0108, 0111, 0112, 0124, 0132, 0133, 0141, 0144, 0159, 0161-0163, 0188	1F	Annually (on or before March 31st)
4	Federal Projects and Municipal (Electric)	0190-0192, 0194-0198, 0837-0839	1H	Annually (3 months following close of fiscal year for municipalities and Federal Projects report on fiscal year usually corresponding with FY of Government)
5	Class C & Class D (Natural Gas Companies)	0101, 0102, 0104, 0105, 0107-0108, 0111, 0112, 0124, 0132, 0133, 0141, 0144, 0159, 0161-0163, 0168, 0181, 0188	2A	Annually (on or before March 31st)
6	Licensed Projects (covers all major projects owned by the licensee)	0199-0202, 0205-0212, 0639-0640	9	Annually (on or before April 30th)

FPC Form 151
(3-76)

UMI 67 of 90

Subgroup	Respondent Category	Schedule Number(s)	Old FPC Form	Submission Date
Monthly Submission				
1	Class A & Class B (Electric Utilities)	0165,0166,0215	5	Monthly (40 days after end of reporting month)
2	Class A & Class B (Natural Gas Companies whose combined gas sales for resale and gas transported or stored for a fee exceeding 50 million MCF)	0182-0186,0215	11	Monthly (40 days after end of reporting month)

Each schedule is identified by a schedule number and title (see Appendix 1, List of Corporate and Financial Schedules).

FPC Form 151 (3-76)

II. STANDARD DEFINITIONS AND CODES

A. UNIFORM SYSTEMS OF ACCOUNTS

The required submission for Class A, Class B, Class C and Class D natural gas pipeline and electric utilities and licensees will be prepared in conformity with the "Uniform Systems of Accounts for Natural Gas Companies" or "Uniform Systems of Accounts for Public Utilities and Licensees" prescribed by Part 101, 104, 201 and 204 of Title 18 CFR. All mention of accounts, accounting requirements and terminology are to be interpreted in accordance with the said classifications.

For Municipal Electric Utilities and Federal Projects, the required submissions should be filled out in accordance with the individual schedule instructions which provide titles of data requirements to fit special respondent cases. Account numbers are related to each of the data titles to assist internal processing of data.

B. ACCOUNT NUMBERING SYSTEM

The new reporting system requires five digit numbers. In reporting the account numbers for the Uniform Systems of Accounts, the respondent must add zeros, either one or two as appropriate, after the number to complete the five digit system. For example, Account 101, Plant in Service, must be reported as Number 101.00; Account 419.1., Allowance for Funds Used During Construction, must be reported as 419.10.

C. SUPPLEMENTAL ACCOUNT NUMBERS

A system of Supplemental Account Numbers have been developed to accommodate the processing of the following types of information:

- Required data items that do not have assigned Uniform Systems of Account numbers (e.g., total assets, net income, etc.)
- Respondents with several reporting departments (e.g., electric, gas, steam, common, other)

FPC Form 151 (3-76)

- Required additional breakdown of data from existing account numbers (e.g., depreciation expense, deferred taxes, etc.)

These categories of information add to and/or expand the data identified by the Uniform Systems of Accounts. The Supplemental Account Numbers are a necessary control to insure uniform reporting of certain data elements and will assist in the efficient processing of the various categories of information.

From the above considerations, many Supplemental Account Numbers are expressed using previously undefined numbers from the Uniform Systems of Accounts:

- A three digit code (e.g., 010.00 - Sources of Funds - Operation - Net Income) or
- A three digit code with decimal (e.g., 046.10 - Total Salaries and Wages)

Further, some existing accounts in the Uniform Systems of Accounts were expanded by addition of a decimal, as:

- Accumulated Deferred Income Taxes - Accelerated Amortization (281) expanded to
- Accumulated Deferred Income Taxes - Accelerated Amortization - Pollution Control Facilities (281.20)

Finally, to indicate reporting by different departments internal to the respondent's operations, a second decimal place was added to any existing Uniform System of Account number or any new Supplemental Account number as shown in the following examples:

FPC Form 151 (3-76)

Example 1:

Uniform System of Account Number	Description
101	Plant in Service
expanded to -	
Supplemental Account	**Description**
Electric Respondents	
101.01	Plant in Service - Electric
101.02	Plant in Service - Gas
101.03	Plant in Service - Common
101.04	Plant in Service - Steam
101.05	Plant in Service - Other
Gas Respondents	
101.01	Plant in Service - Gas
101.02	Plant in Service - Electric
101.03	Plant in Service - Common
101.05	Plant in Service - Other

Example 2:

Supplemental Account	Description
281.20	Accumulated Deferred Income Taxes - Accelerated Amortization - Pollution Control Facilities
expanded to -	
Electric Respondents	
281.21	Accumulated Deferred Income Taxes - Accelerated Amortization - Pollution Control Facilities - Electric
281.22	Accumulated Deferred Income Taxes - Accelerated Amortization - Pollution Control Facilities - Gas
Gas Respondents	
281.21	Accumulated Deferred Income Taxes - Accelerated Amortization - Pollution Control Facilities - Gas
281.22	Accumulated Deferred Income Taxes - Accelerated Amortization - Pollution Control Facilities - Electric

FPC Form 151 (3-76)

The instructions for each schedule list the specific account numbers or indicate where the respondent is required to report departmental information on the basis of supplemental account numbers.

D. SELECTED DEFINITIONS

The following definitions pertain to the indicated subgroups of Corporate and Financial schedules:

1. Annual Submission (Natural Gas Pipeline Respondents)

a. Gas Volumes: All gas volumes will be reported in MMCF rounded to three decimal places. Pressure base of gas volumes reported will be 14.73 PSIA at 60° Fahrenheit, pursuant to Exhibit H of Circular No. A-46, of the Bureau of the Budget issued February 1966.

b. Natural Gas means either natural gas unmixed or any mixture of natural and manufactured gas.

c. BTU per Cubic Foot: The total heating value expressed in BTU, produced by the combustion, at a constant pressure, of the amount of the gas which would occupy a volume of one cubic foot at a temperature of 60° Fahrenheit if saturated with water vapor and under a pressure equivalent to that of 30 inches of mercury at 32° Fahrenheit and under standard gravitational force (980.665 cm. per second^2) with air of the same temperature and pressure as the gas, when the products of combustion are cooled to the initial temperature of gas and air when the water formed by combustion is condensed to the liquid state. (Sometimes called gross heating value or total heating value).

2. Annual Submission (Electric Operating Respondents)

a. Electric Plant: A unit or group of units of the same or different generating type as long as they can be considered at the same physical site.

b. Electric System: The physically connected generation, transmission, distribution, and other facilities operated as an integral unit under one control, management, or operating supervision.

c. Electric Utility: All enterprises engaged in the production and/or transmission and/or distribution of electricity for use by the public, including investor-owned, cooperatively-owned, government-owned (municipal systems, Federal agencies, state projects, and public power districts); and where the data are not separable, those industrial plants contributing to the public supply.

3. Annual Submission (Licensees)

a. The term "project" means all the property covered by a single license number.

b. The term "Federal Project" means those electric projects operating under the supervision of the Alaska Power Administration, Bonneville Power Authority, Bureau of Indian Affairs, Colorado River Storage Project, Southeastern Power Administration, Southwestern Power Administration, Tennessee Valley Authority, U.S. Bureau of Reclamation, and U.S. Corps of Engineers.

4. Monthly Submission (Natural Gas Pipeline Respondents)

a. Imports are gas receipts into the United States of America from a foreign country.

b. Exports are gas deliveries out of the United States of America to a foreign country.

c. Firm Gas Sales to industrial customers are those made under schedules or contracts which anticipate no interruption.

d. Off-Peak Gas Sales to industrial customers are those made under schedules or contracts on a firm basis for periods specified for other than times of seller's peak requirements.

e. Interruptible Gas Sales to industrial customers are those made under schedules or contracts which provide for curtailment by the seller in order to protect service to firm customers.

III. GENERAL INSTRUCTIONS

A. ALL SCHEDULES

1. Information on Utility Departments

For companies having more than one utility department, report information on the basis of total company operations except where otherwise requested on the particular schedule.

2. Changes in Previous Year Reported Figures

Beginning of the year balances are not required on most of the financial schedules. Where amounts reported in the previous year (balance end of year) do not agree with beginning of year amounts for any reason, the respondent shall furnish an explanation of the reason in a footnote.

B. ANNUAL SUBMISSION SCHEDULES

1. Additional Submission

In addition to filing the Annual Submission of Schedules, each respondent shall also file with the Commission, immediately upon publication, five copies of its latest annual report to stockholders and of any annual financial or statistical report regularly prepared and distributed to bond-holders, security analysts, or industry associations. If reports to stockholders are not prepared, so state on Schedule 0112, "Annual Notes to Financial Data".

2. Letter by Certified Public Accountant

Class A and Class B respondents shall file with the original and each copy of the "Annual Submission of Schedules" a letter or report (required by Sections 41.10 - 41.12 of the Commission's Regulations under the Federal Power Act or Sections 158.10 - 158.12 of the Commission's Regulations under the Natural Gas Act) signed by independent certified accountants or independent licensed public accountant, certified or licensed

by a regulatory authority of a State or other political subdivision of the United States until December 31, 1975 and beginning January 1, 1976, and each year thereafter, only independent certified public accountants and independent licensed public accountants (licensed on or before December 31, 1970) will be authorized in attesting to the conformity, in all material repects, of the following schedules in this report with the Commission's applicable Uniform Systems of Accounts (statement certification includes applicable notes relating thereto) and published Commission accounting releases:

Schedule Number	Description
0124	List of Accounts (Part I or Part II)
0133	Long Term Debt
0136	Computation of Federal Income Tax Accruals for the Year
0137	Consolidated Federal Income Tax Return Information
0138	Accumulated Deferred Income Taxes
0139	Accelerated Amortization of Facilities
0140	Tax Deferrals Related to Other Property
0143	Particulars for Estimating Depreciation, Depletion and Amortization of Utility Plant
0144	Plant in Service or All Utility Plants
0145	Completed Construction Not Classified
0149	Plant and Production Properties Held for Future Use
0150	Construction Work in Progress
0151	Accumulated Provision for Depreciation of Utility Plant - Part I
0152	Accumulated Provision for Depreciation of Utility Plant - Part II
0154	Common Plant and Expense Data - Part II

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
		11 of 11

Schedule Number	Description
0155	Common Plant and Expense Data - Part I
0159	Operating Revenues
0162	Detailed Account Data - Part II
0163	Detailed Account Data - Part III (Only Information Pertaining to Retained Earnings Accounts)
0164	Detailed Account Data - Part IV (Only Information Pertaining to Plant Materials and Operating Supplies and Prepayments (Gas Respondents))
0187	Reconciliation of Reported Net Income with Taxable Income

The letter or report shall be in the following form unless unusual circumstances or conditions, explained in the letter or report, demand that it be varied:

In connection with our regular examination of the financial statements of for the year ended , on which we have reported separately under date of , we have also reviewed schedules ____ of the annual submission for the year filed with the Federal Power Commission, for conformity in all material respects with the requirements of the Federal Power Commission as set forth in its applicable Uniform Systems of Accounts and published Commission accounting releases. Our review for this purpose include such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances. Based on our review, in our opinion the accompanying schedules identified in the preceding paragraph (except as noted below)* conform in all material respects with the accounting requirements of the Federal Power Commission as set forth in its applicable Uniform Systems of Accounts and published accounting releases.

* Parenthetical phrase inserted only when exceptions are to be reported.

The letter or report shall state, additionally, which, if any, of the schedules set forth above do not conform to the Commission's requirements, and shall describe the descrepancies that exist.

FEDERAL POWER COMMISSION

Corporate and Financial Reports for Class C and Class D Natural Gas Companies

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0100	INDEX OF FPC PUBLIC USE SCHEDULES SUBMITTED	1 of 2

I. DESCRIPTION

This schedule shall be used to identify the schedules which were submitted by each respondent.

II. GENERAL INFORMATION

A. This schedule shall be submitted by all Federal Power Commission respondents.

B. This schedule shall be completed for each submission of schedules to the Federal Power Commission.

C. The report period date required on line two of this schedule shall be the final date of the period covered by the submission i.e., if data is reported on a calendar year basis, the date to be reported is December 31, 1976, in the format MMDDYY
123176.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1	Date Received in Mail Room (N6): This date field is for Federal Power Commission internal processing only. (TMDATE)
2	Date Received in DBCG (N6): This date field is for Federal Power Commission internal processing only. (TMDATE)
3 (Key)	Schedule Number (N4): Enter the schedule number of each schedule being submitted in this submission.
4	Schedule Contact Name (A35): Enter the name of the individual to contact about the schedule number reported in data field 3 above. The format for the name is: Last Name, First Name or Initial, Middle Initial. (IDNAME)
5	Schedule Contact Telephone Number (A12): Enter the area code and telephone number, in the format NNN-NNN-NNNN. Be certain to over strike the preprinted hyphens (-).
6	Number of Pages (N4) NO: Enter the number of pages submitted for the schedule reported in data field 3 above.
7	Indicate Primary Reporting Media, Hardcopy or Tape (M1): Enter "1" if hardcopy is being submitted; or enter "2" if tape is being submitted. (IMETOR)

FPC Form 131

DETAILED INSTRUCTIONS: SCHEDULE 0100	INDEX OF FPC PUBLIC USE SCHEDULES SUBMITTED	2 of 2

Data Field Number	Instructions
8	Name of Attestor: Enter the legal name of the individual who is attesting to the validity of the data content being submitted on each of the schedules reported in data field 3 above. (IDNAME)
9	Signature of Attestor: Enter the attestors legal signature in this data field. (IDNAME)
10	Date of Attestation: Enter the date of attestation, in the format MMDDYY. (TMDATE)

FPC Form 131
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0101	GENERAL CORPORATE INFORMATION	1 of 2

I. DESCRIPTION

This schedule is used to collect general corporate information for a basic profile on the respondent.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A, Class B, Class C and Class D Natural Gas and Electric respondents.

B. Class A and B respondents shall complete all data fields on this schedule in their first submission. Class C and Class D respondents complete data fields 1 thru 6 only. On subsequent submissions, respondents shall submit only appropriate identification (key data fields) and changed values, additions, and deletions, however, if data fields 10 and 11 are not being submitted, do not complete them as key data fields.

C. Report in data fields 1-9 general information on location of books, incorporation data and public accountants. Report in both data fields 10 and 11 information on the type of service provided (10) and the state(s) where the service is provided (11).

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Name of Officer with Custody of Corporate Books (A22): (IDNAME)
2	Location of Main Books (A22): Enter the state and city where general corporate books are kept. Enter the state appreviation, from the Register of Data Standards, IDSTAT, in the first two postions of this data field, followed by the city name (IDCITY).
3	Location of Other Books (A22): Enter the state and city where any other corporate books of accounts are kept, if different from that at which the general corporate books are kept. Enter the state abbreviation, from the Register of Data Standards, IDSTAT, in the first two positions of this data field, followed by the city name (IDCITY).
4	Incorporation State (A2): Enter the state abbreviation, from the Register of Data Standards, IDSTAT.
5	Incorporation Date (N6) Enter the date the respondent was incorporated, in the format MMDDYY. (TMDATE)
6	Special Law Reference (A20): If incorporated under a special law, give reference to such law. If not incorporated, state type of organization. (IDDESC)

FPC Form 131
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0101	GENERAL CORPORATE INFORMATION	2 of 2

Data Field Number	Instructions
7	Public Accountant (A22): Enter the name of the respondent's independent certified public accountant or independent licensed public accountants (licensed on or before December 31, 1970). (IDNAME)
8	Address of Public Accountant (A22): Enter the state and city. Enter the state abbreviation, from the Register of Data Standards, IDSTAT, in the first two positions of this data field followed by the city name (IDCITY).
9	Date Public Accountant Initially Engaged (N6): Enter the date the public accountant was initially engaged, in the format MMDDYY. The latest year should only be shown if a change in accountants was made during the year. (TMDATE)
10 (Key)	Type of Service (A3): Enter separately each type of utility service furnished, from the following alphabetic abbreviations: (TYUTIL) GAS = Gas ELC = Electric WTR = Water OTH = Other
11 (Key)	State of Service (A2): Enter the abbreviation for each state where respondent supplies the service listed in data field 10 above, from the Register of Data Standards, IDSTAT.

FPC Form 131
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0102	CONTROL OVER RESPONDENT	1 of 2

I. DESCRIPTION

This schedule is used to collect information on any corporations, business trusts or similar organizations or combinations of such organizations which held control over the respondent any time during the year.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A, Class B, Class C and Class D Natural Gas and Electric respondents. Class C and Class D respondents complete data fields 1 thru 4 only.

B. Respondents shall complete all data fields on this schedule in their first submission. On subsequent submissions, respondents shall submit only appropriate identification (key data fields) and changed values, additions, and deletions.

C. In completing this schedule refer to the Uniform System of Accounts for a definition of control.

To summarize:

Direct control is that which is exercised without interposition of an intermediary.

Indirect control is that which is exercised by the interposition of an intermediary which exercises direct control.

Joint control is that in which neither interest can effectively control or direct action without the consent of the other, as where the voting control is equally divided between two holders, or each party holds a veto power over the other. Joint control may exist by mutual agreement or understanding between two or more parties who together have control within the meaning of the definition of control in the Uniform System of Accounts, regardless of the relative voting rights of each party.

D. Report in data fields 1-3 information on companies who directly control the respondent. Report in data field 4 if control over respondent was held under a trust arrangement. For natural gas respondents, if other companies are controlled by the organization listed in data field 1, list in data field 5 the name of each such company and complete data fields 6 and 7. For electric respondents, if control over respondents was in a holding company, list in data field 5 the name of each company in the chain of ownership from respondent to parent organization and complete data field 7.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Name of Controlling Corporation or Organization (A35): (IDNAME)

FPC Form 151 (5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0102	CONTROL OVER RESPONDENT	2 of 2

Data Field Number	Instructions
2	Description of Manner of Control (A40): (IDDESC)
3	Extent of Control (N3) PCT: Enter the extent of control in per cent, rounded to the nearest per cent.
4	Description of Trust Arrangements (A40): If control was held by a trustee(s), state name of trustee(s), name of beneficiary or beneficiaries for whom trust was maintained, and purpose of trust. (IDDESC)
5 (Key)	Other Controlled Company (A35): If other companies are controlled by the organization which holds control over the respondent, list the names of such companies in this data field. (IDNAME)
6	Kind of Business (A27): State the kind of business engaged in by the company listed in data field 5 above. This data field is not applicable to electric respondent. (IDDESC)
7	Extent of Control (N3): State the tier placement of the company listed in data field 5, above, to the controlling corporation or organization reported in field 1, above, by the following example of codes: (NRCADL) 001 - first tier-subsidiary 002 - second tier-subsidiary of tier 1 003 - third tier-subsidiary of tier 2

FPC Form 151 (5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0104	CORPORATIONS CONTROLLED BY RESPONDENT	1 of 2

I. DESCRIPTION

This schedule is used to collect information on all corporations, business trusts, joint ventures and similar organizations controlled directly or indirectly by the respondent at any time during the year.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A, Class B, Class C and Class D Natural Gas and Electric respondents.

B. Respondents shall complete all data fields on this schedule in their first submission. On subsequent submissions, respondents shall submit only appropriate identification (key data fields) and changed values, additions, and deletions.

C. In completing this schedule, refer to the Uniform System of Accounts for a definition of control.

To summarize:

Direct control is that which is exercised without interposition of an intermediary.

Indirect control is that which is exercised by the interposition of an intermediary which exercises direct control.

Joint control is that in which neither interest can effectively control or direct action without the consent of the other, as where the voting control is equally divided between two holders, or each party holds a veto power over the other. Joint control may exist by mutual agreement or understanding between two or more parties who together have control within the meaning of the definition of control in the Uniform System of Accounts, regardless of the relative voting rights of each party.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Name of Company Controlled (A35): (IDNAME)
2	Kind of Business (A30): (IDDESC)
3	Per Cent Voting Stock Owned (N3) PCT: Enter the per cent of voting stock owned, rounded to nearest per cent.
4	Particulars for Corporation Controlled (A144): If control ceased at any time during the year, furnish particulars regarding companies involved, manner of disposition and any other important aspects.

FPC Form 151 (5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0104	CORPORATIONS CONTROLLED BY RESPONDENT	2 of 2

Data Field Number	Instructions
4 (cont'd)	If control was by other means than a direct holding of voting rights, state the manner in which control was held, naming any intermediaries involved. If control was held jointly with one or more other interests, state the fact and name the other interests; however, state if corporation is inactive. (IDDESC)

FPC Form 151 (5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0105	CORPORATE OFFICERS/DIRECTORS	1 of 3

I. DESCRIPTION

This schedule is used to collect data on each general officer and director of the respondent who held office at any time during the year.

II. GENERAL INFORMATION

A. This schedule shall be submitted by the following categories of respondents:

Respondent Category	Data Fields
(1) Class A and Class B (Natural Gas and Electric)	All
(2) Class C and Class D (Natural Gas and Electric)	1-7,9,10

B. Respondents shall complete all data fields on this schedule in their first submission. On subsequent submissions, respondents shall submit only appropriate identification (key data fields) and changed values, additions, and deletions.

C. Report the particulars applicable to all officers and/or directors of the respondent for the reporting year. Other employees of the respondent whose annual salary is $25,000 per year or more ($35,000, if respondent's annual operating revenues are $50,000,000 or more) must also be reported on Schedule 0106, Other Corporate Employees.

D. If an individual is both an officer and director of the respondent, report separately the information called for in this schedule, once for the position of officer and once for the position of director.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Officer's/Director's Last Name (A15): (IDNAME)
2 (Key)	Officer's/Director's First Name and Middle Initial (A15): Enter the full first name and initial(s), separated by a space. (IDNAME)
3	Officer's/Director's Business Address (A22): For officers, enter the financial business address if different from the respondent's address. For directors, enter the principal business address if different from company address. Enter the two character abbreviation, from the Register of Data Standards, IDSTAT, followed by city name (IDCITY).

FPC Form 131

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0105	CORPORATE OFFICERS/DIRECTORS	2 of 3

Data Field Number	Instructions
4	Officer/Director Category (N1): Enter the one digit numeric code as follows: (TYOFDR) 1 = Officer 2 = Director 3 = Both 9 = Other
5	Officer/Director Title (A30): Enter the officer's and/or director's title at the end of the reporting year. If any officer/director retired during the year, write the word "retired" in this data field. If any officer/director otherwise left the respondent during the year, leave this data field blank. Abbreviate as necessary. Examples: V.P. - Vice President, Treas. - Treasurer, Sec. - Secretary, etc. (IDDESC)
6	Officer/Director Salary - Fee (N6) DOL: Report any salaries or regular fees paid during the year.
7	Director/Member of Executive Committee (N1): Indicate "1" for chairman of the executive committee; "2" for member of that committee; or "3" for neither. (TYEXCO)
8	Officer/Director Retirement Benefits (N6) DOL: Enter the annual benefits estimated to be payable to each of the three highest paid officers, and any director who is not an officer named herein, in the event of retirement at normal retirement date, pursuant to any pension or retirement plan.
9	Officer/Director Date Position or Term Began (N6): Enter the date, in the format MMDDYY, each officer first began the position listed in data field 5 above. Enter the date each director was first elected to the position of director. (TMDATE)
10	Officer/Director Date Retired or Otherwise Separated (N6): Enter the date, in the format MMDDYY, that any officer or director retired or otherwise left the respondent during the year. (TMDATE)
11	Director Meetings Attended (N2) NO: Enter the number of meetings each director attended during the past year.
12	Officer/Director Special Remuneration Value (N8) DOL: If any officer and/or director reported in this schedule received remuneration from respondent, directly or indirectly, other than from salary and/or fees reported in data field 6 above, enter the value of the remuneration (in dollars).

FPC Form 131

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0107	SECURITY HOLDERS AND VOTING POWERS - TOTAL	1 of 1

I. DESCRIPTION

This schedule is used to collect summary information on the total number of votes and total holders of voting securities of the respondent.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A and Class B Natural Gas and Electric respondents and Class C and Class D Natural Gas respondents.

B. Class A and Class B respondents shall complete all data fields on this schedule in their first submission. Class C and Class D respondents shall complete data fields 1-3 and 7. On subsequent submissions, respondents shall submit only appropriate identification (key data fields) and changed values, additions, and deletions.

C. Data should be reported as of the latest record date as specified in data field 7.

D. Separate issues of preference stock should be totaled and reported in data fields 2 and 5.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Total Votes - Common Stock (N9) NO.
2	Total Votes - Preferred Stock (N9) NO.
3	Total Votes - Other Voting Securities (N9) NO.
4	Total Number of Holders - Common Stock (N9) NO.
5	Total Number of Holders - Preferred Stock (N9) NO.
6	Total Number of Holders - Other Voting Securities (N9) NO.
7	Latest Record Date (N6): Enter the latest record date, in the format MMDDYY. (TMDATE)

FPC Form 131
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0108	SECURITY HOLDERS AND VOTING POWERS	1 of 1

I. DESCRIPTION

This schedule is used to collect detailed information on holders of the respondent's outstanding securities and voting power thereof, to include:

(a) the ten security holders with the highest voting powers and,

(b) the security holdings and voting powers of any officer or director of the respondent not included in (a) above.

II. GENERAL INFORMATION

A. This schedule shall be completed by Class A, Class B, Class C and Class D Natural Gas and Electric respondents.

B. Respondents shall complete all data fields on this schedule in their first submission. On subsequent submissions, respondents shall submit only appropriate identification (key data fields) and changed values, additions and deletions.

C. In data fields 4-7, state the number of votes which each security holder would have had the right to cast on the latest record date, if a meeting were then in order. The latest record date should be reported on Schedule 0107, data field 7.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field numbers:

Data Field Number	Instructions
1 (Key)	Name of Security Holder (A35): (IDNAME)
2	Location of Security Holder (A22): Enter the state abbreviation in the first two positions of the data field, from the Register of Data Standards, IDSTAT, followed by the city name (IDCITY).
3	Officer/Director Indicator (N1): If the security holder named in data field 1 above, is an officer or director within the respondent's organization, enter "1"; if not, enter "0". (INYONO)
4	Total Number of Votes (N8) NO.
5	Votes - Common Stock (N8) NO.
6	Votes - Preferred Stock (N8) NO.
7	Votes - Other Voting Securities (N8) NO.

FPC Form 131
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0111	NOTES TO SECURITY HOLDERS AND VOTING POWERS	1 of 2

I. DESCRIPTION

This schedule is used to collect additional information related to (a) stock options, warrants or rights outstanding at end of the year, and (b) the voting rights and privileges carried by any security other than the rapondents common and praferred stock.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A, Class B, Class C and Class D Natural Gas and Electric respondents.

B. Respondents shall complete all data fields on this schedule annually as necessary to support schedule Nos. 0107 and 0108.

C. This schedule supports information included on two schedules:

Schedule 0107 - "Security Holders and Voting Powers - Total"

Schedule 0108 - "Security Holders and Voting Powers."

D. Furnish particulars concerning any options, warrants, or rights outstanding at the end of the year for others to purchase securities of the respondent or any securities or other assets owned by the respondent. Particulars should include names of the parties granted the options, warrants or rights, the prices to be paid, expiration dates, and other material information relating to the exercise of the securities or assets. Specify the name of any officer, director, associated company, or any of the ten largest security holders who hold stock options warranty or rights at the end of the year.

E. Give complete description of any other security carrying voting rights and explain the circumstances whereby the security became vested with voting rights. If any class or issue of security (other than common or preferred stock) has any special privileges in the election of directors, trustees or managers, or in the determination of corporate action by any method, explain the extent and circumstances.

F. This schedule is not applicable to convertible securities or to any securities substantially all of which are outstanding in the hands of the general public where the options, warrants, or rights were issued on a prorata basis.

G. If the respondent needs additional space to complete the text information (data field 4) for any particular note, use a separate entry, repeating the same information in data fields 1 and 2 and using successive numbers (1, 2, 3, etc.) in data field 3.

III. DETAILED INSTRUCTIONS

The following data field-by data field instructions are cross-referenced to the corresponding schedule layouts by data field number:

FPC Form 131
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0112	ANNUAL NOTES TO FINANCIAL DATA	1 of 4

I. DESCRIPTION

This schedule is used to collect information deemed necessary for adequate disclosure to support the financial data, including the financial statements, presented to the Commission in the annual filing, to include the following aspects:

A. Disclosures of all important accounting policies.

B. Disclosure of accounting changes made during the year which had significant effect on the reported net income.

C. Disclosure of all contingent assets or liabilities or significant commitments existing at the end of the year which have not been reflected in the financial data.

D. Disclosure of any other important changes occurring during the year which have not been provided elsewhere in the filing.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A, Class B, Class C and Class D Natural Gas and Electric respondents.

B. Respondents shall complete all data fields on this schedule annually.

C. Respondents will use the following guidelines to report disclosure information, using titles underlined below as the Type of Note in data field 1:

1. Accounting Policies: In disclosing its accounting policies, the respondent should identify and describe the accounting principles it has utilized, the methods of applying those principles and the impact of such policies on the financial data submitted. Examples of accounting policies that may be considered significant together with suggested minimum disclosure requirements include:

(a) Plant and Depreciation

(b) Federal Income Tax Expense

(1) Details on the accounting treatment for Federal income taxes (flow through, full normalization, partial normalization).

(2) Details on the ratemaking treatment for Federal income taxes (flow through, full normalization, partial normalization).

(3) Details on accounting for the allocation of income taxes between utility and non-utility segments of company operations.

(4) Details on the accounting for IRS settlements as claim for refunds.

(5) Details on the accounting for recognition of operating loss carrybacks and carryforwards.

FPC Form 151
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0112	ANNUAL NOTES TO FINANCIAL DATA	2 of 4

(6) If the provisions of the tax laws are being utilized with respect to plant property (ADR class life and liberalized depreciation, repair allowance, etc.) for Federal income tax purposes and the resultant benefits are being flowed through the income statement, disclose the effect of such on the income statement.

(c) Investment Tax Credits

(1) Details on the method of accounting adopted for investment tax credits utilized in the current year.

(2) Details on whether the respondent has consented or is required by a regulatory commission to pass the benefits of investment tax credits along to consumers.

(3) For each year beginning with 1971, details on the ratemaking treatment of these credits to include option for (1) rate base treatment, (2) ratable flow through, (3) flow through in accordance with Section 46 (f) of the Internal Revenue Code, or (4) other method.

(d) Equity Accounting

(e) Unbilled Revenues

(f) Deferred Fuel Cost

Details on the accounting and ratemaking treatment for deferred fuel cost, to include whether specific approvals have been received from regulatory commissions to defer and recover these costs for ratemaking purposes.

(g) Deferrals of Expense or Other Items

(h) Reacquisition of Long Term Debt

(1) Details on the amount of gains and/or losses for the year from reacquistion of long term debt.

(2) Details on the accounting for such gains or losses (included in income/amortized).

(3) Details on the accounting treatment of unamortized debt discount and expense if different from the requirements of the Uniform System of Accounts.

(i) Pension Plan

(1) Details on the method of funding.

(2) Details on the pension cost for the current year charged to expense and capital accounts.

FPC Form 151
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0112	ANNUAL NOTES TO FINANCIAL DATA	3 of 4

(3) Details on the amount of unfunded vested benefite.

(4) Details on the effect of the Security Act of 1974 on annual pension cost.

(5) Details on any changes in method of funding for the year.

(j) Research and Development

(k) Other

2. Accounting Changes: Information on important accounting changes should include the nature of and justification for the change, and should include the dollar effect of the change on the reported financial data. The respondent should utilize the following definition of an accounting change taken from Opinion No. 20 of the Accounting Principles Board for purposes of this requirement.

The term accounting change means a change in (a) an accounting principle, (b) an accounting estimate, or (c) the reporting entity.

In considering the importance of an accounting change, the respondent should consider the impact (or estimated impact), on not only the financial data for the current reporting period, but should also consider the financial impact of the changes on subsequent years results of operations.

3. Contingencies or Commitments: Information on all contingent assets or liabilities or significant commitments shall include all pertinent facts surrounding such matters. Examples of matters that should be reported in this section include:

(a) Particulars of all important legal proceedings pending at the end of the year and the results of proceedings culminated during the year, including the related accounting for any settlements.

(b) Commitments related to the respondent's construction program.

(c) Long term commitments on the purchase of fuel supply.

(d) Short term bank borrowing arrangements including open lines of credit, compensating balance arrangements, commitment fees, and average annual effective interest rates.

(e) Details on obligations incurred or assumed by respondent as guarantor for performance by another of any agreement or obligation. Such information shall include the amount of the obligation and the name of the commission authorizing assumption, if any, and date of authorization.

4. Other Important Changes: Information on other important changes during the year shall disclose all significant changes occuring during the year not provided for elsewhere in the Schedules in this filing.

FPC Form 151
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0112	ANNUAL NOTES TO FINANCIAL DATA	4 of 4

Examples of changes include changes in articles of incorporation or amendments to the corporate charter; acquisition of ownership in other companies; recognition, merger or consolidation with other companies, particulars if control over respondent was held by a receiver or trustee.

For securities assumed during the year, the name of the company from which the liability was assumed and other particulars of the transaction should be included in data field 4. For Class A and B respondents, if any unamortized discount, premium, expenses and/or gains or losses were taken over into the respondent's books, details of these amounts should be included in schedule 0123, "Securities Assumed, Refunded or Retired during the Year," data fields 5-9. Additional disclosure on the respondent's accounting policy with respect to gains and losses on security transactions should be included under item (h), above, of this schedule.

D. If the respondent needs additional space to complete the text information (data field 4) for any particular note, use a separate entry, repeating the same information in data fields 1 and 2 and using successive numbers (1, 2, 3, etc.) in data field 3.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Type of Note (A60): Examples: (IDDESC) Policies - Income Tax Expense Policies - Equity Accounting Changes - Unbilled Revenues Contingencies/Commitments - Construction Program
2	Note Number (N1): Use successive numbers to designate more than one occurrence of the type of note listed in data field 1 above. If only one occurrence is needed for a particular type note, enter "1". (NRCADL)
3	Entry Continuation Number (N1): Use successive numbers to designate continuation entries of textual information for a particular note. If only one textual entry is needed to report the required disclosure, enter "1" in this data field. (NRCADL)
4	Text of Note (A249): (IDDESC)

FPC Form 151
(5-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0124	LIST OF ACCOUNTS - PART IV (NATURAL GAS CLASS C AND CLASS D)	1 of 9

I. DESCRIPTION

This schedule is used to collect the end of year balance or the amount for the year for certain accounts of the Uniform System of Accounts and certain other financial data that has been categorized as Supplemental Accounts. (For a discussion of the relationship between the two systems of accounts see General Instructions for Corporate, Economic and Other Financial Schedules.) This schedule replaces several former schedules which reported details of:

- Comparative Balance Sheet
- Statement of Income for the Year
- Statement of Retained Earnings for the Year
- Other supporting schedules, including account balances from numerous schedules.

The account numbers to be used from the two systems of accounts are listed in General Information, II-C.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class C and Class D Natural Gas respondents.

B. Respondents shall complete all data fields on this schedule annually.

C. The data to be reported is structured upon the account groupings from the Uniform System of Accounts augmented by a system of Supplemental Accounts to integrate related data. Included on this schedule are five account groupings, each identified by title and source:

Account Group	Title	Source
1	Balance Sheet Accounts	Uniform System of Accounts/ Supplemental Accounts
2	Income Statement Accounts	Uniform System of Accounts/ Supplemental Accounts
3	Retained Earnings Accounts	Uniform System of Accounts
4	Other Accounts	Uniform System of Accounts/ Supplemental Accounts
5	Departmental Accounts	Supplemental Accounts

Those respondents with only one utility department in their internal organization shall report groups 1 through 4, while those with more than one department shall report groups 1 through 5.

Respondents should start each account group on a new schedule collection sheet. Within each group, account numbers should be listed according to numerical sequence.

	949.90	Total Gas Operation and Maintenance Expenses	

5. Departmental Accounts: Respondents with more than one utility department in their internal organization are required to report the following plant and income accounts on the basis of operating utility departments. Supplemental Account numbers have been established to collect this data. The Supplemental Account numbers will consist of a second decimal place after the appropriate Uniform System of Account numbers as follows: Gas department - XXX.X1; electric department - XXX.X2; common - XXX.X3; other departments - XXX.X5. When the basic number from the Uniform System of Accounts is a whole integer (e.g., 101), the Supplemental Account number will add a zero in the first decimal place (e.g., 101.0) and then the department code (e.g., 101.01). This has been adopted to insure uniformity with those few accounts from the Uniform System of Accounts with a decimal place (e.g., 401.1).

Uniform System of Accounts	Supplemental Accounts	Description	Details on Related Schedules

DETAILED INSTRUCTIONS: SCHEDULE 0132	CAPITAL STOCK	1 of 2

I. DESCRIPTION

This schedule is used to collect selected details on capital stock included in Account 201.00, Common Stock Issued, Account 204.00, Preferred Stock Issued, and Account 217.00, Required Capital Stock.

II. GENERAL INFORMATION

This schedule shall be submitted by the following categories of respondents:

Respondent Category	Data Fields
(1) Class A & Class B Natural Gas and Electric	All
(2) Class C & Class D Natural Gas and Electric	1-4, 6, & 7

B. Respondents shall complete all specified data fields on this schedule annually.

C. Report the particulars called for concerning common and preferred stock at end of year. Report separately each series of and class of preferrad stock.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): (ACCTML)
2 (Key)	Class and Series of Stock (A40): The designation of each class of preferred stock shall show the dividend rate and whether the dividends are cumulative or noncumulative. Example: Preferred Series A 6% Cumulative. Shares authorized for each class of preferred stock should be shown once under the first series of each class as listed in data field 2. (IDDESC)
3	Number of Shares Authorized by Charter (N8) NO: Show the number of shares authorized by the articles of incorporation (as amended) at end of year.
4	Par or Stated Value Per Share (N5) DOL.
5	Call Price End of Year (N5) DOL.
6	Shares of Capital Stock Outstanding (N8) NO: State the total number of shares outstanding per balance sheet without reduction for amounts held by respondent.
7	Amount of Capital Stock Outstanding (N9) DOL. State the total amount outstanding per balance sheet without reduction for amounts held by respondent.

FPC Form 131

DETAILED INSTRUCTIONS: SCHEDULE 0133	LONG-TERM DEBT	1 of 2

I. DESCRIPTION

This schedule is used to collect selected details on long-term debt included in Accounts 221.00, Bonds and 222.00, Reacquired Bonds.

II. GENERAL INFORMATION

A. This schedule shall be submitted by the following categories of respondents:

Respondent Category	Data Fields
(1) Class A & Class B Natural Gas and Electric	All
(2) Class C & Class D Natural Gas and Electric	1, 2, & 5-9

B. Repondents shall complete all appropriate data fields on this schedule annually.

C. For any long-carm debt retired during the year, complete information called for in data fields 1, 2, 6, and 8.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): (ACCTML)
2 (Key)	Class and Series Description of Obligation (A50): Enter class and series of long-term debt. For example: First Refunding Mortgage - Series B. (IDDESC)
3	Name of Issuing Company (A35): Enter the name of the company issuing the bonds for any bonds assumed by the respondent. (IDNAME)
4	Associated Company Indicator (N1): If company named in data field 3 above is an associated company, enter "1"; if not, enter "0". (INYONO)
5	Nominal Date of Issue (N6): Enter the date, in the format MMDDYY. (TNDATE)
6	Date of Debt Maturity (N6): Enter the date, in the format MMDDYY. (TNDATE)
7	Amount Outstanding (N9) DOL.
8	Amount of Interest for Year (N7) DOL: List the amount of interest expense for the year related to long-term debt listed in data field 2 above. Include any interest expense incurred

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0141	INVESTMENT TAX CREDITS	1 of 2

I. DESCRIPTION

This schedule is used to collect information related to investment tax credits for the years 1962 to date.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A, Class B, Class C and Class D Natural Gas and Electric respondents.

B. Respondents shall complete all data fields on this schedule in their first submission. On subsequent submissions, respondents shall submit only appropriate identification (key data fields and data fields 2 and 4) and changed values, additions, and deletions.

C. This schedule shall be prepared by the respondent regardless of the method of accounting adopted for the investment tax credits. The schedule collects details by years for all investment tax credits generated and utilized by the respondent beginning with 1962 through the current year. The required information for each year should be presented as adjusted at year end to reflect corrections of estimated amounts, carryback or carryforward of unused credits.

D. In the initial submission of this schedule, respondents will indicate Code "1" in data field 3 for each year's data. For subsequent submissions, respondents will use "1" (original) or "2" (corrected) as appropriate.

E. For electric respondents with more than one department, report tax credit for the electric department and the total of tax credits for all other departments. For natural gas respondents with more than one department, report tax credits for the gas department and the total of tax credits of all other departments.

II. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Year (N4): Beginning with 1962 enter the year. (THYEAR)
2	Rate (N2) PCT: Indicate 03 percent, 04 percent, 07 percent, 10 percent, 11 percent credits or other appropriate percent credits.
3	Indicator Original/Corrected (N1): Enter "1" at time of original submission. On subsequent submissions, enter "1" (original) or "2" (corrected) as appropriate. (INETOR)
4	Department (A3): Enter one of the following abbreviations to indicate department or operation: (TYUTIL) ELC = electric GAS = gas OTH = other

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): Enter the appropriate plant account number.
2 (Key)	Additions to Plant (N9) DOL: Enter additions for current year.
3	Retirements to Plant (N9) DOL: Enter retirements for current year.
4	Adjustments to Plant (N9) DOL: Enter the dollar amount of adjustments to plant account listed in data field 1 above.
5	Transfers of Plant in Service (N9) DOL: Enter reclassifications or transfers to plant within utility plant accounts or transfer from the detail plant in service function to another function.
6	Plant Balance End of Year (N10) DOL.

FPC Form 151
(3-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0159	OPERATING REVENUES	1 of 2

I. DESCRIPTION

This schedule is used to collect information pertaining to sales of electricity or natural gas and the number of utility customers for the year.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A, Class B, Class C and Class D Natural Gas and Electric respondents.

B. Natural gas respondents shall complete data fields 1-3 annually. Electric respondents shall complete data fields 1, 4 and 5 annually. Jurisdictional respondents for both natural gas and electric shall complete all data fields annually.

C. Report the requested information for the year for each of the following prescribed accounts:

1. Class A, Class B, Class C and Class D Electric respondents:

Uniform System of Accounts	Supplemental Accounts	Description
440.00		Residential sales
442.00		Commercial and industrial sales
	442.10	Small or commercial customers
	442.20	Large or industrial customers
444.00		Public street and highway lighting
445.00		Other sales to Public Authorities
447.00		Sales for resale
448.00		Interdepartmental sales
449.00		Other sales
	449.90	Total Sales of Electricity

2. Class A, Class B, Class C and Class D Natural Gas respondents:

Uniform System of Accounts	Supplemental Accounts	Description
480.00		Residential sales
481.00		Commercial and industrial sales
	481.10	Small or commercial customers
	481.20	Large or industrial customers
482.00		Other sales to Public Authorities
483.00		Sales for resale
484.00		Interdepartmental sales
	485.90	Total Sales of Gas

D. Number of customers shall be reported on the basis of number of meters, plus number of flat rate accounts, except that where separate meter readings are added for billing purposes, one customer should be counted for each group of meters so added. The average number of customers means the average of the 12 figures at the close of each month.

FPC Form 151
(3-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0159	OPERATING REVENUES	2 of 2

E. Natural gas means either natural gas unmixed or any mixture of natural and manufactured gas.

F. The classification of commercial and industrial sales according to small customer or commercial and large customer or industrial, may be according to the basis of classification regularly used by the respondent, provided such basis of classification is not greater generally than 1000 KW of demand for electricity or 200,000 MCF per year for natural gas companies.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): (ACCTML)
2	Average Number of Monthly Natural Gas Customers (N7) NO.
3	Annual MMCF of Natural Gas Sold (N9.3) MMCF: Enter the annual MMCF, rounded to three decimal places.
4	Average Number of Monthly Electric Customers (N7) NO.
5	Annual MWH of Electricity Sold (N10) MWH.

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0161	DETAILED ACCOUNT DATA - PART I	1 of 8

I. DESCRIPTION

This schedule is used to collect detailed information supporting the accounting entries of certain of the balance sheet accounts of the Uniform System of Accounts.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A, Class B, Class C and Class D Natural Gas and Electric respondents.

B. The following accounts are included in this schedule:

Uniform System of Accounts	Supplemental Accounts	Description
123.00		Investment in associated companies
123.10		Investment in subsidiary companies
124.00		Other investments
136.00		Temporary cash investments
145.00		Notes receivable from associated companies
146.00		Accounts receivable from associated companies
181.00		Unamortized debt expense
187.00		Deferred losses from disposition of utility plant
189.00		Unamortized loss on reacquired debt
215.00		Appropriated retained earnings
223.00		Advances from associated companies
224.00		Other long-term debt
225.00		Unamortized premium on long-term debt
226.00		Unamortized discount on long-term debt
233.00		Notes payable to associated companies
234.00		Accounts payable to associated companies
256.00		Deferred gains from disposition of utility plant
257.00		Unamortized gain on reacquired debt

Class A and Class B respondents report the details for all accounts listed on this schedule. Class C and Class D respondents report the details for Account 215.00 only.

C. Respondents shall report the information for each account listed above as specified in Part III, Detailed Instructions. Not every data field is required for every account. The data fields for each account shall be reported annually.

D. Total debits and credits for each account listed on this schedule should be provided for as the last entry for each account in data fields 3 and 4. Report the word "Total" in data field 2. Then report in data field 3 the total debits to the account, and in data field 4 the total credits to the account.

III. DETAILED INSTRUCTIONS

Instructions, cross-referenced to the schedule layout by data field number, are given below for each account to be reported.

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0161	DETAILED ACCOUNT DATA - PART I	2 of 8

Accounts 123.00, 123.10, & 124.00

Report particulars for investments in associated and subsidiary companies and in other investments.

Investments in amounts of less than $10,000 may be grouped. For grouped items, enter the word "Other" in data field 2 together with the number of items grouped, i.e., Other (12). Report data for the grouped items in data fields 3, 4 and 5.

In reporting Account 123.10, include information pertaining to all investments other than common stock accounted for on the equity basis of accounting. Common stock investments under equity accounting should be included on Schedule 0125.

In reporting Account 124.00, do not include information pertaining to advances which are reported on Schedule 0142.

Data Field Number	Instructions
1 (Key)	Account Number (N3.2)
2 (Key)	Description (A50): List separately each investment included in these accounts at any time during the year by the following groupings: Stock Bonds Advances Notes Other Provide a brief description of each investment to include name of issuer and where appropriate, the date acquired, the date issued and interest rate, i.e., Stock - ABC Corporation - 8/25/75 Note - XYZ Co. - 5/10/75 - 8% Stock - BCD Inc. - 3/1/75 Advances - Jones Corp. Bonds - Industrial Development - 8% State "Total" as last entry for each account. (IDDESC)
3	Debits - Amount (N9) DOL: Enter the amount of all purchases or other additions made during the year of the investment listed in data field 2 above.
4	Credits - Amount (N9) DOL: Enter the amount of all sales or other disposition made during the year of the investment listed in data field 2 above.
5	Balance End of Year (N9) DOL: Enter amount of investment at end of year.

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0161	DETAILED ACCOUNT DATA - PART I	6 of 8

Accounts 187.00, & 256.00

Report information related to deferrals of losses or gains to disposition of utility plant. Losses or gains on property with an original cost of less than $50,000 may be grouped. For grouped items, enter the word "Other" in data field 2 with the number of items grouped, i.e., Other (12). Report data for the grouped items in data fields 3, 4 and 5.

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): (ACCTML)
2 (Key)	Description (A50): Give a brief description of the property creating the deferred loss or gain and the date the loss or gain was originally recognized. Enter "Total" as last entry for each account. (IDDESC)
3	Debits - Amount (N9) DOL: For Account 187.00, enter the total amount of losses incurred from the disposition of utility plant during the year. For Account 256.00, enter the total amount of amortizations (to Account 411.60) of previously recorded gains during the year.
4	Credits - Amount (N9) DOL: For Account 187.00, enter the amount of amortizations during the year (to Account 411.70) of previously recorded losses. For Account 256.00, enter the total amount of gains resulting from the disposition of utility plant during the year.
5	Balance End of Year (N9) DOL.
6	Particulars (A60): Give the date of Commission approval of journal entries. Where approval has not been received, give explanation. (IDDESC)
10	Amount of Loss (N9) DOL: For Account 187.00, enter the amount of original loss on the disposition of the property.
11	Amount of Gain (N9) DOL: For Account 256.00, enter the amount of original gain on the disposition of the property.

Accounts 189.00 & 257.00

Report information on reacquired debt. Gains or losses of less than $25,000 may be grouped. For grouped items, enter the word "Other" in data field 2 with the number of items grouped, i.e., Other (12). Report data for the grouped items in data fields 3, 4 and 5.

If certain series of debt were reacquired at different times during the year, the information should be summarized and the totals reported in data fields 2-11.

FPC Form 151

DETAILED INSTRUCTIONS: SCHEDULE 0162	DETAILED ACCOUNT DATA - PART II	1 of 12

I. DESCRIPTION

This schedule is used to collect detailed information supporting the accounting entries to certain balance sheet and retained earning accounts of the Uniform System of Accounts and the Supplemental Accounts.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A, Class B, Class C and Class D Natural Gas and Electric respondents.

B. The following accounts are included on this schedule:

Uniform System of Accounts	Supplemental Accounts	Description
114.00		Utility plant acquisition adjustments
115.00		Accumulated provision for amortization of utility plant acquisition adjustments
116.00		Other utility plant adjustments
120.10		Nuclear fuel in process of refinement, conversion, enrichment and fabrication
	120.11	Nuclear fuel in process - fabrication
	120.12	Nuclear fuel in process - nuclear materials
	120.13	Nuclear fuel in process - allowance for funds used during construction
	120.14	Nuclear fuel in process - other overhead
120.20		Nuclear fuel materials and assemblies - stock account
120.30		Nuclear fuel assemblies in reactor
120.40		Spent nuclear fuel
120.50		Accumulated provision for amortization of nuclear fuel assemblies
121.00		Nonutility property
122.00		Accumulated provision for depreciation and amortization of nonutility property
	144.10	Accumulated provision for uncollectable accounts - utility customers
	144.20	Accumulated provision for uncollectable accounts - merchandise, jobbing, and contract work
	144.30	Accumulated provision for uncollectable accounts - officers and employees
	144.40	Accumulated provision for uncollectable accounts - other
157.00		Nuclear materials held for sale
	157.10	Nuclear materials held for sale - uranium
	157.20	Nuclear materials held for sale - plutonium
	157.30	Nuclear materials held for sale - other
182.00		Extraordinary property losses
183.00		Preliminary survey and investigation charges
183.10		Preliminary natural gas survey and investigation charges

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0162	DETAILED ACCOUNT DATA - PART II	2 of 12

Uniform System of Accounts	Supplemental Accounts	Description
183.20		Other preliminary survey and investigation charges
186.00		Miscellaneous deferred debits
209.00		Reduction in par or stated value of capital stock
210.00		Gain on resale or cancellation of reacquired capital stock
211.00		Miscellaneous paid-in capital
213.00		Discount on capital stock
214.00		Capital stock expense
216.10		Unappropriated undistributed subsidiary earnings
253.00		Other deferred credits
	255.10	Accumulated deferred investment tax credits - electric or gas department
	255.20	Accumulated deferred investment tax credits - other departments
261.00		Property insurance reserve
262.00		Injuries and damages reserve
263.00		Pensions and benefits reserve
264.00		Amortization reserve - Federal
265.00		Miscellaneous operating reserves
437.00		Dividends declared - preferred stock
438.00		Dividends declared - common stock
439.00		Adjustments to retained earnings

Class A and Class B Electric respondents report the detail for all accounts above except Accounts 183.10 and 183.20.

Class A and Class B Natural Gas respondents report the detail for all accounts above except Accounts 120.10 through 120.50, 157.00 through 157.30, 183.00 and 264.00.

Class C and Class D Natural Gas and Electric respondents report only the detail for Accounts 216.00, 255.10, 255.20, 437.00, 438.00 and 439.00.

C. Respondents shall report the information for each account as specified in Part III, Detailed Instructions. Not every data field is required for every account. The data fields for each account shall be reported annually.

D. Data fields 5 or 6 provide space for entry of one account number. If more than one account has been debited or credited for the item listed in data field 2, list the major account in data field 5 or 6 and the remaining accounts in data field 8, Particulars.

III. DETAILED INSTRUCTIONS

Instructions, cross-referenced to the schedule layout by data field number, are given below for each account to be reported.

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0162	DETAILED ACCOUNT DATA - PART II	3 of 12

Accounts 114.00, 115.00 & 116.00

Report particulars for utility plant acquisition or other adjustments.

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): (ACCTML)
2 (Key)	Description (A50): Explain the nature of each plant acquisition adjustment in Account 114.00 and plant adjustment in Account 116.00. For companies who utilize Account 115.00, provide the same description for each acquisition adjustment as provided under Account 114.00. Include the name of the company from which the property was acquired. (IDDESC)
3	Debits - Amount (N9) DOL.
4	Credits - Amount (N9) DOL.
5	Contra Account Credited (N3.2): (ACCTML)
6	Contra Account Debited (N3.2): (ACCTML)
8	Particulars (A60): For acquisition adjustments occuring during the year, state date of transaction and date journal entries clearing Account 102.00, Plant Purchased or Sold, were accepted for filing by the Commission. Give the data Commission authorized the amortization of acquisition adjustments. Explain the plan of disposition of any acquisition adjustments not currently being amortized. (IDDESC)
9	Balance End of Year (N10) DOL.
10	Period of Amortization (A5): Enter the period of amortization by years, in the format YY-YY, i.e., 74-79. (IDDESC)

Accounts 120.10 through 120.14, 120.20 through 120.50, & 157.00 through 157.30

Report the costs incurred for nuclear fuel materials on hand, in reactor, and in cooling owned by the respondent.

If the nuclear fuel stock is obtained under leasing arrangements, details of the leasing arrangements should be included on Schedules 0170 and 0171.

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): (ACCTML)
3	Debits - Amount (N9) DOL: Enter the amount of additions during year.

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0162	DETAILED ACCOUNT DATA - PART II	4 of 12

Data Field Number	Instructions
4	Credits - Amount (N9) DOL: Enter the amount transferred, amortized during year or the amount of other reductions to the cost of nuclear fuel made during the year.
8	Particulars (A60): Explain the nature of all credit entries to Accounts 120.10 through 120.14, except transfers to Account 120.20. For Accounts 120.20, 120.30 and 120.40, state the estimated net salvage value of nuclear materials related to nuclear fuel included in each account. Explain the reason for any adjustments (data field 7) to the cost previously recorded in these accounts. (IDDESC)
9	Balance End of Year (N10) DOL.

Account 121.00

Report particulars for nonutility property.

Information on specific property having a cost under $100,000 should be grouped. For grouped items, enter the word "Other" in data field 2 with the number of item grouped, i.e., Other (12). Report data for the grouped items in data field 3, 4, and 9. Properties previously devoted to public service are separate and distinct from those allowed to be grouped under this instruction.

Total debits and credits should be provided for in data fields 3 and 4. Report the word "Total" as the last item in data field 2, in the first five spaces, and in data field 3, the total debits to the account and in data field 4, the total credits to the account.

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): (ACCTML)
2 (Key)	Description (A50): Give a brief description and state the location (city, state) of nonutility property. (IDDESC)
3	Debits - Amount (N9) DOL: Enter the cost of any property described in data field 2 above, which was purchased or otherwise transferred to Account 121.00 during the year.
4	Credits - Amount (N9) DOL: Enter the cost of property described in data field 2 above, which was sold or otherwise transferred from Account 121.00 during the year.
8	Particulars (A60): List details of sales, purchases or transfers of nonutility property. For all property previously devoted to public service list date of transfer to Account 121.00. (IDDESC)
9	Balance End of Year (N10) DOL.

Report particulars for other paid-in capital accounts.

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): (ACCTML)
2 (Key)	Description (A50): For Accounts 210.00, 213.00 and 214.00, state the class and series of stock to which each debit and credit are related. For Accounts 209.00 and 211.00, state the general nature of transactions which gave rise to the reported amounts. (IDDESC)
3	Debits - Amount (N9) DOL.
4	Credits - Amount (N9) DOL.
5	Contra Account Credited (N3.2): (ACCTML)
6	Contra Account Debited (N3.2): (ACCTML)
9	Balance End of Year (N10) DOL.

Account 216.10

Report particulars for unappropriated undistributed subsidiary earnings.

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): (ACCTML)
2 (Key)	Description (A50): Enter the word "Total". (IDDESC)
3	Debits - Amount (N9) DOL: Enter the amount of dividend received from subsidiaries and any other debit entries to this account during the year.
4	Credits - Amount (N9) DOL: Enter the amount of equity in subsidiary earnings and any other credit entries to this account during the year. Subsidiary losses should be included in data field 5 below, with the notation "Subsidiary Loss" included in data field 8 below.
5	Contra Account Credited (N3.2): (ACCTML)
8	Particulars (A60): Explain the nature of any debit or credit amounts included in data fields 4 or 5, other than subsidiary earnings or dividends. (IDDESC)
9	Balance End of Year (N10) DOL.

FPC Form 131
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0162	DETAILED ACCOUNT DATA - PART II	9 of 12

Account 253.00

Report particulars for other deferred credits.

Report under this account any advance billings or receipts for gas sales or service classified in Account 253.00, but not related to take-or-pay arrangements. Take-or-pay arrangements should be included on Schedule 0131.

Other deferred credits or less than $25,000 should be grouped. For grouped items, enter the word "Other" in data field 2 with the number of items grouped, i.e., Other (12). Report data for the grouped items in data fields 3, 4 and 9.

Total debits and credits should be provided for in data fields 3 and 4. Report the word "Total" as the last item in data field 2, in the first five spaces, and in data field 3 the total debits to the account and in data field 4 the total credits to the account.

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): (ACCTML)
2 (Key)	Description (A50): Give a brief description of the nature of the other deferred credit item. (IDDESC)
3	Debits - Amount (N9) DOL.
4	Credits - Amount (N9) DOL.
5	Contra Account Credited (N3.2): (ACCTML)
9	Balance End of Year (N10) DOL.
10	Period of Amortization (A5): For any deferred credit being amortized, enter the period of amortization, in the format YY-YY, i.e., 74-79. (IDDESC)

Account 255.00

Report particulars for investment tax credits.

Information on investment tax credits should be stated separately for each of the applicable credit percentages. Do not group credit percentages.

Electric respondents with more than one utility department should report as the last entry for Account 255.10, the total of accumulated deferred investment tax credits for their electric department and as the last entry for Account 255.20, the total of accumulated deferred investment tax credits for all other departments combined. Natural Gas respondents with more than one utility department should report as the last entry for Account 255.10, the total of accumulated deferred investment tax credits for their gas department and as the last entry for Account 255.20, the total of accumulated deferred credits for all other departments combined.

DETAILED INSTRUCTIONS: SCHEDULE 0162	DETAILED ACCOUNT DATA - PART II	10 of 12

Respondents with only one utility department should report in data field 1, Account 255.00.

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): (ACCTML)
2 (Key)	Description (A50): In the first two spaces of data field 2, enter one of the following values: "03", "04", "07", "10" or "11" to indicate the appropriate investment tax credit rate. (IDDESC)
3	Debits - Amount (N9) DOL: Enter the amount of investment tax credits amortized to current year income related to each credit listed in data field 2 above.
4	Credits - Amount (N9) DOL: Enter the amount of investment tax credits deferred for the current year related to each credit listed in data field 2 above.
5	Contra Account Credited (N3.2): (ACCTML)
6	Contra Account Debited (N3.2): (ACCTML)
7	Adjustments - Amount (N9) DOL: Enter any adjustment of investment tax credit amounts previously recorded for this account.
8	Particulars (A60): Explain the reason for any adjustments (data field 7 above) to the account balance. Also include in this data field the amount of credits deferred for the year associated with leased property in the following manner: Leased property - $1,000,000. (IDDESC)
9	Balance End of Year (N10) DOL.
10	Period of Amortization (A5): Enter the average period over which the investment tax credits will be amortized to income, in the format YY-YY, i.e., 75-95. (IDDESC)

Accounts 261.00, 262.00, 263.00, 264.00, 265.00

Report particulars for operating reserve accounts.

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): (ACCTML)
2 (Key)	Description (A50): For accounts 216.00, 262.00, 263.00 and 264.00, state the nature of each entry included in data fields 3 and 4. For Account 265.00, identify each reserve therein separately and state the nature of the entry. If

I. DESCRIPTION

This schedule is used to collect detailed information supporting end of year balances or amounts for certain of the Uniform System of Accounts and the Supplemental Accounts.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A, Class B, Class C and Class D Natural Gas and Electric respondents.

B. The following accounts are included on this schedule:

Uniform System of Accounts	Supplemental Accounts	Description
154.00		Plant materials and operating supplies
	165.10	Prepaid insurance
	165.20	Prepaid rent
	165.30	Prepaid taxes
	165.40	Prepaid interest
	165.50	Gas prepayments
	165.60	Other prepayments
174.00		Miscellaneous current and accrued assets
202.00		Common stock subscribed
203.00		Common stock liability for conversion
205.00		Prefarred stock subscribed
206.00		Praferred stock liability for conversion
207.00		Premium on capital stock
208.00		Donations received from stockholders
212.00		Installments received on capital stock
242.00		Miscellaneous current and accrued liability
	252.10	Customer advances for construction - electric department
	252.20	Customer advances for construction - gas department
	252.30	Customer advances for construction - other
419.00		Interest and dividend income
421.00		Miscellaneous nonoperating income
	421.10	Gain on disposition of property
	421.20	Loss on disposition of property
425.00		Miscellaneous amortization
	426.10	Miscellaneous income deductions - donations
	426.20	Miscellaneous income deductions - inaurance
	426.30	Miscellaneous income deductions - penalties
	426.41	Expenditures for certain civic, political and related activities - radio, television, and motion picture advertising
	426.42	Expenditures for certain civic, political and related activities - newspaper, magazine and pamphlet advertising
	426.43	Expenditures for certain civic, political and related activities - inserts in customers' bills or reports to stockholders

Uniform System of Accounts	Supplemental Accounts	Description
	426.44	Expenditures for certain civic, political and related activities - newspaper and magazine editorial services
	426.45	Expenditures for certain civic, political and related activities - other advertising
	426.46	Expenditures for certain civic, political and related activities - expenses other than advertising
426.50		Miscellaneous income deductions - other deductions
430.00		Income on debt to associated companies
431.00		Other interest expenses
436.00		Appropriations of retained earnings
813.00		Other gas supply expenses
858.00		Transmission and compression of gas by others
930.30		Industry association dues
930.40		Nuclear power, experimental and general research expenses
930.50		Stockholder expenses
930.60		Other expenses

Class A and Class B Electric respondents report detail for all accounts listed above except Account 165.10 through 165.60, 491.00, 813.00 and 858.00.

Class A and Class B Natural Gas respondents report detail for all accounts listed above.

Class C and Class D Electric and Natural Gas respondents report detail for Accounts 426.41 through 426.46 and 436.00.

C. Respondents shall report the information for each account as specified in Part III, Detailed Instructions. Not every data field is required for every account. The data fields for every account shall be reported annually.

III. DETAILED INSTRUCTIONS

Instructions, cross-referenced to the schedule layout by data field number, are given below for each account to be reported.

Account 154.00

Report information for plant materials and operating supplies.

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0163	DETAILED ACCOUNT DATA - PART III	3 of 9

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): Refer to General Informatioo, II-B. (ACCTML)
2 (Key)	Description (A50): Furnish a breakdown of plant materiels and operating supplies included in Account 154.00, according to the general character of the items. Examples: (IDDESC) Electric: Poles and pole materials; Steel tower and fittings; Conductor-wire-cable-insulators; Substation materials; Underground materials; Other operations: Maintenance materials, Auto parts & supplies, Stationery & supplies, Production M&S and spare Gas: Steel pipe line; Well casing; Valves and fittings; Meters, regulators and parts; Miscellaneous machine parts, tools & electrical supplies; Compressor station engine parts; Building materials, poles, paint, etc.; Miscellaneous equipment & supplies
3	Balance End of Year (N10) DOL.
4	Particulars (A60): State the amount of any important inventory adjustment made during the year to the classes of material listed in data field 2 above. For any clasa of material listed in data field 2 above, that pertains to other than the primary department, state in this data field the department affected. (IDDESC)

Accounts 165.10 - 165.60

Natural Gas respondents report information on prepayments.

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): Refer to General Information, II-B. (ACCTML)
2	Description (A50): Furnish a description for any prepayment reported in Supplemental Account 165.60, Other Prepayments. (IDDESC)
3	Balance End of Year (N10) DOL.

Accounts 174.00 & 242.00

Report information on miscellaneous current and accrued assets and liabilities or liabilities of less than $25,000 may be grouped. For grouped items, enter the word

FPC Form 131
(3-76)

DETAILED INSTRUCTIONS: SCHEDULE 0168	GAS PURCHASES	1 of 4

I. DESCRIPTION

This schedule is used to collect data relating to gas purchases during the year.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A, Class B, Class C and Class D Natural Gas respondents.

B. Respondents shall complete all appropriate data fields on this schedule annually.

C. Class A and Class B Natural Gas respondents are to report information according to the following accounts:

Uniform System of Accounts	Supplemental Accounts	Description
800.00		Natural gas well head purchases
801.00		Natural gas field line purchases
802.00		Natural gas gasoline plant outlet purchases
803.00		Natural gas transmission line purchases
804.00		Natural gas city gate purchases
805.00		Othar gas purchases

Class C Natural Gas respondents report information according to the following accounts:

	730.01	Natural gas purchases - well head
	730.02	Natural gas purchases - field line
	730.03	Natural gas purchases - gasoline plant outlet
	730.04	Natural gas purchases - other
731.00		Other gas purchases

Class D Natural Gas respondents report information according to the following accounts:

730.00	Natural gas purchases
731.00	Other gas purchases

D. For Class A and Class B respondents, purchases of less than 100,000 MCF per year per contract from sellers not affiliated with the reporting company shall be grouped by account number according to jurisdictional and nonjurisdictional sales, except when the purchases were permanently discontinued during the reporting year. The number of purchases so grouped under each category shall be noted in a footnote. For example, Other Jurisdictional (10) or Other Nonjurisdictional (5).

E. For Class C and Class D respondents, field purchases of less than $25,000 per year from individual non-associated vendors shall be grouped by fields or production areas. For Class C and Class D respondents where purchases are from unitized fields or vendor is a partnership or joint interest arrangement, specify such fact in a footnote and give name of unit operator, principal partner, or largest owner of joint interest, as appropriate.

FPC Form 131
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0168	GAS PURCHASES	2 of 4

F. Report gas quantity in MMCF rounded to three decimal places at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit. If the reported gas quantity is an estimated value, state such fact in a footnote.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): (ACCTML)
2* (Key)	Seller Code (N6): All respondents, enter the seller code, from the Register of Data Standards, IDRESP.
3	Et Al. Indicator (N1): Enter "1" to indicate that an et al. party is involved; otherwise, enter "0". If an et al. party is involved, the seller identified by data field 2 above should be the principle party.
4	State Abbreviation (A2): Class A and Class B respondents, enter the abbreviation, from the Register of Data Standards, IDSTAT, to designate the state where the gas is received. For Class C and Class D respondents, report the state abbreviation for well head or field line purchases.
5	County Code (N3): Class A and Class B respondents, enter the code, from the Register of Data Standards, IDCNTY, to designate the county where the gas is received. If the gas is received in more than one county, use the code designation for the county receiving the largest volume of gas. For Class C and Class D respondents, report the county code for well head or field line purchases.
6	Name of Producing Field or Plant (A26): Class A and Class B respondents, enter the name of the producing field if using Accounts 800.00 and 801.00. Class A and Class B respondents also, report the name of the field or plant contributing the largest volume of gas if purchases under a contract are from more than one field or plant. For Class C respondents, report the gas field or production for well head or field line purchases. (IDGFPL)
7	Associated Company Indicator (N1): All respondents, enter "1" in this data field if the seller is an associated company; if not, enter "0". (INYONO)

FPC Form 131
(5-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0168	GAS PURCHASES	3 of 4

Data Field Number	Instructions
8	Rate Schedule Number (A11): For Class A, Class B, Class C and Class D respondents, report the assigned Federal Power Commission rate schedule number or small producer certificate docket number. If a sale is nonjurisdictional, enter "999" in this data field. For Class C and Class D respondents, intrastate purchases for which there is no required filing of a Federal Power Commission rate schedule shall be specified as "intrast". If for any purchase more than one rate schedule was in effect during the year, show the most recent rate schedule designation and in a footnote give superceded rate schedules and date of supersession or a succinct explanation. The operator's rate schedule designation is sufficient in cases where there are co-owners under the same purchase contract, but the entire volume of gas and amount, data fields 12 and 13 below, must be shown for the purchases under the particular contract. Rate schedule designations are not required with respect to small purchases grouped as permitted by General Information, II-D. (IDRATE)
9	Net Rate Effective December 31st of Report Year (N3.2) CTS/MCF: All respondents, state the average net rate in cents per MCF (rounded to two decimal places) as of December 31st, for the reported year, applicable to the volume shown in data field 12 below. The net rate includes all additive charges and tax reimbursements and is net of all applicable deductions and downward adjustments. The rate is effective if filed pursuant to applicable statutes and regulations and (as to Federal Power Commission rate schedules) permitted by the Commission to become effective.
10	Date of Current Contract (N6): All respondents, enter the date in the format MMDDYY, of the gas purchase contract. For Class A and Class B, show the date of the original contract if gas is purchased under a renegotiated contract. If new acreage is dedicated by ratification of an existing contract show the date of the ratification, rather than the date of the original contract. If gas is being sold from a different reservoir than the original dedicated acreage pursuant to Section 2.56 (f) (2) of the Commission's Rules of Practice and Procedure, report the original contract date as per usual practice. (TMDATE)
11	Approximate BTU Per Cubic Foot (N4) BTU/CF: All respondents, enter for each purchase the approximate BTU per cubic foot, determined in accordance with the definition of BTU per cubic foot of the General Instructions for this packet of schedules.

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0168	GAS PURCHASES	4 of 4

Data Field Number	Instructions
12	Quantity of Gas Purchased (N9.3) MMCF: All respondents, report the volume of purchased gas finally measured for the purpose of determining the amount payable for the gas. Include current year receipts of make-up gas that was paid for in prior years. Report gas in MMCF rounded to three decimal places.
13	Cost of Gas (N9) DOL: All respondents, state the amount paid and previously paid for the volumes of gas shown in data field 12 above.

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0181	GAS ACCOUNT - NATURAL GAS	1 of 2

I. DESCRIPTION

This schedule is used to collect data on total quantities of natural gas received and delivered during the year.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A, Class B, Class C and Class D Natural Gas Pipeline respondents.

B. Respondents shall complete all data fields on this schedule annually.

C. Information on natural gas quantities received and delivered shall be reported by utilizing to the extent possible the appropriate Uniform System of Account numbers which were used to record the related cost. In addition, Supplemental Account numbers have been developed to handle instances where no Uniform System of Account numbers formerly existed. The following accounts shall be reported:

Uniform System of Accounts	Supplemental Accounts	Description	Receipts (Data Field 2)	Deliveries (Data Field 3)
	478.00	Natural gas produced	X	
	479.00	LPG & manufactured gas produced	X	
800.00		Natural gas well head purchases	X	
801.00		Natural gas field line purchases	X	
802.00		Natural gas gasoline plant outlet purchases	X	
803.00		Natural gas transmission line purchases	X	
804.00		Natural gas city gate purchases	X	
805.00		Other gas purchases	X	
806.00		Exchange gas	X	X
808.00		Gas withdrawn from storage - Debit	X	
809.00		Gas delivered to storage - Credit		X
810.00		Gas used for compression station fuel - Credit		X
811.00		Gas used for products extraction - Credit		X
812.00		Gas used for other utility operation - Credit		X
858.00		Transmission and compression of gas by others	X	X
927.00		Franchise requirements	X	X
480.00		Residential sales		X
	481.10	Commercial and industrial sales - small or commercial		X
	481.20	Commercial and industrial sales - large or industrial		X
482.00		Other sales to public authority		X
483.00		Sales for resale		X
484.00		Interdepartmental sales		X

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0181	GAS ACCOUNT - NATURAL GAS	2 of 2

Uniform System of Accounts	Supplemental Accounts	Description	Receipts (Data Field 2)	Deliveries (Data Field 3)
489.00		Revenues from transportation of gas of others	X	X
	940.00	Unaccounted for gas - total	X	X
	941.00	Unaccounted for gas - production system	X	X
	942.00	Unaccounted for gas - storage system	X	X
	943.00	Unaccounted for gas - transmission system	X	X
	944.00	Unaccounted for gas - distribution system	X	X
	945.00	Unaccounted for gas - other	X	X
	946.00	Other receipts/deliveries	X	X
	947.00	Total Gas Quantity	X	X

D. Class A and Class B respondents shall report utilizing all of the above accounts. Class C and Class D respondents shall report only Accounts 478.00, 946.00, and 940.00 through 945.00.

E. Report gas quantity in MMCF rounded to three decimal places, at a uniform pressure base of 14.73 PSIA at 60° Fahrenheit. If the reported gas quantity is an estimated value, state such fact in a footnote.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): Enter the account number, from the Register of Data Standards, ACCTML, and General Information, II-C above.
2 (Key)	Quantity Received (N9.3) MMCF: Enter the quantity of gas received, in MMCF rounded to three decimal places.
3 (Key)	Quantity Delivered (N9.3) MMCF: Enter the quantity of gas delivered, in MMCF rounded to three decimal places.

FPC Form 131
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: ACCUMULATED PROVISION FOR DEPRECIATION, SCHEDULE 0188 DEPLETION, AND AMORTIZATION OF UTILITY PLANT		1 of 2

I. DESCRIPTION

This schedule is used to collect data relating to changes in accumulated provisions for depreciation, depletion and amortization of utility plants for the year according to utility departments.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class C and Class D Natural Gas and Electric respondents.

B. Respondents shall complete all data fields on this schedule annually.

C. The following Supplemental Account numbers are to be used as a means of grouping information for reporting purposes:

Uniform System of Accounts	Supplemental Accounts	Description
Natural Gas respondents		
	110.10	Accumulated provision for depreciation, depletion and amortization of utility plant - gas
	110.20	Accumulated provision for depreciation, depletion and amortization of utility plant - other
Electric respondents		
	110.10	Accumulated provision for depreciation, depletion and amortization of utility plant - electric
	110.20	Accumulated provision for depreciation, depletion and amortization of utility plant - other

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): State the Supplemental Account number listed in General Information, II-C. (ACCTML)
2 (Key)	Total Depreciation Accruals for the Year (N8) DOL: Report the total amount accruals for the year.
3	Net Charges for Plant Retired During Year (N8) DOL: State the net charges for plant retired, to include: book cost of plant, salvage and cost of removal.
4	Other Items - Net (N8) DOL: State the net amount of any other entries to the reserve during the year.

FPC Form 131

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0000 FOOTNOTES TO FPC PUBLIC USE SCHEDULES		1 of 2

I. DESCRIPTION

This schedule is used to collect the text for all footnote references for a respondent submission.

II. GENERAL INFORMATION

A. This schedule shall be submitted when applicable by all respondents for reporting footnotes to FPC Public Use Schedules.

B. The footnote reference numbers must be unique within a particular submission.

C. The respondent has to indicate two major types of footnotes.

1. General Footnote - The General Footnote can refer to either the entire schedule or one data field on the schedule, i.e. all data which is reported for data field 5 on the schedule not just one specific value for data field 5.

2. Specific Footnote - The Specific Footnote can refer either to an entire logical entry, i.e. group of related data which separates as an entity on a schedule or a data item within the logical entry.

The following entries are provided as an example:

Type Footnote	Data Field 2 (Footnote No.)	Data Field 3 (Ref. ID)
1. General Footnote		
a. Entire schedule	001	GEN
b. All data values for data field 5 entries on this schedule	001	005
All data values for data field 6 entries on this schedule	001	006
2. Specific Footnote		
a. Entire logical entry	002	GEN
b. Data item entry	002	004
	002	006
	002	008

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number.

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0000 FOOTNOTES TO FPC PUBLIC USE SCHEDULES		2 of 2

Data Field Number	Instructions
1 (Key)	Schedule Number (N4): Enter the number of the schedule on which the footnote reference number was assigned, e.g., 0501 or 0505.
2 (Key)	Footnote Number (N3): Enter the unique footnote reference number from 001-999 for each particular submission.
3 (Key)	Reference Identification (A3): Enter "GEN" for Type 1a and 2a footnotes, i.e., footnotes that apply to the entire schedule (or to an entire logical entry) or enter the appropriate data field number for the specific data field value being footnoted (Type 1b or 2b).
4 (Key)	Line Sequence Number (N2): Enter 01, 02 etc., for each successive line of text.
5 (Key)	System Code (N6): This data field applies only to Electric respondents reporting data by system. Enter the six digit number code for the system, from the Register of Data Standards, IDSYST.
6 (Key)	Plant ID (N5): This data field applies only to Electric respondents reporting data by plant. Enter the five digit numeric code for the plant, from the Register of Data Standards, IDPLNT.
7 (Key)	Project Development Code (A5): This data field applies only to Electric respondents reporting data by license projects. Enter the five digit numeric code for the license project, from the Register of Data Standards, IDLPRJ.
8	Text (A72): Enter the text of the footnote. Use successive lines as required for text. Repeat Data Fields 1-3, 5 or 6 as applicable, and increment Data Field 4 (Line Sequence Number) by 1.

FPC Form 131

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 1000	SUPPORTING DOCUMENTATION	1 of 1

I. DESCRIPTION

This schedule is used to collect schedule related supporting documentation not required by the Public Use Schedules.

II. GENERAL INFORMATION

A. This schedule shall be submitted by any Federal Power Commission respondent who desires to provide supportive documentation or any additional information relating to the Public Use Schedules.

B. This schedule shall be completed only as deemed necessary by the respondent or where specifically requested by detailed instructions for other schedules.

Comparison and Cross-Reference of Proposed OR1S Schedules
with FPC's Annual Report Form No. 2-A

Proposed ORIS Schedule No.	Title	Replaces (whole or in part) Schedule Page No.	U. S. of A. Account No. Reference	Highlights of Proposed Changes from Previous Reporting Requirements
0101	General Corporate Information	1	-	Respondents will complete all data fields on this schedule in their first submission, and on subsequent submissions, respondents shall submit only appropriate changes, additions, or deletions.
0102	Control Over Respondent	1	-	Data to be filed on a one-time basis, see proposed 0101, above. Represents data required by last instruction on page 1 (old).
0103	Corporations Controlled by Respondent	1	-	Data to be filed on a one-time basis, see proposed 0101, above. Represents data required by last instruction on page 1 (old).
0135	Corporate Officers/ Directors	3	-	Data to be filed on a one-time basis, see proposed 0101, above. No apparent reporting requirement changes, only format.
0137	Security Holders and Voting Powers - Total	3	-	Data to be filed on a one-time basis, see above, proposed 0101. Present reporting requirements of page 3 and has been spread to this and the next [illegible] proposed schedules, in order to accomodate the data processing system. No reporting requirements changed, only format as described above.
0138	Security Holders and Voting Powers	3	-	Data to be filed on a one-time basis, see proposed 0101 above. Covers data presently required by page 3 instruction. No reporting requirement changes, only [illegible]
0141	Notes to Security Holders and Voting Powers	3	-	Covers data presently required by page 3 instruction. No additional reporting requirement changes, only format.
0142	Notes to Financial Data	2, 3, 9	-	This schedule is proposed [illegible] for additional information [illegible] for adequate disclosure to support the data presently reported on the pages listed in column 3 and on the new proposed schedules containing financial data. No new or additional requirement, only the format and location of the notes to various schedules is proposed.
0154	List of Accounts - Pt. IV			
	1. Balance Sheet Accounts	4, 5	101-299	Report only the balance end of year, by account number, for each account within the Uniform System of Accounts. Deleted the requirement for reporting balance beginning of year and amount of increase or (decrease). Notes are to be reported at proposed 0112, detailed reporting by account in a few places which required aggregate reporting on old schedule. Supplemental Account numbers have been established for reporting purposes.
	2. Income Statement Accounts	8, 9	400-414, 433, 434-435	Report only the amount for the year, by account number. Deleted reporting of "Change from Prior Year." Supplemental account numbers have been established for reporting purposes.
	3. Retained Earnings Account	10	433, 438-439	Report only amount for year for each account listed. Details to be reported on proposed 0161.
	4. Others: a. Gas Operating Revenues	7	480-495	Report only amount for year for each account listed, details to be reported on proposed 0159.

Attachment B

- 2 -

Proposed ORIS Schedule No.	Title	Replaces (whole or in part) Schedule Page No.	U. S. of A. Account No. Reference	Highlights of Proposed Changes from Previous Reporting Requirements
0124	4. Others (Cont'd): b. Gas Operation Re- Maintenance Expense Acc't.	7	700-799, 900-949	Supplemental account numbers assigned for coding purposes. No new reporting requirements.
	5. Departmental Account	8, 9	400-411	Supplemental account numbers have been assigned to indicate the various departments, e.g. electric, gas, common, steam, other. Total for current year to be reported only. Deleted requirement for reporting "Change from Prior Year."
0132	Capital Stock	6	201, 204, 217	No new reporting requirements, only format.
0133	Long-Term Debt	6	221	No new reporting requirements, only format.
0141	Investment Tax Credits	15	-	Data to be filed on a one-time basis, with only changes, additions and [illegible] submitted thereafter, see proposed 0101, above. Information on the accounts for investment tax credits will be reported on proposed 0112.
0142	Plant In Service or All Utility Plants Class C and D - Part II	13	101-105, 107, 114, 118, 119, 300-399	Deleted reporting of balance beginning of year. Supplemental account numbers have been assigned to "total" for reporting purposes.
0159	Operating Revenues	7	480, 481, 483, 484	This schedule reports only quantity and number of customers. Supplemental account numbers assigned for reporting purposes. Changed the reporting of quantity of gas to MMcf at 14.73 psia at 60°F rounded to 3 decimal places.
0161	Detailed Account Data - Part I	19	215	No new reporting requirements, only format.
0162	Detailed Account Data - Part II	15, 16	216, 219, 437, 438, 439	No new reporting requirements, only format. Supplemental account numbers have been assigned for reporting purposes only of different departments. Balance beginning of year has been deleted.
0163	Detailed Account Data - Part III	16, 17	436, 426.4	Supplemental account numbers have been assigned to the 426.4 account for reporting purposes. Deleted requirement of reporting accounting entries for account 436.
0166	Gas Purchases	12	730, 731	Quantities reporting has been changed to Mcf at 14.73 psia at 60°F rounded to 3 decimal places. Class C will report by Account 731, Account 730 and supplemental account numbers 730.01 thru 730.04 (reporting purposes) and Class D will report by Account 730 only. There has been some clarifications made in the instructions for a better understanding of what is required to be reported.
0181	Gas Account - Natural Gas	14	-	Supplemental account numbers have been assigned for reporting purposes. Only required to report quantity of receipt of natural gas produced, other receipts/ deliveries and receipts/deliveries of unaccounted for gas. Quantity reporting is changed to Mcf at 14.73 psia at 60°F rounded to 3 decimal places.
0188	Accumulated Provision for Depreciation, Depletion and Amortization of Utility Plant	6	-	Supplemental account numbers have been assigned for reporting purposes. No new reporting requirements.

(The number of copies to be filed has been changed)
(from original and two to "original and four.")

BASIC EDUCATIONAL OPPORTUNITY GRANT PROGRAM

V 41 155 AUG 10 76 UMI

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 190—BASIC EDUCATIONAL OPPORTUNITY GRANT PROGRAM

Eligibility of Part-Time Students and Method of Award Calculation

A notice of proposed rulemaking was published in the FEDERAL REGISTER on June 3, 1975 (40 FR 23970 et seq.) covering the eligibility of part-time students and the method of award calculation for students enrolling on less than a full-time basis for the Basic Educational Opportunity Grant Program. Interested parties were invited to submit written comments, suggestions, or objections with regard to the proposed Amendments.

In addition to verbal comments, a total of 21 written responses were received. The public comments received centered around four major issues: the exclusion of members of a religious community, society, or order (45 CFR 190.3(c) in the proposed rule, and 190.3(b) in the final rule); the reduction of grants in proportion to the degree to which a student is not attending an institution on a full-time basis (45 CFR 190.63); the $200 minimum grant which may be awarded to part-time students (45 CFR 190.62); and the use of actual costs of attendance in determining awards for students enrolling on less than a full-time basis (45 CFR 190.51).

COMMENT

Several comments were expressed with regard to the procedures established for determining awards for part-time students. One group of comments concerned the fact that the actual costs of attendance for part-time students typically are not in direct proportion to a student's enrollment status and suggested that the rate of payment for part-time students should be a higher percentage than the rates proposed in the regulations.

RESPONSE

This regulation was not changed. The proposed reductions of awards are in accord with the authorizing legislation which states that when "a student attends an institution of higher education on a less than full-time basis during an academic year, the amount of the Basic Grant to which that student is entitled shall be reduced in proportion to the degree to which that student is not so attending on a full-time basis * * *" (20 U.S.C. 1070a(a)(2)(A)(ii)). Consequently, the regulations provide that a part-time student's award is determined in terms of the reduced academic workload carried by the student rather than in terms of estimated student budgets for part-time students.

COMMENT

Several commenters were concerned with the use of actual costs of attendance in the determination of the student's award for students enrolling on a part-time basis. Commenters felt that the costs of attendance for less than full-time students should be derived by using the tuition and fees which would be charged that student if he were to enroll on a full-time basis. Otherwise, the part-time student would be penalized because his cost of education is lower and, therefore, he would receive a portion of a Scheduled Award which has already been reduced by virtue of the student's lower education costs.

RESPONSE

The regulations provide that the award for a part-time student shall be 50 percent or 75 percent of the award calculated for a full-time student. Therefore, for purposes of calculating the award for a part-time student, the cost of attendance would be based on a full-time enrollment status. However, the regulations were amended to assure that awards for a part-time student may never exceed one-half of that student's actual costs of attendance.

COMMENT

Several comments were received expressing concern that at full funding the minimum award which a student may receive is $200. It was felt that this ruling would exclude some part-time students whose need may be small but critical, and that this limitation should only apply to full-time students.

RESPONSE

The regulation was not changed. We have been advised by the Office of General Counsel that section 411(a)(2)(B)(iii) of Title IV of the Higher Education Act (20 U.S.C. 1070a(a)(2)(B)(iii)), which sets forth the minimum $200 award limitation, applies to both full-time and part-time students. Of course, a student whose original award for a full academic year was at least $200 will be paid any prorated payments for attendance of less than a full academic year even if such proration results in amounts of less than $200.

COMMENT

A number of commenters noted that the regulations did not accommodate differences in academic program structures among various types of schools in determining awards for part-time students and, therefore, certain inequities resulted in the computation of awards, particularly for students enrolled in institutions with non-standard academic calendars.

RESPONSE

In response to these comments, the Office of Education undertook a major review of the regulations and prepared award computation procedures which more closely reflected institutional and/or program differences to assure equal benefits regardless of where a student enrolls. However, to achieve the objective of increased equity, albeit for a limited class of students, the complexity of the award computation procedures were of necessity significantly increased. These procedures were issued as interim guidelines to all participating institutions in September of 1975.

However, actual use of these procedures at the institutional level resulted in additional comments to the effect that the revised computation procedures were difficult, if not impracticable, to administer, and significantly increased administrative burdens for the institutions.

As a consequence of these developments, a determination was made to issue the final regulations governing the part-time awards unchanged. These regulations provide for a simple computation procedure which is based on a percentage reduction of the Scheduled Award for all students regardless of where they enroll.

COMMENT

Several commenters expressed concern regarding the exclusion of members of religious orders (45 CFR 190.3(c) in the proposed regulation, and 190.3(b) in the final regulation). The regulation provides that a member of a religious order, who by direction of the order is pursuing a course of study at an institution of higher education, or who is receiving support and maintenance from the order, shall be deemed to have a family contribution of $1201, and, consequently would not be eligible to receive a Basic Grant. The comments received indicated that members of religious orders should meet the same requirements as any other candidate and should not be penalized for choosing to dedicate their lives as members of a particular religious community.

RESPONSE

The regulation has not been changed. This provision was included to provide comparability with similar ones governing the Supplemental Educational Opportunity Grant, College Work-Study and National Direct Student Loan Programs. The rationale for these provisions is the view that such individuals are not considered to have financial need which should be met by the Federal government since their religious order is responsible for their maintenance and support.

GENERAL COMMENTS

The requirement set forth in § 190.3(a)(1) is being deleted. This provision limiting the eligibility of students for the Basic Grant program to students who were not enrolled as regular students at any institution of higher education prior to April 1, 1973 was added by Congress in the various acts appropriating funds for the Basic Grants program. However, the appropriation act which appropriated funds for the Basic Grants program for the 1976–77 academic year, Pub. L. 94–94, dropped this limitation and, therefore this provision is being deleted from the regulation effective July 1, 1976. Regardless of the date the provisions contained in this notice become effective, the limitation described above will become inoperative on July 1, 1976.

Other technical amendments were made which assure consistency of terminology and procedure throughout the regulations. The proposed amendments, as published, also contained some technical inaccuracies and omissions which have been corrected in this publication of the regulations. The current regulations to which these amendments apply have been previously published on November 6, 1974 (39 FR 39412) and on December 2, 1974 (39 FR 41800).

In light of the foregoing, Part 190 of Title 45 of the Code of Federal Regulations is amended as set forth below.

Effective date: Pursuant to section 431(d) of the General Education Provisions Act, as amended (20 U.S.C. 1232(d)), these regulations have been transmitted to the Congress concurrently with the publication of this document in the FEDERAL REGISTER. That section further provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmission, subject to the provisions therein concerning Congresssional action and adjournment, except that the provision limiting the eligibility of students enrolled in institutions of higher education prior to April 1, 1973 will become inoperable on July 1, 1976.

(Catalog of Federal Domestic Assistance No. 13.539, Basic Educational Opportunity Grant Program)

Dated: June 17, 1976.

T. H. BELL,
U.S. Commissioner of Education.

Approved: August 4, 1976.

DAVID MATHEWS,
Secretary of Health, Education, and Welfare.

Part 190 of Chapter I of Title 45 of the Code of Federal Regulations is amended as follows:

§ 190.2 [Amended]

1. Section 190.2 is amended as follows: Paragraph (q) becomes (s); paragraph (r) becomes (t); and paragraphs (e) through (p) become (f) through (q). Also, the first sentence of paragraph (i) is revised; paragraph (m) is revised; and paragraphs (e) and (r) are added to read as follows:

* * * * *

(e) "Disbursement Schedule" means a table, effective for a given academic year, published by the Commissioner, which indicates the amount of a student's Basic Educational Opportunity Grant which would be paid to a three-quarter time or half-time student if such student is enrolled for the same number of months during an academic year as is required for a full-time student enrolled in the same program of study to complete a full school year. Such a table is based upon the student's expected family contribution, cost of attendance, and the part-time nature of the student's attendance.

* * * * *

(i) "Half-time student" means a student who is carrying at least a half-time academic work load but less than a three-quarter time work load measured in terms of (1) the tuition and fees customarily charged for half-time study by the institution and (2) the course work or other required activities as determined by the institution in which the student is enrolled: *Provided, however,* That such course work and activities amount to a minimum of (i) 6 semester hours or 6 quarter hours per academic term for institutions utilizing semesters, trimesters, or quarter hour systems; (ii) 12 semester hours or 18 quarter hours per school year for institutions which measure progress in terms of credit hours but which do not utilize semester, trimester, or quarter systems; or (iii) 12 clock hours per week for institutions which utilize clock hours to measure progress.

* * * * *

(m) "Payment Schedule" means a table effective for a given academic year, published by the Commissioner which indicates the amount of a full-time student's Scheduled Basic Educational Opportunity grant based on the Family Contribution Schedules effective for that academic year as described in Subpart C and D of this part, the cost of attendance at the institution in which the student is enrolled as defined in § 190.51, and the amount of funds available for making grants under this part for that academic year.

* * * * *

(r) "Three-quarter time student" means a student who is carrying at least a three-quarter time academic work load but less than a full-time work load measured in terms of (1) the tuition and fees customarily charged for three-quarter time study by the institution and (2) the course work or other required activities as determined by the institution in which the student is enrolled: *Provided, however,* That such course work and activities amount to a minimum of (i) 9 semester hours or 9 quarter hours per academic term for institutions utilizing semesters, trimesters, or quarter hour systems; (ii) 18 semester hours or 27 quarter hours per school year for institutions which measure progress in terms of credit hours but which do not utilize semester, trimester, or quarter systems; or (iii) 18 clock hours per week for institutions which utilize clock hours to measure progress. For students enrolled in an institution which measures progress in terms of both credit and clock hours, a student shall be considered a three-quarter time student at that institution if the sum of the fractions representing the number of credit hours taken by the student, when divided by 9 and the number of clock hours per week taken by the student when divided by 18 is equal to or greater than one, and if such student is charged the tuition and fees customarily charged for three-quarter time study by the institution. Furthermore, a student shall be considered a three-quarter time student if he undertakes a series of courses or seminars, which extends over a period not exceeding 18 weeks and which, if completed, would amount to the equivalent of at least 9 semester or 9 quarter hours and is charged the tuition and fees customarily charged for three-quarter time study by the institution.

(20 U.S.C. 1088(c)(2))

2. Section 190.3 is amended by deleting paragraphs (a)(1) and (b), and by adding new paragraph (b) so that § 190.3 reads as follows:

§ 190.3 Eligible student.

(a) A student is eligible to receive a Basic Educational Opportunity Grant under this part if he:

(1) Is accepted for enrollment or is enrolled in good standing as at least a half-time undergraduate student at an institution of higher education.

(2) Is enrolled in an eligible program as defined in § 190.2(f), and

(3) Is a citizen or national of the United States or is in the United States for other than a temporary purpose and is, or intends to become, a permanent resident thereof; or is a permanent resident of the Trust Territory of the Pacific Islands.

* * * * *

(b) A member of a religious community, society, or order who by direction of his or her order is pursuing a course of study in an institution of higher education or who receives support and maintenance from the community, society, or order shall be deemed to have a family contribution of not less than $1,201. For purposes of this part "a religious community, society, or order" includes an agency or organization which has, as a primary objective, the promotion of ideals and beliefs regarding a Supreme Being and which provides subsistence support to its members and require its members to forego monetary compensation or other support substantially beyond other support provided by the agency or organization.

NOTE.—For academic years 1973–1974 through 1975–1976 an additional eligibility criterion was that the student not be enrolled at any eligible institution of higher education prior to April 1, 1973.

3. Section 190.11 is amended to read as follows:

§ 190.11 Application.

In order to have the expected family contribution calculated for any academic year, a person shall submit to the Commissioner a form, approved by the Commissioner for that purpose, containing such information as the Commissioner may from time to time prescribe, unless the Commissioner specifically provides an alternative method of receiving such information. Information submitted shall

V 41 155 AUG 10 76 UMI

be accurate and complete for the date on which the application is completed.

4. Section 190.15 is revised to read as follows:

§ 190.15 Request by applicant for recomputation of expected family contribution because of clerical or arithmetic error.

An applicant may request a recomputation of his expected family contribution if he believes a clerical or arithmetic error has occurred, or if the information submitted by the application was inaccurate for the date on which the application was completed. Such a request for recomputation shall be made in such form as the Commissioner may prescribe and must be received by the Commissioner no later than the cutoff date established annually by the Commissioner for such requests.

(20 U.S.C. 1070a(b)(2))

5. In § 190.51 paragraph (d) is revised to read as follows:

§ 190.51 Cost of attendance.

• • • • •

(d) In the case of students engaged in a program of study by correspondence, only the costs of tuition and fees determined in accordance with paragraph (a) of this section shall be recognized as a student's cost of attendance for the purposes of this part: *Provided however,* That travel and room and board costs incurred specifically in fulfillment of a required period of residential training may be recognized as a cost of attendance for such a student.

6. Section 190.62 is revised to read as follows:

§ 190.62 Calculation of basic educational opportunity grant awards at full-funding.

(a) When funds are available to satisfy such payments, the Commissioner will pay to each eligible applicant who is enrolled as a full-time student for any academic year a Basic Educational Opportunity Grant in an amount equal to $1400 minus his expected family contribution, except that no award will be made (1) which is in excess of 50 percent of the applicant's actual cost of attendance at the institution of higher education in which the applicant is enrolled, (2) which exceeds the difference between the expected family contribution of the applicant and his actual cost of attendance at the institution in which he is enrolled, or (3) which is less than $200.

(b) In the event that a student enrolls as a three-quarter time student, the amount of his award shall equal 75 percent of the award established in accordance with paragraph (a) of this section; provided that in no event shall the award exceed 50 percent of the cost of attendance of that three-quarter time student: *And provided further,* That no award will be made if the amount of such award after reduction in accordance with this section is less than $200.

(c) In the event that a student enrolls as a half-time student the amount of his award shall equal 50 percent of the award established in accordance with paragraph (a) of this section; provided that in no event shall the award exceed 50 percent of the cost of attendance of that half-time student: *And provided further,* That no award will be made if the amount of such award after reduction in accordance with this section is less than $200.

(20 U.S.C. 1070a(2))

7. Section 190.63 is revised to read as follows:

§ 190.63 Calculation of basic educational opportunity grant awards at less-than-full-funding.

(a) When funds are not available to fully satisfy all Basic Educational Opportunity Grant awards, each grant awarded to an eligible applicant who is enrolled as a full-time student shall be reduced in accordance with the provisions of section 411(b)(3) of the Act. The amount to be reduced in accordance with section 411(b)(3) will be the remainder of $1400 less the applicant's expected family contribution. No award will be made if the amount of such award after the application of the provisions of section 411(b)(3) of the Act is less than $50, nor may an award be made under this section to an applicant whose award was calculated to be less than $200 under § 190.62(a).

(b) In the event that a student enrolls as a three-quarter time student, the amount of his award shall equal 75 percent of the award established in accordance with paragraph (a) of this section; *Provided,* That in no event shall the award exceed 50 percent of the difference between the expected family contribution and the actual cost of attendance of that three-quarter time student: *And provided further,* That no award will be made if the amount of such award after reduction in accordance with this section is less than $50.

(c) In the event that a student enrolls as a half-time student, the amount of his award shall equal 50 percent of the award established in accordance with paragraph (a) of this section; *Provided,* That in no event shall the award exceed 50 percent of the difference between the expected family contribution and the actual cost of attendance of that half-time student: *And provided further,* That no award will be made if the amount of such award after reduction in accordance with this section is less than $50.

(20 U.S.C. 1070a(a)(2)(b)(iii))

8. Section 190.64 is revised to read as follows:

§ 190.64 Calculation of basic educational opportunity grant awards for less than a full school year.

(a) In the event that an applicant is enrolled as at least a half-time student in an eligible program which is less than a full school year in duration, the amount of his grant shall be reduced in the same proportion as that period of time bears to eight months.

(b) In the event that an applicant is enrolled as at least a half-time student in an eligible program which meets the definition of "school year", but the student enrolls for a period of time which is less than the full school year, the amount of his grant shall be reduced in the same proportion as the period of his enrollment bears to the length of such school year.

(20 U.S.C. 1070a(a)(2))

9. Section 190.65 is revised to read as follows:

§ 190.65 Calculation of basic educational opportunity grant awards for a school year which is longer than twelve months in length.

In the event that a student is enrolled as at least a half-time student for a school year which is longer than 12 months, the amount of a Basic Grant payable for an academic year shall be in the same proportion to his Scheduled Basic Educational Opportunity Grant or the amount determined from the appropriate Disbursement Schedule whichever is applicable, as the number of months of the school year occurring in the academic year for which payment is requested bears to twelve months.

(20 U.S.C. 1070a)

10. Section 190.66 is revised to read as follows:

§ 190.66 Calculation of basic educational opportunity grant awards for a school year which spans two academic years.

Subject to the provision of §§ 190.64 and 190.65, in the event that an applicant is enrolled as at least a half-time student for a school year which spans two academic years, the amount of his grant payable during any one academic year, by reason of enrollment in such school year, shall be equal to an amount which bears the same proportion to his Scheduled Basic Educationa' Opportunity Grant or the amount determined from the appropriate Disbursement Schedule, whichever is applicable, for that academic year as the number of months of such school year occurring within that academic year bears to the total number of months of that school year.

(20 U.S.C. 1070a)

11. Section 190.73 is amended by revising paragraph (b) to read as follows:

§ 190.73 Institutional agreements.

• • • • •

(b) The Commissioner will send to each institution with which he has an agreement pursuant to paragraph (a) of this section a payment schedule and a disbursement schedule for each academic year.

(20 U.S.C. 1070a)

12. Section 190.75 is revised to read as follows:

§ 190.75 Payment of basic educational opportunity grant awards.

(a) An institution shall make payment of a Basic Educational Opportunity Grant to a student on the basis of having made the following determinations:

(1) That the student applying for the grant meets the eligibility requirements of § 190.3. In making this determination the institution is entitled to rely on information provided by the student if the institution has no direct independent knowledge with respect to such information;

(2) That the student is enrolled as a full-time, three-quarter time, or half-time student;

(3) The amount equal to the actual cost of attendance of such student, calculated in accordance with § 190.51;

(4) The amount of the student's Scheduled Basic Educational Opportunity Grant, calculated in accordance with the payment scheduled in effect for the period involved;

(5) The amount by which the Scheduled Grant Award determined in subparagraph (4) of this paragraph should be adjusted for three-quarter and half-time students (this amount is set forth in the disbursement schedule in effect for the period involved); and

(6) The amount, if any, by which the amount determined in subparagraph (4) or (5) of this paragraph should be adjusted in accordance with §§ 190.64–190.66.

(b)(1) Payment of Basic Educational Opportunity Grant awards shall be made in equal amounts at least once at the beginning of each semester, trimester, or quarter for those institutions which utilize such academic units. For those institutions not utilizing such academic periods, payments shall be made in equal amounts not less than twice during that portion of the school year which falls within the academic year, with one payment to be made at the beginning and the other to be made at the midpoint of that portion of the school year which falls within the academic year; provided that if the portion of a school year which falls within an academic year is less than three months, only one payment need be made.

(2) Except where prohibited by § 190.76(c), funds paid to a student with respect to an academic period which has already been completed may be paid to such student in one lump sum payment.

(c)(1) Before making any payment to a student under this section, an institution shall confirm that the student meets or continues to meet the eligibility requirements of § 190.3.

(2) In addition to the requirement set forth in subparagraph (1) of this paragraph, the institution shall confirm at the beginning of each semester, trimester, or quarter (or for institutions not utilizing such academic periods, at the beginning and midpoint of the school year) and before making payment to a student for such period, that the student is entitled to receive the amount of the grant payment calculated for that period.

(3) If an institution determines at the beginning of a semester, trimester, or quarter, or for institutions not utilizing such academic periods, at the beginning and midpoint of the school year, that the amount calculated for that student no longer reflects the enrollment status of such student at that institution, it shall recalculate the amount of that student's grant payment for that period in accordance with paragraph (a) of this section.

(4) If an institution disburses funds to a student for a particular academic period and during that period the student increases or decreases his academic workload while continuing to meet the eligibility requirements of § 190.3, the institution may, but need not, adjust the amount of the student's grant attributable to that academic period in accordance with this section and with § 190.85.

(5) Except as provided in § 190.78, if an institution disburses funds to a student for a particular academic period and during that period the student becomes ineligible to participate in the program, the payment applicable to that period need not be returned by the student if such payment was not made on the basis of inaccurate information or statements provided by the student; however, the student shall not receive additional basic grant payments unless he reestablishes his eligibility.

(d) No grant may be paid under this part unless the student to whom it is made has filed with the institution of higher education which he intends to attend, or is attending, an affidavit on a form approved by the Commissioner stating that the money attributable to such grant will be used solely for expenses related to attendance or continued attendance at such institution. The student must sign the affidavit in the presence of a notary or other person who is legally authorized to administer oaths or affirmations and who does not take part in the recruiting of students for enrollment at such institution. The notary or other person must enter his signature and as applicable, his seal or stamp on the affidavit form.

(e) Payments to a student may be made by check or by credit to the student's account with the institution. If payments are made to a student by crediting his account, the institution shall retain a receipt signed by the student for each such transaction and the credit entry to the student's account shall be clearly identifiable.

(20 U.S.C. 1070a)

13. Section 190.85 is revised to read as follows:

§ 190.85 Recalculation of Basic Educational Opportunity Grant awards.

(a) The amount of a student's Basic Educational Opportunity Grant award for an academic year may be recalculated during that academic year if the amount of a student's expected family contribution is redetermined in accordance with § 190.15, § 190.39, or § 190.48; if the student enrolls at more than one institution during the course of an academic year; or if a student varies his academic workload from one-half, three-quarter, or a full-time enrollment.

(b) If a student's Basic Educational Opportunity Grant is adjusted in accordance with § 190.15, § 190.39, or § 190.48, or is increased because of a change in his academic workload, subsequent payments to the student shall be adjusted, based on the newly calculated scheduled award, to ensure that the student is paid the entire amount of his newly calculated award (subject to any adjustments pursuant to §§ 190.64–190.66) before the conclusion of the academic period for which the grant is made. However, an institution calculating an award under § 190.83(b) shall only pay that portion of the newly calculated award which is commensurate with that portion of the school year within the academic year for which the student is enrolled at that institution.

(20 U.S.C. 1070a)

14. Section 190.86 is amended by deleting the numbers (1) and (2) in paragraph (b). As revised, § 190.86(b) reads as follows:

§ 190.86 Calculation and disbursement of awards by the Commissioner of Education.

• • • • •

(b) The Commissioner will pay to a student his Basic Educational Opportunity Grant award computed in accordance with the relevant provisions of this part in equal amounts at least once each semester, trimester, or quarter for those institutions which utilize such academic units. For those institutions not utilizing such academic periods, payments will be made in equal amounts not less than twice during that portion of the school year which falls within the academic year, with one payment to be made at the beginning and the other to be made at the midpoint of that portion of the school year which falls within the academic year: *Provided,* That if the portion of a school year which falls within the academic year is less than three months, only one payment need be made.

PRIVACY ACT OF 1974

Systems of Records and Notice of Proposed Routine Uses Therefor

V 41 155 AUG 10 76 UMI

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Secretary

PRIVACY ACT OF 1974

Systems of Records and Notice of Proposed Routine Uses Therefor

Pursuant to the Privacy Act of 1974 (Pub. L. 93-579) as prescribed in 5 U.S.C. 552a(e)(4), the following notices of systems of records that are maintained by the Department of Health, Education, and Welfare are published as set forth below. These systems are currently ongoing and were either inadvertently omitted from past publications because of oversight or they are notices of contractor systems of records where the contracts were entered into before September 27, 1975.

Prior to the final adoption of the proposed routine uses for these notices, consideration in accordance with the requirements of 5 U.S.C. 552a(e)(11) will be given to comments which are submitted in writing on or before September 9, 1976. Comments should be addressed to the Director, Fair Information Practice Staff, Department of Health, Education, and Welfare, 200 Independence Ave., S.W., Washington, D.C. 20201. Comments received will be available for inspection in Room 526E, South Portal Building, at the above address.

Dated: July 30, 1976.

JOHN OTTINA,
Assistant Secretary for Administration and Management.

NIH NIDR 0303.00

System name: Clinical Research: Study of Oral-Facial Clefts, DHEW/NIH/NIDR.

Security classification: None.

System location:
Westwood Building, NIH
5333 Westbard Avenue
Bethesda, MD 20014 - and at a hospital/clinic under contract.

Categories of individuals covered by the system: Women voluntarily participating in the study who previously gave birth to a child with cleft lip, with or without cleft palate, and an equal number of women planning pregnancies who will serve as controls.

Categories of records in the system: Medical records describing patients' blood and urine metabolic determinations, environmental factors to which they have been exposed, and health of their offspring.

Authority for maintenance of the system: 42 U.S.C. 241,288a.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

1. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual.
2. Data are to be used by authorized contractor investigators in the conduct of the study and in the preparation of scientific reports.
3. To the Department of Justice or other appropriate Federal agencies in defending claims against the United States when the claim is based upon an individual's mental or physical condition and is alleged to have arisen because of activities of the Public Health Service in connection with such individual. (Appendix B Departmental Regulations (45 CFR Part 5b), Item 100).
4. Certain infectious diseases are reported to state government as required by law.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Locked file cabinets and coding system.

Retrievability: Name, patient number, or identifier code. NIH USE: Data analysis; program management; DHEW user (Craniofacial Anomalies Program Branch, NIDR) will receive data extracted by principal investigators from volunteer research records to determine possible metabolic and environmental etiologic factors during pregnancy associated with cleft lip with or without cleft palate in the offspring.

Safeguards: The records are maintained in locked cabinets with access limited to authorized personnel (system manager, principal investigator and his staff assigned to the project, project officer, contracting officer). For computerized records, safeguards are established in accordance with Departmental standards and National Bureau of Standards guidelines, e.g., security codes will be used limiting access to authorized personnel.

Retention and disposal: One year to indefinitely, depending on the requirements of the study. Records are shredded, burned or erased.

System manager(s) and address:
Chief, Craniofacial Anomalies Program Branch
National Institute of Dental Research, NIH
Westwood Building, Room 520
53333 Westbard Avenue
Bethesda, Maryland 20014

Notification procedure: To determine if a file exists, write to the System Manager and provide the following information:

1. approximate dates and place of treatment.
2. name of the study, if known.
3. an individual who requests notification of or access to a medical record shall, at the time the request is made, designate a responsible representative in writing who will be willing to review the record and inform the subject individual of its contents at the representative's discretion (these notification and access procedures are in accordance with Department Regulations (45 CFR, Part 5b.6), Federal Register, October 8, 1975, page 47411).

Record access procedures: Same as notification procedures. Requestors should also reasonably specify the record contents being sought.

Contesting record procedures: Write to system manager and reasonably identify the record and specify the information to be contested, in accordance with Department Regulations, Federal Register, October 8, 1975, page 47411 (45 CFR, Part 5b.7).

Record source categories: Hospital medical records, pathology and biochemistry laboratory records, and diaries on environmental factors kept by patients.

Systems exempted from certain provisions of the act: None.

NIH NHLI 0309.00

System name: National Heart and Lung Epidemiological and Biometric Studies. DHEW/NIH/NHLI.

Security classification: None.

System location: Records included in this system are located in hospitals, universities, research centers, research foundations, and coordinating centers under contract with the National Heart and Lung Institute, and in NHLI facilities in Bethesda, Maryland.

Categories of individuals covered by the system: Participants in these studies include 1) individuals who have been or who are presently being treated by the National Heart and Lung Institute, for diseases or conditions of the heart, lung, blood vessels and blood; 2) individuals whose physical, genetic, social, economic, enviornmental, behavioral or nutritional conditions or habits are being studied in relation to the incidence of heart, lung, blood vessel and blood diseases among human beings; and 3) normal volunteers who have agreed to provide control data germane to these studies.

Categories of records in the system: This system consists of a variety of clinical, medical, and statistical information resulting from or contained in research findings, medical histories, vital statistics, personal interviews, questionnaires, or direct observation. The system also includes records of current addresses of study participants, photographs, fingerprints, and correspondence from or about participants in these studies.

Authority for maintenance of the system: Sec. 412, 413 Public Health Service Act (42 U.S.C. 287a, 287b)

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

1. Research data are made available to authorized, collaborating researchers, which includes DHEW contractors and grantees.
2. See Appendix B Departmental Regulations (45 CFR Part 5b), Items: 2,3,8,9,100,101, and 102.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Data may be stored in file folders, magnetic tapes or discs, punched cards, bound note books.

Retrievability: Information is retrieved by name and/or participant identification number. DHEW Uses: Summaries of data resulting from these studies are used by the National Heart and Lung Institute to monitor and evaluate the incidence of the diseases or the conditions under investigation and the relationship of various factors to the occurrence of these diseases, and for program planning and evaluation purposes.

Safeguards: Access to or disclosure of information is limited to authorized researchers, NHLI employees whose duties require the use of such information, and subject individuals themselves whose identity has been properly verified. Data stored in computers is accessed through the use of key words known only to principal investigatores or authorized personnel. All other information will be stored in locked files.

Retention and disposal: Records are retained by NIH indefinitely, as the documentation from scientific and medical research are normally permanent records.

System manager(s) and address:
Chief, Epidemiology Branch
National Heart and Lung Institute
Landow Building, C825
7910 Woodmont Avenue
Bethesda, MD 20014

Notification procedure:
NHLI Privacy Coordinator
Building 31, NIH
9000 Rockville Pike
Bethesda, MD 20014
Requestors must provide the following information in writing:
1. Full name
2. Name and location of research study

V 41 155 AUG 10 76 UMI

3. Approximate dates of enrollment These notification procedures are in accordance with the DHEW regulations as published in the Federal Register, October 8, 1975, p.47411 (45 CFR, Part 5b.6).

Record access procedures: Same as notification. Requestors should also reasonably specify the record contents being sought. These access procedures are in accordance with the DHEW regulations as published in the Federal Register, October 8, 1975, p.47411 (45 CFR, Part 5b.6).

Contesting record procedures: System Manager as indicated above. The contestor must reasonably specify in writing the record contents at issue.

Record source categories: Information contained in these records is obtained directly from individual participants and from medical and clinical research observations.

15
None.

NIH NICHD 0313.00

System name: Clinical trials dealing with phototherapy for neonatal hyperbilirubinemia--HEW/NIH/NICHD.

Security classification: None.

System location:

Bldg. 31, Room 2A-50
9000 Rockville Pike
Bethesda, Maryland 20014
And six contract sites performing the trials (See Appendix).

Categories of individuals covered by the system: Patients in clinical trials dealing with phototherapy in the newborn.

Categories of records in the system: Individual medical and laboratory records of subjects participating in the study.

Authority for maintenance of the system: 42 U.S.C. 241(g), 289d.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

1. Disclosure may be made to a congressional office from the record of an individual in response to an.inquiry from that office made at the request of that individual, parents, or guardian.
2. Certain infectious diseases are reported to state governments as required by law.
3. Information may be given to a primary care physician when treatment or follow-up of a condition noted during the one-year examination given each patient in the study is indicated.
4. To the Department of Justice or other appropriate Federal agencies in defending claims against the United States when the claim is based upon an individual's mental or physical condition and is alleged to have arisen because of activity of the Public Health Service in connection with such individual. (Appendix B Departmental Regulations (45 CFR Part 5b), Item 100.)

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: File folders, computer tapes or discs.

Retrievability: Name or identifier code. NIH Uses: Data analysis; program management; DHEW user (Office of the Scientific Director, NICHD) will receive unidentified, aggregate data extracted by the principal investigators from patient records describing the effects of phototherapy on the treatment of hyperbilirubinemia in newborns and the subsequent development of the patient.

Safeguards: The records are maintained in locked cabinets with access limited to authorized personnel (system manager, principal investigator and his staff assigned to the project, project officer, contracting officer). For computerized records, safeguards are established in accordance with Departmental standards and National Bureau of Standards guidelines, e.g. security codes will be used limiting access to authorized personnel.

Retention and disposal: One year to indefinitely, depending on the length of the patient follow-up required to complete the study. Records are shredded, burned or erased.

System manager(s) and address:

Chief, Section on Human Biochemical and Developmental Genetics, NPMB
Intramural Research Program, NICHD, NIH
Bldg. 10, 13N258
9000 Rockville Pike
Bethesda, Maryland 20014

Notification procedure: To determine if a file exists, write to the System Manager and provide the following information:

1. Approximate dates and place of treatment.
2. Name of the study, if known.
3. An individual who requests notification of or access to a medical record shall, at the time the request is made, designate a responsible representative in writing who will be willing to review the record and inform the subject individual of its contents at the representative's discretion (these notification and access procedures are in accordance with Department Regulations (45 CFR, Part 5b.6), Federal Register, October 8, 1975, page 47411).

Record access procedures: Same as notification procedures. Requestors should also reasonably specify the record contents being sought.

Contesting record procedures: Write to system manager and reasonably identify the record and specify the information to be contested, in accordance with Department Regulations, Federal Register, October 8, 1975, page 47411 (45 CFR, Part 5b.7).

Record source categories: Information provided by subjects and clinical investigators.

Systems exempted from certain provisions of the act: None.

APPENDIX I

N01-HD-4-2818

University of Cincinnati
College of Medicine
Cincinnati, Ohio 45219

Principal Investigator:
James M. Sutherland, M.D.

N01-HD-4-2819

State University of New York
Downstate Medical Center.
450 Clarkson Avenue
Brooklyn, NY 11203

Principal Investigator:
Dr. Audrey K. Brown

N01-HD-4-2820

Virginia Commonwealth University
Medical College of Virginia
1200 East Broad Street
Richmond, VA 23298

Principal Investigator:
Harold M. Maurer, M.D.

NO1-HD-4-2821

Long Island Jewish Hillside Medical Center
New Hyde Park
New York 11041

Principal Investigator:
Philip J. Lipsitz, M.D.

N01-HD-4-2822

Albert Einstein College of Medicine of Yeshiva University
1300 Morris Park Avenue
Bronx, NY 10461

Principal Investigator:
Lawrence M. Gartner, M.D.

N01-HD-4-2823

Professional Staff Association of the LAC/USC Medical Center
Women's Hospital, Room 919L
1240 Mission Road
Los Angeles, CA 90033

Principal Investigators:
Joan E. Hodgman, M.D.
Paul U. K. Wu, M.D.

NIH NINCDS 0315.00

System name: Neural Prosthesis & Biomedical Engineering Studies. HEW/NIH/NINCDS.

Security classification: None.

System location:

NIH
Federal Building, Room 120
7550 Wisconsin Ave.
Bethesda, Md 20014
and at hospitals and medical centers under contract. A list of locations is available upon request from system manager.

Categories of individuals covered by the system: Patients and normal volunteers, males and females, participating in clinical studies to determine the feasibility of neural prostheses, and in clinical studies related to the development of instrumentation for diagnosis and treatment of neurological and sensory disorders conducted under contract for the National Institute of Neurological and Communicative Disorders and Stroke.

Categories of records in the system: Clinical research data as related to studies which seek to determine the feasibility of neural prostheses and to develop instrumentation for diagnosis and treatment of neurological and sensory disorders.

Authority for maintenance of the system: 42 U.S.C. 421, 289a, 289c.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

1. Records are made available to approved or collaborating researchers, including DHEW contractors and grantees.
2. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.
3. To the Department of Justice or other appropriate Federal Agencies in defending claims against the United States when the claim is based upon an individual's mental or physical condition and is alleged, to have arisen because of activity of the Public Health Service in connection with such individual. (Appendix B, Department Regulations (45 CFR Part 5b) Item 100.)

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: They are stored in file folders.

Retrievability: They are retrieved by name. HEW use: research on the feasibility and development of neural prostheses, and research related to the development of instrumentation for the diagnosis and treatment of neurological and sensory disorders. Clinical research data is used by the National Institute of Neurological and Communicative Disorders and Stroke and unidentified aggregate data may be used by other NIH scientists.

Safeguards: The records are maintained in cabinets with access limited to authorized personnel (system manager and members of his staff, project officer, and contracting officer).

Retention and disposal: Years at NIH: indefinitely.

System manager(s) and address:

Director, Fundamental Neurosciences Program
Federal Building, Room 120
7550 Wisconsin Ave
Bethesda, MD 20014

Notification procedure: Write To:

Head, Administrative Management Section
Building 31, Room 8A47
9000 Rockville Pike
Bethesda, MD 20014

and ask if a file exists with your name in the Neural Prothesis or Biomedical Engineering Studies. Also, designate a responsible representative who will be willing to review the record and inform you of its contents at his/her discretion. (These notification and access procedures are in accordance with Department Regulations (45 CFR, Part 5b.6) Federal Register, October 8, 1975, page 47411.)

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought.

Contesting record procedures: Write to system manager and reasonably identify the record and specify the information to be contested, in accordance with Department Regulations, Federal Register, October 8, 1975, page 47411 (45 CFR, Part 5b.7).

Record source categories: Patients, patients' families, hospital records and clinical investigators.

Systems exempted from certain provisions of the act: None.

NIH NINCDS 0316.00

System name: Clinical Research Studies dealing with Hearing, Speech and Language Disorders. HEW/NIH/NINCDS.

Security classification: None.

System location:

Federal Building, NIH
7550 Wisconsin Avenue
Bethesda, MD 20014
And at hospitals, medical centers, universities and educational settings under contract. A list of locations is available upon request from the System Manager.

Categories of individuals covered by the system: Patients and normal volunteers participating in clinical research studies dealing with hearing, speech and language disorders.

Categories of records in the system: Medical findings, clinical research data, medical and educational histories and research data on the hearing, speech, language and cognition of subjects being tested.

Authority for maintenance of the system: 42 U.S.C. 241, 289a, 289c.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

1. Records are made available to approved or collaborating researchers, including DHEW contractors and grantees.
2. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.
3. To the Department of Justice or other appropriate Federal agencies in defending claims against the United States when the claim is based upon an individual's mental or physical condition and is alleged to have arisen because of activity of the Public Health Service in connection with such individual (Appendix B Departmental Regulations (45 CFR Part 5b) Item 100.)

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: They are stored in file folders.

Retrievability: Name or identifier code. HEW uses: Data analysis; program management; DHEW user (Communicative Disorders Program, National Institute of Neurological and Communicative Disorders and Stroke), will receive data extracted by principal investigators from patient and normal volunteer records on the effects of various factors on hearing, speech, language, and cognition.

Safeguards: The records are maintained in cabinets in offices where access is limited to authorized personnel (principal investigator and staff assigned to the project, project officer, contracting officer).

Retention and disposal: Years at NIH: one year to indefinitely, depending on the requirements of the specific study. Following completion of a specific study all individual identification will be removed, or the records destroyed.

System manager(s) and address:

Director, Communicative Disorders Program
Federal Building, NIH
7550 Wisconsin Avenue
Bethesda, Md. 20014

Notification procedure: Write To:

Head, Administrative Management Section
Building 31, Room 8A47
9000 Rockville Pike
Bethesda, Maryland 20014

V 41 155 AUG 10 76 UMI

To ask if a file exists with your name in studies of Communication Disorders Program. Please supply the following information:

1. Approximate date and place of examination and/or treatment.
2. Name of the study, if known.
3. A responsible representative who will be willing to review the record and inform you of its contents at his/her discretion. (These notification and access procedures are in accordance with Department Regulations (45 CFR, Part 5b.6) Federal Register, October 8, 1975, page 47411).

Record access procedures: Same as notification procedures. Requests should also reasonably specify the record contents being sought.

Contesting record procedures: Write to system manager and reasonably identify the record and specify the information to be contested, in accordance with Department Regulations, Federal Register, October 8, 1975, page 47411 (45 CFR Part 5b.7).

Record source categories: Information provided by patients, patients' families, hospital records, school records, and clinical investigators.

Systems exempted from certain provisions of the act: None.

NIH NCI 0325.00

System name: Environmental Epidemiologic Studies in the Division of Cancer Cause and Prevention, HEW/NIH/NCI.

Security classification: None.

System location:

Landow Building, Room A521
7910 Woodmont Ave.
Bethesda, Md. 20014
and
Bldg. 12, NIH
9000 Rockville Pike
Bethesda, Md. 20014
and at hospitals, medical schools, universities, research institutions, commercial organizations, state agencies, and collaborating government agencies. A list of locations and contracts is available upon request from the System Manager.

Categories of individuals covered by the system: Patients with cancer and related diseases, (e.g., birth defects), patients with other diseases (e.g., heart disease), normal and other persons (e.g., family members) for the purpose of making comparisons.

Categories of records in the system: Medical records, progress reports, correspondence, epidemiological computerized data and records on biological specimens (e.g., blood, tumors, urine, etc.).

Authority for maintenance of the system: 42 U.S.C. 241, and 282.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

1. Disclosure may be made to DHEW contractors and collaborating researchers and their staff in the conduct of the study and in preparation of scientific reports.
2. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual.
3. See other DHEW routine uses as published in the Federal Register, October 8, 1975, Page 47415, Appendix B, items 9 and 100 (45 CFR Part 5b).

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: File folders, microfilm, charts, graphs, computer tapes discs and punch cards.

Retrievability: By name and/or code number. NCI uses: to determine (1) factors or substances in the environment which cause cancer; (2) ways in which these factors or substances may cause cancer; and (3) characteristics of persons who may be particularly susceptible to the environmental factor(s) or substance(s) and/or to cancer.

Safeguards: DHEW contractors and collaborating researchers will comply with the provisions of the Privacy Act and with Department Regulations. Subjects participating in a clinical study will be advised that their identity will only be known to those who are involved in conducting the study and that any published findings will be in a format which precludes individual identification. Data will be kept in secured areas with access limited to authorized personnel (system manager, project officer, contracting officer, collaborating researchers, staff, and DHEW contractors). Data transmitted to the NCI will be in a non-personally identifiable form. For computerized records the contractor will comply, where appropriate, with Department standards and National Bureau of Standards Guidelines. For example, access is controlled by the use of security codes known only to authorized personnel.

Retention and disposal: One year to indefinitely depending on the project. Hard copy burned; computer tapes and discs erased.

System manager(s) and address:

Chief, Environmental Epidemiology Branch
National Cancer Institute
Landow Building, Room A521
7910 Woodmont Avenue
Bethesda, Maryland 20014

Notification procedure:

To determine if a file exists write to system manager and provide the following information:

a. System name: Environmental Epidemiologic Studies in the Division of Cancer Cause and Prevention
b. Complete name at time of study
c. Facility and home address at the time the study was undertaken
d. Date(s) at the time the information was provided (if known)
e. Birthdate
f. Disease type (if known)

Medical records notification procedures are in accordance with Departmental Regulations, Federal Register, October 8, 1975, page 47411 (45 CFR Part 5b.6) (See 12 below)

Record access procedures: The same information provided above for notification is also needed for access. (1) Non-Medical Records - written requests should be made to the System Manager providing identity verification consisting of either a notarization of the request or a certification that the individual is who he or she claims to be, and understands that the knowing and willful request for acquisition of a record pertaining to the individual under false pretenses is a criminal offense under the Act, subject to

5,000 fine. (2) Medical Records access procedures are in accordance with Departmental Regulations, Federal Register, October 8, 1975, page 47411 (45 CFR, Part 5b.6). Individuals seeking access to medical records should designate a representative (including address) who may be a physician, other health professional, or other responsible individual who would be willing to review the record and inform the subject individual of its contents, at the representative's discretion.

Contesting record procedures: Write to system manager and specify the record and the part(s) to be contested.

Record source categories: DHEW agencies, institutions under contract to the U.S. Government, universities, medical schools, hospitals, research institutions, commercial institutions, state agencies, other U.S. Government agencies, patients and normal volunteers, physicians, research investigators and other collaborating personnel.

Systems exempted from certain provisions of the act: None.

NIH NCI 0326.00

System name: Clinical Epidemiologic Studies in the Division of Cancer Cause and Prevention, HEW/NIH/NCI.

Security classification: None.

System location:

Landow Building, Room A521
7910 Woodmont Ave.
Bethesda, Md. 20014
and
Bldg. 12, NIH
9000 Rockville Pike
Bethesda, Md. 20014
and at hospitals, medical schools, universities, research institutions, commercial organizations, state agencies, and collaborating government agencies. A list of locations and contracts is available upon request from the System Manager.

Categories of individuals covered by the system: Patients with cancer and related diseases, (e.g., birth defects), patients with other diseases (e.g., heart disease), normal and other persons (e.g., family members) for the purpose of making comparisons.

Categories of records in the system: Medical records, progress reports, correspondence, epidemiological computerized data and records on biological specimens (e.g., blood, tumors, urine, etc.).

Authority for maintenance of the system: 42 U.S.C. 241, and 282.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

1. Disclosure may be made to DHEW contractors and collaborating researchers and their staff in the conduct of the study and in preparation of scientific reports.
2. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual.
3. See other DHEW routine uses as published in the Federal Register, October 8, 1975. Page 47415, Appendix B, items 9 and 100 (45 CFR Part 5b).

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: File folders, microfilm, charts, graphs, computer tapes discs and punch cards.

Retrievability: By name and/or code number. NCI uses: to determine (1) factors or substances in the environment which cause cancer; (2) ways in which these factors or substances may cause cancer; and (3) characteristics of persons who may be particularly susceptible to the environmental factor(s) or substance(s) and/or to cancer.

Safeguards: DHEW contractors and collaborating researchers will comply with the provisions of the Privacy Act and with Department Regulations. Subjects participating in a clinical study will be advised that their identity will only be known to those who are involved in conducting the study and that any published findings will be in a format which precludes individual identification. Data will be kept in secured areas with access limited to authorized personnel (system manager, project officer, contracting officer, collaborating researchers, staff, and DHEW contractors). Data transmitted to the NCI will be in a non-personally identifiable form. For computerized records the contractor will comply, where appropriate, with Department standards and National Bureau of Standards Guidelines. For example, access is controlled by the use of security codes known only to authorized personnel.

Retention and disposal: One year to indefinitely depending on the project. Hard copy burned; computer tapes and discs erased.

System manager(s) and address:

Chief, Clinical Epidemiology Branch
National Cancer Institute
Landow Building, Room A521
7910 Woodmont Avenue
Bethesda, Maryland 20014

Notification procedure:

To determine if a file exists write to system manager and provide the following information:

a. System name: Clinical Epidemiologic Studies in the Division of Cancer Cause and Prevention
b. Complete name at time of study
c. Facility and home address at the time the study was undertaken
d. Date(s) at the time the information was provided (if known)
e. Birthdate
f. Disease type (if known)

Medical records notification procedures are in accordance with Departmental Regulations, Federal Register, October 8, 1975, page 47411 (45 CFR Part 5b.6) (See 12 below)

Record access procedures: The same information provided above for notification is also needed for access. (1) Non-Medical Records - written requests should be made to the System Manager providing identity verification consisting of either a notarization of the request or a certification that the individual is who he or she claims to be, and understands that the knowing and willful request for acquisition of a record pertaining to the individual under false pretenses is a criminal offense under the Act, subject to

5,000 fine. (2) Medical Records access procedures are in accordance with Departmental Regulations, Federal Register, October 8, 1975, page 47411 (45 CFR, Part 5b.6). Individuals seeking access to medical records should designate a representative (including address) who may be a physician, other health professional, or other responsible individual who would be willing to review the record and inform the subject individual of its contents, at the representative's discretion.

Contesting record procedures: Write to system manager and specify the record and the part(s) to be contested.

Record source categories: DHEW agencies, institutions under contract to the U.S. Government, universities, medical schools, hospitals, research institutions, commercial institutions, state agencies, other U.S. Government agencies, patients and normal volunteers, physicians, research investigators and other collaborating personnel.

Systems exempted from certain provisions of the act: None.

CDC NIOSH 0141.00

System name: Respiratory Disease Studies Involving Persons of West Virginia Coal Mining Communities HEW/CDC/NIOSH.

Security classification: None.

System location:

Appalachian Laboratory for Occupational Safety and Health, NIOSH
944 Chestnut Ridge Road
Morgantown, West Virginia 26505
and
Ian T. Higgins, M.D.
School of Public Health
Dept. of Epidemiology
University of Michigan
109 Observatory Street
Ann Arbor, MI 48104

Categories of individuals covered by the system: Miners, nonminers, wives of miners, and wives of non-miners living in Richwood, Mullens, and Marion Counties, West Virginia.

Categories of records in the system: Medical, occupational, and smoking histories; results of medical tests; demographic data.

Authority for maintenance of the system: Federal Coal Mine Health and Safety Act, Section 501 (30 U.S.C. 951).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To the Department of Justice or other appropriate Federal agencies in defending claims against the United States when the claim is based upon an individual's mental or physical condition and is alleged to have arisen because of activities of the Public Health Service in connection with such individual (see Appendix B of HEW Regulation, 45 C.F.R., part 5b, item 100).

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: File folders, computer tape, computer discs, computer cards, computer printouts.

Retrievability: The purpose of this system is to perform medical and epidemiological research and statistical analysis on the respiratory disease of coal miners and other workers in coal mining communities in West Virginia. The data is retrieved by name or case number.

Safeguards:

24-hour guard service in building
Locked building; locked rooms
Personnel screening
Locked computer room and computer tape vaults
Locked file cabinets
Computer tapes are password protected.

Retention and disposal: Records retained indefinitely. Disposal methods include erasing computer tapes and burning or shredding printouts or paper forms.

System manager(s) and address:

Director
National Institute for Occupational Safety and Health
5600 Fishers Lane, Park Bldg. - Room 3-32
Rockville, Maryland 20852

Notification procedure: To determine if a file exists, write the:

Privacy Act Coordinator
Management Analysis Office
Center for Disease Control
Atlanta, Georgia 30333 and provide the following information:
(1) approximate date(s)
and place of treatment or questionnaire administration, (2) name of study, if known; (3) an individual who requests notification of or access to a medical record shall, at the time the request is made, designate a responsible

V 41 155 AUG 10 76 UMI

representative in writing who will be willing to review the record and inform the subject individual of its contents at the representative's discretion (these notification and access procedures are requirements of the Department Regulations, 45 C.F.R., Part 5b.6, Federal Register, October 8, 1975, page 47411).

Record access procedures: Same as notification procedure. Requesters should also reasonably specify the record contents being sought.

Contesting record procedures: Write the:

Privacy Act Coordinator
Management Analysis Office
Center for Disease Control Atlanta, Georgia 30333
Reasonably identify the record and specify the information to be contested in accordance with Department Regulations, Federal Register, October 8, 1975, page 47411 (45 C.F.R., Part 5b.7).

Record source categories: Information is obtained directly from individuals.

Systems exempted from certain provisions of the act: None. /*

NATIONAL FLOOD INSURANCE PROGRAM
HUD/FIA publishes list of flood-prone communities subject to Section 202 prohibition of Federal and federally related assistance 33969

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: Questions, corrections, or requests for information regarding the contents of this issue only may be made by dialing 202–523–5286. For information on obtaining extra copies, please call 202–523–5240.

To obtain advance information from recorded highlights of selected documents to appear in the next issue, dial 202–523–5022.

federal register
Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 10—Energy

CHAPTER II—FEDERAL ENERGY OFFICE

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

Special Set-Aside Procedures for Middle Distillates

BACKGROUND AND PROPOSED AMENDMENT

On July 9, 1976 the Federal Energy Administration (which, effective July 31, 1976, became the Federal Energy Office and is hereinafter referred to as the "FEO") issued a notice of proposed rulemaking and public hearing (41 FR 28797; July 13, 1976) as to the adoption of Special Rule No. 3 for Subpart A of Part 211 (the "Special Rule"). The Special Rule as proposed provided for a special set-aside procedure for middle distillates administered by FEO's Regional Offices for the transitional period following the exemption of middle distillates from the Mandatory Price and Allocation Regulations on July 1, 1976.

As indicated in the notice, the special set-aside procedures derive from FEO's discussions with members of Congress regarding the middle distillate exemption proposals. In response to Congressional concerns, FEO committed that it would take certain actions following the effectiveness of the exemption to assure first that no unwarranted price increases would occur once controls were removed and secondly that marketers would be protected during the transitional period following removal of controls as to their ability to obtain supplies, which latter commitment is fulfilled by the issuance hereby of the Special Rule. With respect to the safeguards against price increases, FEO informed the Congress that FEO would institute a monitoring system for middle distillate prices, which was proposed by FEO on July 20, 1976 (41 FR 30281, July 22, 1976).

The Special Rule as proposed provided for the establishment of a set-aside program administered by FEO's Regional Offices for the period August 1976 through March 1977, which would operate to insure that no marketer would lose its supply source without adequate time to secure a new supplier. The proposal permitted marketers who have made diligent unsuccessful efforts to obtain supplies to be assigned as much as their previously authorized base period use from the special set-aside. These assignments could be made for periods of up to 90 days if required to permit the marketers to make their own supply arrangements or for longer if required to preclude hardships to consumers. The proposal also allowed assignments to be made directly to consumers under the same hardship criteria that existed previously for middle distillates in the state set-aside program. As proposed, the set-aside for each prime supplier constituted four percent of the estimated portion of its total supply of middle distillates for the particular month to be sold into the distribution system of a state for consumption therein.

Because the FEO regionally administered set-aside program could not be implemented before August 1976, FEO adopted an interim rule (Special Rule No. 2) on July 1, 1976 which continued the operation of the state set-aside program in a modified form for the month of July to assure that no marketer would lose its source of supply during that month.

Written comments were invited on the proposal through July 23, 1976 and the public hearing was held on July 22, 1976. Forty-eight written and oral comments were received. Among those offering comments were suppliers, including major integrated refining companies and large and small independent refining companies, potential recipients of relief, including resellers and marketer associations, and also State Offices which administer the state set-aside program. Most of the comments did not oppose the establishment of a transitional set-aside program for middle distillates. However, many of those commenting, including states, resellers, and the marketer associations, contended that the special set-aside should be administered by the State Offices, as was previously the case, rather than by the FEO Regional Offices.

SPECIAL SET-ASIDE PROCEDURES ADOPTED

FEO has carefully considered the comments of all persons who participated in this rulemaking and has concluded that the proposed set-aside procedures should be adopted, with certain modifications described below that reflect comments received and further analysis by FEO.

Administration by State Offices. FEO has first concluded that the State Offices should administer the special set-aside for middle distillates. During the administration of the state set-aside since its inception, the State Offices have accumulated valuable experience and expertise in dealing with the hardship requests of end-users and wholesale purchaser-consumers in a timely manner, and the procedures that the State Offices already have in place to handle set-aside requests will facilitate their processing of applications of eligible wholesale purchaser-resellers, as well as hardship requests of end-users and wholesale purchaser-consumers during this period. Inasmuch as the State Offices are continuing to administer the state set-aside for motor gasoline and propane, confusion will be avoided by permitting them to operate the special set-aside for middle distillates during the relatively short period it will be in effect.

With respect to whether the states themselves wish to manage the special set-aside, FEO has been apprised that at least forty wish to do so. In those cases where a state does not wish to operate the middle distillate set-aside, a provision has been included in the Special Rule whereby a state may elect to have the special set-aside for middle distillates administered by the appropriate FEO Regional Office that has jurisdiction over the state involved.

Guidelines. To assure uniform treatment to applicants and as an aid in administering the special set-aside procedures, FEO will issue guidelines for administration of the Special Rule to the State and Regional Offices. Among the criteria to be included is the requirement that a new supplier will not be assigned to an applicant merely because the current supplier has higher product prices. FEO does not anticipate that there will be any significant price increases for middle distillates as a result of decontrol, but different prices may continue to exist as among different suppliers following decontrol.

Supplier's Responsibilities. With respect to the obligations of a supplier after an assignment has been made, to prevent any pricing practice or other action which would have the effect of circumventing the objectives and purposes of the Special Rule, a provision has been added which makes it clear that the requirements of paragraph (b) of 10 CFR 210.62 prohibiting any form of discrimination among purchasers continue to apply.

State Representative. Under the proposal each supplier was required to designate as a representative within each state in which it is a prime supplier a firm doing business within the state. Some of the comments received indicated that various suppliers either have no personnel in one or more states or have personnel such as sales representatives, who may not be knowledgeable with respect to the firm's middle distillate distribution system for that state. Certain suppliers distribute their product on a regional (as opposed to a state-by-state) basis, and therefore the most knowledgeable representative of a supplier may be outside the particular state in which the applicant is located. For these reasons, in the final rule FEO is permitting the prime supplier to designate a state representative for the state, not necessarily within the state.

V 41 1 156 AUG 11 76 UMI

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended by Pub. L. 94-163; E.O. 11930, July 30, 1976)

In consideration of the foregoing, Part 211, Chapter II of Title 10, Code of Federal Regulations, is hereby amended as set forth below, effective immediately.

Issued in Washington, D.C., August 5, 1976.

MICHAEL F. BUTLER,
General Counsel.

The Appendix to Subpart A of Part 211 is amended by the addition of a Special Rule No. 3 to read as follows:

SPECIAL RULE NO. 3

1. *Scope.* This Special Rule provides for a set-aside program for middle distillates for the months of August 1976 through March 1977, as provided below, notwithstanding the exemption of middle distillates from the Mandatory Petroleum Allocation and Price Regulations effective July 1, 1976.

2. *Provision for middle distillate set-aside.* Notwithstanding the provisions of paragraphs (b) and (c) of § 210.35 and of paragraphs (b) (5) and (6) of § 211.1, a set-aside is hereby established for the months August 1976 through March 1977 for middle distillates for assignment by State Offices in accordance with the provisions of this Special Rule.

3. *Set-aside volume.* A prime supplier shall inform each appropriate State Office monthly of the estimated volume of middle distillates to be sold into a state for consumption within that state. The set-aside volume available in a state to a State Office for a particular month shall be the sum of the amounts calculated by multiplying four (4) percent by each prime supplier's estimated portion of its total supply for that month which will be sold into that state's distribution system for consumption within the state. The set-aside for a particular month cannot be accumulated or deferred; it shall be made available from stocks of prime suppliers whether directly or through their wholesale purchaser-resellers.

4. *State representative.* Each supplier shall designate a representative for each state in which the supplier is a prime supplier to act for and on behalf of the prime supplier with respect to set-aside petitions and assignments from the set-aside to be supplied by that prime supplier. Each prime supplier for a state shall designate its representative for that state and shall notify in writing the appropriate State and FEO Regional Offices of such designation within 10 days after the effective date of this Special Rule. The State Office shall to the maximum extent possible consult with a prime supplier's representative prior to issuing any authorizing document affecting set-aside volumes to be provided by the prime supplier.

5. *Eligible recipients of set-aside volumes.* The set-aside provided for by this Special Rule shall be utilized by the State Offices to meet hardship and emergency requirements of all wholesale purchaser-consumers and end users and to meet the supply needs of a wholesale purchaser-reseller in cases where the wholesale purchaser-reseller has demonstrated that it will not be able to obtain with diligent efforts in a particular month a volume of middle distillates equal to its base period use of middle distillates for that month as determined under this subpart and Subpart G of this part. To facilitate relief of the hardship and emergency requirements of wholesale purchaser-consumers and end-users, the State Office may also direct that a wholesale purchaser-reseller be supplied from the set-aside in order that the wholesale purchaser-reseller can supply the wholesale purchaser-consumers and end-users experiencing the hardship or emergency.

6. *Term of assignments.* Assignments to eligible wholesale purchaser-resellers under section 5 of this Special Rule by a State Office shall not be made for a period in excess of 90 days. Assignments for additional periods shall not be made to a firm unless necessary to preclude hardship and provide emergency requirements to ultimate consumers. No assignments to eligible recipients under section 5 of this Special Rule shall relate to any period subsequent to March 31, 1977.

7. *Application for assignment.* All applications for assignment under this Special Rule shall be made to the appropriate State Office, which Office has jurisdiction over the state in which the applicant conducts its business operations, in accordance with the procedures set forth in §§ 205.211-218 of Subpart Q of Part 205 of this chapter with respect to the state set-aside, except as otherwise provided in this Special Rule and except that all applications by wholesale purchaser-resellers must be in writing.

8. *Transfer of functions to FEO Regional Office.* Any state may elect irrevocably at any time to transfer administration of the middle distillate set-aside established by this Special Rule from its State Office to the FEO Regional Office which has jurisdiction over said state, and will inform the FEO Regional Office in writing of such election. In the event of an election described in the preceding sentence by a particular state, all applications by applicants conducting business within that state shall be made to the appropriate FEO Regional Office. With respect to applications made to an FEO Regional Office under this section all references to a State Office in this Special Rule and Subpart Q of Part 205 of this chapter shall be deemed to refer to the appropriate FEO Regional Office.

9. *Approval of application.* If a State Office approves an application for assignment, it shall assign a prime supplier and amount from the set-aside to the applicant. To determine an appropriate prime supplier, the State Office may coordinate with the state representatives of the prime suppliers.

10. *Authorizing document.* The State Office shall issue to an applicant granted an assignment a document authorizing such assignment. A copy of the authorizing document (or a summary) shall also be provided by the State Office to the designated state representative of the prime supplier assigned to the applicant. An authorizing document not presented to either the prime supplier or a designated local distributor of the prime supplier within ten (10) days of issuance shall expire after that time.

11. *Supplier's responsibilities.* When presented with an authorizing document, suppliers shall provide the assigned amount of middle distillates to an applicant. The authorizing document shall entitle the applicant to receive product from any convenient local distributor of the prime supplier from which the set-aside assignment has been made. Wholesale purchaser-resellers of prime suppliers shall, as non-prime suppliers, honor such authorizing documents upon presentation, and shall not delay deliveries required by the authorizing document while confirming such deliveries with the prime supplier. Any non-prime supplier which provides middle distillates pursuant to an authorizing document shall in turn receive from its prime supplier an equivalent volume of the product. The requirements of paragraph (b) of § 210.62 of this chapter continue to apply to suppliers to whom an authorizing document is presented pursuant to this Special Rule to prohibit any form of discrimination (including price discrimination) which has the effect of circumventing, frustrating, or impairing the objectives, purposes and intent of this Special Rule.

12. *Prime suppliers.* All prime suppliers shall supply middle distillates from their set-aside volume each month, as directed by the State Offices, not to exceed the total set-aside volume for middle distillates for that month for the state concerned.

13. *Release of set-aside.* At any time during the month, a State Office may order the release of part or all of a prime supplier's set-aside volume through the prime supplier's normal distribution system in the state.

14. *Orders issued by State Offices.* Authorizing documents and other orders issued pursuant to this Special Rule shall be in writing and effective immediately upon presentation to the prime supplier's designated state representative. Authorizing documents shall represent a call on the prime supplier's set-aside volumes for the month of issuance irrespective of the fact that delivery cannot be made until the following month. Any order issued by a State Office pursuant to this Special Rule may be appealed to the FEO Regional Office that has jurisdiction over the state involved, in acordance with the procedures set forth in Subpart H of Part 205 of this chapter. Any appeal from such an order shall be filed within ten (10) days of service of the order from which the appeal is taken. If a State Office fails to take action on an application within ten (10) days of filing, the applicant may treat the application as having been denied in all respects and may appeal therefrom as provided in this section.

15. *Products included within term middle distillates.* For purposes of this Special Rule the term middle distillates includes the following, all as defined in § 212.31 of this chapter: No. 1 heating oil, No. 1-D diesel fuel, No. 2 heating oil, No. 2-D diesel fuel and kerosene.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20368; FCC 76-748]

OFFSHORE RADIO TELECOMMUNICATIONS SERVICE

Creation

By the Commission: [1]

In the matter of amendment of Parts 2 and 21 [2] of the Commission's Rules to provide for the creation of an Offshore Radio Telecommunications Service (ORTS).

1. On February 26, 1975, the Commission, in response to a petition (RM-1985) filed June 7, 1972, by the Offshore Telephone Company (Offshore), issued a Notice of Proposed Rule Making (NPRM) and Notice of Inquiry (NOI) to amend parts 2 and 21 of the Rules and Regulations. The NPRM/NOI was published in the FEDERAL REGISTER on March 20, 1975 (40 FR 12678). The petition proposed the allocation of frequency spectrum and the promulgation of regulations necessary to permit the establishment of comprehensive common carrier radio services in the Outer Continental Shelf region of the Southern Louisiana Gulf Coast.[3] Petitioner suggested that the new service be called the Offshore Radio Telecommunications Service (ORTS).

2. Comments were filed by the Offshore Telephone Company (Offshore), the Association of Maximum Service Telecasters, Inc. (AMST), the Central Committee on Telecommunications of the American Petroleum Institute (API), ITT World Communications, Inc. (ITT), the Radio Broadcasting Company and Radio Dispatch Co. (Radio), the GTE Service Corporation (GTESC), the American Telephone and Telegraph Company (AT&T), the Mobile Marine Radio, Inc. (MMR), the Continental Oil Company (Continental), the CNG Producing Company (CNG), and the Placid Oil Company (Placid). Reply comments were filed by the Offshore Telephone Company, the Association for Maximum Service Telecasters, Inc., the Central Committee on Telecommunications of the American Petroleum Institute, and the American Telephone and Telegraph Company.

3. After careful review of all comments and reply comments, the Commission remains convinced that the establishment of an ORTS, essentially as proposed, would be in the public interest. In brief, we have decided that the use of television channel 17 on a shared basis by stations located offshore in the Gulf of Mexico will satisfy a confirmed need for additional common carrier radio communication in this area in a manner consistent with the most efficient use of the spectrum. However, as noted infra, we have decided to limit the allocation for ORTS to 4 MHz, and allocate the remaining 2 MHz for private use in the Industrial Services. Also, we have reduced the frequency separation for channel-pairs from 5 MHz to 3 MHz for the reasons noted in paragraph 11. The comments raised several issues which we deal with in the following paragraphs.

4. There was considerable difference of opinion regarding the need for the new communication service. AMST and AT&T maintained that no need has been demonstrated. On the other hand, API and Offshore offered several examples of what they perceive to be unfulfilled communication requirements in the Gulf. We are persuaded that the matter was correctly stated in the NPRM/NOI. Radio communication requirements are currently being met in a rather fragmentary manner by the common carrier Rural Radio Service and the Industrial Radio Services. There is an apparent need for a more flexible communication system of greater capacity and versatility. In addition to voice communication, the system must be capable of transmitting facsimile, teletype, telemetry and control data.

5. The comments reflected general agreement among potential subscribers that some level of common carrier radio communication is required in the offshore area of the Gulf. In addition to API, as a representative of the oil industry, statements of need were received from individual companies. Continental stated that it would expect to subscribe to such service where it was cost effective and satisfied reliability requirements. Placid emphasized the handicap imposed by their inability to communicate directly with their service companies due to the fact that the Commission Rules governing presently available services do not provide for interservice communication. CNG noted, that as a smaller company it would prefer, for economic reasons, to obtain its communication services from a common carrier.

6. Offshore stated, and we concur, that it is not possible to obtain firm quantitative information on unfulfilled requirements for common carrier communication services in the Gulf area at this time. The actual number of potential subscribers cannot be ascertained until the service is established. While it is Commission policy not to allocate spectrum to a new service unless it appears likely that the service will find public acceptance, we recognize that there can be no absolute guarantee of such acceptance. In this case, we are satisfied that sufficient evidence of need exists to make it highly probable that a viable common carrier service will emerge, if given the opportunity to develop.

7. Finally, we note that the only radio channels now authorized for common carrier service in the offshore area of the Gulf are available to the Rural Radio Service on a secondary basis. Priority is given to the Domestic Public Land Mobile Radio Service in the use of these frequencies. The Commission has recently authorized land mobile facilities near the Gulf area which may have an impact on the future use of the same frequencies on a secondary basis offshore. It is clear, therefore, that an allocation of spectrum for use by common carriers in the offshore area is warranted.

8. In its comments and reply comments API endorsed the shared use of television channel 17 in the Gulf, but questioned the allocation of the entire band of spectrum (6 MHz) for exclusive common carrier use. API submitted an alternate plan that both modified and extended the proposal contained in the NPRM/NOI. In brief, this plan would include television channels 16 and 18 as well as 17; extend shared use over a larger area of the Gulf; reduce separation of the duplex channels from 5 MHz to 3 MHz; space channels at 12.5 kHz; and allocate this spectrum for use by Industrial Radio Services as well as common carrier.

9. Those elements of the API proposal that would include Television Channels 16 and 18, and extend the geographic area of operation, are considered to be beyond the scope of this proceeding. As such, they will not be addressed in this rule making.

10. We have reviewed the status of radio channels available for private systems in the area of the Gulf under consideration, and find that the channels are highly congested and also restricted in their operational use. This condition is particularly acute in the case of fixed communications links. Present operational fixed assignments are made in the 72-76, 150-170, and 450-470 MHz frequency bands. Microwave systems are also extensively used. The VHF/UHF fixed systems are used to extend telephone type service from the multichannel microwave systems, allow platform-to-platform communications, and the many point-to-point telemetry and supervisory control requirements. It was found that the use of the 72-76 MHz band was restricted by protection requirements of nearby TV Channels 4 and 5. There are only five "splinter frequencies" in the 150-170 MHz band, all of which are heavily used and because of their narrow bandwidth are not suitable for voice operation. Frequencies in the 450-470 MHz band for fixed station use are subject to geographical restrictions by the Rules. Microwave systems operating in the Gulf area are severely congested in all frequency bands up to 6 GHz. We also find that the need for the wideband simplex channels as proposed in the NPRM/NOI for common carrier use is questionable. As a result of both findings, we have determined that the two (2) MHz of spectrum initially proposed for wideband simplex channels should instead be allocated for private use in the Industrial Radio Service.

11. We have reviewed the economic and technical implication of 3 MHz ver-

[1] Separate opinions of Commissioners Lee, Hooks and Quello filed as part of the original document.

[2] The original Notice of Proposed Rule Making was concerned with amendment of Parts 2 and 21 only. After review of comments received, it was determined by the Commission that Part 91 should also be amended.

[3] This zone is bounded by the coordinate lines 94°00' west longitude and 87°45' west longitude and by the three-mile limit along the Gulf Coast on the north and the outer continental shelf on the south.

V 41 1156
AUG 11 76
UMI

sus 5 MHz separation of paired channels for voice duplex operation and have decided that 3 MHz separation is both feasible, and preferable from a spectrum management viewpoint. We recognize that there are economic, space and weight penalties associated with the equipment required for the smaller separation. However, our information indicates that these penalties are not exorbitant; and, as a matter of public interest, are an acceptable cost relative to the increased flexibility of spectrum use that is gained.

12. We do not agree that 12.5 kHz channel spacing is feasible. The API recommendation is apparently based on the assumption that only fixed operation is to be authorized. However, we have decided to accommodate mobile as well as fixed operation. Accordingly, it is not possible to ensure the distance separation between stations that would be required to permit 12.5 kHz channel spacing.

13. Several alternatives to the establishment of the ORTS and/or the shared use of television channel 17 were suggested in the comments. MMR asserted that the communication deficiencies could be eliminated by an increase in the number of radio channels allocated to the Maritime Service in the medium and high frequency portion of the spectrum (2–22 MHz); together with a change in the rules for operation of maritime coastal stations for point-to-point communication. As noted in the NPRM/NOI, frequencies below 100 MHz have been determined to be unsuitable for the ORTS because of the effect of sky-wave propagation on communication reliability. In addition, a sufficient number of channels of the required bandwidth could not be made available in this part of the spectrum.

14. AMST proposed as an alternative to the ORTS that more intensive use be made of the frequencies allocated to the Industrial Radio Services, particularly in the 450–470 MHz band. Our information shows that these channels are very heavily used by the land mobile service in the coastal areas of the Gulf. Also, much of the ORTS traffic can be expected to occur in the near shore area. Therefore, to preclude interference, any spectrum allocation for ORTS in the 450–470 MHz band could not be used by land mobile onshore. As stated in paragraph 17, the primary virtue of sharing TV channel 17 is that the spectrum can be allocated for use in the Gulf by ORTS without preventing planned use of the same frequencies by another radio service.

15. Communication via satellite was also suggested as an alternate means of satisfying the communication requirements that have resulted in the ORTS proposal. We agree that there may be instances where satellite communication will find application in the Gulf area. Further, there is nothing in this rule making that precludes the use of such communication. We do not agree, that all requirements can be satisfied by this mode of communication. Satellite earth terminals are not feasible for much of the mobile equipment, and are too expensive for general application even at the fixed locations.

16. The remaining alternative to the shared use of television channel 17 (488–494 MHz) is to allocate frequencies in the 900 MHz region of the spectrum. Our analysis shows that such a solution, although workable, has disadvantages at this time. To achieve equivalent service reliability, greater power would be required. Also, equipment at 900 MHz is still in a developmental stage, whereas equipment at 490 MHz is available essentially 'off the shelf.' However, we wish to emphasize our interest in encouraging the use of 900 MHz. We recognize that as technology develops, the disadvantages noted should diminish. Thus, for future requirements of this type strong consideration should be given to the use of the 900 MHz region.

17. From the standpoint of spectrum management, the essential issue is not simply whether an allocation at 900 MHz is a feasible alternative, but whether it would also result in the most efficient use of the spectrum. We are convinced that it would not. Frequencies allocated to ORTS if the Gulf of Mexico will be rendered unuseable by other services for some distance inland along the Gulf coast. Consequently, an allocation of spectrum at 900 MHz for ORTS would foreclose future use of these frequencies by the land mobile or other services in the Gulf coastal region. On the other hand, existing television assignments near the Gulf coast preclude other uses of channel 17 within most of the inland areas because of potential interference. However, under proper restrictions this same channel can be used effectively in offshore areas which are separated from existing television assignments. The proposed ORTS therefore represents additional value which can be derived from channel 17 with virtually no impact on possible future onshore services. We conclude, therefore, that shared use of TV channel 17 as proposed for the ORTS is preferable to an allocation at 900 MHz.

18. AMST expressed concern that offshore operation on television channel 17 frequencies would result in interference to reception of the television signal of WMAU located at Bude, Mississippi. We have reviewed the protection criteria contained in the NPRM/NOI and have concluded from this analysis that the separation distances specified for cochannel operation provide an adequate margin of interference protection. The separation distances specified in the NPRM/NOI were based on the procedure developed in Docket 18261 to permit sharing of television channels 14–20 with the land mobile services. In this procedure, a desired-to-undesired signal ratio of 50db at the television station Grade B Contour was specified and the separation distances determined from propagation curves in FCC Report No. R–6602. These curves have since been incorporated in the FCC Rules and Regulations. For application to offshore operation, the interfering signal was assumed to be 15db greater than that used in R–6602 to account for propagation conditions in the Gulf area. Subsequent to publication of the NPRM/NOI, the Commission determined the separation distances using NBS Technical Note #101 and a computer model contained in ESSA Technical Report ERL 79–ITS:67. The results of this analysis agree very closely with the protection requirements specified in the NPRM/NOI. The fact that the Commission's results differ from those derived by AMST is due to the difference in assumption of the "Climate" input to the analysis. We recognize that there is a degree of uncertainty in predicting the level of the interference fields, or the percentage of time a given level will exist. However, this is offset by factors which make the protection ratio greater than indicated; viz., receiving antenna front-to-back ratio, cross polarization discrimination, and the fact that 50db is a greater signal ratio than required for the average receiver, or for interfering signals removed from either the visual or color subcarrier frequencies.

19. While our analysis confirmed the co-channel protection contained in the NPRM/NOI, it also indicated that the separation distances for adjacent channel protection should be increased slightly. These changes are included in Table C, Part 21, of the Appendix.

20. Both MMR and AMST have noted that the implementation of an ORTS as proposed would require the installation of radio equipment that would have no application outside the zone to be served in the Gulf of Mexico. They contend that this would place an unnecessary burden on operators of ships and aircraft who provide support services to the oil industry in this area. The Commission in this instance is proposing to satisfy a specific requirement for radio communication in a very limited geographic area with a minimum diversion of scarce spectrum from other uses. We recognize that this entails the procurement of radio equipment that has restricted application. However, we believe this to be a necessary compromise in order to achieve most efficient use of the spectrum and is in the overall public interest. We must assume that each private entity concerned will elect to subscribe to the ORTS only if it is in its economic interest to do so.

21. Several of the respondents commented on the merit of offshore sharing of television-channels in other coastal areas. The comments reflected divided opinion relative to the opportunity for such sharing, and contained only general information. In this specific case the Commission has concluded that sharing of UHF television Channel 17 is in the public interest. We are concerned, however, about the potential adverse impact of additional sharing in future development of UHF television services. For this reason, the Commission is initating a formal staff investigation of the future spectrum requirements of UHF television, and pending completion of that investigation, no additional sharing of UHF television channels for offshore telecommunications will be considered. Therefore, in the foreseeable future any expansion of this service will be accommodated in frequencies other than those allocated to UHF television.

22. Definitions proposed for § 21.1 of the Rules and Regulations have been amended to incorporate the changes suggested by Offshore.

23. In summary then, we have reviewed all comments and investigated all issues raised in response to our NPRM/NOI, and have concluded that:

(a) There are unfulfilled communication requirements in the Gulf of Mexico.

(b) These unfulfilled requirements create a need for additional spectrum for private systems as well as for common carrier services.

(c) The shared use of television channel 17 results in the most efficient allocation of spectrum to satisfy this requirement.

(d) Television channel 17 can be shared without interference to established broadcasting stations or adversely affecting the future growth of television service in the Gulf area.

24. In its comments, API proposed changes to the Rules that would modify operation by the Industrial Radio Services in the 450–470 MHz band. Consideration of such changes is deemed to be beyond the scope of this proceeding. We do note however, that the portion of the request pertaining to the Business Radio Service was granted by the proceeding in Docket 19478.

25. In consideration of the foregoing the Commission finds that amendment of the Rules to establish a new common carrier radio service in the prescribed area of the Gulf of Mexico, and the allocation of spectrum in the form of shared use of the 488–494 MHz band of frequencies in this prescribed area, is in the public interest. Authority for these rule amendments is contained in section 4(i), 303(c), and 303(r) of the Communications Act of 1934, as amended.

26. Accordingly, it is ordered, that effective September 17, 1976, Parts 1, 2, 21, and 91 of the Commission's rules are amended as set forth below. It is further ordered, That this proceeding is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303.)

Adopted: July 30, 1976.

Released: August 9, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

Parts 1, 2, 21, and 91 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

PART 1—PRACTICE AND PROCEDURE

1. Section 1.1113(f) is amended to read as follows:

§ 1.1113 Schedule of fees for Common Carrier Services.

* * * * *

(f) Offshore Radio Communications Service:	*Application fee*
Application for an initial construction permit or for relocation of Offshore Central or Relay Facilities [4]	$120
Application for other than initial construction permit and for modification of construction permit or license for Offshore Central or Relay Facilities [4]	45
Application for initial construction permit or for relocation of fixed subscriber facilities [4]	75
Application for other than initial construction permit and for modification of construction permit or license for fixed subscriber facilities	30
Application for license for operation of stations at temporary-fixed locations	90
Application for renewal of license of Offshore Central or Relay Facilities	75
Application for renewal of license of fixed subscriber station	15
Application for license, modification of license or renewal of license for individually licensed mobile stations:	
One unit per application	15
Each additional mobile unit per application	9

* * * * *

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

1. The Table of Frequency Allocations is amended by adding a new footnote designator, NG 114, to the band 470–512 MHz and by adding in proper numerical sequence the text of footnote NG 114 following the Table as shown below:

§ 2.106 Table of Frequency Allocations.

Band (megahertz) (7)	Service (8)	Class of station (9)	Frequency (megahertz) (10)	Nature of services of stations (11)
470–512	Broadcasting, land mobile, (NG 66), (NG 114).	Television broadcasting, land mobile, base.	.....	Broadcasting, public safety, industrial, land transportation, domestic public.

NG 114 In the offshore Louisiana Gulf Coast area, the band 488–494 MHz (TV Channel 17) is allocated to the Domestic Public and Industrial Radio Services in accordance with the regulation set forth in Parts 21 and 91, respectively.

* * * * *

PART 21—DOMESTIC PUBLIC RADIO SERVICES (OTHER THAN MARITIME MOBILE)

1. Subpart B of the Table of Contents is amended to read as follows:

* * * * *

Subpart B—Applications and Licenses

GENERAL FILING REQUIREMENTS

21.9 Standard application forms for Domestic Public Land Mobile Radio, Rural Radio and Offshore Radio Telecommunications Services.

* * * * *

2. Section 21.0(a) is amended to read as follows:

§ 21.0 Scope and authority.

(a) The purpose of the rules and regulations in this part is to prescribe the manner in which portions of the radio spectrum may be more available for the use of radio for domestic communication common carrier operations which require transmitting facilities on land or in specified offshore coastal areas within the continental shelf.

* * * * *

3. Section 21.2 is amended to add or change definitions as follows:

§ 21.2 Definitions.

As used in this part:

Airborne station. A mobile station in the Domestic Public Land Mobile Radio Service or in the Offshore Radio Telecommunications Service aboard an aircraft.

* * * * *

Offshore central station. A fixed station in the Offshore Radio Telecommunications Service with facilities for interconnection with public correspondence circuits.

* * * * *

Offshore mobile station. A station in the Offshore Radio Telecommunications Service intended to be used while in motion or during halts at unspecified points.

Offshore private line service. A service whereby facilities for communications between an offshore subscriber station and an offshore central station are set aside for exclusive use or availability for use by a particular customer or group of customers and authorized users during stated periods of time.

Offshore radio telecommunications service. A public communications service for hire between stations located in the offshore coastal waters of the United States or its possessions.

Offshore repeater station. A fixed station used for the reception and automatic retransmission of the signals of another station or stations in offshore radio telecommunications service.

Offshore subscriber station. A fixed, temporary fixed or mobile station in the Offshore Radio Telecommunications

V 41 N 156 AUG 11 76 UMI

Service used by a subscriber for communication with an offshore central station.

• • • • •

Temporary fixed offshore subscriber station. A station in the Offshore Radio Telecommunications Service which operates from various fixed locations for periods not exceeding six months.

§ 21.9 [Amended]

4. In § 21.9 the headnote is amended to read as follows:

21.9 Standard application forms for Domestic Public Land Mobile Radio, Rural Radio and Offshore Radio Telecommunications Services.

• • • • •

5. Section 21.15 is amended to add new paragraph (1) as follows:

§ 21.15 Technical content of applications.

• • • • •

(1) Each application for construction permit for an offshore central station or a fixed subscriber station in the Offshore Radio Telecommunications Service which proposes a new station or changes in the frequency, operating power or antenna height of a station already authorized shall be accompanied by technical engineering information with respect to:

(1) Type of antenna polarization used.

(2) Type of antenna used, including type number and manufacturer thereof.

(3) Antenna power gain expressed in decibels.

(4) Antenna radiation pattern (on letter size polar coordinate paper) showing the antenna power gain distribution in the horizontal plane expressed in decibels.

(5) Orientation of directional antenna array, expressed in degrees of azimuth with respect to True North.

(6) Antenna height above mean sea level.

(7) Antenna transmission line type, length and radio frequency power transmission losses, together with a description and power loss of all other devices in addition to the transmission line, between the output of the transmitter and the antenna radiating system expressed in decibels.

(8) Suitable maps or charts showing thereon the exact station location.

(9) Effective radiated power.

6. Section 21.43(b) is amended to read as follows:

§ 21.43 Period of construction.

• • • • •

(b) For stations in the Point-to-Point Microwave Radio and Offshore Radio Telecommunication Services, and except as may be limited by § 21.45(b), the construction permit issued by the Commission will specify the date of grant as the earliest date of commencement of construction and a maximum of 18 months thereafter as the time within which construction shall be completed and the station be ready for operation, unless otherwise determined by the Commission upon proper showing in any particular use.

7. Section 21.45, pararaph (a) is amended to read as follows:

§ 21.45 License period.

(a) Licenses for stations in the Domestic Public Land Mobile Radio, Rural Radio, Point-to-Point Microwave Radio, Local Television Transmission, Multipoint Distribution and Offshore Radio Telecommunications Services will be issued for a period not to exceed 5 years; in the case of common carrier Television STL and Television Pickup stations to which are assigned frequencies allocated to the broadcast services, the authorization to use such frequencies shall, in any event, terminate simultaneously with the expiration of the authorization for the broadcast station to which such service is rendered except that licenses for developmental stations will be issued for a period not to exceed one year. Unless otherwise specified by the Commission, the expiration of regular licenses shall be on the following date in the year of expiration:

Domestic public land mobile radio service (miscellaneous carriers).	Apr. 1.
Domestic public land mobile radio service (telephone carriers).	July 1.
Domestic public land mobile radio service (all authorization pursuant to section 21.521—air and ground).	Sept. 1.
Rural radio service	Nov. 1.
Point-to-point microwave radio service.	Feb. 1.
Local television transmission service.	Do.
Multipoint distribution service.	May 1.
Offshore radio telecommunications service.	Aug. 1.

The expiration date of developmental licenses shall be one year from the date of the grant thereof. When a license is granted subsequent to the last renewal date of the class of license involved, the license shall be issued only for the unexpired period of the current license term of such class; *Provided however*, That the license for land and airborne mobile units issued in the Domestic Public Land Mobile Radio Service in the name of the person who is not the licensee of the base station with which the mobile unit will be associated shall be issued for a full five-year term from the date of grant thereof.

• • • • •

8. Section 21.108(a) and (b) is amended to read as follows:

§ 21.108 Directional antennas.

(a) Unless otherwise authorized upon specific request by the applicant, each station authorized under the rules of this part, other than base, mobile and auxiliary test stations operating in the Domestic Public Land Mobile Service and all classes of stations in the Offshore Radio Telecommunications Service, shall employ a directional antenna adjusted with the center of the major lobe of radiation in the horizontal plane directed toward the receiving station with which it communicates: *Provided, however*, Where a station communicates with more than one point, a multi- or omni-directional antenna may be authorized if necessary. New periscope antenna systems will not, under ordinary circumstances, be authorized.

(b) Stations operating below 2500 MHz (other than base mobile and auxiliary test stations in the Domestic Public Land Mobile Radio Service, stations in the Multipoint Distribution Service and all classes of stations in the Offshore Radio Telecommunications Service) which are required to use directional antennas shall employ antennas meeting the standards indicated below. (Maximum beamwidth is for the major lobe of radiation at the half power points. Suppression is the minimum attenuation required for any secondary lobe signal and is referenced to the maximum signal in the main lobe).

Frequency range	Maximum beamwidth (degrees)	Suppression
Below 512 MHz	80	10 dB
512 to 1000 MHz	20	13 dB
1500 to 2500 MHz	12	13 dB

• • • • •

9. Sections 21.110(a), (b) and (c) are amended to read as follows:

§ 21.110 Antenna polarization.

(a) Stations operating in the 72–76 MHz band, each base, mobile dispatch and auxiliary test station operating in the Domestic Public Land Mobile Radio Service and all classes of stations in the Offshore Radio Telecommunications Service shall employ an antenna which radiates a signal, the electrical component of which is vertically polarized.

(b) Unless otherwise authorized, each station operating on frequency below 512 MHz (other than base, mobile, dispatch, and auxiliary test stations in the Domestic, all classes of stations in the Offshore Radio Telecommunications Service, and stations operating in the 72–76 MHz band) shall employ an antenna which radiates a signal, the electrical component of which is horizontally polarized: *Provided, however*, That rural subscriber stations communicating with base stations may employ vertical polarization.

(c) Upon a satisfactory showing in each case that improved transmission will result and potentially harmful interference to other radio installations would be reduced, the Commission may authorize a station operating on frequencies below 512 MHz (other than base, mobile and auxiliary test stations in the Domestic Public Land Mobile Radio Service, all class of stations in the Offshore Radio Telecommunications Service, and stations in the 72–76 MHz band) to employ an antenna which radiates a signal, the electrical component of which is circularly or otherwise polarized.

• • • • •

10. Section 21.213 is amended by adding new paragraph (b) (4) as follows:

§ 21.213 Station identification.

• • • • •

(b) • • •

• • • • •

(4) A subscriber station in the Offshore Radio Telecommunications Service may identify itself by the special station designation assigned by the licensee or its assigned telephone number, provided adequate records are maintained by the licensee to permit ready identification of the subscriber station.

• • • • •

11. A new subpart L is added to read as follows:

Subpart L—Offshore Radio Telecommunications Service

Sec.

21.1000 Eligibility.
21.1001 Frequencies.
21.1002 Power limitations.
21.1003 Bandwidth and emission limitations.
21.1004 Modulation requirements.
21.1005 Permissible communication.
21.1006 Station at temporary locations.
21.1007 Modification of station operation at temporary locations.

Subpart L—Offshore Radio Telecommunications Service

§ 21.1000 Eligibility.

Authorizations for stations to be operated in this service will be issued to existing and proposed communications common carriers. Authorizations for subscriber stations will be issued to communication common carriers or to individual users of the service. Applications will be granted only in cases where it is shown that (a) the applicant is legally, financially, technically and otherwise qualified to render the proposed service and (b) there are frequencies available to enable applicant to render a satisfactory service and (c) the public interest, convenience or necessity would be served by a grant thereof.

§ 21.1001 Frequencies.

(a) On a shared basis with television broadcasting channel 17, the following frequencies are for assignment to stations of communication common carriers in the zone specified in Table A below together with the classes of station(s) to which they are normally assigned and the specific limitations, which are enumerated in paragraph (b) of this section:

Offshore central station frequencies (megahertz)	Offshore subscriber frequencies (megahertz)	Limitations
488.025	491.025	1
488.050	491.050	1
488.075	491.075	1
488.100	491.100	1
488.125	491.125	1
488.150	491.150	1
488.175	491.175	1
488.200	491.200	1
488.225	491.225	1
488.250	491.250	1
488.275	491.275	1
488.300	491.300	1
488.325	491.325	1
488.350	491.350	1
488.375	491.375	1
488.400	491.400	1
488.425	491.425	1,2
488.450	491.450	1,2
488.475	491.475	1,2
488.500	491.500	1,2
488.525	491.525	1,2
488.550	491.550	1,2
488.575	491.575	1,2
488.600	491.600	1,2
488.625	491.625	1,2
488.650	491.650	1,2
488.675	491.675	1,2
488.700	491.700	1,2
488.725	491.725	4
488.750	491.750	4

(b) Explanation of assignment limitations appearing in the frequency list of this section:

(1) These frequencies will be assigned for voice grade general communications.

(2) These frequencies may be assigned for private line service.

(3) These frequencies are available for emergency communication involving protecting of life property.

(4) These frequencies may be assigned to radio relay stations upon a satisfactory showing as to why it is impracticable to achieve the requisite communication without the use of radio relay stations operating on such frequencies.

(5) These frequencies shall be used only for emergency auto alarm and voice transmission pertaining to emergency conditions.

(6) These frequencies may be used for emergency shut-off remote control telemetry, environmental Data Acquisition and Dissemination, or facsimile transmissions.

(c) All frequencies listed in this section are subject to the following conditions:

(1) No fixed or temporary-fixed stations shall be located and no mobile stations shall be operated outside the limits of the zone specified in Table A.

(2) All classes of stations in the Offshore Radio Telecommunications Service shall afford protection to co-channel television stations in accordance with the values set out in Table B below.

(3) All classes of stations in the Offshore Radio Telecommunications Service shall afford protection to adjacent channel television stations in accordance with the values set out in Table C below.

(4) No airborne subscriber station shall be operated with an effective radiated power in excess of 1 watt or at heights in excess of 1000 feet above mean sea level and shall not be operated outside the limits of the zone specified in Table A. Further, to provide adjacent channel protection to TV channel 18, no airborne subscriber station shall operate within an 80 mile radial distance to Lake Charles, Louisiana.

(5) Antenna heights in excess of 200 feet above mean sea level will not be authorized, except that, surface mobile stations will be limited to a height of 30 feet above the waterline.

(6) Mobile stations shall not operate with effective radiated power in excess of 25 watts within 20 miles of the 3 mile limit. In all other areas, the effective radiated power shall not exceed 100 watts.

(7) On its regularly assigned frequency, an offshore central station may be used to perform the added functions of a repeater station when means are provided whereby the license of the radio system is able to turn the station on and off at will irrespective of the transmissions of subscriber units on the mobile frequency associated therewith.

TABLE A.—*Frequency availability for offshore radio telecommunications service use*

Offshore zone	Boundaries of zone	Frequencies (megahertz)
Southern Louisiana Zone.	From long. 87°45′ on the east to long. 94°00′ on the west and from the 3-in limit along the Gulf of Mexico shoreline on the north to the limit of the Outer Continental Shelf on the south.	Channel 17, 488–490, 491–493.

TABLE C.—*Protection of adjacent channel television stations by stations in the offshore radio telecommunications service* [1]

[0 db protection]

Distance beyond the 3-mi limit	Antenna height above sea level

21	1,000	1,000

[1] Table C applies only within an 80-mi radial distance of adjacent TV stations.

V 41 N 156 AUG 11 76 UMI

§ 21.1002 Power limitations.

Stations in this service will not be permitted to exceed 1000 watts effective radiated power and shall not be authorized to use transmitters which have a rated power output in excess of the limits set forth in Section 21.107(b): *Provided, however,* That the effective radiated power of mobile stations operating within 20 miles of the 3 mile limit shall be 25 watts or less. In all other areas mobile stations may operate with effective radiated power of 100 watts. The effective radiated power of airborne stations is limited to 1 watt.

§ 21.1003 Bandwidth and emission limitations.

(a) Stations in this service normally will be authorized to use only type F3 emission for radiotelephony. The authorization to use type F3 emission will be construed include the use of tone signals or signaling devices the sole function of which is to establish and maintain communication.

TABLE B.—*Protection of co-channel television stations by stations in the offshore radio telecommunications service—maximum effective radiated power (watts)*

[65 dB protection]

Distance from transmitter to TV channel 17, Bude, Miss.	Antenna height above sea level		
	100 ft	150 ft	200 ft
Miles	*Watts*	*Watts*	*Watts*
210	1,000	1,000	1,000
205	1,000	900	800
200	800	710	630
195	590	520	450
190	450	400	330
185	320	280	240
180	250	210	175
175	175	150	130
170	130	110	100
165	95	80	70
160	65	55	50
155	50	40	35
150	35	30	25

NOTE: To determine the maximum permissible effective radiated power:

(1) Using the method specified in § 73.611, determine the distance between the proposed station and the protected cochannel television station. If the exact mileage does not appear in Table B, the next lower mileage separation figure is to be used.

(2) Entering the table at the mileage figure found in (1) above find opposite, a selection of powers that may be used for antenna height for the proposed station does not appear in Table B, use the power figure above the next greater antenna height.

(3) If the power found to be permitted following this procedure is lower than that determined hereafter from Table C, this lower figure is the maximum power that may be employed at the proposed station.

(b) Other types of emission may be authorized upon a satisfactory showing of need therefor. An application requesting such authorization shall fully describe the emission desired, shall indicate the bandwidth required for satisfactory communication, and shall state the purpose for which such emission is required.

(c) The maximum authorized bandwidth of emission and maximum authorized frequency deviation shall be as follows:

Type of emission	Authorized bandwidth (kilohertz)	Frequency deviation (kilohertz)
F3	20	5

(d) Other types of emission of bandwidths in excess of that specified in paragraph (c) of this section may be authorized upon an adequate showing of need therefor. An application requesting such authorization shall fully describe the modulation, emission and bandwidth desired, shall specify the bandwidth to be occupied and shall state the reasons why such emission or bandwidth is required.

§ 21.1004 Modulation requirements.

(a) The use of modulating frequencies higher than 3000 hertz for single channel radiotelephony or tone signaling is not authorized.

(b) The frequency deviation arising from modulation shall not exceed 5 kHz.

(c) Each transmitter, which has more than 1 watt power output employing type F3 emission shall be equipped with a device which will automatically prevent greater than normal audio level from modulating in excess of the limits specified in paragraph (b) of this section.

(d) Each transmitter, which employs type F3 emission, shall be equipped with a modulation limiter in accordance with the provisions of paragraph (c) of this section and also shall be equipped with a low pass audio filter installed between the modulation limiter and the modulated stage. At audio frequencies between 3 kHz and 20 kHz the filter shall have an attenuation greater than the antenuation at 1 kHz by at least:

$$60 \text{ Log}_{10} (f/3) \text{ decibels,}$$

Where "f" is the audio frequency in kilohertz. At audio frequencies above 20 kHz, the attenuation shall be at least 50 decibels greater than the attenuation at 1 kHz.

§ 21.1005 Permissible communications.

(a) Offshore Central Station shall communicate only with subscriber stations (fixed, temporary-fixed, mobile and airborne).

(b) Subscriber station normally are authorized to communicate with and through Offshore Central.

(c) The foregoing paragraphs of this section shall not be construed to prohibit stations in this service from communicating through radio relay stations authorized pursuant to the provisions of § 21.1001(b).

§ 21.1006 Station at temporary-fixed locations.

Authorizations may be issued upon proper application for the use of frequencies listed in § 21.1001(a) by stations in the Offshore Telecommunications Service for rendition of temporary service to subscribers under the following conditions:

(a) When a fixed station is to remain at a single location for less than 6 months and the location is considered to be temporary.

(b) When a fixed station, authorized to operate at temporary locations, is to remain at a single location for more than six months, applications (FCC Forms 401 and 403) for a station authorization designating that single location as a permanent location shall be filed at least thirty days prior to the expiration of the six-month period.

(c) The station shall be used only for rendition of communication service at points where regular facilities are not available or for restoration of communication service disrupted by storms or other emergencies.

(d) The antenna structure height employed at any location shall not exceed the criteria set forth in § 17.7 of this chapter unless, in each instance, authorization for use of a specific maximum antenna structure height has been obtained from the Commission prior to erection of the antenna. Request for such authorization shall be accompanied by FCC Form 714 and a sketch of the proposed antenna structure.

(e) Applications for authorizations to operate stations at temporary locations under the provisions of this Section shall be made upon FCC Form 401, and may be accompanied by completed 403 for simultaneous consideration provided the equipment to be used is of packaged design. Blanket applications may be submitted for the required number of transmitters.

§ 21.1007 Notification of station operation at temporary locations.

(a) The licensee of stations which are authorized pursuant to the provisions of § 21.1006 shall notify the Commission, its Engineer in Charge of the radio district wherein operation is to be conducted, of each period of operation at least two days prior to installation of the facilities. This notification shall include:

(1) The call sign and specific location of the transmitter.

(2) The location of the transmitter control point.

(3) The identity and location of the station with which it will communicate.

(4) The exact frequency or frequencies to be used.

(5) The commencement and anticipated termination dates of operation from each location. In the event the actual termination date differs from the previous notification, written notice thereof promptly shall be given to the Commission and its Engineer in Charge.

(b) Less than 2 days advance notice may be given when circumstances require shorter notice provided such notice is promptly given and the reasons in support of such notice are stated.

(c) A copy of the foregoing notification shall be posted with the station license (see § 21.114).

PART 91—INDUSTRIAL RADIO SERVICES

1. Section 91.115 is added to read as follows:

§ 91.115 Special provisions governing use of frequencies in the 488–494 MHz band (TV Channel 17) in the Southern Louisiana Offshore Zone.

The following special criteria shall govern the authorization and use of frequencies in the 488–494 MHz band within the Southern Louisiana Offshore Zone.

(a) The frequency bands from 490–491 and 493–494 MHz will be available for assignment to stations governed by this part within the Southern Louisiana Offshore Zone. The boundaries of the Southern Louisiana Offshore Zone are from longitude 87°45′ on the east to longitude 94°00′ on the west, and from the three mile limit along the Gulf of Mexico shoreline on the north to the limit of the outer continental shelf on the south. These frequencies may also be assigned to fixed stations located on shore designed to provide communications service within the zone.

(b) Offshore Base/Mobile, and offshore and shore fixed stations may be authorized.

(c) F2, F3, F4, F9, and A2, A3, A4, A9 emissions may be authorized.

(d) Offshore stations shall afford cochannel protection to TV Channel 17, Bude, Mississippi. Station operating parameters shall be in accordance with the values given in Table I.

TABLE I.—*Protection of co-channel television stations by offshore stations operating in the Southern Louisiana Zone—maximum effective radiated power (watts)*

[65 dB protection]

Distance from transmitter to TV channe 17, Bude, Miss.	Antenna height above sea level		
	100 ft	150 ft	200 ft
Miles	*Watts*	*Watts*	*Watts*
210	1,000	1,000	1,000
205	1,000	900	800
200	800	710	630
195	590	520	450
190	450	400	330
185	320	280	240
180	250	210	175
175	175	150	130
170	130	110	100
165	95	80	70
160	65	55	50
155	50	40	35
150	35	30	25

NOTE: To determine the maximum permissible effective radiated power:

(1) As specified in § 73.611 determine the distance between the proposed station and Channel 17, Bude, Miss. If the exact mileage does not appear in Table 1, the next lower milage separation is to be used.

(2) Opposite this milage figure ERPs are given that may be used for antenna heights of 100, 150 or 200 feet ASL. If the exact antenna height is not shown, the ERP allowed will be that shown for the next higher antenna height.

(e) Shore stations communicating point-to-point with offshore stations will be permitted at least the same ERP as the offshore station, but only in the direction of the offshore station. A directional antenna shall be used and the rearward radiated power from the antenna in a sector ±22½° from the line joining the shore antenna to Bude, Miss. shall not exceed those shown in Table 2.

TABLE 2.—*Maximum rearward effective radiated power allowed for shore stations in the Southern Louisiana Zone*

[Rearward effective radiated power from shore antenna in a sector ±22½° from the line joining the shore antenna to Bude, Miss.]

Distance from transmitter to TV channel 17 Bude, Miss.	Antenna height above ground					
	100 ft	150 ft	200 ft	300 ft	500 ft	750 ft
Miles	*Watts*	*Watts*	*Watts*	*Watts*	*Watts*	*Watts*
185	320	280	240	190	125	90
180	250	210	175	135	100	60
175	175	150	130	100	70	50
170	130	110	100	75	40	35
165	95	82	70	50	35	25
160	65	55	50	40	25	20
155	50	40	35	30	20	15
150	35	30	25	20	15	10
145	25	20	18	15	10	7
140	18	15	13	10	7	5
135	13	10	9	7	5	3
130	10	8	6	5	3	2
125	7	6	5	4	3	2
120	5	4	3	3	2	1

NOTE: As an example of the use of Tables 1 and 2, assume an offshore station located 180 miles from Bude, Miss. with an antenna height of 100 feet. Table 1 allows this station to operate with 250 watts ERP. Now assume the shore station communicating with the offshore station is 30 miles from the offshore station and 150 miles from Bude, Miss. The shore station antenna height is 500 feet above ground. The shore station will be allowed the same ERP as the offshore station (250 watts) in the direction of the offshore station. Table 2 indicates that the effective radiated power in a sector ±22½° from the line joining the shore antenna to Bude, Miss. can only be 15 watts. Consequently, a directional antenna must be used whose minimum front-to-back ratio over this 45° sector must be at least 12.2 dB. (250 watts forward power to 15 watts rearward power is a power ratio of 16.6 or 12.2 dB.)

(f) To provide co-channel protection to TV Channel 17, no shore station will be allowed closer than 120 miles from Bude, Miss., coordinates 31°22′19″ N and 90°45′05″ W.

(g) To provide adjacent channel protection to TV Channel 18 in Lake Charles, Louisiana, no shore or offshore stations shall be allowed within an 80 mile distance of Lake Charles, Louisiana, whose coordinates are 30°13′45″ N and 93°12′52″ W.

(h) Surface mobile stations shall not operate with an effective radiated power in excess of 25 watts within 20 miles of the three mile limit. In all other areas, the effective radiated power shall not exceed 100 watts with 30 foot maximum antenna height.

(i) No airborne station shall be operated with an effective radiated power in excess of 1 watt or at heights in excess of 1000 feet above mean sea level and shall not be operated outside the limits of the zone specified in Table A. However, to provide adjacent channel protection to TV channel 18, no airborne subscriber station shall operate within an 80 mile radial distance of Lake Charles, Louisiana.

(j) The following frequencies are available for assignment in all services for use in the Southern Louisiana Zone as defined in paragraph (a) of this section.

PAIRED FREQUENCIES (MEGAHERTZ)

Transmit (or receive)	*Receive (or transmit)*
490.025 to 490.975	493.025 to 493.975.

Only the first and last assignable frequencies are shown. Frequencies shall be assigned in pairs with 3 MHz spacing between transmit and receive frequencies. Assignable frequency pairs shall occur in increments of 25 kHz.

(k) Fixed stations operating point-to-point shall be assigned frequencies beginning with 490.025/493.025 MHz and progressing upwards utilizing available frequencies towards the end of the band. Offshore base/mobile stations shall be assigned frequencies beginning at 490.975/493.975 MHz and progressing downwards utilizing available frequencies towards the beginning of the band. All frequency assignments are subject to the conditions specified in § 91.8.

(l) Bandwidths other than 25 kHz may be authorized upon an adequate showing of need. An application requesting such authorization shall fully describe the modulation, emission and bandwidth desired, the bandwidth to be occupied, and justification for the request.

[FR Doc.76-23199 Filed 8-10-76;8:45 am]

[FCC 76-719; Docket No. 19905]

DOMESTIC PUBLIC RADIO SERVICES

Application Policies and Procedures, Etc.

In the matter of amendment of Parts 1 and 21 of the Commission's rules and regulations applicable to the Domestic Public Radio Services (other than Maritime Mobile).

V 41 I 156 AUG 11 76 UMI

1. This proceeding was initiated by issuance of a *Notice of Proposed Rulemaking*, 44 F.C.C. 2d 556, 39 FR 1064 (January 4, 1974), for the purpose of clarifying and modifying various procedural rules in Parts 1 and 21 of the Commission's Rules and Regulations. The more important of the proposed changes related to the common carrier radio consolidation or "cut-off" rule, the redefinition of major amendments, and the establishment of new procedures for the legal processing of common carrier radio applications, both microwave and mobile.

2. In manner of background, this proceeding is intended to be the first of a series of rulemakings to "re-regulate" common carrier radio services in order to expedite the processing of applications and to remove obsolete substantive requirements. With this general objective, the Commission released another Notice of Proposed Rulemaking in Docket No. 20490, 55 F.C.C. 2d 36 (1975), intended to implement the use of new application forms and procedures to clarify application requirements, and to lay the basis for automatic data processing of common carrier radio applications.[1] Although they are obviously interrelated (particularly with regard to the definition of major amendments), both of these proceedings focus upon different functional steps involved in the processing of applications.

3. Comments were filed February 21, 1974, by fifteen parties: Aircall New York Corporation (Aircall), and it subsidiaries, Page Boy Inc. and Mobile Radio Message Service, Inc.; Airsignal International, Inc. (Airsignal) and its subsidiaries, Mobile Radio Telephone Service, Inc., Airsignal of California, Inc., Airsignal International of Pittsburgh, Pennsylvania, Inc., Airsignal International of Philadelphia, Inc., and WUI/TAS of Las Vegas, Nevada, Inc.; American Telephone and Telegraph Company (AT&T); American Satellite Corporation; Peter A. Bakal (Bakal) filing individually and for Capital Telephone Company, Inc.; Digital Paging Systems, Inc. (Digital); Eastern Microwave, Inc. (Eastern); Mobilfone, Inc. (Mobilfone); GTE Service Corporation (GTE); Daryal A. Myse, Esquire (Myse); National Association of Radiotelephone Systems (NARS); Stambler & Shrinsky, P.C.; United Video, Inc. (United Video); Vegas Instant Page, Inc. (VIP); and Western Union Telegraph Company (WU). Reply comments were filed by Airsignal, NARS, United Video and VIP.

4. In general, the comments supported the proposed rules, but some questions were raised concerning the contents of public notices; the common carrier "cut-off" rule; the definition of major amendments; the determination of mutually exclusive status; exceptions to the "cut-off" rule; and our proposed comparative evaluation procedure. However, Myse opposed the proposed rules, contending in general that Section 309 of the Communications Act [47 U.S.C. § 309—hereinafter cited as the "Act"] clearly sets forth the only legal processing procedures which may be followed. Instead of defining major amendments, NARS suggested a new processing procedure which would severely limit the discretionary amendment process. These questions, and other issues believed to be of greater significance, are discussed below. In addition, we have considered numerous other suggestions and proposals involving matters of a less substantial nature, but rather than specifically discussing them here, we have modified the rules as considered appropriate.

Procedural Concepts

5. Our major amendment proposals generally involved two procedural requirements—the statutory public notice period and the administrative "cut-off" rule—whose relationship appears to be the cause of some confusion as evidenced in the comments. The concepts are related by the fact that the same definition of a major amendment requires issuance of a statutory public notice which, in turn, causes both the statutory thirty day public notice period and the application of our administrative "cut-off" rule. Although the common carrier radio rules have not clearly distinguished these requirements, they have different origins and purposes which should be briefly noted. The origin of the public notice period is Section 309(b) of the Act which declares that no application (including applications for modification of a construction permit) in the case of a station in the broadcasting or common carrier services shall be granted by the Commission earlier than thirty days following issuance of a public notice by the Commission of the acceptance for filing of such application or of any substantial amendment thereof. This provision is designed specifically to give interested parties a thirty day opportunity to learn of an application or substantial amendment and to file a petition to deny prior to a grant as provided for by Section 309(d).[2] Exempted under Section 309(c) from the thirty day waiting period requirement are certain situations where the matters considered are of minor concern, and where the thirty day waiting period and the filing of a petition to deny would serve no useful purpose. Among these exceptions are "any minor amendment of an application" [§ 309(c)(1)] and any application for "a minor change in the facilities of an authorized station." [§ 309(c)(2)(A)]. Rather than precisely define these exceptions, Congress authorized the Commission under Section 309(g) "to adopt reasonable classifications of applications and amendments in order to effectuate the purposes of this section."

6. In contrast, the three branches of what is commonly called our "cut-off" rule originated in our need for an orderly administrative procedure to control the disposition of our caseload. See 47 U.S.C. § 154(j). First, to provide early consolidation of competing applications and to prevent processing disruption by late filings, we require an application for a frequency, previously applied for, to be filed within a certain date. Applications for Common Carrier Facilities, 13 F.C.C. 2d 415 (1958); see, *Ranger et. al.* (*Radio Cabrillo*) v. *F.C.C.*, 294 F. 2d 240 (D.C. Cir. 1961). Competing applications filed after this date are considered to be "cut-off" from comparative consideration. Secondly, to afford ample opportunity to file objections prior to a grant, and yet prevent the processing interruption caused by a late filed petition, we require petitions to deny to be filed within thirty days of the announcement of acceptance for filing of an application or substantial amendment thereto. 47 U.S.C. § 309(d)(1). Finally, we consider an application which is amended by a major amendment to be so changed as to be the equivalent of a newly filed application. Such an amended application is "cut-off" from immediate processing in order to avoid prejudicial surprise to other parties, to allow consideration of competing applications, to discourage the continual reprocessing of substantially changed applications, and to otherwise prevent unnecessary disruption of our processing. Applications for Common Carrier Facilities, supra.[3] In particular, we should note in this regard that the statutory requirement of a public notice for substantial amendments prevents processing of an application for at least thirty days in order to permit an opportunity for protests which themselves may further delay a grant or designation.[4] See, e.g., Western Union Telegraph Co., 25 Pike & Fischer Rad. Regs. 271, 276 (Adm. L. J. 1963).

Contents of Public Notices

7. These distinctions should be first borne in mind when considering the contents of public notices. AT&T and WU wished all amendments, particularly those associated with the technical parameters of a major amendment, to appear on public notice to allow updating of their data bases and the checking of prior service claims and frequency coordination requests. Minor amendments, they suggest, should be exempted from the thirty day public notice period. In our judgment, this suggestion appears to confuse changes which might affect frequency coordination with substantial changes which require a statutory public notice. Regardless of possible statutory classification of a change, a point-to-point microwave applicant is required under § 21.100(d) of our rules to coordinate prior to filing any change which could reasonably have an adverse impact on another user. If the problem cannot be resolved, and the objecting carrier deems the matter to be of sufficient importance, it may, of course, file a petition to deny or an informal objection. See, Report and Order in Docket No. 18920, 29 F.C.C. 2d 870, 930–31 (1971). In contrast, the Act requires public notice only of the acceptance for filing of a "substantial amendment", the definitions of which are the subject of this rulemaking. Consequently, we do not think that the public notice requirement of the Act requires us to anticipate all conceivable arguments or objections and then to undertake the substantial administrative burden of publishing the complete technical details contained in an application and any change thereto. We do recognize, however, the desirability of making more readily available to the public all of the technical parameters of proposals in the microwave services. Consequently, we are pursuing this goal in connection with the implementation of new automatic data processing procedures.

[1] Among other things, the First Report and Order in Docket No. 20490, 55 F.C.C. 2d 774 (1975), revised Section 21.20 ("Defective applications"). Although this rule was originally proposed in Docket No. 19905, the Commission decided subsequently that it should include more specific examples of common patent defects and be subject to further comment in Docket No. 20490.

[2] H.R. REP. No. 1800, 86th Cong., 2d Sess. 11 (1960); see, S. REP. No. 690, 86th Cong., 1st Sess. 2–5 (1959).

[3] This procedural treatment of substantially amended applications originated in Rule 55 of the Federal Radio Commission (1931).

[4] For similar reasons we are clarifying our definitions of substantial amendments to include those amendments which would convert a proposal into a "major action" under § 1.1305. See, Report and Order in Docket No. 19555, 49 F.C.C. 2d 1313 (1974).

The Common Carrier Radio "Cut-Off" Rule

8. One of the aims of this proceeding was to clarify the common carrier radio consolidation or "cut-off" rule for mutually exclusive applications. None of the comments objected to the basic approach of our proposals. Accordingly, we are revising the consolidation or "cut-off" rule in a new § 21.31 only to clarify the four requirements for an application seeking comparative consideration. These requirements are, first, that the application must be factually mutually exclusive as defined in § 21.31(a). Secondly, the application must be in a condition acceptable for filing, a revised requirement which we believe is, in light of case interpretation and past policy, less ambiguous than the present requirement of "substantial completeness." The present terminology has caused some processing confusion because it has been construed as establishing different standards for defective applications such that it is possible for a "skeleton" application to be otherwise unacceptable for filing and yet be "substantially complete" enough to be entitled to comparative consideration with a competing application.[5] In this regard, § 21.20 ("Defective applications") has been revised in Docket No. 20490 to clarify the necessity of substantial compliance with the Commission's Rules. First Report and Order in Docket No. 20490 55 F.C.C. 2d 744 (1975). Thirdly, the application must be in an acceptable condition as of the so called "cut-off" date. The present §§ 1.227(b)(3) and 21.30(b) imply that an application must be in acceptable condition when it is tendered.[6] We are eliminating this ambiguity. Finally, the application must be filed as of the consolidation "cut-off" date. As before, this requirement in § 21.30(b) is worded in the alternative—sixty days, or the day before final action is taken on the first filed application, whichever date comes first. We are clarifying this requirement, however, to stress that the sixty day period is no guarantee of comparative consideration to potential competitors.[7] The sixty day filing period is a conditional right because we will not delay the grant of an application beyond its statutory public notice period, if it is ready for action, in order to anticipate the possible filing of a competing application.

Definition of Major Amendments

9. We proposed to revise substantially the definition of "major amendments" to specify common examples in each radio service and to equate more clearly the term "major amendment" as used in our Rules with the term "substantial amendment" as used in section 309(b) of the Act. By allowing reference to the public notice philosophy of section 309, we suggested that this clarification would permit a policy test flexible enough to meet unanticipated factual situations caused by changing technology, yet firm enough to offer guidance and to avoid needless interlocutory conflicts on the classification of amendments. All of the comments appeared to endorse this general approach. However, NARS suggested an alternative procedure, numerous parties suggested alternative definitions of major amendments, and most desired an exception to the "cut-off" rule for major amendments reflecting a substantial change in ownership of existing facilities.[8] In connection with amendment of mutually exclusive applications, NARS suggested that, rather than define major amendments, the Commission should designate applications for hearing immediately upon expiration of a thirty day grace period. This period would be the only time discretionary amendments would be permitted in the absence of a demonstration that the amendment was necessitated by events which could not have been reasonably foreseen or controlled. Although we recognize the problem this proposal is designed to eliminate, we believe that NARS's procedure would only complicate our applications backlog and impose a severe administrative burden. Consequently, we think that reform of our existing procedure, with the definitional changes and "cut-off" rule exceptions discussed below, is more appropriate at this time.

Engineering Major Amendments

10. Although not meant to anticipate all of the possible engineering changes which could be considered to require a statutory public notice, the Commission did propose for each radio service specific examples of common engineering changes which would be considered major amendments. With respect to the Point-to-Point Microwave Service, we will briefly discuss the following alternative suggestions:

(a) Although AT&T and WU recommended measuring 3 dB power increases in terms of effective radiated power, we have retained the transmitter output power measurement because it is capable of being easily ascertained. In contrast, effective radiated power must be calculated not only in terms of the transmitter output, but also to include line loss and comparative antenna gain characteristics at various angles from the main lobe.

(b) With respect to increases in bandwidth, AT&T suggested that all increases in authorized bandwidth be considered major. However, for the reasons outlined in paragraph 7 above we do not believe increases of less than 10 percent necessitates classification as major, except where such a change would exceed the maximum specified in the rules.

(c) Although we believe that our allowance of a ten second change in coordinates allows reasonable flexibility for small site changes, some carriers were concerned about such a change causing a major azimuth change over a short path. However, in such circumstances the change in azimuth will constitute, in itself, a major amendment even if the change in coordinates does not.

(d) AT&T notes that a change of two degrees in azimuth on standard high performance antennas operating in the frequency range of 4 to 11 GHz can result in a 15 to 25 dB change in gain. However, this change would be restricted to the horizontal arc segment located along the main beam only and would, therefore, not be as much of a problem as it would otherwise appear. Nonetheless, we have decided to tighten this requirement somewhat by applying a one degree criteria.

(e) AT&T also suggested inclusion of "any change or correction which increases the antenna height above ground level in excess of 20 feet" because such a change could result in a loss of path shielding and increase interference possibilities. This appears to be a reasonable request and therefore we are adopting this suggestion.

11. To better meet the requirements of the Multipoint Distribution Service (MDS), we have created a separate subparagraph to define common MDS major engineering changes. Because of the close location of many MDS stations and the current lack of prior frequency coordination requirements, these examples re-

[5] *James River Broadcasting Co.* v. *FCC*, 399 F. 2d 581, 583 (D.C. Cir. 1968).

[6] Id.

[7] *Century Broadcasting Corp.* v. *FCC*, 310 F. 2d 864 (D. C. Cir. 1962); *see, Ridge Radio Corp.* v. *FCC*, 292 F. 2d 770, 773 (D. C. Cir. 1961).

[8] To avoid semantic confusion, most of the comments favored discontinuance of the term "major amendment" in favor of the statutory term "substantial amendment." While this suggestion has considerable merit, we have decided upon the continued use of the term "major amendment" because it is used elsewhere in our rules and will be more clearly equated by this rulemaking with its statutory equivalent.

V 41 1 156
AUG 11 76
UMI

flect a somewhat more restrictive policy than in point-to-point microwave. Digital urged us to consider a service contour standard for MDS based upon area and population. While this approach has considerable merit, we do not believe that this proceeding is an appropriate vehicle for its implementation. Consequently, we believe that easily calculated, straight forward engineering definitions are more appropriate at this time for this developing service.

12. Our proposed examples of common engineering major amendments in the mobile radio services were generally criticized as being incomplete, ambiguous and restrictive. At GTE's suggestion, we have incorporated rules to deal with changes in transmitting antenna heights and effective radiated power. We have also incorporated AT&T's proposal to permit changes in geographical coordinates of 5 seconds of latitude or longitude, or both. As recommended by NARS, we have deleted ambiguous or unnecessary proposals concerning a number of points of communication and operating characteristics of a station. NARS also suggested that engineering changes be considered substantial only if they should change the land area within the service contour by twenty percent or more, or they change by ten percent or more the population encompassed within the original contour. Upon reflection, we agree that our proposed examples of common engineering changes were somewhat ambiguous. But we do not think that a general proportion of area or population test is a better approach since it would involve possibly disputed measurements, difficult economic assumptions, and would not adequately inform the public of the identity of significant technical changes. As a compromise approach, we have chosen as proposed to specify common major engineering changes, but we have incorporated for some of them a general engineering test which should better define the intent of the rules. Under this approach, some changes—changes in the height or geographic coordinates of a transmitting antenna and increases in effective radiated power or locations served—which might enlarge a station's service contour will be considered to be prima facie major amendments. But to better guide applicants as to what is intended by an "increase in the reliable service contour" we are specifying a standard engineering test which applicants can use should they wish to assume the burden of demonstrating that a proposed change is actually of a minor nature. Taken together, this approach and these modified rules should meet the varied requests of the parties to this proceeding. They should significantly decrease unnecessary interlocutory conflicts concerning the classification of common carrier radio engineering amendments and allow applicants for base stations a degree of flexibility in amending their applications.

OWNERSHIP MAJOR AMENDMENTS

13. The Commission proposed to recognize more explicitly as a major amendment a substantial change in ownership or control of an applicant, or the substitution of one applicant for another. Except for those of Airsignal, the many comments engendered by this proposal appeared to agree in principle that ownership changes to applications for new stations were public notice events which should elicit the "cut-off" rule to discourage "trafficking" in applications. However, the comments also urged an exemption for ownership changes to applications to modify the facilities of existing stations, although they differed as to whether an application for new frequencies should fall within this category.[9] NARS argued that applications for new frequencies or other facility modifications should "run with" the acquisition of an existing station because the public was notified, and the buyer found qualified to be a licensee, incidental to Commission approval of the assignment or transfer application. Otherwise, NARS contends that the value of common carrier properties would be diminished because a buyer does not know in advance whether long pending applications for new frequencies or facility improvements may be protested or dismissed prior to consummation of an assignment or transfer. On the other hand, NARS claims that the acquisition of an application for a new station which is not purchased incidental to the sale of an authorized station should be subject to public notice and the "cut-off" rule since a buyer could not claim that the public had had the opportunity to comment on his qualifications in connection with an assignment application, and the acquisition could result in "trafficking." Although basically agreeing with NARS, VIP distinguished an application for facility modification, which should run with an acquired station, from an application for an additional frequency which VIP considered to be equivalent to an application for a new station. However, Airsignal argued that ownership changes should not be major amendments because they bear no relationship to a determination of mutual exclusivity, restrict the business options of a licensee to assign his stations, and discourage new entrants who could be deprived of long pending guard band applications.

14. We believe that these comments on substantial ownership changes to pending applications should be evaluated in light of our administrative policy towards an unintended side effect of our common carrier "cut-off" rule which appears to have encouraged processing delays. Under this rule, a radio application is protected from the filing of a mutually exclusive application after sixty days from the date of the public notice listing it (or the first application with which it is in conflict) as acceptable for filing.[10] Since this precludes another applicant from filing for the frequency after that date, the only way he could claim the frequency would be to acquire the protected application. The longer such an application remains pending, the more valuable it becomes as other carriers discover a need for additional spectrum through normal business growth. Since delay is potentially rewarded, this situation appears to contribute to the backlog by encouraging the filing of: "skeleton" applications meeting only the minimal requirements for acceptance; unnecessary applications intended to "warehouse" frequencies; and numerous amendments or petitions as strategic devices to delay final action. Although we have attempted to police our procedures, the problem has been exacerbated by the lack of explicit common carrier radio rules, comparable to Rule § 1.525, to deal with "strike" applications or unreasonable agreements to amend or dismiss applications or pleadings. Nevertheless, we are also mindful that a broad prohibition against settlements or ownership changes to pending applications would not be in the public interest since it could prevent a common carrier applicant from resolving unnecessary disputes, from strengthening his financial position, or from acquiring facility improvement applications incidental to the purchase of an existing station.

15. Accordingly, we have sought by a compromise approach to weigh our statutory duty to inform the public and to protect our administrative process, against an obvious public interest in permitting applicants reasonable business flexibility to offer the rendition of the best public service. First, we reaffirm our opinion that a substantial change in the ownership or control of an applicant (other than in the case of a pro forma change), or the substitution of one applicant for another, is an event which changes the identity of the applicant and requires a statutory public notice and a thirty day opportunity for public comment. Furthermore, we believe that the definition of such a change should be by reference to Section 310(d) of the Act since this will allow reference to considerable case law on the subject and will avoid restrictive rule language which could not possibly anticipate all variations of ownership or control changes.

[9] NARS and Stambler & Shrinsky recommended old § 1.571(j)(2) as the definition of substantial ownership changes. This section has been recently revised in a manner similar to our proposal in this proceeding. See, Report and Order in Docket No. 20205, 53 F.C.C. 2d 1089 (1975).

[10] Compare § 21.30(b) with §§ 1.564(c), 1.571(c), and 1.227(b)(1). In contrast, the broadcast "cut-off" date under § 1.227(b) is generally the close of business on the day preceding that date (not less than thirty days after publication) designated by a second public notice (§ 1.571(c)) as the date an application will be considered ready for processing. In the interim period between a public notice announcing acceptance for filing (§ 1.564(c)) and designation of a processing date, a broadcast application has relatively little value as a claim upon the frequency since a competing applicant can file his own application rather than acquire a previously filed application.

16. In this regard, however, we do not believe that a statutory public notice is required for the adoption of applications for minor changes to (or modifications of) facilities which are acquired incidental to the transfer or assignment of an authorized station. Since section 309(c)(2)(A) of the Act does not require a public notice of the acceptance of such applications, we think that the public is adequately informed by the notice listing the acceptance for filing of the authorized station's transfer or assignment application. What constitutes an appropriate application for modification of existing facilities will be determined by reference to the rules of the specific radio service involved. This recognition, however, does not mean that we agree with NARS that applications for new stations or frequencies which appeared initially on public notice should be transferable without public announcement. The grant of a transfer or assignment application should not be construed as a blanket finding that a buyer is necessarily qualified to construct and operate new stations since, as an obvious example, the management ability to operate an existing, profitable business may differ from the substantial capital and engineering needed to construct new stations. Moreover, to accept NARS' argument would be to invite petitions to deny transfer or assignment applications for reasons which may be relevant only to a single construction permit application for a new station.

17. Secondly, we have decided that this is an appropriate time to make more explicit our policy towards settlement agreements as well as the applicability of the "cut-off" rule to ownership amendments to applications for new stations. Although other public interest questions may be involved in such situations, we believe that our policy should be clearly understood as a general procedural rule to focus upon the reasonableness of any consideration promised or received since this would concern the common financial incentives to delay grants or to unreasonably profit from our administrative process. However, while the "cut-off" rule is generally applicable to any major amendment which disrupts processing for the statutory thirty day public notice period, we believe an administrative exception would be justified for appropriate ownership or control changes which tend to reflect changes in business or financial factors overlaying the technical proposal. Relative to these factors, an application's technical proposal due to its engineering nature must be a stable basis for the presentation of the business proposal. Major engineering changes modify the basis of the application and may result in further processing delays caused by, for example, new electrical conflicts. See, e.g., Western Union Telegraph Co., supra. An applicant's business or financial proposal, on the other hand, is based generally upon changing service demands and economic conditions. Since an applicant's reaction to these changes may substantially enhance his ability to render public utility service, we think that it is reasonable to make an exception to the "cut-off" rule for appropriate ownership or control amendments which reflect such changes. If protests should result from the statutory public notice of such amendments, they should be considered prior to grant or to designation for hearing of the amended application.

18. Therefore, to implement this compromise approach we are adopting the procedures outlined in a new § 21.29. In general, these procedures are those of proposed § 21.28(d) expanded to make plain our policy towards not only withdrawal agreements between mutually exclusive applicants, but also ownership amendments and agreements to amend, or to dismiss, applications or pleadings. Under this new procedure, these actions will be generally permitted if the agreement (or understanding) involved is found to be in the public interest, and the consideration promised or paid reimburses only those legitimate and prudent costs directly assignable to the engineering, preparation, filing and advocacy of the withdrawn, dismissed, or amended application, amendment, or pleading.[11] As we proposed, direct "in-house" costs will be permitted, but indirect or overhead costs would be excluded. Where they exceed one thousand dollars, allowable direct costs would have to be verified by an itemized accounting. Finally, in response to suggestions, we have included a ten day period to notify initially the Commission of agreements, and allowed thirty days for the filing of a joint request for approval of agreements.

19. Although broadly written, § 21.29 does contain notable exceptions to its applicability which require some comment. First, its provisions are not applicable to the unilateral actions of an applicant or party, i.e., those actions which are not the result of an explicit agreement or understanding with another applicant or party. Secondly, not all agreements are subject—only those which result in a substantial change in ownership or control, allow grant of a mutually exclusive application, or settle an alleged substantial and material question of fact which would normally necessitate a hearing. In particular, § 21.29 is not applicable to strictly engineering agreements (such as may occur under prior frequency coordination) which resolve frequency conflicts and do not involve any consideration beyond the mutual benefit resulting from a settlement of an electrical conflict. And finally, this section is intended to encourage settlements by clarifying our policy and procedure. As explicitly recognized in paragraph (e), the Commission believes that appropriate settlement of conflicts in common carrier radio services is decidedly in the public interest because it expedites rendition of often essential public communications service and avoids unnecessary legal expenses which may be ultimately borne by the carrier's subscribers. Accordingly, the purpose of this section is to make clear that we will not encourage financial incentives for "strike" application or pleadings, unreasonable "buy-outs" of competitors, or any other procedural actions by persons primarily intending to delay grants or to unreasonably profit from our administrative processes. In short, we believe that this approach will encourage settlements, discourage processing abuses, allow applicants reasonable business flexibility, and yet assure the public of an opportunity to comment on ownership changes as they specifically relate to individual applications for new stations.

MUTUALLY EXCLUSIVE STATUS

20. Both NARS and Myse objected to the ambiguity of our definition of mutually exclusive status. NARS recommended a definition which specified electrical mutual exclusivity, and Myse contended that, in cases of "fringe" electrical interference or economic impact, a substantial and material question of fact is presented which would require in first instance a hearing to determine whether the applications were mutually exclusive so to be entitled to a further comparative hearing. Although we recognize that harmful electrical interference must be determined on a case-by-case basis, we have codified as a rebuttable presumption present Commission policy as to what constitutes mutually exclusive status.[12] To clarify this matter further, we may initiate a series of rulemakings for each radio service in order to establish and distinguish "permissable" and "negotiable" levels of electrical interference from that "harmful" interference which results in actual mutual exclusivity. In the interim, this approach will speed up our processing by guiding applicants and petitioners in cases of so called "fringe" mutual exclusivity, as well as make more explicit our insistence upon good faith cooperation or prior coordination to maximize spectrum utilization and to avoid unnecessary electrical conflicts. See, *F.C.C. v. WJR, The Goodwill Station, Inc.*, 337 US 265 (1949).

21. Although it has been Commission policy for some time,[13] AT&T, GTE, Myse, NARS and United Video objected strongly to our proposal to recognize

[11] We wish to emphasize that the term "legitimate and prudent" are intended to include only those costs that are reasonable and necessary in the preparation and filing of an application. It is not intended to include market surveys or other analyses intended for management decision making purposes, unless such a product is required by the Commission in connection with the application.

[12] Alleged "economic" mutual exclusivity will continue to be dealt with on a case to case basis or by rulemaking. See, Notice of Proposed Rulemaking in Docket No. 20870, FCC76-646 (July 7, 1976); Collier Electric Co., 14 Pike & Fischer Rad. Regs. 848 (1956). Also, we have recognized that mutual exclusivity can result from other practical situations, such as unnecessarily duplicative service to the same customers. Such situations will continue to be judged on a case by case basis as in the past.

[13] Applications for Common Carrier Facilities, 13 F.C.C. 2d 415, 416 (1968).

V 41 N 156 AUG 11 76 UMI

more explicitly the applicability of the "cut-off" rule to applications which are "chain-reaction" mutually exclusive. In addition to equitable considerations, AT&T and GTE argued that this rule would prevent consideration of two proposals which, in combination, may be superior to a third proposal with which they were mutually exclusive. Although this argument has some merit, it implies an indefinite "chain reaction" which could create the serious procedural problems our rule was designed to prevent. See, *Ranger et al. (Radio Cabrillo) v. F.C.C.*, 294 F. 2d 240, 243 (D.C. Cir. 1961); *Ridge Radio Corp. v. FCC*, 292 F. 2d 770 (D.C. Cir. 1961). However, we will consider appropriate waivers to this rule where an applicant can demonstrate both good cause for his failure to timely file, and public interest reasons for late acceptance of his application.[14]

"CUT-OFF" RULE EXCEPTIONS

22. Although it is not generally Commission policy to grant waivers or allow exceptions to the consolidation "cut-off" rule, we proposed certain exceptions which were a balance between our need for an orderly administrative process and a recognition of compelling equitable, procedural, and public interest factors. The comments supported this proposal, suggesting only additional exceptions for substantial ownership changes and for site changes or other occurrences beyond the control of an applicant. Upon consideration, we have adopted in § 21.31(e) these suggestions as well as the following other exceptions. Paragraph (e) (1) is intended to reconcile the present § 21.30 (b) with the present § 21.23(b), and to end the effects of the "cut-off" rule at the discretion of the presiding officer when applications are designated for hearing or comparative evaluation. See, Empire Communications Co., 39 F.C.C. 2d 143 (Rev. Bd. 1973). Paragraph (e) (2) is a clarification of the exception now contained in the present § 21.30(b) and is intended to recognize engineering settlements which expedite processing by removing conflicts which would otherwise require resolution in a hearing. Similarly Paragraph (e) (4) is intended to encourage compromises between competing applications. And Paragraph (e) (6) is in the public interest. Paragraph (e) (3) is for substantial ownership amendments found to be in the public interest. Paragraph (e) (5) is intended to allow for the correction of typographical, transcription, or similar clerical errors whose discovery could not justfy the disruption of reopening a freqency to competing applications where such compromises are tended to recognize engineering changes necessitated by unforeseen events or technological obsolescence of equipment which would have to be considered later in a needless application for modification of facilities. Nevertheless, we stress that these exceptions will be strictly construed and do not represent a basic change in our policy of permitting very limited waivers of the consolidation "cut-off" rule.

COMPARATIVE EVALUATION PROCEDURE

23. Comments to our proposed new comparative evaluation procedure varied from complete opposition by AT&T, VIP, Myse and Stambler and Shrinsky, to largely unenthusiastic support by Aircall, Bakal, Mobilefone, NARS, Eastern and United Video. The oppositions generally contended that our proposal was premature or of doubtful utility since few applicants woud agree to a waiver of hearing rights. The supporters offered a few editorial suggestions (some of which we have incorporated), and a request by United Video that comments not be accepted from affiliated customers, that replies be accepted, and that applicants be required to waive their appellate rights also. Although the initial response to our proposal has not proved as promising as we would have hoped, we have nonetheless decided to adopt the procedure with minor changes and provision for acceptance of reply comments. While it may not be widely used, we believe that it will have some value in cases where applicants find they are not able to bear the expense or delay of a comparative hearing. And the experience it could provide may be helpful in developing future procedural changes concerning "paper hearings."

24. In addition to the items above, we have made numerous small editorial changes to remove ambiguities and have renumbered some rule sections to allow for other rulemakings. We appreciate that a change in organization can be inconvenient at first. To facilitate the transition and aid in cross-reference, we have included in attached Appendix I a table which indicates generally the derivation of the various rule sections. The text of the adopted rules is contained in Appendix II, attached hereto.

25. Accordingly, it is hereby ordered, That pursuant to the authority contained in Sections 4(i), 4(j) and 303 of the Communications Act of 1934 [47 U.S.C. Sections 154(i), 154(j), 303], Parts 1 and 21 of the Commission's Rules and Regulations are revised, as set forth below, effective September 17, 1976.

26. It is further ordered, That the proceedings in Docket No. 19905 are terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303.)

Adopted: July 27, 1976.

Released: August 10, 1976.

FEDERAL COMMUNCATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[14] Among the public interest arguments which may be made, for example, is a demonstration of the existence of a substantial and material question of transmitter site coverage which late acceptance of an application would raise as an issue in a comparative proceeding.

APPENDIX I

For informational purposes, the following is the general derivation of the amendments to Part 1 and Part 21 of the Commission's Rules:

Amendment Section:	*Derivation*
1.227(b)(3).	New—Substantive revision of old § 1.227(b)(3).
21.23(a)	New—Editorial revision of old § 21.23(a) to cross reference §§ 21.29 and 21.35.
21.23(b)	New—Editorial revision of old § 21.23(b).
21.23(c)	New—Substantive revision of old § 21.23 (c) and (d).
21.23(d)	New—Codification of policy announced by Public Notice dated October 16, 1972.
21.23(e)	Second sentence of old § 21.23(a).
21.23(f)	New—Revision of old § 0.291(k).
21.23(g)	First sentence of old §21.24.
21.24	Old § 21.24 deleted and section number reserved.
21.25	Editorial revision of old § 21.25.
21.26(c)	Deleted.
21.27(a)	New—Editorial revision of old § 21.26(c) to include information public notices and notices required by environmental rules of part 1.
21.27(b)	New—Editorial revision of old § 21.27(b).
21.27(c)	New—Editorial revision of old § 21.27(a) to cross reference new § 21.27(a) and 21.23.
21.28(a)	New—Editorial revision of § 21.28(a) and (c) to cross reference §§ 21.29 and 21.35.
21.28(b)	Renumbered some rule sections to old § 21.28(b) to cross reference §§ 21.29 and 21.35.
21.28(c)	New—editorial revision of last sentence of old § 21.28(c) to cross reference §§ 21.29 and 21.35.
21.29	New—substantive elaboration on last sentence of present § 21.28(b) and codification of current policy and procedure modeled after § 1.525.
21.30(a)	New—editorial revision of old § 21.27(c).
21.30(b)	New—editorial revision of old § 21.27(c) and § 21.30(c).
21.30(c)	New—substantive revision of old § 21.30(c).
21.31(a) and (b)	New—substantive revision of old § 21.30(b).
21.31(c)	New—codification of policy announced in "Applications for Common Carrier Facilities," 13 F.C.C. 2d 415 (1968).
21.31(d)	New—editorial combination of old § 21.28(d) and § 21.30(b).
21.31(e)	New—substantive revision of old § 21.30(b).
21.32(a)	New—47 U.S.C. § 309(a).

Amendment Section:	*Deviation*
21.32(b)	New—editorial combination of old § 21.27(e) and § 21.30(e).
21.32(c)	New—editorial combination of old § 21.27(f) and § 21.30(d).
21.32(d)	New—editorial revision of old § 21.20.
21.32(e)	New—editorial revision of old § 21.27(c).
21.32(f)	New—editorial revision of old § 21.27(f).
21.32(g)	New—editorial revision of old § 21.31.
21.32(h)	New.
21.33	Reserved.
21.34	Reserved.
21.35	New—Comparative evaluation procedure.
21.36	Reserved.
21.37	Reserved.
21.38	Reserved.
21.39(a),(b) and (c).	New—substantive revision of old § 21.32 to reflect 47 U.S.C. § 310(d).
21.39(d)	New—codification of current procedure modeled after § 1.541.
21.40(a),(b) and (c).	New.
21.41	Reserved.
21.42	Reserved.
21.43	Redesignation of old § 21.-33.
21.44	Redesignation of old § 21.-34.
21.45	Redesignation of old § 21.-35.

Parts 1 and 21 of Chapter I of Title 47 of the Code of Federal Regulations are amended to read as follows:

PART 1—PRACTICE AND PROCEDURE

1. § 1.227(b)(3) is revised to read as follows:

§ 1.227 Consolidations.

* * * * *

(b) * * *

(3) In common carrier cases (except for those involving either Public Coast stations in the Maritime Mobile Service, or stations in the Domestic Public Radio Services), any application that is mutually exclusive with another previously filed application will be considered with such prior filed application only if the later filed application is received by the Commission in a condition acceptable for filing prior to the close of business on the day preceding the day the earlier filed application is either designated for hearing or granted. Consolidation of cases involving Public Coast stations in the Maritime Mobile Services is provided for in paragraph (b)(4) of this section. In the Domestic Public Radio Services, no application will be entitled to comparative consideration with one or more conflicting applications unless such application, or such application as amended by a major amendment (as defined by § 21.23 of this chapter), meets the requirements of § 21.31 of this chapter.

* * * * *

PART 21—DOMESTIC PUBLIC RADIO SERVICES (OTHER THAN MARITIME MOBILE)

2. Subpart B of the Table of Contents to Part 21 is amended to read as follows:

Subpart B—Applications and Licenses

GENERAL FILING REQUIREMENTS

Sec.
21.3 Station authorization required.
21.4 Eligibility for station license.
21.5 Formal and informal applications.
21.6 Filing of applications, fees, and number of copies.
21.7 Standard application forms for Point-to-Point Microwave Radio, Local Television Transmission and Multipoint Distribution Services.
21.8 [Reserved].
21.9 Standard application forms for Domestic Public Land Mobile Radio and Rural Radio services.
21.10 Special application requirements for the Domestic Public Land Mobile Radio and Rural Radio services.
21.11 Miscellaneous forms shared by all Domestic Public Radio services.
21.12 [Reserved].
21.13 General application requirements.
21.14 [Reserved].
21.15 Technical content of applications.
21.16 [Reserved].
21.17 Demonstration of financial qualifications.
21.18 [Reserved].
21.19 [Reserved].
21.20 Defective applications.
21.21 Inconsistent or conflicting applications.
21.22 Repetitious applications.
21.23 Amendment of applications.
21.24 [Reserved].
21.25 Application for temporary authorizations.

PROCESSING OF APPLICATIONS

21.26 Receipt of application.
21.27 Public notice period.
21.28 Dismissal and return of applications.
21.29 Ownership amendments and agreements to amend or to dismiss applications or pleadings.
21.30 Opposition to applications.
21.31 Mutually exclusive applications.
21.32 Consideration of applications.
21.33 [Reserved].
21.34 [Reserved].
21.35 Comparative evaluation of mutually exclusive applications.
21.36 [Reserved].
21.37 [Reserved].
21.38 [Reserved].
21.39 Transfer of control or assignment of station authorization.
21.40 Considerations involving transfer or assignment applications.
21.41 [Reserved].
21.42 [Reserved].
21.43 Period of construction.
21.44 Forfeiture of station authorizations.
21.45 License period.

* * * * *

3. § 21.23 is revised to read as follows:

§ 21.23 Amendment of applications.

(a) Any pending application may be amended as a matter of right if the application has not been designated either for hearing, or for comparative evaluation pursuant to § 21.35, *Provided however*, that amendments shall comply with the provisions of § 21.29 as appropriate.

(b) The Commission or the presiding officer may grant requests to amend an application designated for hearing or comparative evaluation only if a written petition demonstrating good cause is submitted and properly served upon the parties of record.

(c) The Commission will classify amendments on a case-by-case basis. Whenever previous amendments have been filed, the most recent amendment will be classified by reference to how the information in question stood as of the latest Public Notice issued which concerned the application. An amendment will be deemed to be a major amendment subject to § 21.27 and § 21.31 under any of the following circumstances:

(1) If in the Point-to-Point Microwave Radio Service and Local Television Transmission Service, the amendment results in a substantial modification of the engineering proposal such as (but not necessarily limited to):

(i) A change in, or an addition of, a radio frequency;

(ii) A change in polarization of the transmitted signal;

(iii) An increase in the transmitter output power of three (3) dB or more;

(iv) A change in type of transmitter emission or an increase in emission bandwidth of more than ten (10) percent;

(v) A change in the geographic coordinates of a station's transmitting antenna of more than ten (10) seconds of latitude or longitude, or both;

(vi) A change of more than one (1) degree in the azimuth of the center of the main lobe of radiation of a point-to-point station's transmitting antenna (including any deflections by repeating devices);

(vii) Any change which increases the antenna height by twenty (20) feet or more; or

(viii) Any changes or combination of changes which would cause harmful electrical interference to an authorized facility or result in a mutually exclusive conflict with another pending application.

(2) If in the Multipoint Distribution Service, the amendment results in a substantial modification of the engineering proposal such as (but not necessarily limited to):

(i) A change in, or an addition of, a radio frequency channel;

(ii) A change in polarization of the transmitted signal;

(iii) A change in type of transmitter emission or an increase in emission bandwidth of more than ten (10) percent;

(iv) A change in the geographic coordinates of a station's transmitting antenna of more than ten (10) seconds of latitude or longitude, or both;

(v) Any change which increases the antenna height by ten (10) feet or more;

(vi) Any technical change which would increase the effective radiated power in any direction by more than one and one-half (1.5) dB; or

(vii) Any changes or combination of changes which would cause harmful electrical interference to an authorized facility or result in a mutually exclusive conflict with another pending application.

(3) If in the Domestic Public Land Mobile Radio Service and Rural Radio Service, the amendment results in a substantial modification of the engineering proposal such as (but not necessarily limited to):

(i) A change in, or an addition of, a radio frequency;

(ii) A change in the class of station (e.g., from control to base);

V 41 N 156 AUG 11 76 UMI

(iii) A change in the type of emission of a transmitter; or

(iv) The following modifications of base station facilities, unless a complete engineering showing can demonstrate that the resultant increase in the reliable service area contour (as defined by § 21.504) is less than ten (10) percent or one (1) mile as measured in miles along any of eight radials spaced every forty five (45) degrees from zero degree True North:

(A) A change in geographic coordinates of a station's transmitting antenna of more than five (5) seconds of latitude or longitude, or both;

(B) An increase in effective radiated power in any direction which would enlarge the service contour;

(C) A change in the height, or position of a transmitting antenna which would enlarge the service contour;

(D) An increase in the number of transmitter locations on the same frequency.

(4) If the amendment would convert a proposal into a major action under § 1.1305.

(5) If the amendment results in a substantial and material alteration of the proposed service.

(6) If the amendment specifies a substantial change in beneficial ownership or control (de jure or de facto) of an applicant such that the change would require, in the case of an authorized station, the filing of a prior assignment or transfer of control application under § 310(d) of the Communications Act of 1934 [47 U.S.C. § 310(d)]. *Provided however*, Such a change would not be considered major where it merely amends an application for modification of an authorized station to reflect a change in ownership or control of such station as previously approved by the Commission.

(7) If the amendment, or the cumulative effect of the amendment, is determined by the Commission otherwise to be substantial pursuant to § 309 of the Communications Act of 1934.

(d) In the Point-to-Point Microwave Radio Service and Local Television Transmission Service, a pending application may be amended by a major amendment to reflect the relocation of a proposed station site and a new application will not be required if:

(1) The geographic coordinates of the new station site are within twenty (20) miles of the coordinates of the original site; and,

(2) The relocated station would serve essentially the same purpose in the system as originally proposed.

(e) If a petition to deny (or other formal objection) has been filed, or if the Commission has published a notice that the application appears to be mutually exclusive with another application (or applications), any amendment (or other written communications) shall be served on the petitioner and on any such mutually exclusive applicant (or applicants), unless waiver of this requirement is granted pursuant to paragraph (f) of this section.

(f) The Commission may waive the service requirements of paragraph (e) of this section and prescribe such alternative procedures as may be appropriate under the circumstances to protect petitioners' interests and to avoid undue delay in a proceeding, if an applicant submits a request for waiver which demonstrates that the service requirement is unreasonably burdensome. Requests for waiver shall be served on petitioners. Oppositions to the petition may be filed within five (5) days after the petition is filed and shall be served on the applicant. Replies to oppositions will not be entertained.

(g) Any amendment to an application shall be signed and shall be submitted in the same manner, and with the same number of copies, as was the original application. Amendments may be made in letter form if they comply in all other respects with the requirements of this Chapter.

§ 21.24 [Reserved]

4. § 21.24 is deleted and marked reserved.

§ 21.25 [Amended]

5. In § 21.25(a) change reference from § 21.12 to § 21.5 and in § 21.25(b) change reference from § 21.27(c) to § 21.27(b).

§ 21.26 [Amended]

6. § 21.26(c) is deleted.

7. § 21.27 headnote and text are revised to read as follows:

§ 21.27 Public notice period.

(a) At regular intervals, the Commission will issue a public notice listing:

(1) The acceptance for filing of all applications and major amendments thereto;

(2) Significant Commission actions concerning applications listed as acceptable for filing;

(3) Information which the Commission in its discretion believes of public significance; and

(4) Special environmental considerations as required by Part I of this Chapter.

(b) The Commission will not grant any application until expiration of a period of thirty (30) days following the issuance date of a public notice listing the application, or any major amendment thereto, as acceptable for filing.

(c) As an exception to paragraphs (a)(1), (a)(2) and (b) of this section, the public notice provisions are not applicable to applications:

(1) For authorization of a minor technical change in the facilities of an authorized station where such a change would not be classified as a major amendment (as defined by § 21.23) were such a change to be submitted as an amendment to a pending application;

(2) For issuance of a license subsequent to a construction permit or, pending application for a grant of such license, any special or temporary authorization to permit interim operation to facilitate completion of authorized construction or to provide substantially the same service as would be authorized by such license;

(3) For extension of time to complete construction of authorized facilities;

(4) For temporary authorization pursuant to § 21.25(b);

(5) For authorization of facilities for remote pickup, temporary studio links and similar facilities which service a broadcast station;

(6) For an authorization under any of the proviso clauses of section 308(a) of the Communications Act of 1934 [47 U.S.C. 308(a)];

(7) For consent to an involuntary assignment or transfer of control of a radio authorization; or,

(8) For consent to a voluntary assignment or transfer of control of a radio authorization, where the assignment or transfer does not involve a substantial change in ownership or control.

8. § 21.28 is revised to read as follows:

§ 21.28 Dismissal and return of applications.

(a) Except as provided under § 21.29, any application may be dismissed without prejudice as a matter of right if the applicant requests its dismissal either prior to designation for hearing, or prior to selection of the comparative evaluation procedure of § 21.35. An applicant's request for the return of his application after it has been accepted for filing will be considered to be a request for dismissal without prejudice. Requests for dismissal shall comply with the provisions of § 21.29 as appropriate.

(b) A request to dismiss an application without prejudice will be considered either after designation for hearing, or after selection of the comparative evaluation procedure of § 21.35, only if:

(1) A written petition is submitted to the Commission and is properly served upon all parties of record;

(2) The petition is submitted before the issuance date of a public notice of Commission action denying the application; and

(3) The petition complies with the provisions of § 21.29 (whenever applicable) and demonstrates good cause.

(c) The Commission will dismiss an application for failure to prosecute or for failure to respond substantially within a specified time period to official correspondence or requests for additional information. Dismissal will be without prejudice prior to designation for hearing or selection of the comparative evaluation procedure of § 21.35, but may be made with prejudice for unsatisfactory compliance with § 21.29, or after designation for hearing or selection of the comparative evaluation procedure.

9. The present § 21.29 is revoked and a new headnote and text are added to read as follows:

§ 21.29 Ownership changes and agreements to amend or to dismiss applications or pleadings.

(a) Except as provided in paragraph (b) of this section, applicants or any other parties in interest to pending applications shall comply with the provisions of this section whenever:

(1) They participate in any agreement (or understanding) which involves any consideration promised or received, directly or indirectly, including any agreement (or understanding) for merger of interests or the reciprocal withdrawal of applications; and

(2) The agreement (or understanding) may result in either:

(i) A proposed change in the ownership of an applicant which would be classified as a major amendment under § 21.23, and for which an exemption under § 21.31(e) from the "cut-off" rule would be requested; or,

(ii) A proposed withdrawal, amendment or dismissal of any application(s), amendment(s), petition(s), pleading(s), or any combination thereof, which would thereby permit the grant without hearing of an application previously in contested status.

(b) The provisions of this section shall not be applicable to any engineering agreement (or understanding) which:

(1) Resolves frequency conflicts with authorized stations or other pending applications without the creation of new or increased frequency conflicts; and

(2) Does not involve any consideration promised or received, directly or indirectly (including any merger of interests or reciprocal withdrawal of applications), other than the mutual benefit of resolving the engineering conflict.

(c) For any agreement subject to this section, the applicant of an application which would remain pending pursuant to such an agreement will be considered responsible for the compliance by all parties with the procedures of this section. Failure of the parties to comply with the procedures of this section shall constitute a defect in those applications which are involved in the agreement and remain in a pending status.

(d) The principals to any agreement or understanding subject to this section shall comply with the standards of paragraph (e) of this section in accordance with the following procedure:

(1) Within ten (10) days after entering into the agreement, the parties thereto shall jointly notify the Commission in writing of the existence and general terms of such agreement, the identity of all of the participants and the applications involved;

(2) Within thirty (30) days after entering into the agreement, the parties thereto shall file any proposed application amendments, motions, or requests together with a copy of the agreement which clearly sets forth all terms and provisions, and such other facts and information as necessary to satisfy the standards of paragraph (e) of this section. Such submission shall be accompanied by the certification by affidavit of each principal to the agreement declaring that the statements made are true, complete, and correct to the best of their knowledge and belief, and are made in good faith.

(3) The Commission may request any further information which in its judgment it believes is necessary for a determination under paragraph (e) of this section.

(e) The Commission will grant an application (or applications) involved in the agreement (or understanding) only if it finds upon examination of the information submitted, and upon consideration of such other matters as may be officially noticed, that the agreement is consistent with the public interest, and the amount of any monetary consideration and the cash value of any other consideration promised or received is not in excess of those legitimate and prudent costs directly assignable to the engineering, preparation, filing, and advocacy of the withdrawn, dismissed, or amended application(s), amendment(s), petition(s), pleading(s), or any combination thereof. Where such costs represent the applicant's in-house efforts, these costs shall include only directly assignable costs and shall exclude the application of general overhead expenses. [The treatment to be accorded such consideration for interstate rate making purposes will be determined at such time as the question may arise in an appropriate rate proceeding.] An itemized accounting shall be submitted to support the amount of consideration involved except where such consideration (including the fair market value of any non-cash consideration) promised or received does not exceed one thousand dollars ($1,000.00). Where consideration involves a sale of facilities or merger of interests, the accounting shall clearly identify that portion of the consideration allocated for such facilities or interests and a detailed description thereof, including estimated fair market value. The Commission will not presume an agreement (or understanding) to be *prima facie* contrary to the public interest solely because it incorporates a mutual agreement to withdraw pending application(s), amendment(s), petition(s), pleading(s), or any combination thereof.

10. § 21.30 headnote and text are revised to read as follows:

§ 21.30 Opposition to applications.

(a) Petitions to deny (including petitions for other forms of relief) and responsive pleadings for Commission consideration must:

(1) Identify the application or applications (including applicant's name, station location, Commission file numbers and radio service involved) with which it is concerned;

(2) Be filed in accordance with the pleading limitations, filing periods, and other applicable provisions of §§ 1.41 through 1.52;

(3) Contain specific allegations of fact (except for those of which official notice may be taken), which shall be supported by affidavit of a person or persons with personal knowledge thereof, and which shall be sufficient to demonstrate that the petitioner (or respondent) is a party in interest and that a grant of, or other Commission action regarding, the application would be prima facie inconsistent with the public interest;

(4) Be filed within thirty (30) days after the date of public notice announcing the acceptance for filing of any such application or major amendment thereto (unless the Commission otherwise extends the filing deadline); and

(5) Contains a certificate of service showing that it has been mailed to the applicant no later than the date of filing thereof with the Commission.

(b) The Commission will classify as informal objections:

(1) Any petition to deny not filed in accordance with paragraph (a) of this section;

(2) Any petition to deny (or for another forms of relief) an application to which the thirty (30) day public notice period of § 21.27(b) does not apply; or

(3) Any comments on, or objections to, the grant of an application (other than the issuance of a license pursuant to a construction permit) where the comments or objections do not conform to either paragraph (a) of this section or other Commission rules and requirements.

(c) The Commission will consider informal objections, but will not necessarily discuss them specifically in a formal opinion if:

(1) The informal objection is filed at least one day before Commission action on the application; and

(2) The informal objection is signed by the submitting person (or his representative) and discloses his interest.

11. The present § 21.31 is revoked and a new headnote and text are added to read as follows:

§ 21.31 Mutually exclusive applications.

(a) The Commission will consider applications to be mutually exclusive if their conflicts are such that the grant of one application would effectively preclude by reason of harmful electrical interference, or other practical reason, the grant of one or more of the other applications. The Commission will presume "harmful electrical interference" to mean interference which would result in a material impairment to service rendered to the public despite full cooperation in good faith by all applicants or parties to achieve reasonable technical adjustments which would avoid electrical conflict.

(b) An application will be entitled to comparative consideration with one or more conflicting applications only if:

(1) The application is mutually exclusive with the other application; and

(2) The application is received by the Commission in a condition acceptable for filing by whichever "cut-off" date is earlier:

(i) Sixty (60) days after the date of the public notice listing the first of the conflicting applications as accepted for filing; or

(ii) One (1) business day preceding the day on which the Commission takes final action on the previously filed application (should the Commission act upon such application in the interval between thirty (30) and sixty (60) days after the date of its public notice).

(c) Whenever three or more applications are mutually exclusive, but not unl-

V 41 156 AUG 11 76 UMI

formly so, the earliest filed application establishes the date prescribed in paragraph (b)(2) of this section, regardless of whether or not subsequently filed applications are directly mutually exclusive with the first filed application. [For example, applications A, B, and C are filed in that order. A and B are directly mutually exclusive, B and C are directly mutually exclusive. In order to be considered comparatively with B, C must be filed within the "cut-off" period established by A even though C is not directly mutually exclusive with A.]

(d) An application otherwise mutually exclusive with one or more previously filed applications, but filed after the appropriate date prescribed in paragraph (b)(2) of this section, will be returned without prejudice and will be eligible for refiling only after final action is taken by the Commission with respect to the previously filed application (or applications).

(e) For the purposes of this section, any application (whether mutually exclusive or not) will be considered to be a newly filed application if it is amended by a major amendment (as defined by § 21.23), except under the following circumstances:

(1) The application has been designed for comparative hearing, or for comparative evaluation (pursuant to § 21.35), and the Commission or the presiding officer accepts the amendment pursuant to § 21.23(b);

(2) The amendment resolves frequency conflicts with authorized stations or other pending applications but does not create new or increased frequency conflicts;

(3) The amendment reflects only a change in ownership or control pursuant to an agreement (or understanding) which is found by the Commission to be in the public interest under § 21.29 and from which a requested exemption from the "cut-off" requirements of this section is granted;

(4) The amendment reflects only a change in ownership or control which results from an agreement under § 21.29 whereby two or more applicants entitled to comparative consideration of their applications join in one (or more) of the existing applications and request dismissal of their other application (or applications) to avoid the delay and cost of comparative consideration;

(5) The amendment corrects typographical, transcription, or similar clerical errors which are clearly demonstrated to be mistakes by reference to other parts of the application, and whose discovery does not create new or increased frequency conflicts; or

(6) The amendment does not create new or increased frequency conflicts, and is demonstrably necessitated by events which the applicant could not have reasonably foreseen at the time of filing, such as, for example:

(i) The loss of a transmitter or receiver site by condemnation, natural causes, or loss of lease or option;

(ii) Obstruction of a proposed transmission path caused by the erection of a new building or other structure; or

(iii) The discontinuance or substantial technological obsolescence of specified equipment, whenever the application has been pending before the Commission for two or more years from the date of its filing.

12. The present § 21.32 is revoked and a new headnote and text are added to read as follows:

§ 21.32 Consideration of applications.

(a) Applications for an instrument of authorization will be granted if, upon examination of the application and upon consideration of such other matters as it may officially notice, the Commission finds that the grant will serve the public interest, convenience, and necessity.

(b) The grant shall be without a formal hearing if, upon consideration of the application, any pleadings or objections filed, or other matters which may be officially noticed, the Commission finds that:

(1) The application is acceptable for filing, and is in accordance with the Commission's rules, regulations, and other requirements;

(2) The application is not subject to comparative consideration (pursuant to § 21.31) with another application (or applications), except where the competing applicants have chosen the comparative evaluation procedure of § 21.35 and a grant is appropriate under that procedure;

(3) A grant of the application would not cause harmful electrical interference to an authorized station;

(4) There are no substantial and material questions of fact presented; and

(5) The applicant is legally, technically, financially and otherwise qualified, and a grant of the application would serve the public interest.

(c) If the Commission should grant without a formal hearing an application for an instrument of authorization which is subject to a petition to deny filed in accordance with § 21.30, the Commission will deny the petition by the issuance of a Memorandum Opinion and Order which will concisely report the reasons for the denial and dispose of all substantial issues raised by the petition.

(d) Whenever the Commission, without a formal hearing, grants any application in part, or subject to any terms or conditions other than those normally applied to applications of the same type, it shall inform the applicant of the reasons therefor, and the grant shall be considered final unless the Commission should revise its action (either by granting the application as originally requested, or by designating the application for a formal evidentiary hearing) in response to a petition for reconsideration which:

(1) Is filed by the applicant within thirty (30) days from the date of the letter or order giving the reasons for the partial or conditioned grant;

(2) Rejects the grant as made and explains the reasons why the application should be granted as originally requested; and,

(3) Returns the instrument of authorization.

(e) The Commission will designate an application for a formal hearing, specifying with particularity the matters and things in issue, if, upon consideration of the application, any pleadings or objections filed, or other matters which may be officially noticed, the Commission determines that:

(1) A substantial and material question of fact is presented;

(2) The Commission is unable for any reason to make the findings specified in paragraph (a) of this section and the application is acceptable for filing, complete, and in accordance with the Commission's rules, regulations, and other requirements;

(3) The application is entitled to comparative consideration (under § 21.31) with another application (or applications); or

(4) The application is entitled to comparative consideration (pursuant to § 21.31) and the applicants have chosen the comparative evaluation procedure of § 21.35 but the Commission deems such procedure to be inappropriate.

(f) The Commission may grant, deny, or take other action with respect to an application designated for a formal hearing pursuant to paragraph (e) of this section after an appropriate hearing conducted in accordance with the provisions of § 21.35 or Part 1 of this chapter.

(g) Whenever the public interest would be served thereby the Commission may grant one or more mutually exclusive applications expressly conditioned upon final action on the applications, and then either designate all of the mutually exclusive applications for a formal evidentiary hearing or (whenever so requested) follow the comparative evaluation procedures of § 21.35, as appropriate, if it appears:

(1) That some or all of the applications were not filed in good faith, but were filed for the purpose of delaying or hindering the grant of another application;

(2) That the public interest requires the prompt establishment of radio service in a particular community or area;

(3) That a delay in making a grant to any applicant until after the conclusion of a hearing on all applications might jeopardize the rights of the United States under the provisions of a international agreement to the use of the frequency in question; or

(4) That a grant of one application would be in the public interest in that it appears from an examination of the remaining applications that they cannot be granted because they are in violation of provisions of the Communications Act, other statutes, or of the provisions of this chapter.

(h) Reconsideration or review of any final action taken by the Commission will be in accordance with subpart A of Part 1 of this chapter.

13. The present § 21.33, "Period of construction", and the present § 21.34 "Forfeiture and termination of station authorization", are redesignated as §§ 21.43 and 21.44, respectively, and §§ 21.33 and 21.34 are reserved.

14. The present § 21.35, "License period," is redesignated § 21.45 and a new § 21.35 is added to read as follows:

§ 21.35 Comparative evaluation of mutually exclusive applications.

(a) In order to expedite action on mutually exclusive applications, the applicants may request the Commission to consider their applications without a formal hearing in accordance with the summary procedure outlined in paragraph (b) of this section, if:

(1) The applications are entitled to comparative consideration pursuant to § 21.31;

(2) The applications have not been designated for formal evidentiary hearing; and

(3) The Commission determines, initially or at any time during the procedure outlined in paragraph (b) of this section, that such procedure is appropriate, and that, from the information submitted and consideration of such other matters as may be officially noticed, there are no substantial and material questions of fact presented (other than those relating to the comparative merits of the applications which would preclude a grant under paragraphs (a) and (b) of § 21.32.

(b) Provided that the conditions of paragraph (a) of this section are satisfied, applicants may request the Commission to act upon their mutually exclusive applications without a formal hearing pursuant to the summary procedure outlined below:

(1) To initiate the procedure, each applicant will submit to the Commission a written statement containing:

(i) A waiver of his right to a formal hearing;

(ii) A request and agreement that, in order to avoid the delay and expense of a comparative formal hearing, the Commission should exercise its judgment to select from among the mutually exclusive applications that proposal (or proposals) which would best serve the public interest; and

(iii) The signature of a principal (and his attorney if so represented).

(2) After receipt of the written requests of all of the applicants the Commission (if it deems this procedure appropriate) will issue a notice designating the comparative criteria upon which the applications are to be evaluated and will request each applicant to submit, within a specified period of time, additional information concerning his proposal relative to the comparative criteria.

(3) Within thirty (30) days following the due date for filing this information, the Commission will accept concise and factual argument on the competing proposals from the rival applicants, potential customers, and other knowledgeable parties in interest.

(4) Within fifteen (15) days following the due date for the filing of comments, the Commission will accept concise and factual replies from the rival applicants.

(5) From time to time during the course of this procedure the Commission may request additional information from the applicants and hold informal conferences at which all competing applicants shall have the right to be represented.

(6) Upon evaluation of the applications, the information submitted, and such other matters as may be officially noticed the Commission will issue a decision granting one (or more) of the proposals which it concludes would best serve the public interest, convenience and necessity. The decision will report briefly and concisely the reasons for the Commission's selection and will deny the other application(s). This decision shall be considered final.

§§ 21.36–21.38 [Reserved]

15. Sections 21.36, 21.37 and 21.38 are [Reserved].

16. A new § 21.39 is added to read as follows:

§ 21.39 Transfer of control or assignment of station authorizations.

(a) No construction permit or station license, or any rights thereunder, shall be transferred, assigned, or disposed of in any manner, voluntarily or involuntarily, directly or indirectly, or by transfer of control of any corporation holding such permit or license, to any person except upon application to the Commission and upon finding by the Commission that the public interest, convenience, and necessity will be served thereby. The treatment to be accorded acquisition or disposition costs for interstate rate making purposes will be determined at such time as the question may arise in a rate proceeding.

(b) Requests for transfer of control or assignment authority shall be submitted on the application forms prescribed by § 21.11 of this chapter; shall be accompanied by the applicable showings required by §§ 21.13, 21.15, 21.17 and 21.40 of this chapter.

(c) In acting upon applications for transfer and assignment authority the Commission will not consider whether the public interest, convenience, and necessity might be served by the transfer, assignment, or disposal of the permit or license to a person other than the proposed transferee or assignee.

(d) The Commission shall be notified in writing promptly of the death or legal disability of an individual permittee or licensee, a member of a partnership, or a person directly or indirectly in control of a corporation which is a permittee or licensee. Within thirty (30) days after the occurrence of such death or legal disability, an application in accordance with the provisions of paragraph (b) of this section shall be filed requesting consent to involuntary assignment of such permit or license or for involuntary transfer of control of such corporation to a person or entity legally qualified to succeed to the foregoing interests under the laws of the place having jurisdiction over the estate involved.

17. A new § 21.40 is added to read as follows:

§ 21.40 Considerations involving transfer or assignment applications.

(a) The Commission will review a proposed transaction to determine if the circumstances indicate "trafficking" in licenses or construction permits whenever applications (except those involving a pro forma assignment or transfer of control) for consent to assignment of a common carrier construction permit or license, or for transfer of control of a corporate permittee or licensee, involve facilities which have been operated for less than two years by the proposed assignor or transferor. At its discretion, the Commission may require the submission of an affirmative, factual showing (supported by affidavits of a person or persons with personal knowledge thereof) to demonstrate that the proposed assignor or transferor has not acquired an authorization or operated a station for the principal purpose of profitable sale rather than public service. This showing may include, for example, a demonstration that the proposed assignment or transfer is due to changed circumstances (described in detail) affecting the licensee or permittee subsequent to the acquisition of the permit or license, or that the proposed transfer of radio facilities is incidental to a sale of other facilities or merger of interests.

(b) If a proposed transfer of radio facilities is incidental to a sale of other facilities or merger of interests, any showing requested under paragraph (a) of this section shall include an additional exhibit which:

(1) Discloses complete details as to the sale of facilities or merger of interests;

(2) Segregates clearly by an itemized accounting, the amount of consideration involved in the sale of facilities or merger of interests; and

(3) Demonstrates that the amount of consideration assignable to the facilities or business interests involved represents their fair market value at the time of the transaction.

(c) For the purposes of this section, the two year period is calculated using the following dates (as appropriate):

(1) The initial date of grant of the construction permit, excluding subsequent modifications;

(2) The date of consummation of an assignment or transfer, if the station is acquired as the result of an assignment of construction permit or license, or transfer of control of a corporate permittee or licensee; or

(3) The median date of the applicable commencement dates (determined pursuant to paragraphs (c) (1) and (2) of this section) if the transaction involves a system (such as a Point-to-Point Microwave System) of two or more stations. (The median date is that date so selected such that fifty percent of the commencement dates of the total number of stations, when arranged in chronological order, lie below it and fifty percent lie above it. When the number of stations is an even number, the median date will be a value half way between the two dates closest to the theoretical median).

PUBLIC, INDUSTRIAL AND LAND TRANSPORTATION RADIO SERVICES

Elimination of Required Annual Measurement of Transmitter Power, Frequency and Modulation and Specification of Transmitter Power in Terms of Output Power

In the matter of amendment of Parts 89, 91, and 93 of the Commission's rules and regulations to eliminate the required annual measurement of transmitter power, frequency and modulation, and to specify transmitter power in terms of output power.

1. On November 7, 1975, the Commission released a Notice of Proposed Rule Making (40 FR 52857) in the above-entitled matter which was published in the FEDERAL REGISTER on November 13, 1975. The Rule Making was issued in response to a petition from HT&B Electronics (HTB) requesting elimination of the annual transmitter power measurement currently required by the rules [1] and the specification of radio frequency output power as the preferred method of transmitter power measurement. In keeping with its policy of attempting to eliminate nonessential operating requirements, the Commission expanded the scope of the HTB petition and proposed elimination of the presently required annual measurement of transmitter frequency and modulation.[2]

2. A list of parties filing comments and reply comments is given in Appendix A. Subsequent to the reply comment deadline of February 14, 1976, the Commission received three filings intended as reply comments and 70 letters from individuals and concerns having an interest in this proceeding. While we were unable to include these showings with the official comments, we wish to assure these parties that their respective observations and concerns were substantially reflected in those comments filed in a timely manner.

ANNUAL MEASUREMENT OF TRANSMITTER POWER, FREQUENCY AND MODULATION

3. The Association of American Railroads (AAR), the American Automobile Association (AAA) and the Land Mobile Communications Council (LMCC) expressed general support for our proposal to eliminate the required annual measurement of transmitter power, frequency and modulation. The Special Industrial Radio Service Association (SIRSA) and the California Public Safety Radio Association, Inc. (CPSRA) also concurred with our proposal and expressed particular support for our policy of encouraging on-the-air measurement techniques. The GTE Service Corporation, the Forest Industries Telecommunications (FIT), the American Trucking Associations (ATA), the International Taxicab Association (ITA) and Yellow Cab of California also expressed their support of our proposal, citing the increased flexibility in maintenance policy which would result from the proposed de-regulation.

4. The Utilities Telecommunications Council (UTC) also concurred with our proposal, provided that the Commission require that measurements of transmitter power, frequency, and modulation, and the methods used to perform these measurements, be entered into the station records irrespective of the frequency or circumstances surrounding the measurements.[3] The Arizona Department of Public Safety also expressed its approval of our proposal, but recommended that this matter be reviewed in two years in order to assess its overall impact, particularly with respect to any noted increase in the number of interference incidents. The Associated Public Safety Communications Officers (APCO) expressed opinions similar to those of the Arizona Department of Public Safety. APCO cautioned, however, that in many solid state transmitters, a reduction in output power due to the deterioration of certain discreet components could result in an increase in spurious radiation, and thus a consequent increase in the interference potential.

5. The National Association of Manufacturers (NAM) was less optimistic and expressed the belief that with the ever increasing channel congestion, the complete and immediate elimination of periodic mandatory checks of transmitter performance could be unwise. Therefore, NAM suggested that the Commission limit its proposed de-regulation to the Chicago Region and evaluate the results at a later date, or else amend the rules to stipulate a measurement interval of 18 or 24 months.

6. Ratelco, Inc., also viewed the proposed de-regulation with disapproval. They stated their biggest problem is in convincing customers to make their mobiles available for routine preventive maintenance. Ratelco also expressed reservations about the use of on-the-air measurement techniques noting that a high percentage of required service is to correct receiver problems, dirty contacts, and intermittent transmit conditions caused by broken microphone cords and other physical problems. These statements were echoed in the numerous comments filed by other service organizations after the reply comment deadline.

7. The Land Mobile Section of the Communication Division of the Electronic Industries Association (EIA) also expressed the belief that the requirements for annual measurements and on-site inspection are in the best public interest and should be retained. EIA argued tha the existing rules help to assure the system integrity necessary for efficient spectrum utilization. "It is well accepted in the industry", states EIA, "that as a transmitter or receiver crystal ages it gradually changes frequency. This drift can cause the transmitter to be outside the Commission's tolerances and poses a potential interference problem for the users. The inevitable results of off-frenquency operation are interference to other users and a loss of effective radiating power from the drifting transmitter. Both require the system operator to increase his air time to repeat transmissions". Concluding, EIA pointed out that there is a large market for used equipment, much of which, while reconditioned, is nevertheless constructed to past (tube and crystal oven) technology.[4] The National Association of Business and Educational Radio (NABER) while expressing general support for the Commission's de-regulation policy, expressed in its comments many of the reservations voiced by the EIA.

8. In reply comments, Bell Communications of Helena, Arkansas, stated that in its experience, approximately 40 percent of the licensees in the Business Radio Service use system degradation as the motivating factor to have their equipment returned to the applicable technical standards.

9. After weighing the arguments we have concluded for the reasons listed below that it would be in the public interest to eliminate the annual measurement requirements as proposed. We are, however, as suggested by the Arizona Department of Public Safety, going to review this matter in the future in order to assess its overall impact on land mobile radio operations.

10. By proposing to delete these requirements it was not our intention to encourage laxity on the part of licensees with respect to system maintenance. It is emphasized that the deletion of these requirements does not in any way relieve the licensee of his responsibility to take appropriate measures to insure that the radio equipment is at all times operated in accordance with the applicable technical standards. The rules have and will continue to require licensees to operate their transmitters within the specified technical parameters. We point out, however, that in the case of the older tube type transmitters, it may be necessary to make measurements every few months to meet the technical standards in the rules, while longer intervals may suffice for the more modern solid state equipment. Eliminating these annual measurement requirements merely increases the licensee's flexibility in transmitter maintenance policy and procedure.

11. Also, it was not our intention to suggest that on-the-air measurements alone as noted in several of the comments, would suffice to safeguard system performance. In a time of even increasing frequency congestion, it is necessary that each licensee take effective measures to insure the integrity of his communications system. These measurements should include an evaluation of receiver performance in order that undue air time not be consumed in repeating messages lost due to poor effective receiver sensitivity. Receiver and antenna performance optimization, as well as the repair of damage resulting from rugged use, allows no alternative to regular on-site transceiver evaluation.

OUTPUT POWER VS. INPUT POWER

12. Our proposal to specify the use of transmitter output power in lieu of DC input power to the final radio frequency stage as the preferred method of transmitter power measurement received the support of all parties filing comments. Therefore, except for several minor changes as discussed below we are adopting this part of the item as proposed.

13. UTC, for example, recommended that we amend our definition of output power to read:

> The radio frequency output power of the transmitter's final stage as measured at the output terminals which terminate into a dummy or artificial load.

We agree that a refinement of our originally proposed definition could be advantageous. However, we feel that a provision should be made for output power measurement under radiating conditions. Accordingly, we have amended the Appendix to refine output power as:

> The radio frequency output power of a transmitter's final radio frequency stage as measured at the output terminal while connected to a load of the impedance recommended by the manufacturer.

14. UTC, in reviewing our proposed Appendix, also pointed out that:

> The last phrase in § 91.102(b) provides that "• • • the power of a transmitter shall be the maximum rated output power as specified by the manufacturer". However, § 91.106(c) provides that "The output power shall not exceed by more than 20 percent, the output power shown in the Radio Equipment List • • •", "• • • for purposes of uniformity and consistency in the rules, it is recommended that the phrase "shown in the Radio Equipment List" be substituted for the phrase "as specified by the manufacturer" in § 91.102(b).

We agree, and have so amended the Appendix.[5]

15. SIRSA, in its comments, objected to our conversion factor of .75 for transmitters below 25 MHz and .60 for transmitters above 25 MHz for converting transmitter final stage input power to output power stating that:

> It has been the experience of several of SIRSA's members that under current state-of-the-art conditions in the band 25–100 MHz, a transmitter with 500 watts input power is capable of producing 330 watts output power and, in fact, some of the newer base stations are capable of producing 350 watts output power. Similarly, new base stations operating in the band 100–215 MHz with 600 watts input power have a normal output of 375 watts.

16. We recognize that there are a few transmitters with final stage efficiencies greater than our specified value of .60 (for frequencies above 25 MHz). However, after further reviewing the data submitted by manufacturers for type acceptance, we have concluded that our value of .60 is well above the average. Moreover, as we indicated in the Notice of Proposed Rule Making, we are relaxing the output power tolerance from 10 to 20 percent in order to accommodate the relatively small number of units with exceptional efficiency. Accordingly, we do not feel that further adjustment to our efficiency factor is warranted.

17. In other comments, the United States Independent Telephone Association and the GTE Service Corporation pointed out that the 350 watt output power limit specified in §§ 89.111, 91.106 and 93.106 did not agree with the result of 360 watts obtained by using the procedure described in paragraph 6 of the Notice. We are aware of this slight discrepancy. Our motive in specifying the power as 350 watts was simply to suggest a figure which, in view of the other power limits specified, might be more easily remembered. Since no arguments were advanced demonstrative of the need for 360 watts output power, and since the decible difference resulting from the 10 watt reduction is insignicant, we have decided to retain the originally suggested value of 350 watts.

18. The Arizona Department of Public Safety has, in its comments requested that the Commission specify that transmitter output power be measured at the input to the antenna system, since such a measurement would then reflect the losses due to ancillary equipment such as duplexers and cavities. While this proposal would, at first glance, appear attractive, it poses a number of practical and administrative difficulties. For maximum accuracy, it would be necessary to measure the power actually delivered to the antenna in order to take into account normal transmission line losses. Needless to say, it would be difficult and impractical to climb the antenna tower each time a measurement is desired. The preferable approach would be to measure the transmitter output power and subtract the line losses. Secondly, output power has traditionally been interpreted to mean either the transmitter output power or the effective radiated power (ERP). Since ERP is not conveniently measured, it should be apparent that when we refer to the measurement of output power, unless otherwise specified, we mean the transmitter output power.

19. Moreover, it is our practice when enforcing the rules relating to transmitter power, to compare the measured transmitter output power with the value specified for that particular transmitter in the Commission publication, "Radio Equipment List—Equipment Acceptable for Licensing." Since transmitters have been type accepted for the output powers appearing in this list, it would be inappropriate to attempt to increase the transmitter power to the level necessary to compensate for ancillary equipment or line loss. While a number of conservatively designed transmitters are available which are capable of producing substantially more than their rated output power, it has been noted that tuning for such maximum power often results in the generaiton of undesired harmonic or spurious emissions.

20. In view of the fact that losses resulting from the use of particular cables, duplexers, cavities and the like are readily available from technical information supplied by the manufacturers, and can easily be summed in order to determine the overall transmission line loss, we believe that the measurement of actual antenna input power is unnecessary and that the authorization of this parameter would be largely without advantage. Therefore, for the sake of convenience and simplicity, we reaffirm our original proposal and specify that output power be measured at the transmitter output terminals while connected to a load of the impedance recommended by the manufacturer.

21. In concurrence with the foregoing, the Commission has determined that the public interest, convenience and necessity will be best served by the elimination of the requirement for annual measurement of transmitter power, frequency and modulation and by amending Parts 89, 91, and 93 of the Rules to specify the use of radio frequency output power as the preferred method of transmitter power measurement.

22. Accordingly, pursuant to the authority contained in sections 4(i) and 303 of the Communications Act of 1934, as amended, it is ordered, That effective September 9, 1976, Parts 89, 91 and 93 of the Commission's Rules and Regulations are amended as shown below. It is further ordered, that this proceeding is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303.)

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

Parts 89, 91, and 93 of the Commission's Rules and Regulations are amended as follows:

PART 89—PUBLIC SAFETY RADIO SERVICES

1. Section 89.3(b) is amended to add a new definition in alphabetical sequence to read as follows:

§ 89.3 Definitions.

• • • • • •

(b) • • •

Output power. The radio frequency output power of a transmitter's final radio frequency stage as measured at the output terminal while connected to a load of the impedance recommended by the manufacturer.

• • • • • •

2. Section 89.15(a)(2) is amended as follows:

§ 89.15 Frequency coordination procedures.

(a) • • •

• • • • • •

(2) Requests to change existing facilities by increasing the unauthorized output, or raising the authorized height of the antenna or moving the authorized station location (including the antenna), or by adding a base station within the licensee's existing area of operation.

• • • • •

3. Section 89.61(c)(10) is amended as follows:

§ 89.61 Request for special temporary authority.

• • • • • •

(c) • • •

(10) Output power of the transmitter.

• • • • • •

4. Section 89.101(d)(1) & par (p) are armended to read as follows:

§ 89.101 Frequencies.

• • • • • •

(d) • • •

(1) Notwithstanding the rule provisions relating to permissible communications, points of communication and emissions in the applicable subpart of this part, the frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz may be used to accomplish any radio communication requirement which is necessary to the licensee's activity: Provided, That all operations are otherwise in accordance with the rules in this chapter; that the bandwidth of emission does not exceed 8 kHz; and that output power is limited to no more than 20 watts.

• • • • • •

(p) The following frequencies may be assigned to fixed stations in the Public Safety Radio Services on a secondary, non-interference basis to land mobile operations in the Industrial (except Business) and Land Transportation Radio Services. All such use of these frequencies for fixed systems is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population, except that the distance may be 75 miles if the output power does not exceed 20 watts. All such fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. For two-frequency systems the separation between transmit-receive frequencies is 5 MHz. The centers of urbanized areas of 200,000 or more populations are determined from the Appendix, page 226, of the U.S. Commerce Publication "Air Line Distance Between Cities in the United States." Urbanized areas of 200,000 or more population are defined in the U.S. Census of Population, 1960, Vol. 1, Table 23, page 1–50.

• • • • • •

5. Section 89.103 is amended as follows:

§ 89.103 Frequency stability.

(a) • • •

Frequency range (megahertz)	All fixed and base stations	Over 2 W	All mobile stations W or less
	Percent	*Percent*	*Percent*
Below 25	0.01	0.01	0.02
25 to 50	.002	.002	.0°5
50 to 450	[1].0005	.0005	.005
450 to 470	[4].00025	.0005	.0005
470 to 512	[4].00025	.0005	.0005
806 t. 821	[4].00015	.00025	.00025
851 to 866	.00015	.00 25	.00025
1427 to 1435	[4].03	.03	.03
Above 1435	([3])	([2 3])	([2 3])

[1] Stations authorized for operation on or before Dec. 1, 1961, in the frequency band 72–74.6 MHz may operate with a frequency tolerance of 0.005 pct.
[4] Operational fixed stations controlling mobile relay stations, through use of the associated mobile frequency, may operate with a frequency tolerance of 0.0005 pct.
[4] For control stations the frequency stability is 0.00025 pct.
[4] For fixed stations with power output above 120 Ws, the frequency tolerance is 0.01 pct if the necessary bandwidth of the emission does not exceed 3 kHz. For fixed station transmitters with a power of 120 W or less and using time division multiplex, the frequency tolerance may be increased to 0.05 pct.
[2] Radiolocation equipment using pulse modulation shall meet the following frequency tolerance. The frequency at which maximum emission occurs shall be within the authorized frequency band and shall not be closer than 1.5/T MHz to the upper and lower limits of the authorized frequency band where t₀ is the pulse duration in microseconds. For other radiolocation equipment, tolerances will be specified in the station authorization. See also sec. 89.121.
[3] The frequency tolerance for base and mobile stations will be specified in the station authorization.

(b) For the purpose of determining the frequency tolerance applicable to a particular transmitter in accordance with the foregoing provisions of this section, the power of a transmitter shall be the maximum rated output power as specified in the Commission's "Radio Equipment List".

6. Section 89.109(c) is amended as follows:

§ 89.109 Modulation requirements.

• • • • • •

(c) Each transmitter shall be equipped with a device which automatically prevents modulation in excess of that specified in this subpart which may be caused by greater than normal audio level: *Provided, however,* That this requirement shall not be applicable to transmitters authorized to operate as mobile stations with a maximum output power of 2 watts or less.

• • • • • •

7. Section 89.111(b) and (c) are amended to read as follows:

§ 89.111 Power and antenna height.

• • • • • •

(b) Except where the maximum power that may be used on a particular frequency is specifically designated in connection with the use of such frequency, the maximum power that will be authorized is shown in the following tabulation:

Frequency range (megahertz)	Maximum output power	Maximum effective radiated power
	Watts	*Watts*
1.3 to 3	1,500	
3 to 25	750	
25 to 100	300	
100 to 470	350	
470 to 512		1,000
806 to 821	([1])	([1])
851 to 866	([1])	([1])
2450 to 2500	5	
2500 to 10,550	([2])	
10,550 to 10,680	3	
Above 10,680	([3])	

[1] For power limitations see sec. 89.651.
[2] The output power of a transmitter on any authorized frequency in this service shall not exceed 2,000 W (33 dBW).
[3] To be specified in the station authorization.

(c) The output power shall not exceed by more than 20 percent the output power shown in the Radio Equipment List for transmitters included in this list, or the output power for the particular transmitter specifically listed on the station authorization.

8. Section 89.115 (a), (b), (b)(2) & (c) are amended; par (a) (3) & (4), (b)(3) & (c)(3) are deleted to read as follows:

§ 89.115 Transmitter measurement.

(a) The licensee of each station shall employ a suitable procedure to determine that the carrier frequency of each transmitter authorized to operate with an output power in excess of 2 watts, is maintained within the tolerance prescribed in this part. This determination shall be made, and the results thereof entered in the station records, in accordance with the following:

• • • • • •

(b) The licensee of each station shall employ a suitable procedure to determine that the transmitter output power of each transmitter authorized to operate with an output power in excess of two watts does not exceed the maximum figure specified on the current station authorization. On authorizations stating only the input power to the final radio frequency stage, the maximum permissible output power is 75 percent for frequencies below 25 MHz and 60 percent of the input power for frequencies above 25 MHz. If a non-DC final radio frequency stage is utilized, then the output power shall not exceed 75 percent of the input power. This determination shall be made, and the results thereof entered into the station records, in accordance with the following:

• • • • • •

(2) When any change is made in the transmitter which may affect the transmitter power output.

(c) The licensee of each station shall employ a suitable procedure to determine that the modulation of each transmitter authorized to operate with an output power in excess of 2 watts, does not exceed the limits specified in this part. This determination shall be made and the results thereof entered in the station records, in accordance with the following:

• • • • • •

9. Section 89.126(h) is amended to read as follows:

§ 89.126 Secondary alarm and signalling operations.

• • • • • •

(h) The output power shall not exceed 30 watts (at the remote site).

• • • • • •

10. Section 89.259(g)(6) is amended as follows:

§ 89.259 Frequencies available to the Local Government Radio Service.

(g) • • •

(6) Available for assignment: *Provided,* That the output power of any transmitter authorized to operate on this frequency shall not exceed 2 watts.

• • • • • •

11. Section 89.309(h) (9), (13), (14), (15) and (17) are amended as follows:

§ 89.309 Frequencies available to the Police Radio Service.

• • • • • •

(h) • • •

(9) This frequency is available for assignment to zone and interzone stations in the Police Radio Service for use with A1 emission only and an output power of 750 watts.

• • • • • •

(13) Subject to the restrictions contained in Section 89.111(a), base stations operating on this frequency and rendering service to state police mobile units may be authorized to use a maximum output power in excess of the maximum indicated in Section 89.111(b) but not in excess of 7500 watts: Provided, That such operation will cause no harmful interference to the service of other stations.

(14) This frequency may be assigned to fixed stations in the Police Radio Service in Alaska for point-to-point radiotelephone communications, using type A3 emission and an output power of 750 watts.

(15) This frequency may be assigned to fixed stations in the Police Radio Service in Alaska for point-to-point radiotelephone communications, using type A3 emission with output power of 750 watts, subject to the condition that no harmful interference is caused to the service of any police station employing type A1 emission on this frequency including any operations conducted in accordance with outstanding regional agreements and further subject to the condition that no harmful interference is caused to the service of any station, which in the discretion of the Commission may have priority on the frequency with which interference results.

• • • • • •

(17) The maximum output power of any transmitter authorized to operate on this frequency, after June 1, 1956, shall not exceed 2 watts. Licensees holding a valid authorization as of June 1, 1956, for base or mobile station operations on this frequency, with a power in excess of 2 watts, may continue to be authorized for such operation without regard to this power limitation.

• • • • • •

12. Section 89.359(g)(6) is amended as follows:

§ 89.359 Frequencies available to the Fire Radio Service.

(g) • • •

(6) The output power of any transmitter authorized to operate on this frequency shall not exceed 2 watts.

• • • • • •

PART 91—INDUSTRIAL RADIO SERVICES

13. Section 91.3 is amended to add a new definition in alphabetical sequence to read as follows:

§ 91.3 Definitions.

• • • • • •

Output Power. The radio frequency output power of a transmitter's final radio frequency stage as measured at the output terminal while connected to a load of the impedance recommended by the manufacturer.

• • • • • •

14. Section 91.7(b)(7) and (e)(4) are amended to read as follows:

§ 91.7 Relay and control stations.

• • • • • •

(b) • • •

(7) A mobile station associated with one or more mobile relay stations may be authorized to operate only on a mobile service frequency above 25 MHz which is available for assignment to mobile stations. In the Business Radio Service any low-power frequency below 450 MHz may be authorized for that purpose when such stations are limited to a maximum output power of 1 watt or less.

• • • • • •

(e) • • •

(4) Notwithstanding paragraph (e)(1) and (3) of this Section, in the Business and Special Industrial Radio Services in the frequency bands below 450 MHz only low power frequencies (2 watts or less output power) may be assigned for the purposes described in paragraph (e)(1) and (2) of this section.

15. Section 91.8(a) is amended as follows:

§ 91.8 Policy governing the assignment of frequencies.

(a) The frequencies which normally may be assigned to stations in any one of the several Industrial Radio Services are listed in the applicable subpart of this part. All licensees of stations in these services shall cooperate in the use of the frequencies assigned in order to minimize interference, and thereby obtain the most effective use of the authorized facilities. Each frequency or band of frequencies listed in this part is available on a shared basis only and will not be assigned for the exclusive use of any one licensee. The use of any frequency may be restricted as to specified geographical areas, maximum power, or such other operating conditions contained in this part or in the station authorization. Except for applications listed in paragraph (9)(1) of this section, each application for assignment of a new frequency or to change existing facilities by increasing the authorized output power, or raising the height of the antenna, or moving the authorized station location (including the location of the antenna), or by adding a base station within the licensee's existing area of operation shall be accompanied by evidence of frequency coordination in the form set forth either in paragraph (2) or (3) of this paragraph:

• • • • • •

16. Section 91.53(c)(10) is amended as follows:

§ 91.53 Procedure for obtaining special temporary authority.

• • • • • •

(c) • • •

(10) Output power of the transmitter.

• • • • • •

17. Section 91.102 is amended as follows:

§ 91.102 Frequency stability.

(a) • • •

V 41 1 156 AUG 11 76 UMI

Frequency range (megahertz)	Transmitter output power: Fixed and base stations: Over 200 W	Fixed and base stations: 200 W or less	Mobile stations: Over 2 W	Mobile stations: 2 W or less
	Percent	*Percent*	*Percent*	*Percent*
Below 25 [1]	0.005	0.01	0.01	0.02
25 to 50	.002	.002	.002	.005
50 to 450	[2] .0005	[2] .0005	.0005	.005
450 to 170	[2] .00025	[2] .00025	.0005	[4] .0005
170 to 512	[3] .00025	.00025		
806 to 821	[5] .00015	[3] .00015	.00025	.00025
851 to 866	.00015	.00015	.00025	.00025
1427 to 1435	[6] .03	[6] .03	.03	.03
Above 1435	(7)	(7)	(7)	(7)

[1] Industrial Radiolocation Service stations operating in the frequency bands 70–90 kHz and 110–130 kHz will be required to maintain the carrier frequency of each authorized transmitter within 0.01 pct of the assigned frequency. Industrial Radiolocation Service stations operating in frequency bands above 130 kHz must comply with the tolerance requirements indicated in the column for fixed and base stations in this table.

[2] Stations authorized for operation on or before Dec. 1, 1961, in the frequency band 72–74.6 MHz may operate with a frequency tolerance of 0.005 pct.

[3] Operational fixed stations controlling mobile relay stations, through use of the associated mobile frequency, may operate with a frequency tolerance of 0.0005 pct.

[4] The frequency tolerance for base and mobile stations authorized to operate in these bands will be specified in the station authorizations.

[5] For control stations, the frequency stability is 0.00025 pct.

[6] For fixed stations with a output power above 120 W, the frequency tolerance is 0.01 pct if the necessary bandwidth of the emission does not exceed 3 kHz. For fixed station transmitters with a power of 120 W or less and using time division multiplex the frequency tolerance may be increased to 0.05 pct.

[7] Radar stations in the Industrial Radiolocation Service using pulse modulation shall meet the following frequency tolerances. The frequency at which maximum emission occurs shall be within the authorized frequency band and shall not be closer than 1.5/T MHz to the upper and lower limits of the authorized frequency band where tesla is the pulse duration in microseconds. For other equipment, tolerances will be specified in the station authorization.

(b) For the purpose of determining the frequency tolerance applicable to a particular transmitter in accordance with the foregoing provisions of this Section, the power of a transmitter shall be the maximum rated output power as specified in the Commission's "Radio Equipment List".

18. Section 91.105(c) is amended as follows:

§ 91.105 Modulation requirements.

• • • • • •

(c) Each transmitter first authorized or installed after July 1, 1950, shall be provided with a device which automatically will prevent modulation in excess of that specified in this subpart which may be caused by greater than normal audio level: *Provided, however,* That this requirement shall not be applicable to transmitters authorized to operate as mobile stations with a maximum output power of 2 watts or less.

• • • • • •

19. Section 91.106 (b) and (c) are amended to read as follows:

§ 91.106 Power and antenna height.

• • • • •

(b) • • •

Frequency range (megahertz)	Output power	Maximum effective radiated power
	Watts	*Watts*
1.6 to 6	1,500	
25 to 100	300	
100 to 216	350	
216 to 220	(1)	(1)
220 to 470	350	
470 to 512		1,000
806 to 821	(2)	(2)
851 to 866	(2)	(2)
2450 to 2500	5	
2500 to 10,550	(1)	
10,550 to 10,680	3	
Above 10,680	(1)	

[1] To be specified in the station authorization.

[2] For power limitations, see sec. 80.651.

[3] The output power of a transmitter on any authorized frequency in this service shall not exceed 2,000 W (33 BW).

(c) The output power shall not exceed by more than 20 percent the output power shown in the Radio Equipment List for transmitters included in this list, or the output power for the particular transmitter specifically listed on the station authorization.

20. Section 91.108 (a), (b), (b)(2) and (c) are amended; and par (a) (3) & (4), (b)(3) and (c)(3) are deleted to read as follows:

§ 91.108 Transmitter measurements.

(a) The licensee of each station shall employ a suitable procedure to determine that the carrier frequency of each transmitter authorized to operate with an output power in excess of 2 watts, is maintained within the tolerance prescribed in this part. This determination shall be made, and the results thereof entered in the station records, in accordance with the following:

• • • • • •

(b) The licensee of each station shall employ a suitable procedure to determine that the transmitter output power of each transmitter authorized to operate with an output power in excess of two watts does not exceed the maximum figure specified on the current station authorization. On authorizations stating only the input power to the final radio frequency stage, the maximum permissible output power is 75 percent for frequencies below 25 MHz and 60 percent of the input power for frequencies above 25 MHz. If a non-DC final radio frequency stage is utilized, then the output power shall not exceed 75 percent of the input power. This determination shall be made, and the results thereof entered into the station records, in accordance with the following:

• • • • • •

(2) When any change is made in the transmitter which may affect the transmitter output power.

(c) The licensee of each station shall employ a suitable procedure to determine that the modulation of each transmitter authorized to operate with an output power in excess of 2 watts, does not exceed the limits specified in this part. This determination shall be made and the results thereof entered in the station records, in accordance with the following:

• • • • • •

21. Section 91.254(b) (8) and (26) are amended to read as follows:

§ 91.254 Frequencies available.

(b) • • •

(8) Other provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed an occupied bandwidth of 8 kHz for intermittent transmissions; further, authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

• • • • • •

(26) This frequency may be assigned to fixed stations on a secondary non-interference basis to land mobile stations in the Public Safety and Land Transportation Radio Services. All use of these frequencies by fixed stations is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population, except that the distance may be 75 miles if the output power does not exceed 20 watts. All fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. For two-frequency systems separation between transmit-receive frequencies is 5 MHz. Urbanized areas of 200,000 or more population are defined in the U.S. Census of Population, 1960, vol. 1, table 23, pages 1–50. The centers of urbanized areas are determined from the appendix, Page 226, of the U.S. Commerce publication "Air Line Distance Between Cities in the United States."

• • • • • •

22. Section 91.304(b)(6) & (29) are amended to read as follows:

§ 91.304 Frequencies available.

(b) • • •

(6) Other provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed in an occupied bandwidth of 8 kHz, for intermittent transmissions; further, authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

• • • • • •

(29) This frequency may be assigned to fixed stations on a secondary non-

interference basis to land mobile stations in the Public Safety and Land Transportation Radio Services. All use of these frequencies by fixed stations is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population, except that the distance may be 75 miles if the output power does not exceed 20 watts. All fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15dB. For two-frequency systems separation between transmit-receive frequencies is 5 MHz. Urbanized areas of 200,000 or more population are defined in the U.S. Census of population, 1960, vol. 1, table 23, page 1–50. The centers of urbanized areas are determined from the appendix, page 226, of the U.S. Commerce publication "Air Line Distance Between Cities in the United States."

• • • • • •

23. Section 91.354(b)(6), (10) and (29) are amended to read as follows:

§ 91.354 Frequencies available.

(b) • • •

(6) Other provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed an occupied bandwidth of 8 kHz, for intermittent transmissions; further, authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

• • • • • •

(10) Authorizations to operate on this frequency will be issued for A2 or F2 emission for tone signalling or for a combination of such emission with A3 or F3 emission with a maximum bandwidth of 20 kHz. The output power shall not exceed 2 watts. The maximum distance between any transmitter and the center of the radiating portion of its antenna shall not exceed 25 feet. Operation on this frequency is subject to the condition that no harmful interference is caused to stations operating in the Business Radio Service.

• • • • • •

(29) This frequency may be assigned to fixed stations on a secondary non-interference basis to land mobile stations in the Public Safety and Land Transportation Radio Services. All use of these frequencies by fixed stations is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population except that the distance may be 75 miles if the output power does not exceed 20 watts. All fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. For two-frequency systems separation between transmit-receive frequencies is 5 MHz. Urbanized areas of 200,000 or more population are defined in the U.S. Census of Population, 1960, Vol. 1, Table 23, page 1–50. The centers of urbanized areas are determined from the appendix, page 226, of the U.S. Commerce publication "Air Line Distance Between Cities in the United States."

• • • • • •

24. Section 91.404(b)(5) is amended to read as follows:

§ 91.404 Frequencies available.

(b) • • •

(5) Other provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed an occupied bandwidth of 8 kHz, for intermittent transmission; further, authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

• • • • • •

25. Section 91.454(b)(2) is amended to read as follows:

§ 91.454 Frequencies available.

(b) • • •

(2) Other provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed an occupied bandwidth of 8 kHz, for intermittent transmission; further, authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

• • • • • •

26. Section 91.504(b)(8), (14), (26) and (33) are amended to read as follows:

§ 91.504 Frequencies available.

(b) • • •

(8) Other rule provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed an occupied bandwidth of 8 kHz, for intermittent transmission; further, authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

• • • • • •

(14) This frequency is limited to a maximum output power of 2 watts; and each station authorized hereon will be classified and licensed as a mobile station. Any units of such a station, however, may be used to provide the operational functions of a base or fixed station; *Provided* no harmful interference is caused to mobile service operations and *Provided further,* That the separation between the control point and the center of the radiating portion of the antenna of any units so used shall not exceed

• • • • • •

(26) This frequency may be assigned to fixed stations on a secondary non-interference basis to land mobile stations in the Public Safety and Land Transportation Radio Services. All use of these frequencies by fixed stations is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population, except that the distance may be 75 miles if the output power does not exceed 20 watts. All fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. For two frequency systems separation between transmit-receive frequencies is 5 MHz. Urbanized areas of 200,000 or more population are defined in U.S. Census of Population, 1960, Vol. 1, table 23, page 1–50. The centers of urbanized areas are determined from the appendix, page 226, of the U.S. Commerce publication "Air Line Distance Between Cities in the United States."

• • • • • •

(33) The maximum transmitter output power that will be authorized is 1 watt; and each station authorized will be classified and licensed as a mobile station. Any units of such a station, however, may be used to provide the operational functions of a base or fixed station. The antennas of transmitters operating on this frequency must be directly mounted or installed upon the transmitting unit: Provided, however, that when permanently installed aboard a vehicle, antenna and transmitter may be separated as required for convenience in mounting. Horizontal polarization will not be allowed; and the gain of antennas employed shall not exceed that of a half wave dipole. The maximum bandwidth that will be authorized is 20 kHz. This frequency is available for voice or tone control transmission, and subject to the condition that interference will not be caused to the reception of television channels 4 or 5. No protection from television interference will be afforded licensees operating on this frequency.

• • • • • •

27. Section 91.553(a) is amended as follows:

§ 91.553 Station limitations.

(a) Mobile relay stations will not be be authorized in the Business Radio Service within the continental limits of the United States, except when (1) such stations and all associated control and mobile stations are to be operated exclusively on frequencies above 450 MHz, or (2) when such stations are to be operated on frequencies designated for low power operation and are limited to a maximum output power of 1 watt with the mobile relay antenna system no more than 40 feet above the ground.

• • • • • •

28. Section 91.554(b)(8), (10), (13), (17), (20), (26), (27), (37), (38), (39), & (47) and par. (c) are amended to read as follows:

§ 91.554 Frequencies available.

• • • • • •

(b) • • •

(8) Other provisions of this part notwithstanding, this frequency may be au-

V 41 156

UMI

thorized for use with any type of emission which does not exceed an occupied bandwidth of 8 kHz, for intermittent transmission; further, authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

• • • • •

(10) Operation on this frequency is limited to a maximum output power of 110 watts.

• • • • •

(13) This frequency is limited to a maximum output power of 2 watts and each station authorized hereon will be classified and licensed as a mobile station. Any units of such a station, however, may be used to provide the operational functions of a base or fixed station, provided no harmful interference is caused to mobile service operations and further provided, that the separation between the control point and the center of the radiating portion of the antenna of any units so used shall not exceed 25 feet.

• • • • •

(17) Operation on this frequency is limited to a maximum output power of 35 watts.

• • • • •

(20) This frequency is limited to a maximum output power of 1 watt and each station authorized hereon will be classified and licensed as a mobile station. Any units of such a station, however, may be used to provide the operational functions of a base or fixed station, provided no harmful interference is caused to mobile service operations and further provided, that the separation between the control point and the center of the radiating portion of the antenna of any units so used shall not exceed 25 feet.

• • • • •

(26) Operation on this frequency is limited to an output power of 75 watts.

• • • • •

(27) Operation on this frequency is limited to an output power of 20 watts.

• • • • •

(37) This frequency is available for assignment to stations in the Business Radio Service for use at locations removed by 75 or more miles from the boundaries of airports in urbanized areas of 200,000 or more population, U.S. Census of Population, 1960, Vol. 1 Table 23 page 1–50. Maximum permissible output power is 110 watts.

(38) This frequency may be assigned to fixed stations in the Business Radio Service. All use of these frequencies by fixed stations is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population, except that the distance may be 75 miles if the output power does not exceed 20 watts. All fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. For two frequency systems separation between transmit-receive frequencies is 5 MHz. Urbanized areas of 200,000 or more population are defined in U.S. Census of Population, 1960, Vol. 1 Table 23 page 1–50. The centers of urbanized areas are determined from the Appendix page 226, of the U.S. Commerce publication "Air Line Distance Between Cities in the United States."

(39) This frequency will be assigned only to stations operated with local control. Maximum output power may not exceed 110 watts. Overall height of antenna above ground may not exceed 100 feet. Control point location to be within one-half air mile of the transmitter location.

• • • • •

(47) This frequency will be assigned only for the specific purpose of one-way tone or voice paging. The output power shall not exceed 20 watts.

• • • • •

(c) Except for frequencies separated by 12.5 kHz from regularly assigned frequencies in the bands 460.650–460.875 MHz and 465.650–465.875 MHz, low power mobile stations of 2 watts or less output power may be assigned any frequency separated by 12.5 kHz from any mobile frequency in the band 450–470 MHz listed in paragraph (a) of this section. Such station may be used to provide any function of a base, mobile relay, or mobile station: *Provided*, That all operation is limited to the confines of an industrial complex. When used as a base station or mobile relay, the height of the antenna shall not exceed 20 ft. above ground. All operation is subject to the condition that harmful interference is not caused to adjacent mobile operations.

• • • • •

29. Section 91.555 is amended as follows:

§ 91.555 Exemption from technical standards.

Transmitters licensed in this Service which have an output power not exceeding 120 milliwatts are exempt from the technical requirements set out in Subpart C of this part: *Provided, however*, That the sum of the bandwidth occupied by the emitted signal plus the bandwidth required for frequency tolerance shall be so adjusted that any emission appearing on a frequency 40 kHz or more removed from the assigned frequency is attenuated at least 30 dB below the unmodulated carrier. Such transmitters may operate in the continuous carrier transmit mode.

30. Section 91.604(b) (9) is amended to read as follows:

§ 91.604 Frequencies available.

(b) • • •

(9) Station assignments on frequencies in this band will be made subject to the conditions that the maximum output power shall not exceed 375 watts and the maximum authorized bandwidth shall not exceed 2 kHz.

• • • • •

31. Section 91.730(b)(1), (3), (8) & (14) are amended to read as follows:

§ 91.730 Frequencies available.

• • • • •

(b) • • •

(1) This frequency is shared with the Forest Products and Petroleum Radio Services. The output power of all transmitters operating on this frequency shall not exceed 110 watts.

• • • • •

(3) Other provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed an occupied bandwidth of 8 kHz, for intermittent transmission; further; authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

• • • • •

(8) The maximum transmitter output power that will be authorized is 1 watt; and each station authorized will be classified and licensed as a mobile station. Any units of such a station, however, may be used to provide the operational functions of a base or fixed station. The antennas of transmitters operating on this frequency must be directly mounted or installed upon the transmitting unit: *Provided, however*, That when permanently installed aboard a vehicle, antenna and transmitter may be separated as required for convenience in mounting. Horizontal polarization will not be allowed; and the gain of antennas employed shall not exceed that of a half wave dipole. The maximum bandwidth that will be authorized is 20 kHz. This frequency is available for voice or tone control transmissions, and subject to the condition that interference will not be caused to the reception of television channels 4 or 5. No protection from television interference will be afforded licensees operating on this frequency.

• • • • •

(14) This frequency may be assigned to fixed stations on a secondary non-interference basis to land mobile stations in the Public Safety and Land Transportation Radio Services. All use of these frequencies by fixed stations is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population, except that the distance may be 75 miles if the output power does not exceed 20 watts. All fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. For two frequency systems separation between transmit-receive frequencies is 5 MHz. Urbanized areas of 200,000 or more population are defined in U.S. Census of Population, 1960, Vol. 1 Table 23 page 1–50. The centers of urbanized areas are determined from the appendix, page 226, of the U.S. Commerce publication "Air Line Distance Between Cities in the United States."

• • • • •

32. Section 91.754(b) (3) and (10) are amended to read as follows:

§ 91.754 Frequencies available.

(b) • • •

(3) Other provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed an occupied bandwidth of 8 kHz, for intermittent transmission; further, authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

• • • • •

(10) This frequency may be assigned to fixed stations on a secondary non-interference basis to land mobile stations in the Public Safety and Land Transportation Radio Services. All use of these frequencies by fixed stations is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population, except that the distance may be 75 miles if the output power does not exceed 20 watts. All fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. For two frequency systems separation between transmit-receive frequencies is 5 MHz. Urbanized areas of 200,000 or more population are defined in U.S. Census of Population, 1960, Vol. 1, Table 23, pages 1–50. The centers of urbanized areas are determined from the appendix, page 226, of the U.S. Commerce publication "Air Line Distance Between Cities in the United States."

• • • • •

PART 93—LAND TRANSPORTATION RADIO SERVICES

33. Section 93.7(b) is amended to add a definition in alphabetical sequence to read as follows:

§ 93.7 Definitions.

• • • • •

(b) • • •

Output power. The radio frequency output power of a transmitter's final radio frequency stage as measured at the output terminal while connected to a load of the impedance recommended by the manufacturer.

• • • • •

34. Section 93.9(a) is amended as follows:

§ 93.9 Frequency coordination.

(a) Except for applications listed in paragraph (a)(1) of this section, each application for assignment of a new frequency, or to change existing facilities by increasing the authorized output power or raising the height of the station antenna, or moving the authorized station location (including the location of the antenna), or by adding a base station within the licensee's existing area of operation shall be accompanied by evidence that the applicant is aware of and has complied with the requirement that he cooperate with other licensees in the selection of a frequency. Evidence of frequency coordination may be submitted in the form set forth either in paragraph (a) (2) or (3) of this section. In no instance will an application be granted where the proposed station is located less than 7 miles from an adjacent-channel station 15 kHz removed.

• • • • •

35. Section 93.53(c)(10) is amended as follows:

§ 93.53 Special temporary authority.

• • • • •

(c) • • •

(10) Output power of the transmitter.

• • • • •

36. Section 93.101(b) is amended to read as follows:

§ 93.101 Frequencies.

• • • • •

(b) The following frequencies may be assigned to fixed stations in the Land Transportation Radio Service on a secondary non-interference basis to Land Mobile Stations in the Public Safety and Industrial Radio Services. All such use of these frequencies for fixed stations is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population except that the distance may be 75 miles if the output power does not exceed 20 watts. All such fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. For two-frequency operation the separation between transit and receive frequencies is 5 MHz. The center of urbanized areas of 200,000 or more population are determined from the Appendix, page 226 of the U.S. Commerce publication, "Air Line distance Between Cities in the United States."

• • • • •

37. Section 93.102(a) is amended to read as follows:

§ 93.102 Frequency stability.

(a) • • •

Frequency range (megahertz)	All fixed and base stations	All mobile stations	
		Over 2 W	2 W or less
	Percent	*Percent*	*Percent*
Below 25	0.01	0.01	0.02
25 to 50	.002	.002	.005
50 to 450	[1].0005	.0005	.005
450 to 470	[2][3].00025	.0005	[4].0005
470 to 512	[3].00025	.0005	.0005
806 to 821	[4].0015	.00025	.00025
851 to 866	.0015	.00025	.00025
1427 to 1435	[5].03	.03	.03
Above 1435	([6][7])	([6][7])	([6][7])

[1] Stations authorized for operation on or before Dec. 1, 1961, in the frequency band 73–74.6 MHz may operate with a frequency tolerance of 0.005 pct.

[2] A frequency tolerance of 0.0005 pct is permitted in the Railroad Radio Service for base stations operating on the frequencies 452.925, 452.950, 457.925, and 457.950 MHz used for remote control purposes in railroad yard and terminal areas.

[3] Operational fixed stations controlling mobile relay stations, through use of the associated mobile frequency, may operate with a frequency tolerance of 0.0005 pct.

[4] For control stations, the frequency stability is 0.00025 pct.

[5] For fixed stations with a output power above 120 W, the frequency tolerance is 0.01 pct if the necessary bandwidth of the emission does not exceed 3 kHz. For fixed station transmitters with a power of 120 W or less and using time division multiplex the frequency tolerance may be increased to 0.05 pct.

[6] Radiolocation equipment using pulse modulation shall meet the following frequency tolerance: The frequency at which maximum emission occurs shall not be closer than 1.5/T MHz to the upper and lower limits of the authorized frequency band where tesla is the pulse duration in microseconds. For other radiolocation equipment tolerances will be specified in the station authorization. See also sec. 93.111.

[7] The frequency tolerance for base and mobile stations will be specified in the station authorization.

(b) For the purpose of determining the frequency tolerance applicable to a particular transmitter in accordance with the foregoing provisions of this section, the power of a transmitter shall be the maximum rated output power, as specified in the Commission's "Radio Equipment List".

38. Section 93.105(c) is amended as follows:

§ 93.105 Modulation requirements.

• • • • •

(c) Each transmitter first authorized or installed after July 1, 1950, shall be provided with a device which automatically will prevent modulation in excess of that specified in this subpart which may be caused by greater than normal audio level: *Provided, however*, That this requirement shall not be applicable to transmitters authorized to operate as mobile stations with a maximum output power of 2 watts or less.

• • • • •

39. Section 93.106(b) and (c) amended to read as follows:

§ 93.106 Power and antenna height.

• • • • •

(b) • • •

V 41 N 156 AUG 11 76 UMI

Frequency range (megahertz)	Maximum output power	Maximum effective radiated power
	Watts	*Watts*
30 to 100	300	
100 to 470	[1] 75	
470 to 512		1,000
806 to 821		(3)
821 to 866	(4)	(3)
2450 to 2500	5	
2500 to 10,550	(5)	
10,550 to 10,680	3	
Above 10,680	(5)	

[1] In the frequency band 450–470 MHz maximum output power in excess of 75 W but not in excess of 350 W may be authorized in accordance with the provision of subpt. E of this part, upon submission of the required showings.
[2] [Reserved].
[3] For power limitations see sec. 89.651.
[4] The output power of a transmitter on any authorized frequency in this service shall not exceed 2,000 W (33 dBW).
[5] To be specified in the station authorization.

(c) The output power shall not exceed by more than 20 percent the output power shown in the Radio Equipment List for transmitters included in this list, or the output power for the particular transmitter specifically listed on the station authorization.

40. Section 93.108 (a), (b), (b) (2) & (c) are amended; and pars (a) (3), (a) (4), (b) (3) and (c) (3) deleted to read as follows:

§ 93.108 Transmitter measurements.

(a) The licensee of each station shall employ a suitable procedure to determine that the carrier frequency of each transmitter authorized to operate with an output power in excess of 2 watts, is maintained within the tolerance prescribed in this part. This determination shall be made, and the results thereof entered in the station records, in accordance with the following:

* * * * *

(b) The licensee of each station shall employ a suitable procedure to determine that the transmitter output power of each transmitter authorized to operate with an output power in excess of two watts does not exceed the maximum figure specified on the current station authorization. On authorization stating only the input power to the final radio frequency stage, the maximum permissible output power is 75 percent for frequencies below 25 MHz and 60 percent of the input power for frequencies above 25 MHz. If a non-DC final radio frequency stage is utilized, then the output power shall not exceed 75 percent of the input power. This determination shall be made, and the results thereof entered into the station records, in accordance with the following:

* * * * *

(2) When any change is made in the transmitter which may affect the transmitter output power.

(c) The licensee of each station shall employ a suitable procedure to determine that the modulation of each transmitter authorized to operate with an output power in excess of 2 watts, does not exceed the limits specified in this part. This determination shall be made and the results thereof entered in the station records, in accordance with the following:

* * * * *

41. Section 93.254(a) is amended to read as follows:

§ 93.254 Frequencies below 952 MHz available for base, mobile and operational fixed stations.

(a) The following frequencies are available for assignment to base, mobile, or operational fixed stations in the Motor Carrier Radio Service, on a shared basis with stations in the same service and other services, subject to no protection from interference due to the operation of industrial, scientific, or medical devices on the frequency 27.12 MHz, and limited to the use of transmitters having not more than 20 watts output power.

FREQUENCIES (MHz)

27.235	27.265
27.245	27.275
27.255	

* * * * *

42. Section 93.352(b) (4) is amended as follows:

§ 93.352 Frequencies below 952 MHz available for base and mobile stations.

* * * * *

(b) * * *

(4) The maximum transmitter power that will be authorized is 1 watt; and each station authorized will be classified and licensed as a mobile station. Any units of such a station, however, may be used to provide the operational functions of a base or fixed station. The antennas of transmitters operating on this frequency must be directly mounted or installed upon the transmitting unit: *Provided, however,* That when permanently installed aboard a vehicle antenna and transmitter may be separated as required for convenience in mounting. Horizontal polarization will not be allowed; and the gain of antennas employed shall not exceed that of a half wave dipole. The maximum bandwidth that will be authorized is 20 kHz. This frequency is available for voice or tone control transmissions and subject to the condition that interference will not be caused to the reception of television channels 4 or 5. No protection from television interference will be afforded licensees operating on this frequency.

* * * * *

43. Section 93.355(c) (2) and (3) are amended to read as follows:

§ 93.355 Relay and repeater stations.

* * * * *

(c) * * *

(2) A mobile repeater station may be used only for the purpose of extending the transmitting and receiving range of pack-carried or hand-carried units of mobile stations. Such pack-carried or hand-carried units shall be operated only on a frequency or freqencies above 150 MHz and the output power shall not exceed 6 watts. The frequency and maximum power of the pack-carried or hand-carried transmitters which may be associated with a mobile repeater station shall be specified in the station authorization.

(3) The output power of a mobile repeater station, when transmitting as a repeater station on the frequency used for communication with its associated pack-carried or hand-carried units, shall not exceed 6 watts except when the same frequency is also used by the same station for direct communication with vehicular mobile units or with one or more base stations.

* * * * *

44. Section 93.356(a) is amended as follows:

§ 93.356 Frequencies below 952 MHz available for base mobile, and operational fixed stations.

(a) The following frequencies are available for assignment to base, mobile, or operational fixed stations in the Railroad Radio Service, on a shared basis with stations in the same service and other services, subject to no protection from interference due to the operation of industrial, scientific, or medical devices on the frequency 27.12 MHz, and limited to the use of transmitters having not more than 20 watts output power:

FREQUENCIES (MHz)

27.235	27.265
27.245	27.275
27.255	

* * * * *

45. Section 93.357(c) (3) (i) is amended as follows:

§ 93.357 Scope of service.

* * * * *

(c) * * *

(3) * * *

(i) The output power shall not exceed 30 watts.

* * * * *

46. Section 93.404(a) is amended as follows:

§ 93.404 Frequencies below 952 MHz available for base, mobile, and operational fixed stations.

(a) The following frequencies are available for assignment to base, mobile, or operational fixed stations in the Taxicab Radio Service, on a shared basis with stations in the same service and other services, subject to no protection from interference due to the operation of industrial, scientific, or medical devices on the frequency 27.12 MHz, and limited to the use of transmitters having not more than 20 watts output power:

FREQUENCIES (MHz)

27.235	27.265
27.245	27.275
27.255	

* * * * *

47. Section 93.504(a) is amended as follows:

§ 93.504 Frequencies below 952 MHz available for base, mobile, and operational fixed stations.

(a) The following frequencies are available for assignment to base, mobile, or operational fixed stations in the Automobile Emergency Radio Service on a shared basis with stations in the same service and other services, subject to no protection from interference due to the operation of industrial, scientific, or medical devices on the frequency 27.12 MHz, and limited to the use of transmitters having not more than 20 watts output power.

FREQUENCIES (MHz)

27.235	27.265
27.245	27.275
27.255

Title 50—Wildlife and Fisheries

CHAPTER I—FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Ravalli National Wildlife Refuge, Montana

The following special regulations are issued and are effective August 11, 1976.

§ 32.12 Special regulations; migratory game birds.

MONTANA

RAVALLI NATIONAL WILDLIFE REFUGE

The hunting of ducks, geese, coot and mergansers will be permitted on portions of the Ravalli National Wildlife Refuge during the regular migratory bird hunting season and in accordance with the following additional special conditions:

1. All hunters must enter public hunting through appropriate check station.
2. All hunters must set blind selection pointer to "taken" upon selecting a blind, and return blind selection pointer to "open" upon leaving hunting area.
3. Placing blind selection pointer to "taken" determines occupant of blind.
4. During periods of high hunter demand, as determined by the Refuge Manager, hunters will be limited to one period only during a day: Period #1; Start of shooting hours to 12 Noon. Period #2; 1 p.m. until close of shooting hours.
5. Hunters must be within ten feet of designated blind sites while attempting to take and taking of waterfowl game birds.
6. Blind sites will be limited to five hunters each.
7. A designated area will be open to the taking of ducks, geese, coot and mergansers by means of falconry from the opening of the migratory waterfowl season through November 28. No firearms may be carried in this area.
8. The public hunting area will be closed to entry from one hour after sunset until one and one-half hour before sunrise.
9. No fishing equipment of any type will be permitted on the public hunting area.
10. Boats are not permitted.

The hunting area is designated by signs and delineated on maps available at Refuge Headquarters, No. 5 Third Street, Stevensville, Montana, and from the Area Manager, U.S. Fish and Wildlife Service, Room 3035, Federal Building, 316 No. 26th Street, Billings, Montana.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally and which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through June 30, 1977.

AUGUST 2, 1976.

R. C. TWIST,
Refuge Manager, Ravalli National Wildlife Refuge, Stevensville, Montana.

[FR Doc.76-23285 Filed 8-10-76;8:45 am]

PART 32—HUNTING

Ravalli National Wildlife Refuge, Montana

The following special regulations are issued and are effective August 11, 1976.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

MONTANA

RAVALLI NATIONAL WILDLIFE REFUGE

The taking of white-tailed deer by bow and arrow will be permitted on designated areas of Ravalli National Wildlife Refuge by means of archery only from September 4 through October 10 and from October 24 through October 31, either sex deer, and from November 1 through November 28, antlered bucks only, in accordance with State regulations, and with the following additional special conditions:

1. All hunters must check in and out at checking stations.
2. No firearms may be carried in this area.
3. The public hunting area will be closed to entry from one hour after sunset until one and one-half hour before sunrise.

This hunting area will be designated by signs and delineated on maps available at Refuge Headquarters, No. 5 Third Street, Stevensville, Montana, and from the Area Manager, U.S. Fish and Wildlife Service, Room 3035, Federal Building, 316 No. 26th Street, Billings, Montana.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally and which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through June 30, 1977.

R. C. TWIST,
Refuge Manager, Ravalli National Wildlife Refuge, Stevensville, Montana.

AUGUST 2, 1976.

[FR Doc.76-23286 Filed 8-10-76;8:45 am]

Title 24—Housing and Urban Development

Subtitle A—Office of the Secretary, Department of Housing and Urban Development

[Docket No. R-76-397]

PART 10—RULEMAKING: POLICY AND PROCEDURES

Public Property, Loans, Grants, Benefits or Contracts

On June 4, 1976, the Department proposed a revision of 24 CFR Part 10, entitled Rule Making-Policy and Procedures (41 FR 22583). The proposal would update and clarify references made in Part 10 as it was first published on March 4, 1971, and would also prescribe certain rulemaking procedures provided under 5 U.S.C. 553, but not included in the original rule. Interested persons were invited to comment on the proposal no later than July 8, 1976.

In response, the Department received only one comment. The commenter, while agreeing that the proposal substantially improves the original rule, nevertheless criticized the definition of "rule" and the explanation of public procedure as arbitrary and vague. In particular, the comment inquired about the relationship between rules and HUD issuances such as handbooks, circulars and guides. As the preamble to the proposal pointed out, HUD's Unified Issuance System no longer includes circulars and guides (see also HUD Handbook 2130.1, available from the HUD Public Information Center, 451 7th Street, S.W., Washington, D.C. 20410). Handbooks are now the medium for disseminating instructions and advice to HUD personnel and program participants when such instructions and advice are not regulatory in nature. Neither handbooks nor notices, which are intermediate issuances complementing handbooks and periodically assimilated by them, are published in the FEDERAL REGISTER, although such regulatory provisions as they may contain may be promulgated separately by rule.

We recognize that the definition of Rule contained in § 10.2(a) is broad; however, this definition has been adopted from the conforming statute, 5 USC 551(4), with changes made only to meet HUD's particular program responsibility. We also consider the proposal to be sufficiently clear that public procedure includes the filing of written comments and, at the Secretary's discretion, oral presentation. See §§ 10.10 and 10.12. No further description of the term is needed.

The Department is not making any changes of its own to the proposal which is hereby adopted as published on June 4, 1976, 41 FR 22583, and set forth hereinafter.

Findings of inapplicability with respect to environmental and economic impact were prepared for the proposed rule and copies made available in the Office of the Rules Docket Clerk, Room 10141, 451 7th Street, SW., Washington, D.C. Since the Department has previously determined that adoption of this rule will not affect the quality of human environment or the

V 41 I 156 AUG 11 76 UMI

national economy and since no change has been made in the substance of this rule, no further environmental or economic determination is being made at this time.

Effective date: This regulation shall be effective on August 11, 1976.

CARLA A. HILLS,
Secretary of Housing, and Urban Development.

Subpart A—General

Sec.
10.1 Policy.
10.2 Definitions.
10.3 Applicability.
10.4 Rules docket.

Subpart B—Procedures

10.6 Initiation of rule making.
10.8 Notice of proposed rule making.
10.10 Participation by interested persons.
10.12 Additional rule making proceedings.
10.14 Hearings.
10.16 Adoption of final rule.
10.18 Petitions for reconsideration.
10.20 Petitions for rule making.

AUTHORITY: The provisions of this Part 10 issued under Sec. 7(d) of the Department of Housing and Urban Development Act, 79 Stat. 670 (42 U.S.C. 3535(d)).

Subpart A—General

§ 10.1 Policy.

It is the policy of the Department of Housing and Urban Development to comply with rule making provisions of 5 U.S.C. 553 with respect to all HUD programs and functions, including matters that relate to public property, loans, grants, benefits, or contracts even though such matters are not subject to rule making under the statute. The Department therefore publishes general notices of proposed rulemaking in the FEDERAL REGISTER and gives interested persons an opportunity to participate in the rule making through submission of written data, views, and arguments with or without opportunity for oral presentation. Unless required by statute, notice and public procedure will be omitted if the Department determines in a particular case or class of cases that notice and public procedure are impracticable, unnecessary or contrary to the general interest. In a particular case, the reasons for the determination shall be stated in the rule making document. Notice and public procedure may also be omitted with respect to statements of policy, interpretative rules, rules governing the Department's organization or its own internal practices or procedures, or if a statute expressly so authorizes. A substantive rule will be published not less than 30 days before its effective date, unless it grants or recognizes an exemption or relieves a restriction or unless the rule itself states good cause for taking effect upon publication or less than 30 days thereafter. Statements of policy and interpretative rules will usually be made effective on the date of publication.

§ 10.2 Definitions.

(a) "Rule" means the whole or a part of a Departmental statement of general or particular applicability and future effect (1) designed to implement, interpret, or prescribe law or policy, or (2) describing the Department's organization, or its procedure or practice requirements.

(b) "Rule making" means the Departmental process for formulating, amending, or repealing a rule.

(c) "Secretary" means the Secretary or the Under Secretary of Housing and Urban Development, or any of the following heads of offices to whom the Secretary has expressly delegated authority to issue rules:

(1) Each Assistant Secretary of the Department and Deputy Assistant Secretary;

(2) The President of the Government National Mortgage Association;

(3) The Federal Insurance Administrator; or

(4) The Federal Disaster Assistance Administrator.

§ 10.3 Applicability.

(a) This part prescribes general rule making procedures for the issuance, amendment, or repeal of rules of the Secretary in which participation by interested persons is required by 5 U.S.C or by Department policy.

(b) The authority to issue rules, delegated by the Secretary, may not be redelegated unless expressly permitted.

§ 10.4 Rules docket.

(a) All documents relating to rule making procedures, including but not limited to advance notices of proposed rule making, notices of proposed rule making, written comments received in response to notices, withdrawals or terminations of proposed rule making, petitions for rule making, requests for oral argument in public participation cases, requests for extension of time, grants or denials of petitions or requests, transcripts or minutes of informal hearings, final rules and general notices are maintained in the Rules Docket Room, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410.

(b) Documents relating to rule making proceedings are public records. After a docket is established, any person may examine docketed material at any time during regular business hours, and may obtain a copy of any docketed material upon payment of the prescribed fee. (See Part 15 of this subtitle).

Subpart B—Procedures

§ 10.6 Initiation of rule making.

Rue making proceedings may be initiated on the Secretary's motion, or on the recommendation of a Federal State or local government or government agency, or on the petition of any interested person.

§ 10.8 Notice of proposed rule making.

Each notice of proposed rule making required by statute or by § 10.1 of this part is published in the Federal Register and includes—

(a) The substance or terms of the proposed rule or a description of the subject matter and issues involved;

(b) A statement of how and to what extent interested persons may participate in the proceeding;

(c) Where participation is limited to written comments, a statement of the time within which such comments must be submitted; and

(d) A reference to the legal authority under which the proposal is issued.

§ 10.10 Participation by interested persons.

(a) Unless the notice otherwise provides, any interested person may participate in rule making proceedings by submitting written data, views or arguments within the comment time stated in the notice. In addition, the Secretary may permit the filing of comments in response to original comments.

(b) In appropriate cases, the Secretary may provide for oral presentation of views in additional proceedings described in § 10.12.

§ 10.12 Additional rule making proceedings.

The Secretary may invite interested persons to present oral arguments, appear at informal hearings, or participate in any other procedure affording opportunity for oral presentation of views. The transcript or minutes of such meetings, as appropriate, will be kept and filed in the Rules Docket.

§ 10.14 Hearings.

(a) The provisions of 5 U.S.C. 556 and 557, which govern formal hearings in adjudicatory proceedings, do not apply to informal rule making proceedings described in this part. When opportunity is afforded for oral presentation, such informal "hearing" is a nonadversary, fact-finding proceeding. Any rule issued in a proceeding under this part in which a hearing is held is not based exclusively on the "record" of such hearing.

(b) When a hearing is provided, the Secretary will designate a representative to conduct the hearing, and if the presence of a legal officer is desirable, the General Counsel will designate a staff attorney to serve as the officer.

§ 10.16 Adoption of final rule.

All timely comments are considered in taking final action on a proposed rule. Each preamble to a final rule will contain a short analysis and evaluation of the significant issues set forth in the comments submitted, and a clear concise statement of the basis and purpose of the rule. Only relevant comments will be considered.

§ 10.18 Petitions for reconsideration.

Petitions for reconsideration of a final rule will not be considered. Such petitions, if filed, will be proposed as petitions for rule making in accordance with § 10.20.

§ 10.20 Petitions for rule making.

(a) Any interested person may petition the Secretary for the issuance, amendment, or repeal of a rule. Each petition shall—

(1) Be submitted to the Rules Docket Clerk, Room 10141, Department of Housing and Urban Development, Washington, D.C. 20410;

(2) Set forth the text or substance of the rule or amendment proposed or specify the rule sought to be repealed;

(3) Explain the interest of the petitioner in the action sought; and

(4) Set forth all data and arguments available to the petitioner in support of the action sought.

(b) No public procedures will be held directly on the petition before its disposition. If the Secretary finds that the petition contains adequate justification, a rule making proceeding will be initiated or a final rule will be issued as appropriate. If the Secretary finds that the petition does not contain adequate justification, the petition will be denied by letter or other notice, with a brief statement of the ground for denial. The Secretary may consider new evidence at any time; however, repetitious petitions for rule making will not be considered.

[FR Doc.76-23380 Filed 8-10-76;8:45 am]

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-2245]

PART 1915—IDENTIFICATION AND MAPPING OF SPECIAL HAZARD AREAS

List of Communities With Special Hazard Areas

• The purpose of this notice is the identification of communities with areas of special flood or mudslide or erosion hazards in accordance with Part 1915 of Title 24 of the Code of Federal Regulations as authorized by the National Flood Insurance Program (42 U.S.C. 4001–4128). The identification of such areas is to provide guidance so that communities may adopt appropriate flood plain management measures to minimize damage caused by flood losses and to guide future construction, where practicable, away from locations which are threatened by flood hazards. •

The Flood Disaster Protection Act of 1973 requires the purchase of flood insurance on and after March 2, 1974, as a condition of receiving any form of Federal or Federally related financial assistance for acquisition or construction purposes in an identified flood plain area having special flood hazards that is located within any community participating in the National Flood Insurance Program.

One year after the identification of the community as flood prone, the requirement applies to all identified special flood hazard areas within the United States, so that, after that date, no such financial assistance can legally be provided for acquisition and construction in these areas unless the community has entered the program. The prohibition, however, does not apply to loans by a Federally regulated, insured, supervised or approved bank prior to March 1, 1976, to finance the acquisition of a previously occupied residential dwelling.

The effective date of identification shall be September 10, 1976, or the date which appears in this notice, whichever is later.

This 30 day period does not supersede the statutory requirement that a community, whether or not participating in the program, be given the opportunity for a period of six months to establish that it is not seriously flood prone or that such flood hazards as may have existed have been corrected by floodworks or other flood control methods. The six months period shall be considered to begin September 10, 1976 or the effective date of the Flood Hazard Boundary Map, whichever is later. Similarly, the one year period a community has to enter the program under Section 201(d) of the Flood Disaster Protection Act of 1973 shall be considered to begin September 10, 1976 or the effective date of the Flood Hazard Boundary Map, whichever is later.

Where several dates appear in the column set forth below marked Effective Date of Identification, the first date is the date of initial identification, and all other dates represent modification by additions or deletions to identified areas with special hazards.

Accordingly, § 1915.3 is amended by adding in alphabetical sequence a new entry to the table, which entry reads as follows:

§ 1915.3 List of communities with special hazard areas (FHBM's in effect).

State	County	Location	Map No.	Local map repository	Effective date of identification of areas which have special flood hazard
Alabama	Marshall	Albertville, city of	H 010366 01 through H 010366 15.	Mayor, 201 South Broad St., Albertville, Ala. 35950	Oct. 1, 1976

PART 1916—CONSULTATION WITH LOCAL OFFICIALS

Changes Made in Determinations of City of Las Cruces, New Mexico

On June 25, 1976, at 41 FR 26415, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas. The list included Flood Insurance Rate Maps for portions of the City of Las Cruces, New Mexico.

The Federal Insurance Administration, after consultation with the Chief Executive Officer of the community, has determined that it is appropriate to modify the base (100-year) flood elevations of some locations in the City of Las Cruces, New Mexico. These modified elevations are currently in effect and amend the Flood Insurance Rate Map, which was in effect prior to this determination. A revised rate map will be published as soon as possible. The modifications are made pursuant to section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234) and are in accordance with the National Flood Insurance Act of 1968, as amended (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90–448) 42 U.S.C. 4001–4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 355332A, and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the modified elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

From the date of this notice, any person has 90 days in which he can request through the community that the Federal Insurance Administrator reconsider the changes. Any request for reconsideration must be based on knowledge of changed conditions or new scientific or technical data. All interested parties are on notice that until the 90-day period elapses, the Administrator's new determination of elevations may itself be changed.

Any persons having knowledge or wishing to comment on these changes should immediately notify:

Mr. Harold R. Yungmeyer, City Manager, City of Las Cruces, P.O. Box 760, Las Cruces, New Mexico 88001.

Also, at this location is the map showing the new base flood elevations. This map is a copy of the one that will be printed. The numerous changes made in the base flood elevations on the Las Cruces, New Mexico Flood Insurance Rate Map make it administratively infeasible to publish in this notice all of the base flood elevation changes contained on the Las Cruces, New Mexico map.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: July 22, 1976.

H. B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-2134]

PART 1916—CONSULTATION WITH LOCAL OFFICIALS

Changes Made in Determinations of City of Alcoa, Tennessee, Base Flood Elevations

On June 25, 1976, at 41 FR 26415, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas. The list included Flood Insurance Rate Maps for portions of the City of Alcoa, Tennessee.

The Federal Insurance Administration, after consultation with the Chief Executive Officer of the community, has determined that it is appropriate to modify the base (100-year) flood elevations of some locations in the City of Alcoa, Tennessee. These modified elevations are currently in effect and amend the Flood Insurance Rate Map, which was in effect prior to this determination. A revised rate map will be published as soon as possible. The modifications are made pursuant to section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234) and are in accordance with the National Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90–448) 42 U.S.C. 4001–4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 475421A, and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the modified elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

From the date of this notice, any person has 90 days in which he can request through the community that the Federal Insurance Administrator reconsider the changes. Any request for reconsideration must be based on knowledge of changed conditions or new scientific or technical data. All interested parties are on notice that until the 90-day period elapses, the Administrator's new determination of elevations may itself be changed.

Any persons having knowledge or wishing to comment on these changes should immediately notify:

Honorable Andrew Knox, Mayor, City of Alcoa, Municipal Building, Alcoa, Tennessee 37701.

Also, at this location is the map showing the new base flood elevations. This map is a copy of the one that will be printed. The numerous changes made in the base flood elevations on the Alcoa, Tennessee Flood Insurance Rate Map make it administratively infeasible to publish in this notice all of the base flood elevation changes contained on the City of Alcoa, Tennessee map.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974)

Issued: July 23, 1976.

PART 1916—CONSULTATION WITH LOCAL OFFICIALS

Final Flood Elevation Determinations for City of Corpus Christi, Texas

On November 14, 1975, at 40 FR 53009, the Federal Insurance Administrator published a notification of modification of the base (100-year) flood elevations in Corpus Christi, Texas. Since that date, ninety days have elapsed, and the Federal Insurance Administrator has evaluated requests for changes in the base flood elevations, and after consultation with the Chief Executive Officer of the community, has determined no changes are necessary. Therefore, the modified flood elevations are effective as of October 31, 1975 and amend the Flood Insurance Rate Map which was in effect prior to that date.

The modifications are pursuant to Section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234) and are in accordance with the National Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448) 42 U.S.C. 4001–4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 485464 B and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the modified elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for

[Docket No. FI-852]

PART 1916—CONSULTATION WITH LOCAL OFFICIALS

Final Flood Elevation Determinations for City of Richwood, Texas

On February 2, 1976, at 41 FR 4824, the Federal Insurance Administrator published a notification of modification of the base (100-year) flood elevations in the City of Richwood, Texas. Since that date, ninety days have elapsed, and the Federal Insurance Administrator has evaluated requests for changes in the base flood elevations, and after consultation with the Chief Executive Officer of the community, has determined no changes are necessary. Therefore, the modified flood elevations are effective as of January 16, 1976 and amend the Flood Insurance Rate Map which was in effect prior to that date.

The modifications are pursuant to Section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234) and are in accordance with the National Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448) 42 U.S.C. 4001–4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 485502 D and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the modified elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The numerous changes made in the base flood elevations on the City of Richwood, Texas Flood Insurance Rate Map make it administratively infeasible to publish in this notice all of the base flood elevation changes contained on the Richwood map.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 29, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974)

Issued: June 15, 1976.

[Docket No. FI-863]

PART 1916—CONSULTATION WITH LOCAL OFFICIALS

Final Flood Elevation Determinations for Borough of Belmar, New Jersey

On February 13, 1976, at 41 FR 6740, the Federal Insurance Administrator published a notification of modification of the base (100-year) flood elevations in Belmar, New Jersey. Since that date, ninety days have elapsed; and the Federal Insurance Administrator has evaluated requests for changes in the base flood elevations, and after consultation with the Chief Executive Officer of the community, has determined no changes are necessary. Therefore, the modified flood elevations are effective as of February 27, 1976 and amend the Flood Insurance Rate Map which was in effect prior to that date.

The modifications are pursuant to section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234) and are in accordance with the National Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448) 42 U.S.C. 4001–4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 345283C and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the final flood elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The numerous changes made in the base flood elevations on the Belmar, New Jersey Flood Insurance Rate Map make it administratively infeasible to publish in this notice all of the base flood elevation changes contained on the Belmar, New Jersey map.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: June 14, 1976.

[Docket No. FI-853]

PART 1916—CONSULTATION WITH LOCAL OFFICIALS

Final Flood Elevation Determinations for Town of Westwood, Massachusetts

On February 2, 1976, at 41 FR 4823, the Federal Insurance Administrator published a notification of modification of the base (100-year) flood elevations in Westwood, Massachusetts. Since that date, ninety days have elapsed; and the Federal Insurance Administrator has evaluated requests for changes in the base flood elevations, and after consultation with the Chief Executive Officer of the community, has determined no changes are necessary. Therefore, the modified flood elevations are effective as of January 30, 1976 and amend the Flood Insurance Rate Map which was in effect prior to that date.

The modifications are pursuant to section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234) and are in accordance with the National Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448) 42 U.S.C. 4001–4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 255225A and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the final flood elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The numerous changes made in the base flood elevations on the Westwood Flood Insurance Rate Map make it administratively infeasible to publish in this notice all of the base flood elevation changes contained on the Westwood map.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: June 14, 1976.

R. W. KRIMM,
Acting Federal Insurance Administrator.

[FR Doc.76-23386 Filed 8-10-76;8:45 am]

[Docket No. FI-862]

PART 1916—CONSULTATION WITH LOCAL OFFICIALS

Final Flood Elevation Determinations for City of Gretna, Louisiana

On February 13, 1976, at 41 FR 6739, the Federal Insurance Administrator published a notification of modification of the base (100-year) flood elevations in Gretna, Louisiana. Since that date, ninety days have elapsed; and the Federal Insurance Administrator has evaluated requests for changes in the base flood elevations, and after consultation with the Chief Executive Officer of the community, has determined no changes are necessary. Therefore, the modified flood elevations are effective as of February 13, 1976 and amend the Flood Insurance Rate Map which was in effect prior to that date.

The modifications are pursuant to section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234) and are in accordance with the National Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448) 42 U.S.C. 4001–4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 225198C and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the final flood elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The numerous changes made in the base flood elevations on the Gretna Flood Insurance Rate Map make it administratively infeasible to publish in this notice all of the base flood elevation changes contained on the Gretna, Louisiana map.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: June 11, 1976.

R. W. KRIMM,
Acting Federal Insurance Administrator.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Parts 17 and 222]

HAWAIIAN MONK SEAL

Proposed "Endangered" Status

CROSS REFERENCE: For a document issued jointly by the Department of Interior's U.S. Fish and Wildlife Service, and the Department of Commerce, National Oceanic and Atmospheric Administration, on the subject of the Hawaiian Monk Seal as a proposed "Endangered" Status, see FR Doc. 76-23275, appearing in the proposed rules section of this issue under the Department of Commerce, National Oceanic and Atmospheric Administration.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 910]

HANDLING OF LEMONS GROWN IN THE STATES OF CALIFORNIA AND ARIZONA

Proposed Approval of Expenses and Fixing of Rate of Assessment for 1976–77 Fiscal Year

This notice invites written comment relative to the proposed expenses of $378,000 and rate of assessment of $0.0315 per carton on lemons to support the activities of the Lemon Administrative Committee for the 1976–77 fiscal year under Marketing Order No. 910.

Consideration is being given to the following proposals submitted by the Lemon Administrative Committee, established pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in the State of Arizona and that part of the State of California south of a line drawn due east and west through the post office in Turlock, California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), as the agency to administer the terms and provisions thereof:

(1) That expenses that are reasonable and likely to be incurred by the Lemon Administrative Committee during the period August 1, 1976, through July 31, 1977, will amount to $378,000.

(2) That the rate of assessment for said period, payable by each handler in accordance with § 910.41, be fixed at $0.0315 per carton of lemons.

All persons who desire to submit written data, views, or arguments in connection with the aforesaid proposals should file the same, in quadruplicate, with the Hearing Clerk, United States Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, not later than August 31, 1976. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

Dated: August 6, 1976.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FmHA Instruction 104.1]

AVAILABILITY OF INFORMATION

Release of Credit Reports

Notice is hereby given that the Farmers Home Administration (FmHA) has under consideration the amendment of § 1813.7(d) (2) and (3) of Part 1813, Title 7, Code of Federal Regulations (40 FR 21696). The purpose of this amendment is to implement provisions of the Privacy Act of 1974 which provide for the release of credit reports to the subject of the report in response to the subject's request.

Interested persons are invited to submit written comments, suggestions or objections regarding the proposed amendments to the Chief, Directives Management Branch, Farmers Home Administration, United States Department of Agriculture, Room 6316, South Building, Washington, DC 20250, within 30 days from date of publication in the FEDERAL REGISTER. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Chief, Directives Management Branch, during regular business hours (8:15 am to 4:45 pm).

As proposed § 1813.7(d) (2) and (3) will read as follows:

§ 1813.7 Availability of identifiable material.

* * * * *

(d) * * *

* * * * *

(2) FmHA will release credit reports from a credit reporting company to the subject of the report at the subject's request.

(3) Persons furnishing a credit reference from outside the Government can be promised confidentiality under the exemption made available by 5 U.S.C. 552a(k)(5) and implemented in 7 CFR 1.123 for Credit Report File, USDA/FmHA. The promise of confidentiality must be made in good faith, for good reasons, and only if confidentiality is requested by the source.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[50 CFR Parts 17 and 222]

HAWAIIAN MONK SEAL

Proposed "Endangered" Status

The Director, National Marine Fisheries Service, and the Director, U.S. Fish and Wildlife Service, hereby issue a notice of proposed rulemaking that would list the Hawaiian monk seal (*Monachus schauinslandi*) as an endangered species throughout its range, pursuant to section 4 of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 et seq.) (hereinafter the Act). This proposed rulemaking would add this species to the List of Endangered and Threatened Wildlife found in 50 CFR 17.11 and and would reference such listing in 50 CFR 222.23. This proposed listing is based on a preliminary determination by the Director, National Marine Fisheries Service (hereinafter the Director and the NMFS, respectively), that the Hawaiian monk seal is an endangered species. The Hawaiian monk seal is found throughout the Hawaiian Archipelago, but is known to breed only on the islands of the Leeward Chain, including French Frigate Shoals, Laysan Island, Lisianski Island, Pearl and Hermes Reef, Midway Atoll, and Kure Atoll.

BACKGROUND

Section 4(a) of the Act states:

General.—The Secretary shall by regulation determine whether any species is an endangered or a threatened species because of any of the following factors:

(1) The present or threatened destruction, modification or curtailment of its habitat or range;

(2) Overutilization for commercial, sporting, scientific or educational purposes;

(3) Disease or predation;

(4) The inadequacy of existing regulatory mechanisms; or

(5) Other natural or man-made factors affecting its continued existence.

With the exception of enforcement responsibilities for certain plants, the Act defines "Secretary" to mean either the Secretary of the Interior or the Secretary of Commerce (as program responsibilities are vested pursuant to the provisions of Reorganization Plan Numbered 4 of 1970). Most marine species, including seals, are the sole responsibility of the Secretary of Commerce. The authority of the Secretary of Commerce has been delegated to the Director, NMFS.

In June 1975, a status review of the Hawaiian monk seal was completed wthin NMFS. This status review reported a rarity of the species, a high mortality in pups, a very low recruitment rate, and indications of population decline and harassment. The status review proposed that the species be classified as depleted under the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361–1407).

NMFS then sought the advice of the Marine Mammal Commission and its Committee of Scientific Advisors, providing them a copy of the NMFS status review. After reviewing available scientific information, the Commission on December 24, 1975, concurred with the NMFS assessment, supporting designation as depleted. In addition, the Commission recommended that the species be listed as an endangered species under the Endangered Species Act of 1973.

NMFS designated the Hawaiian monk seal as a depleted species (see 41 FR 30120, July 22, 1976). Although the moratorium on taking imposed by the Marine Mammal Protection Act of 1972 already applies to this species, the designation as depleted provides additional by prohibiting the issuance of permits to take for other than scientific research purposes.

Since December 1975, NMFS has conducted research efforts, in cooperation with the U.S. Fish and Wildlife Service, to supplement available data concerning the status and trends of the Hawaiian monk seal population. As a result of this research, the Northwest Fisheries Center, NMFS, released in May 1976, a preliminary document which reports the count of recent shipboard and beach surveys of this species. NMFS research on the species is continuing.

On May 26, 1976, the Marine Mammal Commission again recommended to NMFS the designation of the Hawaiian monk seal as an endangered species and in so doing transmitted on April 7, 1976, letter from the U.S. Coast Guard to the Commission (concerning Hawaiian monk seals on Kure Atoll and French Frigate Shoals) and the Commission's May 26, 1976 response thereto. This correspondence provided additional information and encouragement for protecting Hawaiian monk seals.

After preliminary consultation with officials of the State of Hawaii, the Director believes that the information now available to him clearly indicates the Hawaiian monk seal is presently in danger of extinction and supports the listing of this species as endangered.

SUMMARY OF FACTORS AFFECTING THE SPECIES

The findings in support of the Director's proposal are summarized herein and described under each of the five criteria of Section 4(a) of the Act.

(1) The present or threatened destruction, modification, or curtailment of its habitat or range. Beach areas formerly used by the Hawaiian monk seal as rookeries are now being used for man's activities. Successful rookery areas have been adandoned by the monk seal, a sensitive breeder easily frightened by man's activities and harassment by dogs. This curtailment of habitat is evidenced by a shift in rookeries from vegetative areas to non-vegetative, isolated, exposed sand pits. This is believed to be the cause of the severe decrease in reproductive success at Midway, and perhaps other areas, once considered major rookeries. The curtailment of habitat, and the shift from preferred to marginal rookeries, with the accompanying loss in recruitment, is the major factor threatening the species.

(2) Overutilization for commercial, sporting, scientific, or educational purposes. This factor is not applicable to the Hawaiian monk seal.

(3) Disease or predation. Shark predation, particularly on weaned pups, is an important cause of reduction in the already low population level of the Hawaiian monk seal. The number of sharks in waters surrounding the Hawaiian Islands may be increasing as a result of the cessation of the commercial shark fishery and shark control program in these waters. Disease is not known to be a factor in reduced population levels of this seal.

(4) The inadequacy of existing regulatory mechanisms. The Hawaiian monk seals in the Hawaiian Islands National Wildlife Refuge are subject to Federal jurisdiction under the National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd), which prohibits most activities and strictly controls others by express authorization. While this law affords protection to all wildlife found within the refuge, not all islands of concern are included in the refuge. The Marine Mammal Protection Act of 1972, as amended, affords protection in all areas by imposing a moratorium on the taking of the Hawaiian monk seal; however, exceptions are provided for research and public display purposes. While no permits have been issued for the removal of living animals from the wild, several permits have been issued for field research and collection of specimen materials from dead animals. Additional protection, including protection for habitat, could be gained by listing the species as endangered under the Act.

(5) Other natural or man-made factors affecting its continued existence. Boat navigation and recreational activities in waters where the Hawaiian monk seal occurs may also deleteriously affect the species.

EFFECT OF THIS RULEMAKING

Section 9(a) of the Act sets forth a series of general prohibitions which apply to all endangered species of fish and wildlife.

With respect to any endangered species listed pursuant to section 4 of the Act, it is unlawful for any person subject to the jurisdiction of the United States to:

(1) Import any such species into, or export any such species from, the United States;

(2) Take any such species within the United States or the territorial sea of the United States;

(3) Take any such species upon the high seas;

(4) Possess, sell, deliver, carry, transport, or ship, by means whatsoever, any such species taken in violation of (2) and (3) above;

(5) Deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity, any such species;

(6) Sell or offer for sale in interstate or foreign commerce any such species; or

(7) Violate any regulation pertaining to such species and promulgated by the Secretary pursuant to authority provided by the Act.

The term "take" means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.

The Act further provides certain limited exceptions to those general prohibitions. These exceptions include: a grandfather clause for species held in captivity or a controlled environment on December 28, 1973, and not for commercial purposes (section 9(b) of the Act); a one-year limited exemption to minimize undue economic hardship tied to a previous contract commitment (section 10(b) of the Act); and permits for scientific purposes or enhancement of propagation or survival of the species (section 10(a) of the Act).

In addition, NMFS regulations published in Parts 217–222 and Part 225 of Title 50 of the Code of Federal Regulations, set forth rules and procedures which apply to all endangered species under the jurisdiction of the Secretary of Commerce. These regulations provide for general provisions, civil procedures, seizure and forfeiture procedures, importation and exportation at designated ports, general and specific permit provisions, and Federal/State cooperation and financial assistance. In the event that the Hawaiian monk seal is listed as an endangered species, these regulations would be applicable to the species.

INTERAGENCY COOPERATION

The listing herein proposed would make available the protection afforded by section 7 of the Act. That section reads as follows:

Section 7. The Secretary shall review other programs administered by him and utilize

V 41 156 AUG 11 76 UMI

such programs in furtherance of the purposes of this Act. All other Federal departments and agencies shall in consultation with and with the assistance of the Secretary, utilize their authorities in furtherance of the purposes of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to Section 4 of this Act and by taking such action necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of such endangered species and threatened species or result in the destruction or modification of habitat of such species which is determined by the Secretary, after consultation as appropriate with the affected States, to be critical.

No "critical habitat" has yet been determined by MMFS for the Hawaiian monk seal. However, the other provisions of section 7 would be applicable.

No critical habitat is presently proposed for the Hawaiian monk seal. However, the Director recognizes that loss of habitat is the principal threat faced by this species and will propose critical habitat in the future, as appropriate. NMFS will actively consider any and all written information, including maps, submitted on the matter of delineating critical habitat for the Hawaiian monk seal. The concept of critical habitat was discussed in the FEDERAL REGISTER on April 22, 1975 (40 FR 17764–17765).

PUBLIC COMMENTS SOLICITED

Pursuant to section 4(b) of the Act, the Director is notifying the Governor of the State of Hawaii and various interested Federal agencies with respect to this proposal and requests any comments and recommendations before making a final determination on listing.

The Director intends that the rules finally adopted be as accurate and effective as possible in the conservation of any endangered or threatened species. Therefore, any written comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, private interests or any other interested party concerning any aspect of this proposed rulemaking are solicited. Comments are particularly sought concerning:

1. The existence of any other living members of this species;

2. Biological or other relevant data concerning any threat (or the lack thereof) to the Hawaiian monk seal;

3. The location of and reasons why any habitat of the Hawaiian monk seal should be determined to be "critical habitat" as provided for by section 7 of the Act; and

4. Additional information concerning the range and distribution of the Hawaiian monk seal.

Written comments, views, and other documents should be submitted, preferably in duplicate, to the Director, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235. All comments and other documents received no later than October 12, 1976, will be considered. The Director will consider requests for a public hearing, provided such requests are received by September 27, 1976. The holding of a public hearing is at the discretion of the Director.

The Director has determined that the proposed designation of the Hawaiian monk seal as an endangered species is not a major Federal action which would significantly affect the quality of the human environment within the meaning of the National Environmental Policy Act of 1969. Accordingly, the preparation of an environmental impact statement on the proposed action is not required. The Declaration setting forth this determination is available for inspection in the Marine Mammals and Endangered Species Division, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C. Comments and other documents received pertaining to the proposed listing are available for public review in the Marine Mammals and Endangered Species Division, at the above address, or may be obtained by writing the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235.

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Accordingly, it is proposed to amend Part 17, Subchapter B of Chapter I, Title 50 of the Code of Federal Regulations by adding to § 17.11(i) under the class entitled "Mammals" and immediately before "Seal, Mediterranean Monk" the following:

§ 17.11 Endangered and threatened wildlife.

* * * * *

Species			Range				
Common name	Scientific name	Population	Known distribution	Portion of range where threatened or endangered	Status	When listed	Special rules
*	*	*	*	*	*	*	*
Seal, Hawaiian Monk	*Monachus schauinslandi*	NA	Hawaiian archipelago	Entire	E	15	NA
*	*	*	*	*	*	*	*

PART 222—ENDANGERED FISH OR WILDLIFE

§ 222.23 [Amended]

In addition, it is proposed to amend § 222.23(a) of Subpart C, Part 222 of Chapter II, Title 50 of the Code of Federal Regulations by adding "Hawaiian monk seal (*Monachus schauinslandi*)" immediately before "Mediterranean monk seal (*Monachus monachus*)" in the second sentence.

Dated: August 5, 1976.

ROBERT W. SCHONING,
Director,
National Marine Fisheries Service.

LYNN A. GREENWALT,
Director,
U.S. Fish and Wildlife Service.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

[29 CFR Part 1601]

706 AGENCIES

Proposed Designation

Pursuant to § 1601.12 (i), Title 29 Chaptr 14 to the Code of Federal Regulations as revised and published in the FEDERAL REGISTER, 40 FR 3210M, January 20, 1975, the Equal Employment Opportunity Commission (hereinafter referred to as the Commission) proposes that the agencies listed below be designated as "706 Agencies" (§ 1601.12(c)). There are three (3) purposes for such designation: First, that the agencies receive charges deferred by the Commission pursuant to section 706 (c) and (d) of Title VII of the Civil Rights Act of 1964, as amended; second, that the Commission accord "substantial weight" to the final findings and orders of those agencies pursuant to § 1601.19B(e); and third, to commence the 15-day period within which any person or organization may file written comments as provided for under § 1601.12(i)(1). At the expiration of the 15-day period, the Commission may effect designation of each of the agencies by publishing the list of them as an amendment to § 1601.12(m). Additions to the list may be made by the Commission by similar notice and publication.

The proposed "706 Agency" is as follows:

SOUTH CAROLINA HUMAN AFFAIRS COMMISSION

Written comments pursuant to this notice must be filed with the Commission on or before August 24, 1976.

Signed at Washington, D.C. this 6th day of August 1976.

ETHEL BENT WALSH,
Vice Chairman, Equal Employment Opportunity Commission.

[FR Doc.76–23415 Filed 8–10–76;8:45 am]

FEDERAL TRADE COMMISSION

[16 CFR Part 456]

ADVERTISING OF OPHTHALMIC GOODS AND SERVICES

Additional Hearings on Proposed Trade Regulation Rule

On April 2, 1976, the Presiding Officer published in the FEDERAL REGISTER (41 FR 14194) Final Notice of a proposed trade regulation rule proceeding concerning the Advertising of Ophthalmic Goods and Services. The notice included a schedule of dates and places of public hearings to be held in that proceeding. By a subsequent notice published in the FEDERAL REGISTER on April 16, 1976 (41 FR 16183) the date for the commencement of the public hearings in New York City was changed to July 19, 1976.

Commission attorneys and representatives of interested groups have informally requested that the Presiding Officer schedule an additional Washington, D.C. public hearing date for the purpose of allowing certain witnesses to present testimony concerning the proposed rule. The Commission attorneys and group representatives consider the testimony of these witnesses to be of particular importance to this proceeding. The witnesses were unable to participate in the hearings held previously in Washington, D.C. because there was insufficient time for the Commission staff and group representatives to prepare adequately for cross-examination of them.

In view of the above, the Presiding Officer has scheduled additional public hearings to be held commencing at 9:30 a.m., September 8, 1976, in Room 532 of the Federal Trade Commission Building, Pennsylvania Avenue at Sixth Street, NW., Washington, D.C. and will confine the hearings to the testimony of those witnesses.

Prepared statements of witnesses at the mentioned public hearings will be made available for inspection in the office of Ann Stahl Guler, Room 421, of the Federal Trade Commission Building, in Washington, D.C. at the above address; Telephone No. (202) 523–3435, on and after August 20, 1976.

Issued: August 5, 1976.

HENRY B. CABELL,
Presiding Officer.

[FR Doc.76–23350 Filed 8–11–76;8:45 am]

URUGUAY, AID REPRESENTATIVE, ET AL.

Redelegation of Authority

Section I. Pursuant to the authority delegated to me by (i) Delegation of Authority No. 38 from the Administrator of A.I.D. dated April 10, 1964, as amended, and (ii) Delegation of Authority No. 99 from the Administrator of A.I.D. dated April 27, 1973, I hereby delegate to:

(a) The A.I.D. Representative in Uruguay,

(b) The A.I.D. Affairs Officer in Costa Rica, in Barbados, and in Jamaica;

(c) The Director of the United States A.I.D. Mission in all other countries in the Latin American Region of A.I.D.,

the following authorities with respect to the implementation of approved programs of A.I.D. for the country to which such official is assigned:

1. To sign project agreements, trust fund agreements, and grant agreements with foreign governments, foreign government agencies, and international organizations having a membership consisting primarily of such foreign governments,

2. To approve country contracts for capital projects financed in whole or in part by an A.I.D. grant, and

3. To sign Project Implementation Orders—Technical Services (PIO/T).

Section II. The authorities delegated in Section I are subject to all applicable provisions of law, and shall be exercised in conformity with all restrictions, regulations, manual orders and directives which are now in effect or which may be issued hereafter governing the operations of A.I.D. programs.

Section III. The authorities delegated in Section I may be exercised by persons who are serving in an acting capacity, and may be redelegated by the specified officials to their principal deputy.

Section IV. The redelegation of authority previously issued by me on October 1, 1973, is hereby rescinded as of this date. This deleagtion shall be deemed effective as of this date and shall continue in effect until rescinded by me.

Dated: July 9, 1976.

HERMAN KLEINE,
Assistant Administrator for Latin America.

[CM-6/74]

SECRETARY OF STATE'S ADVISORY COMMITTEE ON PRIVATE INTERNATIONAL LAW

Meeting

A meeting of the Secretary of State's Advisory Committee on Private International Law will be held at 10 a.m. on Friday, September 17, 1976, in room 5519 of the Department of State. Members of the general public may attend and participate in the discussion subject to instructions of the Chairman.

The principal purpose of the meeting is to review draft conventions on conflict of laws relating to agency, marriage, and matrimonial property and to recommend positions which the United States might take on those drafts at the Thirteenth Session of the Hague Conference on Private International Law in October.

Members of the general public who desire to attend the meeting will be admitted up to the limits of the capacity of the meeting room. Entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. It is requested that prior to September 17, 1976, members of the general public who plan to attend the meeting inform their name, affiliation and address to Mr. Robert E. Dalton, Office of the Legal Adviser, Department of State; the telephone number is area code 202, 632-2107. All non-government attendees at the meeting should use the C Street entrance.

Dated: August 2, 1976.

ROBERT E. DALTON,
Executive Director.

SHORELINE EROSION ADVISORY PANEL

Meeting

Pursuant to section 10(a) of the Federal Advisory Committee Act (Pub. L. 92-463) notice is hereby given of a meeting of the Shoreline Erosion Advisory Panel on August 30-31, 1976.

The meeting will be held in the meeting room (Brent I), Old Town Holiday Inn, 480 King Street, Alexandria, Virginia, from 0830 hours to 1630 hours on August 30, 1976 and from 0830 hours to 1230 hours on August 31, 1976.

The meeting will be devoted to presentations by the public and manufacturers of shore protection devices and methods; action to be taken by the Panel on recommended sites on the Atlantic, Gulf, Pacific, and Great Lakes Coasts, and Delaware Bay; and action on recommended devices for the recommended sites.

Participation by the public is scheduled on the agenda at 1130 to 1200 hours on August 31, 1976.

The meeting will be open to the public subject to the following:

1. Since seating capacity of the meeting room at the Old Town Holiday Inn limits public participation to not more than 30 people, advance notice of intent to attend, although not required, is requested in order to assure adequate arrangements for those wishing to attend.

2. Oral participation by public attendees is encouraged during those times scheduled on the agenda. Written statements may be submitted prior to the meeting or up to 30 days after the meeting.

Inquiries, notices of intent to attend the meeting, written statements for consideration of the Panel may be addressed to Colonel John H. Cousins, Executive Secretary, Shoreline Erosion Advisory Panel, Kingman Building, Fort Belvoir, VA 22060, Telephone (202) 325-7518.

Dated: August 5, 1976.

By authority of the Secretary of the Army.

R. S. SEEBERG,
LTC, U.S. Army, Acting Director, Administrative Management, TAGCEN.

DOD ADVISORY GROUP ON ELECTRON DEVICES

Advisory Committee Meeting

Working Group C (Mainly Imaging and Display) of the DoD Advisory Group on Electron Devices (AGED) will meet in closed session at 201 Varick Street, New York, NY 10014, on September 2, 1976.

The purpose of the Advisory Group is to provide the Director of Defense Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group C meeting will be limited to review of research and development programs which the Military Departments proposed to initiate with industry, universities or in their laboratories. This special device area includes such programs as Infrared and Night Vision Sensors. The review will include classified program details throughout.

In accordance with section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Advisory Group meeting concerns matters listed in section 552(b) of Title 5 of the United States Code, specifically subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and Directives, OASD (Comptrollcr).

AUGUST 5, 1976.

[FR Doc.76-23292 Filed 8-10-76;8:45 am]

WAGE COMMITTEE

Closed Meetings

Pursuant to the provisions of section 10 of Pub. L. 92-463, the Federal Advisory Committee Act, effective January 5, 1973, notice is hereby given that a meeting of the Department of Defense Wage Committee will be held on Tuesday, October 5, 1976; Tuesday, October 12, 1976; Tuesday, October 19, 1976; and Tuesday, October 26, 1976 at 9:45 a.m. in Room 1E801, The Pentagon, Washington, D.C.

The Committee's primary responsibility is to consider and submit recommendations to the Assistant Secretary of Defense (Manpower and Reserve Affairs) concerning all matters involved in the development and authorization of wage schedules for Federal prevailing rate employees pursuant to Pub. L. 92-392. At this meeting, the Committee will consider wage survey specifications, wage survey data, local wage survey committee reports and recommendations, and wage schedules derived therefrom.

Under the provisions of section 10(d) of Pub. L. 92-463, the Federal Advisory Committee Act, meetings may be closed to the public when they are "concerned with matters listed in section 552(b) of Title 5, United States Code." Two of the matters so listed are those "related solely to the internal personnel rules and practices of an agency," (5 U.S.C. 552(b)(2)), and those involving "trade secrets and commercial or financial information obtained from a person and privileged or confidential" (5 U.S.C. 552(b)(4)).

Accordingly, the Deputy Assistant Secretary of Defense (Civilian Personnel Policy) hereby determines that this meeting will be closed to the public because the matters considered are related to the internal rules and practices of the Department of Defense (5 U.S.C. 552(b)(2)), and the detailed wage data considered by the Committee during its meetings have been obtained from officials of private establishments with a guarantee that the data will be held in confidence (5 U.S.C. 552(b)(4)).

However, members of the public who may wish to do so are invited to submit material in writing to the Chairman concerning matters believed to be deserving of the Committee's attention. Additional information concerning this meeting may be obtained by contacting the Chairman, Department of Defense Wage Committee, Room 3D281, The Pentagon, Washington, D.C.

MAURICE W. ROCHE,
Director, Correspondence and Directives, OASD (Comptroller).

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Power Projects 821 and 1577]

ALASKA

Restoration of Lands in Power Withdrawals

AUGUST 3, 1976.

1. In an order issued February 23, 1973 FR Doc. 73-3893, 38 FR 5685), the Federal Power Commission vacated the land withdrawals created by the filing of applications for licenses for Power Projects 821 and 1577, involving the following described lands:

(a) Power Project No. 821

CASCADE AND ROSA CREEKS, GRAVINA ISLAND, ALASKA

A parcel of land on the northeast side of Gravina Island, approximately 4 miles northwest of Ketchikan, as more particularly described in the above-referenced order. Containing approximately 81 acres.

(b) Power Project No. 1577

KODIAK ISLAND, ALASKA

A parcel of land near the west shore of Chip Cove, Moser Bay, an arm of Alitak Bay located within T. 36 S., R. 31 W., Seward Meridian, sections 23, 25, and 26, as more particularly described in the above-referenced order. Containing approximately 36.5 acres.

2. The lands described in paragraph 1 are hereby restored to operation of the applicable public land laws, subject to valid existing rights and the provisions of existing withdrawals. Those lands described in paragraph 1 that are within the Tongass National Forest are open to such disposition as may by law be made of national forest lands.

3. Inquiries concerning the lands should be addressed to the State Director, Bureau of Land Management, 555 Cordova Street, Anchorage, Alaska 99501.

CLAIR M. WHITLOCK,
Acting State Director.

[AA-8332]

ALASKA

Restoration of Lands in Power Withdrawals

AUGUST 3, 1976.

1. In two orders issued February 28, 1973 (FR Doc. 73-4290 and FR Doc. 73-4289, 38 FR 6227, 6228), the Federal Power Commission vacated in their entirety the withdrawals of land pursuant to the applications for Power Projects 160, 162, 383, 689, 951, 1222, 1232, 2001, 2178, and 2505. The lands involved are briefly described below. More detailed descriptions are contained in the above-referenced orders.

(1) Power Project No. 160. Vicinity of Orca Inlet, Prince William Sound, Chugach National Forest, Alaska. All lands within one-quarter mile of Power Creek for 2 miles of its length beginning at and extending upstream from Eyak Lake.

(2) Power Project No. 162. Same lands as Project No. 160 (see item 1 above).

(3) Power project No. 383. Located approximately 8 miles southwest of Hyder, Alaska, in the Tongass National Forest in the vicinity of Soule Glacier River.

(4) Power Project No. 689. Located along the Soule Glacier River near Hyder, Alaska.

(5) Power Project No. 951. Located on Chichagof Island in the Tongass National Forest in the vicinity of Rust Lake and Sister Lake.

(6) Power Project No. 1222. Located on Ward Creek, Revillagigedo Island, about 3 miles northwest of Ketchikan, Alaska.

(7) Power Project No. 1232. Located near Port Walter, Baranof Island, in the Tongass National Forest.

(8) Power Project No. 2001. Located near Port Walter, Baranof Island, in the Tongass National Forest.

(9) Power Project No. 2178. Same lands as Project No. 160 (see item 1 above).

V 41 1156 AUG 11 76 UMI

(10) Power Project No. 2505. Located along Power Creek near Cordova, Alaska.

2. The lands described in paragraph 1 are within the Chugach and Tongass National Forests. The lands are hereby opened to such disposition as may by law be made of national forest lands.

3. Inquiries concerning the lands should be addressed to the State Director, Bureau of Land Management, 555 Cordova Street, Anchorage, Alaska 99501.

CLAIR M. WHITLOCK,
Acting State Director.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

[Notice of Designation Number A360]

TEXAS

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in the following Texas Counties as a result of a severe hailstorm May 25, 1976, in Baylor County; hail and heavy rains May 25, 1976, in Bosque County; a hailstorm May 25, 1976, in Foard County; hail, damaging winds, and excessive rainfall May 25, 1976, in Somervell County; a serve thunderstorm with very high winds and hail May 31, 1976, in Starr County; hailstorms May 23 and May 25, 1976, in Swisher County; and excessive rainfall, a hailstorm, and excessive straight winds May 25, 1976, in Young County.

Therefore, the Secretary has designated this area as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Public Law 94-68, and the provisions of 7 CFR 1832.-3(b) including the recommendation of Governor Dolph Briscoe that such designation be made.

Applications for emergency loans must be received by this Department no later than September 29, 1976, for physical losses and May 3, 1977, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, DC, this 5th day of August 1976.

FRANK B. ELLIOTT,
Administrator,
Farmers Home Administration.

TETON WILDERNESS ADDITION PROPOSAL

Public Hearing

Notice is hereby given in accordance with provisions of the Act of September 3, 1964 (78 Stat. 890, 16 U.S.C. 1131-1132) that a public hearing will be held, beginning at 2 p.m. on September 30, 1976, in the Teton County Courthouse, Jackson, Wyoming, on a proposal for an addition to the Teton Wilderness comprised of approximately 28,318 acres contiguous to the Teton Wilderness. The proposed addition to the Teton Wilderness is located in the Bridger-Teton National Forest in the County of Teton in the State of Wyoming.

A brochure containing a map and information about the proposed Wilderness may be obtained from the Forest Supervisor, Bridger-Teton National Forest, Forest Service Building, Jackson, Wyoming 83001.

Individuals and organizations may express their views by appearing at the hearing, or may submit written comments for inclusion in the official record to Forest Supervisor, Bridger-Teton National Forest, Forest Service Building, Jackson, Wyoming 83001. Written comments must be received within 30 days following the hearing dates to be included in the official record.

REXFORD A. RESLER,
Associate Chief.

EXPORTERS' TEXTILE ADVISORY COMMITTEE

Public Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. IV, 1974) notice is hereby given that a meeting of the Exporters' Textile Advisory Committee will be held at 10 a.m., on September 28, 1976, in Room 3817, Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

The Committee which is comprised of 28 members involved in textile and apparel exporting, advises Department officials concerning ways of increasing U.S. exports of textile and apparel products.

The agenda for the meeting is as follows:

1. Review of Export Data.
2. Report on Conditions in the Export Market.
3. Recent Foreign Restrictions Affecting Textiles.
4. Other Business.

A limited number of seats will be available to the public on a first come basis. The public may file written statements with the Committee before or after the meeting. Oral statements may be presented at the end of the meeting to the extent time is available.

Copies of the minutes of the meeting will be made available on written request addressed to the DIBA Freedom of Information Officer, Freedom of Information Control Desk, Room 3100, U.S. Department of Commerce, Washington, D.C. 20230.

Further information concerning the Committee may be obtained from Arthur Garel, Director, Office of Textiles, Main Commerce Building, U.S. Department of Commerce, Washington. D.C. 20230, telephone 202-377-5078.

Dated: August 5, 1976.

NATIONAL ADVISORY COUNCIL ON DRUG ABUSE

Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the month of September 1976:

NATIONAL ADVISORY COUNCIL OF DRUG ABUSE

SEPTEMBER 27; 9:30 A.M., AND SEPTEMBER 28; 9:00 A.M.

Conference Room 873, Rockwall Building, Rockville, Maryland.

Open—September 27, 1:00-5:00 p.m., September 28.

Closed—September 27, 9:30 a.m. to 12:00 noon.

Contact Ms. Pamela Thurber, Rockwall Building, Room 840, 11400 Rockville Pike, Rockville, Md. 20352, 301-443-6618.

Purpose: The National Advisory Council on Drug Abuse advises and makes recommendations to the Secretary, Department of Health, Education, and Welfare, the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, and the Director, National Institute on Drug Abuse, on the development of new initiatives and priorities and the efficient administration of drug abuse research, training, demonstration, prevention and community services programs. The Council also gives advice on policies and priorities for drug abuse grants and contracts and reviews and make recommendations on grant applications.

Agenda: From 9:30 a.m. to 12:00 noon on September 27, the Council will conduct a final review of grant applications for Federal assistance and this session will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of sections 552(b)(5) and 552(b)(6), Title 5 U.S. Code and Section 10(d) of Public Law 92-463 (5 U.S.C. Appendix I).

The remainder of the meeting from 1:00 p.m. on September 27 until 5:00 p.m. on September 28 will be devoted to a discussion of issues in the field of drug abuse, orientation to the programs of the Institute, development of priorities for action by the Council, and administrative announcements and will be open.

Agenda items are subject to change as priorities dictate.

Substantive program information, summaries of the meeting and rosters of the Council members can be obtained from the contact person listed above.

Dated: August 4, 1976.

CAROLYN T. EVANS,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

[Docket No. 75G-0336]

DEAN FOODS CO.

Filing of Petition for Affirmation of GRAS Status

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 701(a), 52 Stat. 1055, 72 Stat. 1784-1788 (21 U.S.C. 321(s), 348, 371(a))) and the regulations for affirmation of GRAS status (21 CFR 121.40), published in the FEDERAL REGISTER of December 2, 1972 (37 FR 25705), notice is given that a petition (GRASP 6G0065) has been filed by Dean Foods Co., 1126 Kilburn Ave., Rockford, IL 61101 and placed on public display at the office of the Hearing Clerk, Food and Drug Administration, proposing affirmation that modified whey, modified whey-demineralized, and modified whey-demineralized-delactosed are generally recognized as safe (GRAS) for use in human food.

Any petition which meets the format requirements outlined in 21 CFR 121.40 is filed by the Food and Drug Administration. There is no prefiling review of the adequacy of data to support a GRAS conclusion. Thus the filing of a petition for GRAS affirmation should not be interpreted as a preliminary indication of suitability for affirmation.

Interested persons may, on or before October 12, 1976, review the petition and/or file comments (preferably in quintuplicate) with the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852. Comments should include any available information that would be helpful in determining whether the substance is, or is not, generally recognized as safe. A copy of the petition and received comments may be seen in the office of the Hearing Clerk, address given above, during working hours, Monday through Friday.

Dated: August 3, 1976.

HOWARD R. ROBERTS,
Acting Director, Bureau of Foods.

LAND O'LAKES, INC.

Filing of Petition for Affirmation of GRAS Status

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 701(a), 52 Stat. 1055, 72 Stat. 1784-1788 (21 U.S.C. 321(s), 348, 371(a))) and the regulations for affirmation of GRAS status (21 CFR 121.40), published in the FEDERAL REGISTER of December 2, 1972 (37 FR 25705), notice is given that a petition (GRASP 6G0075) has been filed by Land O'Lakes, Inc., P.O. Box 116, Minneapolis, MN 55440, and placed on public display at the office of the Hearing Clerk, Food and Drug Administration, proposing affirmation that modified whey-partially delactosed and, partially demineralized are generally recognized as safe (GRAS) for use in human food.

Any petition which meets the format requirements outlined in 21 CFR 121.40 is filed by the Food and Drug Administration. There is no prefiling review of the adequacy of data to support a GRAS conclusion. Thus the filing of a petition for GRAS affirmation should not be interpreted as a preliminary indication of suitability for affirmation.

Interested persons may, on or before October 12, 1976, review the petition and/or file comments (preferably in quintuplicate) with the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852. Comments should include any available information that would be helpful in determining whether the substance is, or is not, generally recognized as safe. A copy of the petition and received comments may be seen in the office of the Hearing Clerk, address given above, during working hours, Monday through Friday.

Dated: August 3, 1976.

Health Services Administration

GRANTS FOR COMPREHENSIVE HEMOPHILIA DIAGNOSTIC AND TREATMENT CENTERS

Availability of Application

Section 606 of Pub. L. 94-63 amended Title XI of the Public Health Service Act by adding a new section 1131 thereto. The new section 1131 gives the Secretary authority to make grants to public and nonprofit private entities for projects for the establishment of comprehensive hemophilia diagnostic and treatment centers.

It is anticipated that regulations implementing section 1131 will be published shortly; grants will not be made under the section until they are published. However, in order to facilitate the development of applications for viable projects under section 1131 prior to the expiration of the fiscal year 1976 funds appropriated for that purpose, the Secretary has concluded that he should provide potential applicants with preliminary information and guidance in developing such projects and applications therefor. Accordingly, notice is hereby given that preliminary information and guidance on developing applications for funds under section 1131 may be obtained by writing the Office for Maternal and Child Health, Bureau of Community Health Services, 5600 Fishers Lane, Room 7-15, Rockville, Maryland 20852. All information and guidance so obtained is provided subject to the understanding that it reflects preliminary policies only and that subsequent policy changes, as contained in the regulations, may require appropriate alterations in project applications and design.

Dated: August 2, 1976.

JOHN H. KELSO,
Deputy Administrator,
Health Services Administration.

[FR Doc.76-23282 Filed 8-10-76;8:45 am]

MISSOURI STATEWIDE PROFESSIONAL STANDARDS REVIEW COUNCIL

Nominations for Public Member Positions

Notice is hereby given that pursuant to section 1162(b) of the Social Security Act (the Act) [42 U.S.C. 1320c-11(b)], nominations are being accepted

V 41 156 AUG 11 76 UMI

for public membership positions on the Missouri Statewide Professional Standards Review Council (Statewide Council). Section 1162(a) of the Act mandates that a Council shall be established in each State where there are located three or more Professional Standards Review Organizations (PSROs). As there are located three conditional PSROs in Missouri, the Missouri Statewide Council is being formed.

The PSRO program is established under Title XI, Part B of the Act, enacted by the 1972 Amendments to the Act (Pub. L. 92-603) to provide for physician-directed review of the utilization and quality of medical care services paid for by the Medicare, Medicaid, and Maternal and Child Health and Crippled Children Services programs. The Statewide Council component of the PSRO program will perform a number of functions, including: (1) Coordinating activities of PSROs and disseminating information and data among PSROs in the State under section 1162(c) of the Act; (2) reviewing PSRO reconsiderations under section 1159(a) of the Act; (3) reviewing PSRO sanction reports under section 1157 of the Act; (4) using its influence to assure that practitioners and providers comply with the obligations of the legislation under section 1160(c) of the Act; (5) assisting the Secretary of Health, Education, and Welfare in developing uniform data gathering and operating procedures among PSROs in the State, in evaluating PSRO performance, and, should it become necessary, in developing and arranging for a qualified replacement for a PSRO under section 1162(c) of the Act.

There will be four public representatives on the Statewide Council. Persons or organizations wishing to submit nominations for public members are advised that each nominee will be considered by the Secretary on the basis of whether such nominee is:

(1) Knowlegeable about health care in Missouri as provided under the Maternal and Child Health and Crippled Children Services, Medicare and Medicaid programs (Titles V, XVIII, XIX of the Social Security Act respectively),

(2) Willing and able to represent the interests of the public; and

(3) Willing and able to discharge the responsibilities of membership in the Statewide Council.

Special consideration will be given to qualified representatives of organizations and groups which are not otherwise included on the Statewide Council (PSRO representatives or physician representatives) or on the Statewide Council Advisory Group (nonphysician health care practitioners, hospitals, and other health care facilities). Since nominees for public member positions on the Statewide Council should represent a broad segment of public interest, involvement in community activities should be outlined in the curriculum vitae submitted with the nomination.

After due consideration of all nominees, including nominees of the Governor of Missouri, the Secretary of Health, Education, and Welfare will appoint four public representatives, at least two of whom shall have been recommended by the Governor under section 1162(b)(3) of the Act.

All nominations from the general public for public member positions on the Statewide Council, together with a curriculum vitae, should be sent to Holman R. Wherritt, M.D., Regional Health Administrator at Department of Health, Education, and Welfare, Region VII Office, 601 East 12th Street, Kansas City, Missouri 64106. To ensure consideration, nominations should be received on or before October 12, 1976. Further information concerning the nature and function of the Statewide Council and the role of public members in Council activities may be obtained by contacting the Office of the Regional Health Administrator at (816) 374-3291.

Dated: July 27, 1976.

JOHN H. KELSO,
Deputy Administrator,
Health Service Administration.

RUTGERS COMMUNITY HEALTH PLAN

Qualified Health Maintenance Organizations

Notice is hereby given, pursuant to 42 CFR 110.605, that in the month of July 1976 the following entity has been determined to be a qualified health maintenance organization under section 1310 (d) of the Public Health Service Act (42 U.S.C. 300e-9(d)).

QUALIFIED HEALTH MAINTENANCE ORGANIZATION

Name, address, service area, and date of qualifiation. (Pre-operational qualified health maintenance organization: 42 CFR 110.603(c).)

1. Rutgers Community Health Plan, 88 College Avenue, New Brunswick, New Jersey 08903. Service area: Communities within a 15 mile radius of New Brunswick which includes all of Middlesex County and parts of Somerset, Union, Mercer, Monmouth and Morris Counties. Date of Qualification: July 1, 1976.

Files containing detailed information regarding this qualified health maintenance organization will be available for public inspection between the hours of 8:30 a.m. and 5 p.m., Monday through Friday, at the Office of the Administrator, Health Services Administration, Department of Health, Education, and Welfare, Room 14A-27, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852.

Questions about the review process or requests for information about qualified health maintenance organizations should be sent to the same office.

Dated: August 2, 1976.

JOHN H. KELSO,
Deputy Administrator,
Health Services Administration.

[FR Doc.76-23284 Filed 8-10-76;8:45 am]

Office of Education

TEACHER CORPS PROJECTS

Proposed Criteria for Selection of Applications

Pursuant to the authority contained in Part B-1 of the Education Professions Development Act of 1965, as amended (79 Stat. 1255-1258, as amended, 20 U.S.C. 1101-1107a), notice is hereby given that the Commissioner of Education, with the approval of the Secretary of Health, Education, and Welfare, proposes to issue the criteria set forth below as the basis on which applications submitted for Teacher Corps projects will be judged. Assistance under this program will be subject to Part 100a of Title 45 of the Code of Federal Regulations.

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposed criteria to the Teacher Corps, U.S. Office of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202. Comments received in response to this notice will be available for public inspection Mondays through Fridays between 8:30 a.m. and 4:30 p.m. at the Teacher Corps office, Room 1700 of the Donohoe Building, 400 Sixth Street, S.W., Washington, D.C.

All comments, suggestions, or objections to be considered must be received not later than September 27, 1976.

(Catalog of Federal Domestic Assistance Program No. 13.489, Teacher Corps—Operation and Training.)

Dated: June 23, 1976.

T. H. BELL,
Commissioner of Education.

Approved: August 4, 1976.

DAVID MATHEWS,
Secretary of Health,
Education, and Welfare.

I. CRITERIA FOR THE SELECTION OF TEACHER CORPS PROJECT APPLICATIONS

In addition to the criteria set forth in 45 CFR 100a.26(b), the following criteria will also be used as a basis for approving applications for Teacher Corps projects and in determining the amount of the award under approved applications:

(A) *Instructional Program.* The extent to which the proposed instruction program provides:

(i) Training options designed to enable Teacher Corps interns, teacher aids, and experienced teachers to provide individualized classroom instruction;

(ii) Adequate means for evaluating their competencies; and

(iii) Training to prepare these persons to serve in schools in areas having concentrations of low income families.

These low income areas are determined in accordance with Section 103 of Title I of the Elementary and Secondary Act of 1965, as amended. The training will relate to such matters as identifying children with learning and behavioral problems, diagnosing their special needs, and prescribing learning activities to meet those needs.

(20 U.S.C. 1101, 1103)

(B) *Community Based Education.* The extent to which the application sets forth opportunities for involvement of parents of children to be served by the proposed project in decision-making, planning, development, implementation, and evaluation of the project. There must be evidence that this participation has occurred during the development of the application and that provision is made for developing the capabilities of parents, residents in the community, and secondary education and college students to serve as part-time tutors or full-time instructional assistants in the project (including, where appropriate, provision for university courses). There must be procedure for adequate dissemination of program plans and evaluation to parents and the public.

(20 U.S.C. 1101, 1103, 1231d)

(C) *Institutional Adoption.* The extent to which the project is designed so that the successful elements of the project can be incorporated into the overall instructional program of the applicant institution or agency.

(20 U.S.C. 1101, 1103)

(D) *Needs Analysis.* Whether the retraining of experienced teachers and teacher aides, and the training of teacher interns, will be based on an analysis of the learning needs of children from low income families.

(20 U.S.C. 1101, 1103)

(E) *Multi-Cultural Consideration.* The extent to which the application supports activities that are responsive to the diverse cultures represented by the proposed project's target populations, and relates to the needs of the communities and students to be served by the Teacher Corps project. In applications for projects in areas where the target population is predominantly from one culture, there must be an indication of the extent to which the project will increase the children's knowledge of their own culture and other cultures as well.

(20 U.S.C. 1101, 1103)

(F) *Diagnostic-Prescriptive Teaching.* The extent to which the application contains provisions for training in:

(i) Skills needed to identify special learning problems;

(ii) Skills needed to diagnose particular learning needs; and

(iii) Skills needed to prescribe programs to meet these learning problems and needs.

The application must show how these skills can be applied to all children to be served by the project, and to improve the educational opportunities in the regular classroom for children with learning and behavioral problems. This must be an integral part of the program design for all projects.

(20 U.S.C. 1101, 1103)

(G) *School-Staff Focus.* The extent to which the proposed retraining of experienced teachers and teacher aides will be available to the entire educational staff of each school receiving a Teacher Corps intern team.

(20 U.S.C. 1101, 1103)

(H) *Field Based Instruction.* The extent to which appropriate aspects of the instruction for experienced teachers and teacher aides, teacher interns, or community volunteers, will be carried out in the school served by the project and the local community rather than at the participating college or university.

(20 U.S.C. 1101, 1103)

(I) *Collaborative Decision-Making.* The extent to which the application indicates that a school-community council for each participating school exists or will be developed to respond to the needs and wishes of those directly involved with the project (such as Teacher Corps members, staff, trainees, school administrators, and members of the community) and to those less directly involved (such as teacher unions, State Educational Agencies and other organizations which may influence or be affected by the project).

(20 U.S.C. 1101, 1103)

(J) *Intern Teams.* The extent to which the application sets forth a team organization which will be able to operate effectively in carrying out the purposes of the project. An intern team (except as otherwise determined by the Commissioner) consists of 4 interns led by an experienced teacher who is the team leader. There is one team for each Teacher Corps project.

(20 U.S.C. 1103)

(K) *Local Needs.* The extent to which the project has special characteristics which take account of local conditions (such as population density, housing patterns, etc.).

(20 U.S.C. 1101, 1103)

(L) *Equitable Geographical Distribution.* The extent to which approval of the project would further the equitable geographical distribution of projects, including proportional representation among urban and rural areas.

(20 U.S.C. 1101, 1103)

(M) *Management and Evaluation Plans.* The extent to which plans for program organization, management, and evaluation are set forth. Data collection procedures must be described based on program goals, performance criteria, and regular program review.

(20 U.S.C. 1101, 1103)

II. DEMONSTRATION REQUIREMENTS

Collectively, Teacher Corps projects should represent a coherent effort to demonstrate to all local educational agencies and communities the potential for training and retraining approaches. Therefore, each application for a Teacher Corps project must combine:

(i) The meeting of local educational needs and concerns, with

(ii) A demonstration project for the training of teacher interns and the retraining of experienced teachers and teacher aides that could have wider applicability than the local project.

To achieve this coherence and broader impact, the demonstration project must adopt one of the following broadly defined strategies:

(A) *The Training Complex.* This strategy is designed to provide training and retraining of educational personnel at a site located within or near the schools, and where a school program for children is to be conducted. The institution of higher education and the local educational agency establish the training complex where teacher interns and experienced teachers and teacher aides are to be trained and retrained. This is intended to become a permanent structure for training and retraining educational personnel for the local educational agency. Applications may show wide diversity in the features of a training complex, but they must describe plans for the direct involvement of training personnel from the institution of higher education at the training complex with school officials and the trainees, and a wide use of community and local educational agency resources for the development and delivery of both training and retraining.

(20 U.S.C. 1101, 1103)

(B) *Competency-Based Teacher Education.* This strategy specifies in advance what effective teachers should be able to do when the training is completed. It then measures their achievements by observing their work with children in a school. The training for experienced teachers, teacher interns, teacher aides, and community volunteers is delivered through sequential modules based on increasing their levels of competencies. Applications must describe how the proposed project will:

(i) Objectively define the needed competencies based on analysis of training and retraining needs:

(ii) Develop systematic management processes so that persons in training or retraining can evaluate their own learning needs and achievements;

(iii) Provide alternative modes of instruction to help trainees achieve the needed competencies relating to the improvement of educating students; and

(iv) Direct the use of university and other program resources towards meeting the needs of teacher interns, experienced teachers, teacher aides, and community volunteers within the local educational agencies served by the project.

(20 U.S.C. 1101, 1103)

(C) *Training for Implementing Alternative School Designs.* In local educational agencies where alternative school designs are planned, this strategy may be chosen to demonstrate, through a Teacher Corps project, a program of training teacher interns and retraining experienced teachers and teacher aides for implementing such an innovation. Applications must:

(i) Contain assurances that the local educational agency is already committed

V 41 1156
AUG 11 76
UMI

to an alternative design and that the institution of higher education involved in the Teacher Corps project will be able to demonstrate appropriate training and retraining activities;

(ii) Limit Teacher Corps resources to training and retraining, and provide evidence that locally controlled resources are committed to supporting other aspects of the project; and

(iii) Demonstrate a viable alternative strategy for improving the education of low income children by improving both the skills of educational personnel and the conditions under which education takes place.

(20 U.S.C. 1101, 1103)

(D) *Interdisciplinary Training Approaches.* This strategy should be chosen by those applicants who wish to demonstrate a training program for teacher interns and the retraining of experienced teachers and teacher aides that involves the participation in teacher education of representatives from various academic disciplines (such as the liberal and fine arts, physical and natural sciences, social sciences, and humanities). The approach selected must be aimed at increasing the educational opportunities of low income children by enriching and reorganizing the base of knowledge and experience for planning and managing learning activities. Applications must emphasize that there has been collaborative planning by representatives of diverse disciplines and that the proposed training and retraining is responsive to the cultural and community values of the families of the children to be served. Applications must also emphasize how and to what extent interrelationships among educational agencies and institutions (such as universities and local educational agencies) and other community institutions are to be improved by their choice of this strategy.

(20 U.S.C. 1101, 1103)

(E) *Training for the Systematic Adaption of Research Findings.* There is presently available, in immediately usable form, a substantial body of research results which has proven effective and is relevant to learning and educational processes for schools serving low income populations. This research represents a vast potential resource which, as yet, has not been organized into systemic or overall program demonstrations. These research findings can be incorporated into the design of Teacher Corps programs for the training of teacher interns and the retraining of experienced teachers and teacher aides by identifying training objectives, selecting approaches to training and evaluation, creating instructional materials and activities or adapting existing materials to new situations. Applications selecting this strategy must:

(i) Identify and describe the validated research findings that will be incorporated into a demonstration program of teacher intern training and the retraining of experienced teachers and teacher aides, and show the relationship of these research findings to the educational problems addressed by the application;

(ii) Indicate a plan for the systematic application of these findings to activities of practicing educational personnel; and

(iii) Show how the proposed program, based on these findings, will have applicability to other local educational agencies, and to educational groups, as a demonstration project.

(20 U.S.C. 1101, 1103)

Office of the Secretary

PRIVACY ACT OF 1974

Systems of Records and Notice of Proposed Routine Uses Therefor

Pursuant to the Privacy Act of 1974 (Pub. L. 93-579) as prescribed in 5 U.S.C. 552a(e)(4), the following modified notices of systems of records that are maintained by the Department of Health, Education, and Welfare are published as set forth below. These systems are currently ongoing and the changed and/or additional information in the notices are indicated by italics.

Prior to the final adoption of the proposed additional/modified routine uses of these notices, consideration in accordance with the requirements of 5 U.S.C. 552a(e)(11) will be given to comments which are submitted in writing on or before September 10, 1976. Comments should be addressed to the Director, Fair Information Practice Staff, Department of Health, Education, and Welfare, 200 Independence Avenue, S.W., Washington, D.C. 20201. Comments received will be available for inspection in Room 526E, South Portal Building, at the above address.

Due to a format error the system notice on "Workers Exposed to Benzidine—(Bladder Cancer)—HEW/CDC/NIOSH" published in the FEDERAL REGISTER on June 29, 1976 was inadvertently published twice on pp. 26735 and 26736 with some of the changed and/or additional information in each system notice. In order to clarify the situation for the reader, this notice numbered CDC NIOSH 0024.01 is published again with all of the changed and/or additional information in one listing of the notice. The .01 part of the number 0024.01 indicates that this is the first set of modifications to that notice.

Dated: August 4, 1976.

JOHN OTTINA,
Assistant Secretary for Administration and Management.

OS ASAM PT *05.02*

System name:

Employee Alcoholism, Drug Abuse and Emotional Problem Counselling and Referral Records HEW/OS/ASAM/PT.

Security classification:

None.

System location:

Personnel offices shown in Applicants for Employment Records, HEW System OS-ASAM-PT-1, Appendix 1 or designated offices performing counselling functions for employees in organizational units serviced by those personnel offices, *including the Public Health Employee Assistance Program offices listed in Appendix 1 of this notice.*

Categories of individuals covered by the system:

Department employees who have been counselled for work adjustment, personal or emotional health problems *and/or the abuse* of alcohol or drugs.

Categories of records in the system:

This system contains records *of employees who have been referred but not counseled; records of employees who have been counseled for work adjustment, personal or emotional problems, and/or alcohol or drug abuse; and records of members of employees' families who have been counselled.* Examples of information which may be found in this record system include the employee's name, SSN, date of birth, grade, job series, job title, leave record, service computation date, home address, home phone number, supervisor's name, name and address of the individual's personal physicans, social history, educational background, and performance appraisals. Other documents which may be found in the counsel's file *are notes made by the counselor,* copies of admonishments and reprimands received by the employee and a record of the supervisor's referral (if the employee was referred by the supervisor).

Authority for maintenance of the system: *44 U.S.C. 3101, 42 U.S.C. 4561, 21 U.S.C. 1180, and 5 U.S.C 7901.*

Routine uses of records maintained in the systems, including categories of users and the proposes of such uses:

In unusal circumstances, it may be appropriate to disclose information from this system of records: (1) in accordance with Appendix B Departmental Regulations (45 CFR Part 5b), Items 9, 101, 102; (2) To the Department of Justice or other appropriate Federal agencies in defending claims against the United States when the claim is based upon an individual's mental or physical condition and is alleged to have arisen because of activities of components of the Department in connection with such individual. Such disclosures will be restrictively made; in particular, disclosures of information pertaining to an individual with a history of alcohol or drug abuse will be limited in compliance with the restrictions of the Confidentiality of Alcohol and Drug Abuse Patient Records regulations, 42 CFR Part 2.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Employee records are maintained in file folders and on index cards.

Retrievability:

Records are *filed* by name or by case number cross indexed with the employee's name. The records are used by counsellors to document the *nature of the individual's problem and progress and when necessary to refer individuals to appropriate community or private resources for treatment or rehabilitation. Anonymous information* from these records may also be used to produce summary descriptive statistics and analytical studies in support of the functions for which the records are collected and maintained.

Safeguards:

During the employment of the individual, records are maintained in confidential files separate from the Official Personnel Folder and are located in lockable metal containers or in secured rooms with access limited to those whose official duties require access. *Disclosure of the contents of records which pertain to an individual's alcohol or drug abuse is restricted under the provisions of the Confidentiality of Alcohol and Drug Abuse Patient Records regulations, 42 CFR, Part 2, as authorized by 21 U.S.C. 1175 and 42 U.S.C. 4582, as amended by P.L. 93-282. To the extent possible, identical restrictions will be applied to the disclosure of the contents of records pertaining to individuals with other problems who are participating in the Public Health Employee Assistance Program.*

Retention and disposal:

Counselling records may be maintained for as long as the employee continues to visit the counsellor. The records are destroyed upon separation or transfer of the employee or when the employee has ceased contact with the counsellor for two years.

System manager(s) and address:

For records of individuals participating in the Public Health Employee Assistance Program conducted by the Public Health Service: The responsible Administrator shown in Appendix 1 below. For other individuals' records: The Personnel Officer servicing the installation in which counseling was provided, as shown in Applicants for Employment Records, HEW System OS-ASAM-PT-1, Personnel Appendix 1.

Notification procedure:

Inquiries should be addressed to the system manager at the office where counseling was provided. Individual should provide name, grade, organization in which employed date of birth *and location and approximate date of counseling. When applicable, the special procedures for access to medical records will be followed (see 45 CFR 5b.6 in 40 Federal Register 47411). When the records pertain to an individual's alcohol or drug abuse, the procedures in 42 CFR 2.40 will also be followed.*

Record access procedures:

Same as above.

Contesting record procedures:

Requests for correction or amendment of records should be addressed to the appropriate system manager.

Record source categories:

Information in this system of records is: (1) supplied directly by the individual, or (2) supplied by a member of the individual's family, or (3) derived from information supplied by the individual, or (4) supplied by sources to whom the employee has been referred for assistance, or (5) supplied by Department officials, or *(6) supplied by program counselors.*

Administrator, Public Health Employee Assistance Program, Office of Occupational Health, National Institutes of Health, Bethesda, Maryland 20010.
Administrator, Public Health Employee Assistance Program, Office of the Assistant Secretary for Health, 330 Independence Avenue SW., Washington, D.C. 20201.

OS ASAM PT *12.04*

System name:

Pay, Leave and Attendance Records. HEW/OS/ASAM/PT.

Security classification:

None.

System location:

Division of Central Payroll, Department of Health, Education, and Welfare, 330 Independence Avenue, S.W., Washington, D.C. 20201.

Payroll Liaison Representatives. See Personnel Appendix 1. Timekeepers in organizational units serviced by Payroll Liaison Representatives shown in Personnel Appendix 1. *Personnel offices shown in HEW System OS-ASAM-PT-1, Applicants for Employment Records, Appendix 1.*

Categories of individuals covered by the system:

All paid employees of the Department of Health, Education, and Welfare including PHS Commissioned Corps Personnel.

Categories of records in the system:

This system consists of a variety of records relating to pay and leave determinations made about each employee of the Department of Health, Education, and Welfare. In addition to the name of the employee, the system includes information such as the employee's date of birth, social security number, home address, grade or rank, employing organization, timekeeper number, salary, Civil Service Commission retirement fund contributions, pay plan, number of hours worked, annual and sick leave accrual rate and usage, annual and sick leave balance, FICA withholdings, Federal, state and city tax withholdings, Federal Employees Government Life Insurance withholdings, Federal Employees Health Benefits withholdings, garnishment documents, savings allotments, union and management association dues withholdings allotments, savings bonds allotments, and combined Federal Campaign allotments; for Commissioned Corps personnel information such as the following is included: years of service, payroll number, base pay, incentive pay, hazardous pay, allowances and Servicemen's Group Life Insurance.

Authority for maintenance of the system:

5 U.S.C. 5501 et. seq., 5525 et. seq., 6301 et. seq.; 42 U.S.C. 201 et. seq.; and P.L. 90-83.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Information in this system of records is used or may be used:

a. To prepare W-2 Forms to submit to the Internal Revenue Service, *and to disclose to state and local government agencies having taxing authority pertinent records relating to employees, including name, home address, social security number (in accordance with Section 7 of Public Law 93-579), earned income, and amount of taxes withheld.*

b. In accordance with Appendix B Departmental Regulations (45 CFR Part 5b) Items 01, 3, 4, 5, 6, 7, 8, 9.

c. By the Civil Service Commission in the performance of its functions.

d. By the Department of Labor to make compensation determination in connection with a claim filed by the employee for compensation on account of a job-connected injury or disease.

e. To respond to court orders for garnishment of an employee's pay for allimony or child support.

f. To respond to orders from IRS for garnishment of an employee's pay for Federal income tax purposes.

g. To the Department of Treasury for the purposes of preparing and issuing employee salary and compensation checks and U.S. Savings Bonds.

h. By state offices of unemployment compensation in connection with claims filed by former DHEW employees for unemployment compensation.

V 41 1 156 AUG 11 76 UMI

i. When an individual to whom a record pertains dies, to disclose information in the individual's record to heirs, executors and legal representatives of beneficiaries.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Magnetic tape, microfilm, punch cards and forms.

Retrievability:

Records are maintained by pay period and are retrievable by name, SSN and Timekeeper number within each pay period. They are used to insure that each employee receives the proper pay and allowances; that proper deductions and authorized allotments are made from the employee's salary; that the employee is credited and charged with the proper amount of sick and annual leave. Records are also used to produce summary descriptive statistics and analytical studies in support of the functions for which the records are collected and maintained and for related personnel management functions or pay studies, and for other purposes compatible with the intent for which the records system was created.

Safeguards:

Access to and use of these records are limited to personnel whose official duties require such access. Personnel screening is employed to prevent unauthorized disclosure.

Retention and disposal:

A record (continuously updated) is maintained on the data disc for as long as employed. Source document microfilm records are kept 4 years then destroyed. Time card microfilm is kept 5 years then destroyed. Data file microfilm is kept 6 years then destroyed.

System manager(s) and address:

Director, Division of Central Payroll, P.O. Box 1825, Washington, D.C. 20013.

Notification procedure:

Same as System Manager. Also may contact, *as appropriate*, Payroll Liaison Representatives in Personnel Appendix 1 *or Personnel Officers shown in HEW System OS–ASAM–PT–1, Applicants for Employment Records, Appendix 1.* Provide name, social security number, timekeeper number and pay period about which inquiring.

Records access procedures:

Same as above.

Contesting record procedures:

Same as above.

Record source categories:

In formation in this system of records is (1) supplied directly by the individual, or (2) derived from information supplied by the individual, or (3) supplied by timekeepers and other Department officials.

Systems exempted from certain provisions of the act:

None.

OASH OAM 0007.02

System name:

PHS Commissioned Corps General Personal Files and Records. HEW/OASH/OAM.

Security classification:

None.

System location:

Office of the Director, Commissioned Personnel Operations Division, Office of Personnel Management/OAM/PHS, Room 4A–15, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852.

Categories of individuals covered by the system:

Commissioned Officers, former Commissioned Officers, applicants to the Commissioned Corps of the Public Health Service.

Categories of records in the system:

Official Personnel Folders; Service Records Cards (summarizing personnel actions); Commissioned Officer leave records; file records of non-appointed applicants; Commissioned Officer Residency Deferment Program (CORD) files containing application forms and related documents; Selection Systems applications; identification and privilege card records; recommendations regarding payment of leprosy duty pay; and correspondence relating to the above.

Authority for maintenance of the system:

Public Health Service Act Section 201 et seq. (42 U.S.C. 202 et seq.).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Limited information provided prospective employers upon inquiry. Employment confirmations provided FHA and financial institutions. DOD may obtain access in event of national emergency. VA may obtain information in event of past employment claim. Bureau of Prisons (Department of Justice), Coast Guard (Department of Transportation), and Environmental Protection Agency may obtain copies of personnel documents relating to Commissioned Officers on assignment to those agencies. *Records may be disclosed to individuals and organizations deemed qualified by the Secretary to carry out specific research solely for the purpose of carrying out such research (45 CFR, Part 5b, Appendix B, Item 101).*

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Records kept in secured area. Derogatory information kept in locked safe.

Retrievability:

Alphabetically indexed by name of person and SSN. (Permission has been requested from the Department for the continued use in this system of the SSN as a use within Sec. 7(a)(2)(B) of the Privacy Act.) Used by HEW officials who conduct personnel operations for the Commissioned Corps.

Safeguards:

Secured area, safes, and building guard force.

V 41 156 AUG 11 76 UMI

Retention and disposal:

Applicant files destroyed after two years if not used; leave records destroyed five years after separation; other files retained indefinitely. Identification and privilege cards and records disposed of when officer is no longer entitled to use.

System manager(s) and address:

Director, Commissioned Personnel Operations Division. (See System Location above.).

Notification procedure:

Write only System Manager.

Record access procedures:

Contact the System Manager shown above.

Contesting record procedures:

Contact System Manager.

Record source categories:

Information furnished by subject, references, reports of supervisors and other officials; personal actions; and doctors.

Systems exempted from certain provisions of the act:

None.

SSA HI CAR 0175.03

System name:

Carrier Medicare Claims Records HEW SSA.

Security class (If none, so state):

None.

System location:

Carriers, under contract to Social Security Administration (See Appendix C, section 4).

Categories of individuals covered by the system:

Recipients of Part B (Supplementary Medical) Medicare benefits.

Categories of records in the system:

Request for Payment; Provider Billing for Patient Services by Physician; Prepayment Plan for Group Medicare Practices Dealing through a Carrier; Request for Claim Number Verification; Payment Record Transmittal; Statement of Person Regarding Medicare Payment for Medical Services Furnished Deceased Patient; Report of Prior Period of Entitlement; itemized bills and other similar documents from beneficiaries required to support payments to physicians and other suppliers of Part B Medicare services.

Authority for maintenance of the system:

Sections 1842 and 1874 of title XVIII of the Social Security Act.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Routine uses for disclosure may be to:

a. Claimants, other than the data subject, their authorized representatives or representative payees to the extent necessary to pursue claims made under title XVIII of the Social Security Act (Medicare).

b. Third-party contacts by the Social Security Administration (without the consent of the individual to whom the information pertains) in situations where the party to be contacted has, or is expected to have, information relating to the individual's capability to manage his affairs or his eligibility for or entitlement to benefits under the Medicare program when:

(1) The individual is unable to provide the information being sought (an individual is considered to be unable to provide certain types of information when any of the following conditions exist: individual is incapable or of questionable mental capability, cannot read or write, cannot afford the cost of obtaining the information, a language barrier exists, or the custodian of the information will not, as a matter of policy, provide it to the individual), or

(2) The data are needed to establish the validity of evidence or to verify the accuracy of information presented by the individual, and it concerns one or more of the following: the individual's eligibility to benefits under the Medicare program; the amount of reimbursement; any case in which the evidence is being reviewed as a result of suspected abuse or fraud, concern for program integrity, or for quality appraisal, or evaluation and measurement system activities.

c. Third-party contacts by the Social Security Administration where necessary to establish or verify information provided by representative payees or payee applicants.

d. The Treasury Department for investigating alleged theft, forgery, or unlawful negotiation of Medicare reimbursement checks.

e. The United States Postal Service for investigating alleged forgery or theft of social security checks.

f. The Department of Justice for investigating and prosecuting violations of the Social Security Act to which criminal penalties attach, for representing the Secretary and for investigating issues of fraud by agency officers or employees, or violation of civil rights.

g. The Railroad Retirement Board for administering provisions of the Railroad Retirement and Social Security Acts relating to railroad employment.

h. Professional Standards Review Organizations (PSRO) for utilization review.

i. State Licensing Boards for review of unethical practices or nonprofessional conduct.

j. Providers and suppliers of services directly or dealing through fiscal intermediaries or carriers for administration of provisions of title XVIII.

k. Contractors under contract to the Social Security Administration for the performance of research and statistical activities directly relating to the Social Security Act.

l. State welfare departments pursuant to agreements with the Social Security Administration for administration of State supplementation payments for determinations of eligibility of Medicaid per Section 1634 of the Social Security Act.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Records maintained on paper.

Retrievability:

System is indexed by health insurance claim number. The record is prepared by the beneficiary and is used by the carriers to determine amount of and entitlement to Part B benefits. The bills are retained by the carriers. The record is also used to update the Part B Physician/Supplier 25,000 listing. Disclosures of physician's customary charge data are made to state audit agencies in order to ascertain the correctness of Title XIX charges and payments.

Safeguards (access controls):

Unauthorized personnel are denied access to the records area. Disclosure is limited.

Retention and disposal:

Close out at the end of the calendar year in which paid, two additional years, transferred to Federal Records Center and destroy after another six years.

System manager(s) and address (include zip code):

Director, Bureau of Health Insurance, 6401 Security Boulevard, Baltimore, Maryland 21235.

Notification procedure:

Inquiries and requests for system records should be addressed to the most convenient social security office or to Social Security Administration, Bureau of Health Insurance, Health Insurance Inquiries Branch, Baltimore, Maryland 21235. The individual should furnish his or her health insurance claim number and name as shown on social security records.

Record access procedures:

The individual can obtain information on the procedures for gaining access to and contesting records from the most convenient social security office or from Social Security Administration, Bureau of Health Insurance, Health Insurance Inquiries Branch, Baltimore, Maryland 21235.

Contesting record procedures:

Same.

Record source categories:

The data contained in these records is furnished by the individual. In most cases, the identifying information is provided to the physician by the individual. The physician then adds the medical information and submits the bill to the carrier for payment.

Systems exempted from certain provisions of the act (if none, so state):

None.

SSA PO RSI 0175.02

System name:

Claims Folders and Post-Adjudicative Records of Applicants and Beneficiaries for Social Security Administration Benefits HEW SSA.

Security class (if none, so state):

None.

System location:

Retirement and Survivors Insurance Claims; Claims folders are maintained primarily in the Retirement and Survivors Insurance Program Centers and the *Division of International Operations (see Appendix A). Disability Insurance Claims;* Bureau of Disability Insurance (see Appendix B) or Division of International Operations (see Appendix A.) Black Lung Claims: Bureau of Disability Insurance (see Appendix B). Supplemental Security Income Claims: Claims for benefits based on age—Retirement and Survivors Insurance Program centers (see Appendix A). Claims for Disability or Blind: Benefits—Bureau of Disability Insurance (see Appendix B). In addition, claims folders are transferred to numerous other locations throughout the Social Security Administration, and infrequently may be temporarily transferred to other Federal agencies (Department of Justice, or Office of the General Counsel, Department of Health, Education, and Welfare). The disability claims folders are also transferred to State agencies for disability and vocational rehabilitation determinations (see Appendix B). The claims folders are generally set up in district or branch offices when claims for benefits are filed. They are retained there until all development has been completed, then are transferred to the appropriate reviewing offices as set out above. Supplemental security income claims folders are held in district or branch offices pending establishment of a payment record, or until the appeal period, in a denied claim situation, has expired. The folders are then transferred to the reviewing office. For district or branch office information, see Appendix P.

Categories of individuals covered by the system:

Claimants for retirement, survivors, disability, health insurance, or black lung benefits or supplemental security income payments.

Categories of records in the system:

The claims folder is established when a claim for benefits is filed. It contains applications for benefits, earnings record information established and maintained by the Social Security Administration, documents supporting factors of entitlement and continuing eligibility, payment documentation, and correspondence to and from claimants and/or representatives. It may also contain data collected as a result of inquiries or complaints; and evaluation and measurement study of effectiveness of claims policies. Separate files may be maintained of certain actions which are entered directly into the computer processes. These relate to report of changes of address, work status, and other post-adjudicative reports.

Authority for maintenance of the system:

Payment of benefits is directed by the following sections: Sections 202 (a)–(i), 223, 226, 228, and 1611 of the Social Security Act and Section 411 of the Federal Coal Mine and Health Safety Act.

Routine uses of record maintained in the system, including categories of users and the purposes of such uses:

Routine uses for disclosure may be to:

a. Third party contacts by the Social Security Administration (without the consent of the individual to whom the information pertains) in situations where the party to be contacted has, or is expected to have, information relating to the individual's capability to manage his affairs or his eligibility for or entitlement to benefits under the social security program when:

(1) The individual is unable to provide the information being sought (an individual is considered to be unable to provide certain types of information when any of the following conditions exist: individual is incapable or of questionable mental capability, cannot read or write, cannot afford the cost of obtaining the information, a language barrier exists, or the custodian of the information will not, as a matter of policy, provide it to the individual), or

(2) The data are needed to establish the validity of evidence or to verify the accuracy of information presented by the individual, and it concerns one or more of the following: the individual's eligibility to benefits under a social security program; the amount of a benefit payment; any case in which the evidence is being reviewed as a result of suspected abuse or fraud, concern for program integrity, or for quality appraisal, or evaluation and measurement system activities.

b. Third party contacts by the Social Security Administration where necessary to establish or verify information provided by representative payees or payee applicants.

c. A person (or persons) on the rolls when a claim is filed by an individual which is adverse to the person on the rolls; that is:

(1) An award of benefits to a new claimant precludes an award to a prior claimant; or

(2) An award of benefits to a new claimant will reduce the benefit payments to the individual(s) on the rolls; but only for information concerning the facts relevant to the interests of each party in a claim.

d. Employers or former employers for correcting or reconstructing earnings records and for social security tax purposes only.

e. The Treasury Department for collecting social security taxes or as otherwise pertinent to tax and benefit payment provisions of the Social Security Act, (including social security number verification services), for investigating alleged theft, forgery, or unlawful negotiation of social security checks, *and for purposes of garnishment to provide child support or alimony in accordance with a properly executed garnishment action in accordance with 47 U.S.C. 659.*

f. The United States Postal Service for investigating alleged forgery or theft of social security checks.

g. The Department of Justice for investigating and prosecuting violations of the Social Security Act to which criminal penalties attach, for representing the Secretary, and for investigating issues of fraud by agency officers or employees, or violation of civil rights.

h. The Department of State and the Veterans' Administration Regional Office Philippines for administering provisions of the Social Security Act in foreign countries through facilities and services of those agencies.

i. The Railroad Retirement Board for administering provisions of the Railroad Retirement and Social Security Act relating to railroad employment.

j. The Veterans' Administration for the purpose of administering 38 U.S.C. 412 (special payments to certain survivors of uninsured persons who die after 1956 while on active duty, active duty for training, or inactive duty training, or who die after 1956 due to a service-connected disability incurred after September 15, 1940).

k. The Department of Labor for administering provisions of Title IV of the Federal Coal Mine Health and Safety Act.

l. The Bureau of Census when it performs as a collecting agent or data processor for research and statistical purposes directly relating to the Social Security Act.

m. The Department of the Treasury, Office of Tax Analysis, for studying the effects of income taxes and taxes on earnings.

n. The Civil Service Commission for study of the relationship of civil service annuities to minimum social security benefits, and the effects on the trust fund.

o. State social security administrators for administration of agreements pursuant to section 218 (State and local).

p. State Welfare Departments for administering Sections 205(c)(2)(B)(i)(II) and 402(a)(25) of the Social Security Act requiring information about assigned social security numbers for Aid to Families with Dependent Children program purposes only.

q. State Welfare Department pursuant to agreements with the Social Security Administration for administration of State supplementation payments, for determinations of eligibility for Medicaid per section 1634, for enrollment of welfare recipients for medical insurance under Section 1843 of the Social Security Act, *and for conducting independent quality assurance reviews of supplemental security income recipient records,*

V 41 1 156 AUG 11 76 UMI

provided that the agreement for Federal administration of the supplementation provides for such an independent review.

r. State Vocational Rehabilitation agencies for rehabilitation services.

s. State audit agencies for auditing State supplementation payments and Medicaid eligibility considerations.

t. Professional Standards Review Organizations (PSRO) and State Licensing Boards for review of unethical practices or nonprofessional conduct as provided in section 1165.

u. Providers and suppliers of services directly or dealing through fiscal intermediaries or carriers for administration of provisions of title XVIII.

v. Private medical and vocational consultants for use in making preparation for, or evaluating the results of, consultative medical examinations or vocational assessments which they were engaged to perform by the Social Security Administration or a State agency acting in accord with sections 221 or 1633.

w. Energy Resources Development Administration for their study of the long-term effects of low-level radiation exposure.

x. Specified business and other community members and Federal, State, and local agencies for verification of eligibility for benefits under section 1631(e).

y. Institutions or facilities approved for treatment of drug addicts or alcoholics as a condition of the individual's eligibility for payment under section 1611e and as authorized by regulations issued by the Special Action Office for Drug Abuse Prevention.

z. Contractors under contract to the Social Security Administration for the performance of research and statistical activities directly relating to the Social Security Act.

aa. Applicants, claimants, prospective applicants or claimants, other than the data subject, their authorized representaives or representative payees to the extent necessary to pursue social security claims and receive and account for benefit payments.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Claims folders are maintained in file cabinets by service area as set out in Location above.

Retrievability:

Filed in numerical sequence by social security number. The folders are used throughout the Social Security Administration for the purposes of determining, organizing, and maintaining documents for making normal determination as to eligibility to benefits, the amount of benefits, revewing continuing eligibility, holding hearings or administrative review processes, and to ensure that proper adjustments are made based on events affecting entitlement. The folder may be referred to State Disability Determination Sections or Vocational Rehabilitation Agencies in disability cases. They may also be used for quality review, evaluation, and measurement studies, and other statistical and research purposes.

The claims folder constitutes the basic record for payments and determinations under the Social Security Act and the Federal Coal Mine Health and Safety Act (black lung). Data are used to produce and maintain the master beneficiary record system (see Systems Notice) which is the automated payment system for retirement, survivors, and disability benefits; the supplemental security income automated system for the aged, blind, and disabled payments; the black lung payment process for black lung claims; and the Health Insurance and Billing and Collection Master record system for Hospital and supplementary medical (medicare) insurance benefits.

This paper file is controlled by the Social Security Administration Claims Control System while the claim is pending development for adjudication in the district or branch office, and by the Case Control System once the folder has been transferred to the reviewing office (program centers, Division of International Operations, or the Bureau of Disability Insurance).

Safeguards (access controls):

Claims folders are protected through limited access to Social Security Administration records, limited employee access to need to know. All employees are instructed in Social Security Administration confidentiality rules as a part of their initial orientation training.

Retention and disposal:

The claims folder is maintained in the reviewing office until the social security number becomes inactive (no one is entitled to benefits). It is then transferred for storage to the Federal Archives and Records Center to await destruction based on predetermined destruction dates; 5-year retention-no record of surviving potential beneficiaries; 20-year retention-withdrawn claims, claims disallowed or lump-sum death payments only; and 55-year retention-potential future claimants indicated in the file. When a subsequent claim is filed on the social security number the claim is recalled from the Records Center. Similarly, the claims files may be recalled from the Records Center at any time by the Social Security Administration as necessary in the administration of the social security programs.

System manager(s) and address (include zip code):

Director, Bureau of Retirement and Survivors Insurance, 6401 Security Boulevard, Baltimore, Maryland 21235.

Director, Bureau of Supplemental Security Income, 6401 Security Boulevard, Baltimore, Maryland 21235.

Director, Bureau of Disability Insurance, 6401 Security Boulevard, Baltimore, Maryland 21235.

Director, Bureau of Health Insurance, 6401 Security Boulevard, Baltimore, Maryland 21235.

Notification procedure:

Contact the most convenient social security office (see Appendix F for address and telephone information).

Record access procedures:

In order to find out if this system contains information about him, an individual may contact the most convenient social security office in person or in writing. The inquirer should provide his name, social security number, identify the type of claim he filed (retirement, survivors, disability, health insurance, black lung, special minimum payments, or supplemental security income) (if more than one claim was filed, each should be identified); whether he is or has been receiving benefits; whether payments are being received under his own social security number, and if not, the name and social security number under which received; if benefits has not been received, the approximate date and place the claim was filed; and his return address or his telephone number.

Contesting record procedures:

If upon review of the record, the individual wishes to contest any part of it, he may do so at the same offices where he accessed the record.

Record source categories:

This information is obtained from the claimants, accumulated by the Social Security Administration from reports of employers or self-employed individuals, various local, State, and Federal agencies, claimant representatives and other sources to support factors of entitlement and continuing eligibilities.

Systems exempted from certain provisions of the act (if none, so state):

None.

CDC NIOSH 0024.01

System name:

Workers Exposed to Benzidine—(Bladder Cancer)—HEW/CDC/NIOSH.

Security classification:

None.

System location:

Division of Field Studies and Clinical Investigations, NIOSH, U.S. Post Office & Courthouse, Cincinnati, Ohio 45202.

Southwest Ohio Regional Computer Center, Medical Sciences Building, University of Cincinnati, Cincinnati, Ohio 45202.

Johns Hopkins University, School of Hygiene and Public Health, 618 N. Wolfe Street, Baltimore, MD 21205.

Categories of individuals covered by the system:

Employees at Selected Plants Using Benzidine. *A list of selected plant sites will be made available to the public upon request to the system manager.*

Categories of records in the system:

Occupational History, Demographic Data.

Authority for maintenance of the system:

Occupational Safety and Health Act Section 20 (29 U.S.C. 669).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Information from studies will be used by Johns Hopkins epidemiologists to conduct a medical screening program for early detection of possible bladder cancer in this group of workers. Also, see Appendix B of HEW Regulation (45 CFR, part 5b), item 100.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Computer Tape, Microfilm, Microfiche. Computer Printouts.

Retrievability:

The purpose of this system is to determine the cause and prevention of disease of industrial origin. There is no transfer of this information outside NIOSH. Name is the index used to retrieve records from this system.

Safeguards:

24-hour guard service in building, Locked building; locked rooms, Personnel screening, Locked computer room and computer tape vaults, Locked file cabinets, Computer tapes are password protected.

Retention and disposal:

Records are retained indefinitely. Disposal methods include erasing computer tapes and burning or shredding printouts.

System manager(s) and address:

Director, National Institute for Occupational Safety and Health, 5600 Fishers Lane, Park Bldg., Room 3-32, Rockville, Maryland 20852.

Notification procedure:

To determine if a file exists, write the Privacy Act Coordinator, Management Analysis Office, Center for Disease Control, Atlanta, GA 30333, and provide the following information: (1) approximate date(s) and place of treatment or questionnaire administration; (2) name of study if known; (3) an individual who requests notification of or access to a medical record shall, at the time the request is made, designate a responsible representative in writing who will be willing to review the record and inform the subject individual of its contents at the representative's discretion (these notification and access procedures are requirements of the Department regulations, 45 CFR, Part 5b.6, Federal Register, October 8, 1975, page 47411).

Record access procedures:

Same as notification procedures. Requesters should also reasonably specify the record contents being sought.

Contesting record procedures:

Write the Privacy Act Coordinator, Management Analysis Office, Center for Disease Control, Atlanta, GA 30333. Reasonably identify the record and specify the information to be contested in accordance with Department regulations, Federal Register, October 8, 1975, page 47411 (45 CFR Part 5b.7).

Record source categories:

Information is obtained from employer records. Vital status information is obtained from Federal, State and Local governments and other available sources: Information is obtained from the individual and employer records.

Systems exempted from certain provisions of the act:

None.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Interstate Land Sales Registration

[Docket No. N-76-576; OILSR No. 0-2844-02-588; LSED 76-71-IS]

HAULAPAI HIGHLANDS

Order of Suspension

Notice is hereby given that: On March 19, 1976, the Department of Housing and Urban Development, Office of Interstate Land Sales Registration, attempted to serve upon Carl Hanauer, President, Phase II Properties, Inc., 3443 North Central Avenue, Phoenix, Arizona 85012, a Notice of Proceedings and Opportunity for Hearing by certified mail and service of process was not possible since the addressee could not be located. On May 11, 1976 the Department published the Notice of Proceedings and Opportunity for Hearing in the FEDERAL REGISTER (41 FR 19247) pursuant to 44 U.S.C. 1508. The Developer has failed to answer or to request a hearing pursuant to 1720.160 within 15 days of the service by publication of the said Notice of Proceedings and Opportunity for Hearing. Accordingly, an Order of Suspension is being issued pursuant to 15 U.S.C. 1706(d) and 24 CFR 1710.45(b)(1), as follows:

ORDER OF SUSPENSION

1. The Developer, having filed a Statement of Record for the above captioned subdivision pursuant to the provisions of the Interstate Land Sales Full Disclosure Act, 15 U.S.C. 1701 et seq. and the Rules and Regulations lawfully promulgated thereto pursuant to 15 U.S.C. 1718, had its Statement of Record become effective pursuant to 24 CFR 1710.21 of the Interstate Land Sales Regulations. Said Statement is still in effect.

2. As authorized 15 U.S.C. 1715, the authority and responsibility for administration of the Interstate Land Sales Full Disclosure Act has been delegated to the Assistant Secretary for Consumer Affairs and Regulatory Functions (41 FR 19365, May 12, 1976).

3. Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1710.45(b)(1), if it appears to the Assistant Secretary for Consumer Affairs and Regulatory Functions at any time that a Statement of Record, which is in effect, includes any untrue statement of a material fact or omits to state any material fact required to be stated therein or necessary to make the Statement therein not misleading, the Assistant Secretary may, after notice, and after an opportunity for a hearing requested within 15 days of receipt of such notice, issue an order suspending the Statement of Record.

4. On March 19, 1976, the Department of Housing and Urban Development, Office of Interstate Land Sales Registration, attempted to serve upon Carl Hanauer, President, Phase II Properties, Inc., 3443 North Central Avenue, Phoenix, Arizona 85012, a Notice of Proceedings and Opportunity for Hearing by certified mail and service of process was not possible since the addressee could not be located. On May 11, 1976 a Notice of Proceeding and Opportunity for Hearing was served upon the Developer by publication in the FEDERAL REGISTER (41 FR 19247). The notice informed the Developer of information obtained by the Office of Interstate Land Sales Registration showing a change occurred affecting a material fact contained in the above-specified Statement of Record and Property Report. The Developer has failed to answer or to request a hearing pursuant to 24 CFR 1720.160 within 15 days of receipt of said Notice of Proceedings and Opportunity for Hearing.

Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1710.45(b)(1) the Statement of Record filed by the Developer covering its subdivision is hereby suspended, effective as of August 11, 1976. This Order of Suspension

V 41 156 AUG 11 76 UMI

shall remain in full force and effect until the Statement of Record has been properly amended as required by the Interstate Land Sales Full Disclosure Act and the implementing Regulations.

This Order shall be served upon the Respondent by publication in the FEDERAL REGISTER pursuant to 44 U.S.C. 1508.

Any sales or offers to sell made by the Developer or its agents, successors, or assigns while this Order of Suspension is in effect will be in violation of the provisions of said Act.

Issued in Washington, D.C., Aug. 4, 1976.

CONSTANCE B. NEWMAN,
Assistant Secretary for Consumer Affairs and Regulatory Functions.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 598-1; OPP-42016A]

FLORIDA

Approval of State Plan for Certification of Commercial and Private Applicators of Restricted Use Pecticides

Section 4(a)(2) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), and the implementing regulations of 40 CFR Part 171 require each State desiring to certify applicators to submit a plan for its certification programs. Any State certification program under this section shall be maintained in accordance with the State Plan approved under this section.

On May 13, 1976, notice was published in the FEDERAL REGISTER (41 FR 19755) of the intent of the Regional Administrator, EPA, Region IV, to approve, on a conditional basis, the Florida State Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides (Florida State Plan). Conditional approval was requested by the state of Florida pending promulgation and passage of regulations pursuant to Florida Statute 487, Florida Administrative Code, Chapters 5E-2 and 5E-9; Florida Statute 388, Florida Administrative Code, Chapters 10D-54.03, 10D-54.14; Florida Statute 482, Florida Administrative Code, Chapters 10D-55.06, 10D55.40 and 10D-55.42 and implementation of procedures proposed in letter from Department of Health and Rehabilitative Services to Department of Agriculture and Consumer Services dated March 2, 1976. Complete copies of the Florida State Plan were made available for public inspection at the Agency's Region IV office in Atlanta, at the office of the Florida Department of Agriculture and Consumer Services, Tallahassee, Florida, and at the Agency's Technical Services Division, Federal Register Section, Office of Pesticide Programs, EPA Headquarters, Washington, D.C.

There were no comments received concerning the State Plan during the 30 day comment period.

The Florida State Plan will remain available for public inspection at the office of Florida Department of Agriculture and Consumer Services in Tallahassee, Florida.

It has been determined that the Florida State Plan will satisfy the requirements of section 4(a)(2) of the amended FIFRA and 40 CFR Part 171 if proposed rules and regulations are promulgated and passed to augment existing legislation. Also Florida's Structural Pest Control Operators Certification Program has been reviewed and found to meet the Agency's standards for certain specific categories. Those applicators who currently hold such Florida licenses gained by written examination shall be considered fully certified.

Accordingly, the Florida State Plan is approved conditionally upon promulgation and passage of implementing regulations in accordance with and as prescribed in the Florida State Plan.

This conditional approval shall expire one (1) year from its effective date if these terms and conditions are not satisfied by that time. On or before the expiration of the period of conditional approval, a notice shall be published in the FEDERAL REGISTER concerning the extent to which these terms and conditions have been satisfied, and the approval status of the Florida State Plan as a result thereof.

Effective date. Pursuant to section 4(d) of the Administrative Procedure Act. 5 U.S.C. 553(d), the Agency finds that there is good cause for providing that the one year conditional approval granted herein to the Florida State Plan shall be effective immediately. Neither the Florida State Plan itself nor this agency's conditional approval of the plan create any direct or immediate obligations on pesticide applicators or other persons in the state of Florida. Delays in starting the work necessary to implement the Plan, such as may be occasioned by providing some later effective date for this conditional approval, are inconsistent with the public interest. Accordingly, this conditional approval shall become effective immediately.

Dated: June 24, 1976.

JOHN A. LITTLE,
Deputy Regional Administrator, Region IV.

FEDERAL COMMUNICATIONS COMMISSION

DOMINICAN REPUBLIC; ASSIGNMENT OF STANDARD BROADCAST STATIONS

Notification List

Notification of new and changed assignments of standard broadcast stations in the Dominican Republic in accordance with Part III, Section F, Annex 2 of the North American Regional Broadcasting Agreement (Washington, D.C., 1950).

Dominican Republic list No., (1) June 28, 1976

Call letters	Location	Power (kilowatts)	Antenna	Schedule	Class	Antenna height (feet)	Ground system: Number of radials	Ground system: Length (feet)	Proposed date of commencement of operation
		1600 kHz							
HIMR	Azua N. 18°27'00", W. 70°44'00"	1D/0.25N		U					
		1600 kHz							
HIBS	San Pedro de Macoris N. 18°27'00", W. 69°18'03"	1D/0.25N		U					

(1) FCC Note: By letter dated June 28, 1976 from the government of the Dominican Republic, information concerning the above stations was included along with other matters. Although not provided strictly in accordance with the notification procedures, the Commission recognizes this as a valid notification.

WALLACE E. JOHNSON,
Chief, Broadcast Bureau, Federal Communications Commission.

[FR Doc.76-23354 Filed 8-10-76;8:45 am]

[Docket No. 20864, File No. BPH-9439; Docket No. 20865, File No. BPH-9640]

ALLEGAN COUNTY BROADCASTERS, INC. AND ROBERT B. TAYLOR

Memorandum Opinion and Order Designating Applications for Consolidated Hearing on Stated Issues

In re applications of Allegan County Broadcasters, Inc., Otsego, Michigan, Requests: 100.9 MHz, Channel No. 265; 3 kW (H&V); 300 feet (H&V); Robert B. Taylor, Plainwell, Michigan, Requests: 100.9 MHz, Channel No. 265; 3 kW (H&V); for construction permits.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has before it for consideration the above-captioned applications of Allegan County Broadcasters, Inc. [Allegan], licensee of standard broadcast station WAOP, Otsego, Michigan, requesting a construction permit for a new FM broadcast station to serve Osego, Michigan; and Robert B. Taylor [Taylor], licensee of standard broadcast station WBUK, Portage, Michigan, requesting a construction permit for a new FM broadcast station to serve Plainwell, Michigan. Seeking the same channel to serve communities three miles apart, these applications are mutually exclusive.

2. Taylor's application is deficient in that its survey of community leaders fails to comply with the Commission's Primer on the Ascertainment of Community Problems by Broadcast Applicants, 27 FCC 2d 650 (1971). Taylor has consulted no leaders of students and youth; no representatives of the poor and unemployed, and no representatives of the elderly. Taylor's proposal also suffers from failure to correlate broadcast matter to particular ascertained problems, as required by question and answer 29 of the Primer. Further, the programs proposed do not appear responsive to the problems ascertained. The program "Directions", for example, described as a "religious type program" which "will give moral lessons to the community to help build character in local citizens * * *", is not responsive to any ascertained need for such lessons; in fact, no such need is reported. Similarly, "Agriculture USA" is described as designed to "help solve problems and needs related to farming and agribusiness", none of which were ascertained. For all five other programs proposed, the attempt at correlation is so vague and overly general as to reflect but a token effort to comply with the requirements of the Primer, as in Southeast Arkansas Radio, Inc., 47 FCC 2d 835, 30 RR 2d 769 (1974). For example, "Meet the Newsmaker" is described as follows:

'Meet the Newsmaker', produced by ABC News, is an interview with a government official or leader from a particular area of American life. Topics covered will be those of a national nature which also affect local communities such as Plainwell.[1]

[1] Taylor amendment of April 30, 1976, at 4.

Of the seven programs proposed to meet community needs, only "Conference" is locally produced, and its duration is a mere fifteen minutes per week. According to Taylor, however, "[i]n a very direct fashion this program will address itself to the local problems and needs listed in paragraph 'F' above."[2] Paragraph F contains all 32 of the problems and needs ascertained as a result of the applicant's surveys. The Taylor programming proposal is therefore analogous to that in Radio Marion, Inc., 52 FCC 2d 1229, 33 RR 2d 182 (1975), which was questioned because it simply pitted pre-planned or existing programs against ascertained problems and needs. In proposing only 15 minutes of Sunday morning programming per week to deal "very directly" with 32 problems, the Taylor proposal is less adequate than that in Risner Broadcasting, Inc., 32 FCC 2d 75, 23 RR 2d 61 (1971). The applicant in Risner proposed 45 minutes of weekly programming to meet the 18 of 33 needs regarded by it as worthy of attention, ⅔ to be broadcast on Saturday mornings; 14 of the problems were to be met in a 15-minute weekly discussion program like Taylor's "Conference". The Risner plan was held not to be "even a minimally adequate response to ascertained community problems and needs." Risner, supra, at 78.

3. At page 7 of its amendment of May 12, 1976, Allegan states that it selected community leaders so as to include, inter alia, professionals. The list of community leaders beginning at page 9 of the amendment includes one person identified as a member of the Society of American Military Engineers, one "Attorney (General Practice)", and one person affiliated with the American Society of Women Accountants, although her position in that organization is not specified. None of these three is identified as a leader of a professional organization. Membership in an organization or professional status alone do not necessarily qualify a person as a community leader for purposes of community ascertainment. As Allegan has therefore failed to consult leaders of a significant group, its ascertainment showing is defective[3] and a Suburban issue will be specified.[4]

4. The respective proposals, although for different communities, would serve substantial areas in common. Consequently, in addition to determining, pursuant to section 307(b) of the Communications Act of 1934, as amended, which of the proposals would better provide a fair, efficient and equitable distribution of radio service, a contingent comparative issue will also be specified.

5. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. Because they are mutually exclusive they must be designated for hearing in a consolidated proceeding.

6. Accordingly, it is ordered, That pursuant to section 309(e) of the Communications Act of 1934, as amended, the above-captioned applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine the areas and populations which would receive primary aural (1 mV/m or greater in the case of FM) service from the proposed operations, and the availability of other primary service to such areas and populations.

2. To determine the efforts made by Taylor to ascertain the public's needs and interests, in the following respects:

(a) whether Taylor's showing omits consultations with leaders of significant groups in the community; and

(b) whether the program service proposed by Taylor would meet the needs of the community sought to be served.

3. To determine the efforts made by Allegan to ascertain the public's needs and interests in the following respect:

(a) whether Allegan's showing omits consultations with leaders of significant groups in the community.

4. To determine, in light of section 307(b) of the Communications Act of 1934, as amended, which of the proposals would better provide a fair, efficient and equitable distribution of radio service.

5. To determine, in the event it is concluded that a choice between the applications should not be based solely on considerations relating to section 307(b), which of the proposals in the above-captioned applications would, on a comparative basis, better serve the public interest.

6. To determine, in light of the evidence adduced pursuant to the foregoing issues, which, if either, of the applications should be granted.

7. It is further ordered, That, to avail themselves of the opportunity to be heard, the applicants herein, pursuant to section 1.221(c) of the Commission's rules, in person or by attorney, shall, within twenty (20) days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

It is further ordered, That the applicants herein shall, pursuant to section 311(a)(2) of the Communications Act of 1934, as amended, and section 1.594 of the Commission's rules, give notice of the hearing within the time and in the manner prescribed in such rule, and shall advise the Commission of the publication of such notice as required by section 1.594(g) of the rules.

FEDERAL POWER COMMISSION

[Docket No. ER76-110]

ARKANSAS POWER AND LIGHT CO.

Settlement Conference

AUGUST 4, 1976.

Take notice that on August 13, 1976, a conference of all parties to this proceeding and Commission Staff will be held in Room No. 8402 at the offices of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C., at 10 a.m.

Customers and other interested persons will be permitted to attend, but if such persons have not previously been permitted to intervene by order of the Commission, attendance at the conference will not be deemed to authorize intervention as a party in the proceeding.

All parties will be expected to come fully prepared to discuss the merits of all issues concerning the lawfulness of the proposed rate increase and any procedural matters preparatory to a full evidentiary hearing or to make commitments with respect to such issues and any offers of settlement or stipulations discussed at the conference.

Letters concerning this conference are being mailed this date to all parties to the proceeding, all of the jurisdictional customers, and all affected state commissions.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-23355 Filed 8-10-76;8:45 am]

[Docket No. ER76-822]

BLACK HILL POWER AND LIGHT CO.

Filing

AUGUST 5, 1976.

Take notice that on July 30, 1976, Black Hills Power and Light Company (Black Hills) tendered for filing proposed changes in its electric rate schedules to the Wyoming Cities of Gillette and Upton. The proposed rates would increase revenues from those customers by $124,101 based upon estimated sales for the 12 month period ended September 30, 1977. Black Hills requests an effective date of September 30, 1976.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-23371 Filed 8-10-76;8:45 am]

[Docket No. ER76-797]

CLEVELAND ELECTRIC ILLUMINATING CO.

Filing of Interconnection Agreement

AUGUST 4, 1976.

Take notice that on July 21, 1976 the Cleveland Electric Illuminating Company (CEI) submitted for filing with the Commission an interconnection agreement between CEI and the City of Painesville, Ohio (Painesville). The agreement entered into on Jaunary 13, 1975, provides for the synchronous interconnection of CEI's 138 KV transmission system with Painesville's 13.8 KV transmission system. The filing consists of the interconnection agreement and five service schedules covering emergency service, short term service, limited term service, economy interchange, and coordination of scheduled maintenance of generating facilities.

CEI states that, due to the forced outage of Painesville's main boiler with the resulting loss of generation, CEI commenced emergency service to Painesville on July 19, 1976. Accordingly, CEI requests waiver of the notice requirements so that the interconnection agreement may take effect on July 19, 1976.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 13, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-23356 Filed 8-10-76;8:45 am]

[Docket No. RP75-8; PGA76-6]

COMMERCIAL PIPELINE CO., INC.

PGA Filing

AUGUST 4, 1976.

Take notice that on July 23, 1976, Commercial Pipeline Company, Inc. (Commercial) tendered for filing Thirteenth Revised Sheets No. 3A reflecting Puchased Gas Adjustments and effective dates as set out below:

Sheet No.	Current adjustments	Cumulative adjustments	Effective date
3A 13th revised.	$0.0045	$0.3111	Aug. 23, 1976

Commercial states that these revisions track precisely similar revisions in the tariff of Cities Service Gas Company, its sole supplier. Commercial requests waiver of notice to the extent required to permit said tariff sheets to become effective as proposed.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 16, 1976. Protests will be considered by the Commission in determining the appropriate action be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 76-23357 Filed 8-10-76;8:45 am]

[Docket No. ER76-807]

CONNECTICUT LIGHT AND POWER CO.

Purchase Agreement

AUGUST 5, 1976.

Take notice that on July 23, 1976, The Connecticut Light and Power Company (CL&P) tendered for filing a proposed Purchase Agreement with Respect to Various Gas Turbine Units (the "Unit Contract"), dated May 15, 1976 between (1) CL&P, The Hartford Electric Light Company (HELCO) and Western Massachusetts Electric Company (WMECO) and (2) Westfield Gas and Electric Department (Westfield).

CL&P states that the Unit Contract provides for a sale to Westfield of a specified percentage of capacity and energy from five gas turbine generating units (SL&P's Norwalk Harbor and Devon units and HELCO's South Meadow 10, Middletown and Torrington Terminal units) during the period from June 1, 1976 to October 31, 1977, and from two gas turbine generating units (WMECO's Doreen and Woodland Road units) during the period from November 1, 1977 to the termination of the Unit Contract, together with related transmission service.

Westfield's request to receive service under the Unit Contract is conditioned upon the Commission's permitting to become effective the following two contracts which have recently been entered into.

1. Resale Service Rate CD-1, Service Agreement between Western Massachusetts Electric Company and City of Westfield, Massachusetts (the "CD-1 Rate") dated as of June 1, 1976.

2. Purchase Agreement with Respect to Middletown Station (the "Purchase Agreement") dated as of June 1, 1976 by and among The Hartford Electric Light Company and Westfield Gas and Electric Department.

CL&P states that the capacity charge rate for the proposed service is a negotiated rate for the period from June 1, 1976 to October 31, 1977, and is a rate

determined on a cost-of-service basis for the period from November 1, 1977 to the termination date. The monthly transmission charge is equal to one-twelfth of the annual average unit cost of transmission service on the Northeast Utilities (NU) system determined in accordance with Section 13.9 of the New England Power Pool (NEPOOL) Agreement and the uniform rules adopted by the NEPOOL Executive Committee, multiplied by the number of kilowatts of winter capability which Westfield is entitled to receive. The variable maintenance charge was derived from historical costs and is comparable to the variable maintenance allowance used in New England Power Exchange ("NEPEX") computations.

CL&P states that copies of this rate schedule have been mailed or delivered to CL&P, Hartford, Connecticut, HELCO, Hartford, Connecticut, WMECO, West Springfield, Massachusetts and Westfield, Westfield, Massachusetts.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10).

All such petitions or protests should be filed on or before August 16, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 76-23372 Filed 8-10-76;8:45 am]

[Docket No. RP76-59]

EL PASO NATURAL GAS CO.

Order Denying Petition for Interlocutory Relief

AUGUST 4, 1976.

On June 21, 1976, Southwest Gas Corporation (Petitioner) filed a petition requesting the Commission to issue an order to condition El Paso Natural Gas Company's (El Paso) rates filed in this docket on January 30, 1976, so that if Petitioner's proposed rate design is ultimately determined to be just and reasonable, it would be applied as of August 1, 1976, the date the rates became effective subject to refund. The petition also requests that the Commission place the burden of proof on El Paso to justify its rate design. On July 7, 1976, El Paso filed an answer to the Petitioner's request. For the reasons discussed herein, we shall deny Petitioner's request.

On June 30, 1972, El Paso filed an application for a rate increase which was assigned Docket No. RP72-150. Subsequently, on January 15, 1973, Petitioner filed a complaint against El Paso, at Docket No. RP73-75, alleging that Petitioner was fully qualified to receive gas service pursuant to Rate Schedule G, and that El Paso's refusal to serve Petitioner under that schedule constituted discrimination against Petitioner. Such complaint was subsequently consolidated for disposition with the proceeding at Docket No. RP72-150.

As a result of our approval on February 14, 1974 (as subsequently confirmed on August 26, 1974) of a Settlement Agreement dated May 13, 1973, in Docket Nos. RP69-6, et al., all issues at Docket No. RP72-150, other than the rate design issues, were resolved. The Settlement Agreement reserved for trial in Docket No. RP72-150 the rate design issue raised by Petitioner, and this issue was subsequently consolidated with two additional El Paso rate proceedings, at Docket Nos. RP73-104 and RP74-57. These proceedings, together with El Paso's rate proceeding at Docket No. RP75-39, are currently the subject of settlement discussions between El Paso, the Commision Staff, El Paso's customers and various state commissions.

Petitioner states that it is actively participating in these settlement negotiations to achieve a settlement of the rate design issue that will control the rates that El Paso will place into effect, subject to refund, in this proceeding on August 1, 1976. Petitioner asserts that it has been unable to resolve the rate design issue in accordance with its interests and therefore requests the relief sought herein in order to protect its interests.

On July 7, 1976, El Paso filed a response to the petition, accompanied by a motion for its receipt. We will grant this motion and consider the response. In its answer, El Paso states that Petitioner's position "has no basis in law or Commission policy," and that the proponent of an issue must bear the burden of proof on that issue.[1] As to Petitioner's request to burden El Paso with the financial responsibility for any retroactive period in Docket No. RP76-59, El Paso noted that in Texas Eastern Transmission Corporation, Docket No. RP74-41, the Commission denied a similar request.

We note that the Petitioner is an intervenor in this proceeding and has participated in the settlement conferences held heretofore in relation to El Paso's previous rate filings. The Petitioner has all the rights attendant to its status as an intervenor herein including the right to participate in all settlement negotiations and to submit comments on a settlement agreement and to seek rehearing of the Commission's order on a proposed settlement, if one is filed. Moreover, in the event the rate design issue is reserved for hearing, the Petitioner may submit evidence and cross-examine on that issue and submit briefs prior to final Commission action. The issue cited by the Petitioner more properly should be raised and developed in the hearing established in this proceeding or resolved by the parties through settlement negotiations. Accordingly, the Commission will deny the subject petition. This action is without prejudice to any action the Commission may take upon receipt of a settlement record or a formal hearing record.

The Commission finds: Good cause exists to deny the petition filed on June 21, 1976 by the Southwest Gas Corporation.

The Commission orders: (A) The petition filed on June 21, 1976, by the Southwest Gas Corporation in Docket No. RP76-59 is hereby denied.

(B) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-23358 Filed 8-10-76;8:45 am]

[Docket No. RI76-126]

ENERGY DEVELOPMENT CORP.

Order Setting Matter for Hearing Establishing Procedures and Granting Intervention

AUGUST 4, 1976.

On May 19, 1976, Energy Development Corporation (EDC) filed in Docket No. RI76-126 a petition for special relief seeking a rate higher than the applicable area rate ceiling for sales of natural gas to Consolidated Gas Supply Corporation (Consolidated) from the Sandy River District, Iaeger E. C. Quadrangle, McDowell County, West Virginia.

EDC was issued a small producer certificate in Docket No. CS76-765. The currently effective contract between EDC and Consolidated provides for EDC to collect a price of $1.00 per Mcf, or the national rate, as adjusted, whichever is higher. Presently, there exists a contractual dispute between EDC and Consolidated as to whether an alleged contract amendment allows EDC a rate in excess of the original contract price. If Consolidated is correct in its interpretation of the contract dispute, then EDC's request for special relief must rely upon the Commission's authority under the Sierra-Doctrine[1] to sanction a rate in excess of a contract, if the contract rate can be shown to be so low as to adversely affect the public interest.

Pursuant to The Commission's general rules § 2.56 A(g) EDC seeks a price of $3.78 per Mcf to permit the recovery of its expenses for drilling, refracing, and operating its well No. Mcd-653. EDC based its need for the $3.78 per Mcf rate on the high drilling and completion costs incurred and a low recoverable reserve estimate of 75,000 Mcf.

EDC's petition was noticed on June 8, 1976. On June 14, 1976, the Public Service

[1] Michigan Wisconsin Pipeline Company, 34 FPC 621 (1965); Louisiana Pipe Line Company v. FPC, 344 F.2d 525 (U.S. App. D.C. 1965).

V 41 N 156 AUG 11 76 UMI

Commission Of The State Of New York (PSCNY) filed a Notice of Intervention Requesting A Formal Hearing On The EDC Petition. On June 28, 1976, Consolidated filed a timely petition to intervene requesting that a formal hearing be held.

In light of the factual and legal issues raised by EDC's application, this proceeding should be set for hearing in order to provide EDC and other interested parties an opportunity to present evidence on the issues raised and on any other matters considered to be relevant to the proceeding.

The Commission finds: (1) It is necessary and in the public interest that the above-docketed proceeding be set for hearing.

(2) Good cause exists to grant Consolidated's petition to intervene.

(3) Pursuant to the provisions of § 1.8 (a) (1) of the Commission's rules of practice and procedure, PSCNY is entitled to intervene.

The Commission orders: (A) Pursuant to the authority of the Natural Gas Act, particularly sections 4, 5, 7, 14 and 16 thereof, the Commission's rules of practice and procedure, and the Regulations under the Natural Gas Act (18 CFR Chapter 1), a public hearing shall be held in a hearing room of the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, to resolve the issues raised by EDC's petition.

(B) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (See Delegation of Authority, 18 CFR 3.5 (d)) shall preside at the hearing in this proceeding, with authority to establish and change all procedural dates, and to rule on all motions (with the sole exception of petitions to intervene, motions to consolidate and sever, and motions to dismiss, as provided for in the Rules of Practice and Procedure).

(C) EDC and all intervenors supporting EDC shall file their direct testimony and evidence on or before August 20, 1976. All testimony and evidence shall be served upon the Presiding Administrative Law Judge, the Commission Staff, and all parties to this proceeding.

(D) The Presiding Administrative Law Judge shall preside at a pre-hearing conference to be held on September 2, 1976, at 9:30 a.m. e.s.t., in a hearing room at the address noted in Ordering Paragraph (A).

(E) Consolidated is permitted to intervene in the above-entitled proceeding, subject to the rules and regulations of the Commission; Provided, however, That its participation shall be limited to matters affecting asserted rights and interests specifically set forth in its petition for leave to intervene; and Provided, further, That the admission of Consolidated in the manner provided shall not be construed as recognition by the Commission that it might be aggrived because of any order or orders entered in this proceeding, and that it agrees to accept the record as it now stands.

(F) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. E-9446]

GREEN MOUNTAIN POWER CORP.

Filing of Revised Sheets

AUGUST 5, 1976.

Take notice that on July 30, 1976, Green Mountain Power Corporation (Green Mountain) tendered for filing modified copies of Third Revised Sheet Nos. 7 and 9 and Statement O—Fuel Cost Adjustment, pages 1 and 2.

Green Mountain states that by motion filed June 8, 1976, Green Mountain requested Commission approval of a settlement agreement among Green Mountain, the Commission Staff, and all intervenors, in resolution of all issues in the captioned proceeding. That settlement agreement provided. inter alia, for certain revisions to Third Revised Sheet 5 through 9 of Green Mountain's FPC Electric Tariff Original Volume 1, to become effective as of September 16, 1975, and to Green Mountain's Statement O—Fuel Cost Adjustment. Information showing the derivation of the revised rates was included in Green Mountain's motion.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedue. All such petitions or protests should be filed on or before August 16, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-23373 Filed 8-10-76;8:45 am]

[Project Nos. 2756 and 2764]

GREEN MOUNTAIN POWER CORP.

Extension of Time

AUGUST 4, 1976.

On July 27, 1976, the Green Mountain Power Corporation, Vermont, filed a motion to extend the time, fixed by notices of applications for preliminary permits issued April 2, 1976 and March 31, 1976, within which a party may file a protest or petition to intervene in the above-designated proceeding. The motion states that the City of Burlington concurs in the request.

Upon consideration, notice is hereby given that the time to file a protest or petition to intervene in these proceedings is extended to and including October 1, 1976.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-23360 Filed 8-10-76;8:45 am]

[Docket No. ER76-792]

INDIANA & MICHIGAN ELECTRIC CO.

Filing

AUGUST 4, 1976.

Take notice that Indiana & Michigan Electric Company ("I&M") on July 16, 1976 tendered for filing an unsigned agreement with the City of Mishawaka, Indiana ("Mishawaka"), pursuant to the Company's filed FPC Electric Tariff WS, as amended, and filed with the Commission, as amended, on May 28, 1976.

I&M states that the reason for the proposed changes is to place Mishawaka on Tariff WS upon the termination on September 23, 1976 of the existing agreement with Mishawaka. I&M requests an effective date for the filing so made of September 24, 1976.

I&M states that copies of the filing were served upon the City of Mishawaka and upon the Public Service Commission of Indiana.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedures (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 13, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-23362 Filed 8-10-76;8:45 am]

[Docket No. ER76-813]

JERSEY CENTRAL POWER & LIGHT CO.

Rate Change

AUGUST 4, 1976.

Take notice that on July 27, 1976 Jersey Central Power & Light Company (Jersey Central) tendered for filing increased tariff rates for all-requirements service to Allegheny Electric Cooperative Inc., and to the Boroughs of Butler Lavallette, Madison, Pemberton and Seaside Heights, New Jersey. Jersey Central states that the increase amounts

to $1,201,462, or 18 percent, based on calendar year 1976. The reason for the increase, according to Jersey Central, is increased costs since the 1972 test year underlying the present rates. The proposed effective date is August 27, 1976.

Jersey Central states that the demand charge would be increased from $3.18 to $3.45 per kw, the energy charge from 9.0 mills to 2.0 cents per kwh, and the untransformed service credit from 28 to 29 cents per kw.

Jersey Central also proposes to "phase in" an increase in the base cost of its fuel adjustment clause to the calendar year 1975 level. The purpose of this procedure, according to Jersey Central, is to recover unbilled fuel costs under the presently effective fuel adjustment clause that would not otherwise be recoverable.

Jersey Central proposes, in addition, (1) to increase the notice period for termination of service from one to three years (2) to lengthen the period of payment of bills from 10 to 30 days and to add a late payment charge of two percent per month and (3) to eliminate a discount for customers not subject to New Jersey Public Utility Gross Receipts and Franchise Taxes since all customers are presently exempt from such taxes and they have not been reflected in the cost of service study underlying the proposed rates. Jersey Central proposes to substitute a surcharge for recovery of the taxes in the event they are reimposed on the customers.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 18, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. RI76-139, etc.]

JURISDICTIONAL SALES OF NATURAL GAS

Order Providing for Hearing on and Suspension of Proposed Changes in Rates, and Allowing Rate Changes To Become Effective Subject to Refund [1]

AUGUST 4, 1976.

Respondents have filed proposed changes in rates and charges for jurisdictional sales of natural gas, as set forth in Appendix "A" hereof.

The proposed changed rates and charges may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon hearings regarding the lawfulness of the proposed changes, and that the supplements herein be suspended and their use be deferred as ordered below.

The Commission orders: (A) Under the Natural Gas Act, particularly sections 4 and 15, the regulations pertaining thereto (18, CFR, Chapter I), and the Commission's rules of practice and procedure, public hearings shall be held concerning the lawfulness of the proposed changes.

(B) Pending hearings and decisions thereon, the rate supplements herein are suspended and their use deferred until date shown in the "Date Suspended Until" column. Each of these supplements shall become effective, subject to refund, as of the expiration of the suspension period without any further action by the Respondent or by the Commission. Each Respondent shall comply with the refunding procedure required by the Natural Gas Act and § 154.102 of the regulations thereunder.

(C) Unless otherwise ordered by the Commission, neither the suspended supplements, nor the rate schedules sought to be altered, shall be changed until disposition of these proceedings or expiration of the suspension period, whichever is earlier.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[1] Does not consolidate for hearing or dispose of the several matters herein.

[5] The pressure base if 14.65 lb/in²a.

V 41 1 15 6 AUG 11 76 UMI

As indicated in the tabulation the proposed increased rates reflecting the minimum rate established in Opinion No. 749 are accepted. The remaining proposed rate increases are to the rate ceilings established in Opinion No. 749 as of January 1 and July 1, 1976. They are suspended for one day from the proposed effective date pending resolution of the contract issue. The contractual dispute exists between the producers and the buyer over the right of the producers to request redetermination of the contract rate at this time. Dorchester and Helmerich & Payne have indicated that they intend to seek resolution of the contractual dispute in court litigation, and Helmerich & Payne has requested that this matter not be set for formal hearing pending such court litigation.

[Docket No. ER76-810]

KENTUCKY UTILITIES CO.

Rate Change

AUGUST 5, 1976.

Take notice that on July 23, 1976, the Kentucky Utilities Company (K.U. Co.) tendered for filing a change in its Rate Schedule FPC No. 67 which is for service to Berea College.

K.U. Co. states that the proposed Contract provides for delivery at 69,000 volts, billing on Rate Schedule WPS-73 among other things.

Included with the K.U. Co. filing was a Certificate of Concurrence executed by Berea College.

The Company in its filing requested waiver of prior notice requirement under Section 35.11 which will allow earlier implementation of service arrangements under the contract, thereby relieving overloaded facilities.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol, Street, NE., Washington, DC 20426, in accordance with § 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not service to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP76-50]

MICHIGAN WISCONSIN PIPE LINE CO.

Order Granting Motion, Convening a Hearing for the Submission of a Stipulation and Agreement and Evidence Related Thereto and Establishing Procedures

AUGUST 4, 1976.

On December 29, 1975, Michigan-Wisconsin Pipe Line Company (Mich-Wisc) tendered for filing, in Docket No. RP76-50, seven tariff sheets[1] setting forth its proposed curtailment plan to be effective February 1, 1976. Mich-Wisc's filing was made pursuant to the requirement of the Commission order issued October 14, 1975, in Docket No. CP74-157. Notice of the filing was given on January 14, 1976 and protests or petitions to intervene were due on or before January 21, 1976.

By Commission order of January 30, 1976 the tariff sheets referred to above were accepted for filing, suspended and the use thereof deferred until February 2, 1976, and until such further time as they are made effective in the manner prescribed by the Natural Gas Act. On February 10, 1976 Mich-Wisc filed a motion placing the subject tariff sheets into effect.

In response to a request by Mich-Wisc the Commission gave notice on March 30, 1976, that the Staff would preside at a conference of all interested parties on April 13, 1976. At the April 13, 1976 conference certain modifications to the proposed plan were suggested by Staff and the customers.

By motion filed July 2, 1976 Mich-Wisc requests we convene a hearing for the submission of a stipulation and agreement and evidence related thereto. Mich-Wisc states the stipulation and agreement incorporates the modifications suggested at the April 13, 1976 conference. Mich-Wisc further proposes to introduce, at the hearing hereinafter ordered, the final report of the Data Verification Committee, together with explanatory and supporting data.

The Commission finds: Good cause exists for granting Mich-Wisc's motion and convening a hearing for the purposes outlined in the motion and establishing procedures for the hearing as hereinafter ordered.

The Commission orders: (A) The motion filed by Mich-Wisc on July 2, 1976 is granted.

(B) On or before August 6, 1976, Mich-Wisc shall file with the Secretary of this Commission and serve all testimony and exhibits supporting the Stipulation and Agreement upon all parties to this proceeding including the Commission Staff.

(C) Pursuant to the authority of the Natural Gas Act particularly sections 7 and 15 thereof, of the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR, Chapter 1), a public hearing will be held in a hearing room of the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426 at 10 a.m. on August 17, 1976 commencing with a prehearing conference concerning the matters involved in and the issues presented by this application.

(D) An Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (See delegation of authority, 18 CFR 3.5(d)) shall preside at the hearing in this proceeding, with authority to establish and change all procedural dates, and to rule on all motions (with the sole exception of petitions to intervene, motions to consolidate and sever, and motions to dismiss, as provided for in the rules of practice and procedure.)

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-23364 Filed 8-10-76;8:45 am]

[1] The tariff sheets are designated as Second Revised Sheet No. 26 and Original Sheet Nos. 26A, 26B, 26C, 26D, 26E and 26F to Mich-Wisc's FPC Gas Tariff, Second Revised Volume No. 1.

[Docket No. RP71-16 (PGA 76-5)]

MIDWESTERN GAS TRANSMISSION CO.

Proposed Northern System PGA Rate Adjustment

AUGUST 4, 1976.

Take notice that on July 9, 1976, Midwestern Gas Transmission Company (Midwestern) tendered for filing Substitute Fifteenth Revised Sheet No. 5 in Third Revised Volume No. 1 of its FPC Gas Tariff, to be effective on September 10, 1976.

Midwestern states that the sole purpose of the revised tariff sheet is to reflect a PGA rate adjustment for its Northern System. Midwestern states that the PGA rate increase reflected on Substitute Fifteenth Revised Sheet No. 5 is based upon an increase, effective September 10, 1976, in the price which Midwestern is required to pay for gas to its Northern System supplier, Trans-Canada Pipe-Lines Limited (Trans-Canada).

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 12, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH E. PLUMB,
Secretary.

[FR Doc.76-23365 Filed 8-10-76;8:45 am]

[Docket No. CP74-187]

MONTANA POWER CO.

Petition To Amend

AUGUST 5, 1976.

Take notice that on July 19, 1976, The Montana Power Company (Petitioner), 40 East Broadway, Butte, Montana 59701, filed in Docket No. CP74-187 a petition to amend further the Commission's order, issued March 21, 1975, in said docket, as amended, pursuant to

section 3 of the Natural Gas Act by authorizing an increase in the annual volumes of natural gas which Petitioner can import from Canada into the United States at a border point near Aden, Alberta, Canada from 10,000,000 Mcf to 19,892,000 Mcf, effective November 1, 1976, as such volume is set forth in amendments to Canadian-Montana Pipeline Company's (Pipeline Company) export licenses issued by the National Energy Board of Canada (NEB), all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner states that on April 29, 1976, the NEB issued orders authorizing Pipeline Company to export at Aden, Alberta, an additional quantity of gas to be purchased by Petitioner not to exceed 99,460 Mcf per day or 19,892,000 Mcf in any consecutive 12-month period commencing with November 1, 1976. Petitioner further states that it is currently authorized in the subject docket to import up to 99,460 Mcf of gas per day only 10,000,000 Mcf in any 12-month period at Aden. Petioner asserts that it imports from Canada more than 70 percent of the natural gas supply necessary to serve its market and that the ability of Petitioner to meet its market requirements and avoid curtailment of service directly depends on continued importation of natural gas under the authorization granted in the subject docket.

Any person desiring to be heard or to make any protests with reference to said petition to amend should on or before August 23, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rule of practice and procedure (18 CFR 1.8 or 1.10).

All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH E. PLUMB,
Secretary.

[FR Doc.76-23375 Filed 8-10-76;8:45 am]

[Docket No. CP76-448]

NATIONAL FUEL GAS DISTRIBUTION CORP.

Application

AUGUST 5, 1976.

Take notice that on July 19, 1976,[1] National Fuel Gas Distribution Corporation (Applicant), 10 Lafayette Square, Buffalo, New York 14203, filed in Docket No. CP76-448 an application pursuant to section 1(c) of the Natural Gas Act for exemption from the provisions of the Natural Gas Act and the regulations of the Commission pertaining thereto, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it sells natural gas to retail customers within the States of New York and Ohio and the Commonwealth of Pennsylvania and that all gas is purchased from its affiliate National Fuel Gas Supply Corporation at numerous delivery points in New York, Pennsylvania, and Ohio. Applicant further states that its New York division distributes gas in eleven counties within the western part of New York and that its Pennsylvania-Ohio division distributes gas in fourteen counties within the western portion of Pennsylvania and the two counties within Ohio adjacent to the Ohio-Pennsylvania border. It is indicated that all gas received by Applicant from out-of-state sources is consumed within the same state, except a de minimis amount of gas involved in that small portion of Applicant's distribution area which straddles the Pennsylvania-Ohio state line at Sharon, Pennsylvania, and Sharon, Ohio, and that the gas involved in these sales flows through Applicant's facilities in Sharon, Pennsylvania, and then continues across the Pennsylvania-Ohio state line for ultimate sale to Applicant's customers in Sharon, Ohio.

It is asserted that New York, Pennsylvania, and Ohio acting by and through their respective Public Service Commissions exercise jurisdiction over the rates (including rates for sales for resale), service and facilities of Applicant in those respective states.

Accordingly, Applicant requests exemption from Commission jurisdiction pursuant to section 1(c) of the Natural Gas Act since all gas received by it from out of state sources is sold in the state in which received, with the possible exception of considerably less than one percent of Applicant's total sales. Applicant states this amount represents local sales made in a bi-state municipality which are both incidental to Applicant's otherwise exclusively intrastate distribution function and deminimis in relation to Applicant's total sales volumes.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 24, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-811]

PACIFIC GAS AND ELECTRIC CO.

Proposed Changes in Rates and Charges

AUGUST 4, 1976.

Take notice that on July 26, 1976, Pacific Gas and Electric Company (PGandE) tendered for filing a notice of change in rates and charges of certain electric resale rate schedules under its FPC Electric Tariffs, Original Volumes Nos. 1 and 2. Based upon test period (calendar year 1976) conditions, PGandE estimates the change in rates would increase annual revenues from jurisdictional sales and services by approximately $6,388,000. Based on revenues for the period August, 1976 to July, 1977 the new rates will result in an average increase of 12.3%. The proposed effective date for the increased rates is August 25, 1976.

Copies of the filing were served upon PGandE's jurisdictional customers, the California Public Utilities Commission and the Public Service Commission of Nevada.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, Washington, D.C., 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 16, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CI76-268]

PHILLIPS PETROLEUM CO.

Notice Cancelling Hearing

AUGUST 4, 1976.

Take notice that the hearing scheduled in the above-docketed proceeding at 10 a.m., Thursday, August 19, 1976, is hereby cancelled, inasmuch as Phillips Petroleum Company has amended the subject application and no longer requests a limited-term certificate.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-23367 Filed 8-10-76;8:45 am]

[1] The application was tendered for filing July 19, 1976; however, the fee required by § 159.1 of the regulations under the Natural Gas Act (18 CFR 159.1) was not paid until July 30, 1976. Thus, filing was not completed until the latter date.

V 41 156 AUG 11 76 UMI

[Docket No. ER76-809]

PUBLIC SERVICE COMPANY OF COLORADO

Filing of Initial Rate Schedule

AUGUST 4, 1976.

Take notice that Public Service Company of Colorado (PSCo) on July 23, 1976 tendered for filing as an initial rate schedule a contract for facilities, interconnections and transmission service between the United States Department of Interior Bureau of Reclamation Colorado River Storage Project, Fryingpan-Arkansas Project and Pick-Sloan Missouri Basin Program (USBR) and PSCo.

The Agreement provides for the accepting and transmitting of power and energy by each party for delivery on the system of the other party. Included in the Agreement is the establishment of the necessary facilities for the transmission of the power and energy.

PSCo states that copies of the filing were served upon all parties and affected state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such protests or petitions should be filed on or before August 13, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-814]

PUBLIC SERVICE ELECTRIC AND GAS CO.

Tariff Change

AUGUST 4. 1976.

Take notice that Public Service Electric and Gas Company of New Jersey (Public Service), on July 28, 1976, tendered for filing proposed changes in its FPC Electric Service Tariffs Nos. 53 and 54. The proposed changes would increase revenues from jurisdictional sales and service by $76,797 based on the twelve month period ending December 31, 1975. In addition, the proposed filing also slightly modified Public Service Electric and Gas Company's existing fuel adjustment clauses in the above tariffs to conform to § 35.14 of the Commission's regulations.

Public Service proposes an effective date of August 28, 1976. Public Service states that despite all efforts by it to combat increased costs, the continuing inflationary trend has affected practically all its operations. Due to these increased costs, Public Service states that it is becoming increasingly difficult for it to provide adequate and reliable service for the growing needs of its customers. The Company also contends that the rate increases are necessary to assure continued confidence in its financial integrity to provide earnings which will attract additional capital at reasonable cost to enable the Company to finance its electrical construction program.

Copies of the filing were served upon the public utility's jurisdictional customers, the Boroughs of Milltown and South River, and the New Jersey Board of Public Utility Commissioners.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 16, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-812]

SOUTHERN CALIFORNIA EDISON CO.

Filing of Initial Rate Schedule and Request for Waiver

AUGUST 5, 1976.

Take notice that on July 26, 1976, Southern California Edison Company (Edison) tendered for filing a September 26, 1976, Agreement with Valley Electric Association Inc. (Valley) representing a change in provisions of Rate Schedule FPC No. 44 whereby Edison serves an isolated load of Valley in exchange for Valley's serving four isolated loads of Edison. Under the new agreement Edison will make up for deficiencies in Valley's ability to continuously serve the Edison loads by scheduling energy to Valley over USBR owned transmission lines. The Edison supplied energy will be credited back to Edison at the time bills are rendered.

Edison states that the arrangement has been in effect on the basis of oral agreements since July of 1975 and that the energy and capacity so scheduled are necessary for continuous service to its isolated customers. For that reason Edison requests that the notice provisions of the Commision's regulations be waived and the filing be permitted to become effective as of July 1, 1975.

Copies of this filing were served upon Valley Electric and the Public Utilities Commission of the State of California.

Any person desiring to be heard or to protest this application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 16, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RI76-138]

SOUTHERN UNION SUPPLY CO.

Petition for Special Relief

AUGUST 4, 1976.

Take notice that on July 21, 1976, Southern Union Supply Company (Petition), First International Building Dallas, Texas 75270, filed in Docket No. RI76-138 a petition for special relief from the base national rate as adjusted pursuant to § 2.56a(g) of the Commission's general policy and interpretations and § 1.7(b) of the Commission's rules of practice and procedure. Petitioner seeks a rate of approximately $1.13 and 86 cents per Mcf respectively for the sale of natural gas to its parent, Southern Union Company,[1] and El Paso Natural Gas Company [1] from No. 2 Gallagher State Well, Lea County, New Mexico. Petitioner's request includes a raw gas volume shrinkage factor of 20 percent in connection with the gathering, compression, and cleaning of such gas by Phillips Petroleum Company in addition to liquids extracted under contract dated April 30, 1976, performed prior to delivery to El Paso Natural Gas Company [1] for transportation to various points in Arizona, New Mexico and Texas where such gas will be delivered by Petitioner to its parent, Southern Union Company.

Petitioner further requests that the intermediate procedure be omitted and waives oral hearing and opportunity for filing exceptions. Petitioner further requests that a shortened notice period be provided.

Any persons desiring to be heard or to make any protest with reference to said petition should on or before August 20,

[1] Presently pending is Southern Union Supply Company's requested temporary authorizations based upon emergency conditions for sale of natural gas to its parent, Southern Union Company, under contract dated April 13, 1976 (Docket No. CI76-578) an to El Paso Natural Gas Company under contract dated April 30, 1976 (Docket No. CI76-579). Also, pending is El Paso Natural Gas Company certificate request for transportation and delivery of such natural gas under contract dated April 13, 1976 (Docket No. CI76-410).

1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with Commission's rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-805]

WESTERN MASSACHUSETTS ELECTRIC CO.

Rate Schedule Filing

AUGUST 5, 1976.

Take notice that Western Massachusetts Electric Company (the "Company") on July 23, 1976, tendered for filing a proposed rate schedule governing firm electric service to the City of Westfield, Massachusetts. The proposed rate schedule is a contract demand form of rate, which rate form was agreed upon by the Company, the City of Westfield, and certain other of the Company's wholesale customers as part of the settlement approved by this Commission in Docket No. E-8798.

The Company states that the demand and energy charges in the proposed rate schedule have been designed to achieve the revenue levels found acceptable by this Commission in the settlement of Docket No. E-8798 and no revenue increase is being sought.

The Company proposed a June 1, 1976 effective date for the proposed rate schedule and states that the City of Westfield supports the waiver of the Commission's notice requirements to permit such effective date.

Copies of the filing were served upon the City of Westfield, Massachusetts and the Commonwealth of Massachusetts Department of Public Utilities.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 16, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP72-41; (PGA76-1)]

WESTERN TRANSMISSION CORP.

Proposed Change in Rates Under Purchased Gas Cost Adjustment Clause

AUGUST 5, 1976.

Take notice that Western Transmission Corporation (Western), on July 27, 1976, tendered for filing proposed changes in its FPC Gas Tariff, Original Volume No. 1. Western states that the proposed changes would increase the monthly charges for purchased gas to Colorado Interstate Gas Company, Western's sole jurisdictional customer, pursuant to the provisions of Section 18 of Western's FPC Gas Tariff. Original Volume No. 1.

Western's filing is proposed to become effective on September 1, 1976. This increase will compensate Western for increases in its current cost of purchased gas, the Company states.

Copies of this filing have been served upon Colorado Interstate Gas Company, Western states.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

FEDERAL TRADE COMMISSION

PRIVACY ACT OF 1974

Corrected Notices of Systems of Records

On July 21, 1976, the Commission published certain additions and modifications to its Privacy Act systems of records (41 FR 30087). The following systems were erroneously set out under the heading of "Additions of Systems of Records": FTC-7, Congressionag Correspondence, Office of General Counsel; FTC-28, Investigational, Legal, and Public Records; FTC-33, Preliminary Investigation Files; and FTC-39, Staff Advisory Opinion Records. These are not additional systems; rather they are systems to which modifications have been made, and should have been so listed at 41 FR 30092.

JAMES A. TOBIN,
Acting Secretary.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-27]

CHICORY ROOT—CRUDE AND PREPARED

Memorandum Opinion

PROCEDURAL BACKGROUND

On August 2, 1976, the presiding officer certified to the Commission two motions filed on July 27, 1976, by intervenor parties Wm. B. Reily & Co., Inc., Community Coffee Co., Inc., and American Coffee Co., Inc., that hearings in the above matter be transferred from Washington, D.C., to New Orleans, Louisiana (M 27-2), and that the temporary relief hearing scheduled for August 11, 1976, be continued (M 27-5). On July 29, 1976, the Commission received a submission from complainant opposing a continuation. Notice of the Commission's ordering of the investigation and of the scheduling of the temporary relief hearing, to begin in Washington on August 11, 1976, was published in the FEDERAL REGISTER of July 16, 1976 (41 FR 29496).

ORDER

(1) The motion of intervenor parties Wm. B. Reily & Co., Inc., Community Coffee Co., Inc., and American Coffee Co., Inc. (M 27-2), to transfer all hearings in this proceeding from Washington, D.C., to New Orleans, Louisiana, is denied.

(2) The motion of intervenor parties Wm. B. Reily & Co., Inc., Community Coffee Co., Inc., and American Coffee Co., Inc. (M 27-5), that the hearing set for August 11, 1976, be continued is denied.

OPINION

The Commission considers that requests for temporary relief under section 337 should be acted upon expeditiously. The Commission on July 8, 1976, ordered the present expedited schedule. Intervenor parties Wm. B. Reily & Co., Inc., Community Coffee Co., Inc., and American Coffee Co., Inc., in our judgment, have failed to show good cause why the noticed place of hearings and time of this hearing should be changed, and the Commission accordingly denies their motions.

By order of the Commission.

Issued: August 5, 1976.

KENNETH R. MASON,
Secretary.

V 41 N 156 AUG 11 76 UMI

[Preliminary Investigation No. 603-TA-1]

TELEVISION RECEIVERS FROM JAPAN

Commission Memorandum Opinion

PROCEDURAL BACKGROUND

The Commission instituted this preliminary investigation on March 26, 1976, pursuant to section 603 of the Trade Act of 1974 (19 U.S.C. 2482), to determine whether to institute an investigation under section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337). A Notice of Preliminary Investigation was published in the FEDERAL REGISTER on April 8, 1976 (41 F.R. 14949). During the course of the preliminary investigation, the Commission recevied petitions [1] to quash various questionnaires sent by the investigative staff to petitioners.

ORDER

On July 16, 1976, the Commission denied the petitions to quash questionnaires, and also denied the request for oral argument.[2]

OPINION

The Commission, after considering the motions, has determined that the motions and requests for oral argument be denied because the Commission construes the questionnaires to be voluntary rather than mandatory. The Commission has directed its investigative staff to confer with the Matsushita companies and RCA Corporation to review the extent to which these companies are reasonably able and willing to supply, on a voluntary basis, information which is relevant to the preliminary investigation. The Commission wishes to encourage voluntary cooperation of the aforesaid concerns in order to assist the Commission in determining whether facts exist which would warrant the institution of an investigation under section 337 of the Tariff Act of 1930.

The Commission may seek the use of compulsory process in the event that resort to such process is reasonable and justifiable as provided under Commission rules.

Issued: August 6, 1976.

By Order of the Commission:

KENNETH R. MASON,
Secretary.

[FR Doc.76-23414 Filed 8-10-76;8:45 am]

[1] On June 30, 1976, the Commission received a "Petition of Matsushita Electric Industrial Co., Ltd., Matsushita Electric Trading Co., Ltd., Matsushita Electronics Corporation and Matsushita Electric Corporation of America to Quash Questionnaires of Investigative Staff of the United States International Trade Commission and Accompanying Request for Production of Documents." This petition was docketed by the Office of the Secretary as motion docket No. 603-TA-1-2. Also on June 30, 1976, the Commission received a "Petition by RCA Corporation to Quash Questionnaire and Request for the Production of Documents." This petition was docketed by the Office of the Secretary as motion docket No. 603-TA-1-3. On July 6, 1976, the Commission received from counsel for the Matsushita companies a request for oral argument in connection with their petition of June 30, 1976. This request for oral argument was docketed by the Office of the Secretary as motion docket No. 603-TA-1-4.

[2] Commissioner Abbondi did not participate in the Commission action.

INTERSTATE COMMERCE COMMISSION

[Notice No. 114]

ASSIGNMENT OF HEARINGS

AUGUST 6, 1976.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 115841 (Sub-No. 506), Colonial Refrigerated Transportation, Inc., now assigned September 13, 1976 at Washington, D.C., has been postponed indefinitely.

MC 82841 (Sub-No. 173), Hunt Transportation, Inc., now being assigned September 9, 1976 (2 days), at Denver, Colorado, in U.S. Court of Appeals Division 2, 4th Floor, Federal Courthouse, 1961 Stout Street.

MC 134323 Sub 80, Jay Lines, Inc., now being assigned for continued hearing, September 30, 1976, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 110328 (Sub-No. 11), Roy A. Leiphart Trucking, Inc., now assigned October 14, 1976, at Washington, D.C. is canceled and application dismissed.

MC 99952 (Sub-No. 2), Eagle Truck Lines, Inc., now assigned August 30, 1976, at Los Angeles, Calif. is canceled and application dismissed.

MC 58923 (Sub-Nos. 33 and 42), Georgia Highway Express, Inc. now being assigned November 8, 1976 (1 week), at Tallahasse, Florida in a hearing room to be later designated.

MC 113678 (Sub-No. 557), Curtis, Inc., Extension, now assigned September 8, 1976 at Denver, Colorado; will be held in the U.S. Court of Appeals, Division 2, 4th Floor Federal Courthouse, 1961 Stout Street.

MC 141966, Gina Marie Express Co., now assigned September 13, 1976 at Denver, Colorado; will be held in the U.S. Court of Appeals, Division 2, 4th Floor Federal Courthouse, 1961 Stout Street.

MC 124692 (Sub-No. 164), Sammons Trucking, now assigned September 14, 1976 at Denver, Colorado; will be held in the U.S. Court of Appeals, Division 2, 4th Floor Federal Courthouse, 1961 Stout Street.

MC 139468 (Sub-No. 15), International Contract Carriers, Inc., now assigned September 16, 1976 at Denver, Colorado; will be held in the U.S. Court of Appeals, Division 2, 4th Floor Federal Courthouse, 1961 Stout Street.

MC-F-12725, Best Refrigerated Express, Inc.—Investigation of Control—Scott Truck Line, Inc., and MC-F-12795, Best Refrigerated Express, Inc.—Control—Scott Truck Line, Inc., now assigned September 20, 1976 at Omaha, Nebraska; will be held in Room 616 Union Pacific Plaza, 110 North 14th Street, 14th & Dodge.

ROBERT L. OSWALD,
